

Templeton Emerging Markets Income Fund

TEI
June 30, 2017

Closed-End Fund Fact Sheet

Fund Description

The fund seeks high, current income, with a secondary goal of capital appreciation, by investing under normal market conditions, at least 80% of its net assets in income-producing securities of sovereign or sovereign-related entities and private sector companies in emerging market countries.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please visit franklintempleton.com for the most recent month-end performance.

The fund has a fee waiver associated with any investment it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through December 31, 2017. Fund investment results reflect the fee waiver; without this waiver, the results would have been lower.

Portfolio Characteristics

Average Duration	1.56 Years
Average Weighted Maturity	5.94 Years
Yield to Maturity	8.79%

Unlike open-end funds (mutual funds), closed-end funds are not continuously offered. Closed-end funds trade on the secondary market through a national stock exchange at a price which may be above (a premium), but is often below (a discount to) the net asset value (NAV) of the fund's portfolio.

What Are the Risks

All investments involve risks, including possible loss of principal. Changes in interest rates will affect the value of the fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments of countries where the fund invests. The fund's investments in emerging market countries are subject to all of the risks of foreign investing generally, and have additional heightened risks due to these markets' smaller size and lesser liquidity and lack of established legal, political, business and social frameworks to support securities markets, including: delays in settling portfolio securities transactions; currency and capital controls; greater sensitivity to interest rate changes; pervasiveness of corruption and crime; currency exchange rate volatility; and inflation, deflation or currency devaluation. The markets for particular securities or types of securities are or may become relatively illiquid. Reduced liquidity will have an adverse impact on the security's value and on the fund's ability to sell such securities when necessary to meet the fund's liquidity needs or in response to a specific market event. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio that may result in significant volatility and cause the fund to participate in losses (as well as enable gains) on an amount that exceeds the fund's initial investment. The fund may not achieve the anticipated benefits and may realize losses when a counterparty fails to perform as promised. As a nondiversified investment company, the fund may invest in a relatively small number of issuers and, as a result, be subject to a greater risk of loss with respect to its portfolio securities. The fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

Glossary

Average Duration: A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years.

Average Weighted Maturity: An estimate of the number of years of maturity, taking the possibility of early payments into account, for the underlying holdings.

Yield to Maturity: Yield to Maturity (YTM) is the rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate. Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.

Important Information

The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the fund's portfolio. Index data is provided for comparison purposes only. The fund is not managed against an index.

Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Performance: Total return calculations represent the cumulative and the average annual changes in value of an investment over the periods indicated. YTD returns have not been annualized.

Fund returns at market price assumes reinvestment of distributions based on the dividend reinvestment and cash purchase plan.

Fund returns at NAV assumes reinvestment of distributions based on net asset value (net of fund expenses). See the fund's annual report for full information on expenses.

Composition of Fund: Currency allocation represent the net fund exposure and include certain derivatives held in the portfolio (or their underlying reference assets) or unsettled trades and may not total 100% or may be negative due to rounding, use of any derivatives or other factors. Information is historical and may not reflect current allocation.

The figures shown reflect certain derivatives held in the portfolio (or their underlying reference assets) and may not total 100% or may be negative due to rounding, use of derivatives, unsettled trades or other factors.
