You may request a copy of the Fund's current Report to Shareholders by contacting Franklin Templeton's Fund Information Department at 1-800/DIAL BEN® (1-800-342-5236) or by visiting franklintempleton.com. All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency volatility, economic instability, and social and political developments of countries where the Fund invests. Emerging markets are subject to all of the risks of foreign investing generally and involve heightened risks due to these markets' smaller size and lesser liquidity, and lack of established legal, political, business and social frameworks to support securities markets. Some of these heightened risks may include political and social uncertainty (for example, regional conflicts and risk of war); pervasiveness of corruption and crime in these countries' economic systems; delays in settling portfolio securities transactions; risk of loss arising out of the system of share registration and custody used in these countries; greater sensitivity to interest rate changes; currency and capital controls; currency exchange rate volatility; and inflation, deflation or currency devaluation. The Fund may invest a portion of its assets in Russian securities. The U.S. and other nations have imposed and could impose additional sanctions on certain issuers in Russia due to regional conflicts. These sanctions could result in the devaluation of Russia's currency, a downgrade in Russian issuers' credit ratings, or a decline in the value and liquidity of Russian stocks or other securities. The Fund may be prohibited from investing in securities issued by companies subject to such sanctions. In addition, if the Fund holds the securities of an issuer that is subject to such sanctions, an immediate freeze of that issuer's securities could result, impairing the ability of the Fund to buy, sell, receive or deliver those securities. There is also the risk that countermeasures could be taken by Russia's government, which could involve the seizure of the Fund's assets. Such sanctions could adversely affect Russia's economy, possibly forcing the economy into a recession. These risks could affect the value of the Fund's portfolio. The Fund is actively managed and investment allocations can be expected to change, but there is no guarantee that the manager's investment decisions will produce the desired results. The industry allocation uses MSCI's industry definitions for the convenience of comparison. The information provided is as of the date shown and comes from sources considered reliable, but the Fund makes no representation or warranty as to its completeness or accuracy.

* Equity includes convertible and preferred securities.

You may request a copy of the Fund's current Report to Shareholders by contacting Franklin Templeton's Fund Information Department at 1-800/DIAL BEN® (1-800-342-5236) or by visiting franklintempleton.com. All investments involve risks, including possible loss of principal. Changes in interest rates will affect the value of the Fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the Fund adjust to a rise in interest rates, the Fund's share price may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments of countries where the Fund invests. The Fund's investments in emerging market countries are subject to all of the risks of foreign investing generally, and have additional heightened risks due to these markets' smaller size and lesser liquidity and lack of established legal, political, business and social frameworks to support securities markets, including: delays in settling portfolio securities transactions; currency and capital controls; greater sensitivity to interest rate changes; pervasiveness of corruption and crime; currency exchange rate volatility; and inflation, deflation or currency devaluation. The markets for particular securities or types of securities are or may become relatively illiquid. Reduced liquidity will have an adverse impact on the security's value and on the Fund's ability to sell such securities when necessary to meet the Fund's liquidity needs or in response to a specific market event. The Fund's use of foreign currency techniques involves special risks as such techniques may not achieve the anticipated benefits and/or may result in losses to the Fund. Also, as a nondiversified investment company, the Fund may invest in a relatively small number of issuers and, as a result, be subject to a greater risk of loss with respect to its portfolio securities. The Fund is actively managed and investment allocations can be expected to change, but there is no guarantee that the manager's investment decisions will produce the desired results. The information provided is as of the date shown and comes from sources considered reliable, but the Fund makes no representation or warranty as to its completeness or accuracy. The weightings do not include the impact of currency forwards within the country weightings.
