High Yield
Fixed Income
September 30, 2018

Product Profile

Product Details¹

Fund Assets	\$6,422,762,908.10
Fund Inception Date	03/18/1986
Number of Securities Including Cash	669
NASDAQ Symbol	FHYVX
Maximum Sales Charge	0.00
Investment Style	High Yield
Benchmark	Bloomberg Barclays Municipal Bond Index
Lipper Classification	High Yield Municipal Debt Funds
Morningstar Category™	High Yield Muni
Dividend Frequency	Monthly, on or near the last business day

Asset Allocation^{2,3}

Percent of Total

Fund Description

The fund seeks to provide investors with a high current yield exempt from federal income taxes. Its secondary goal is capital appreciation to the extent possible and consistent with the fund's principal investment goal.⁵

Performance Data^{6,7}

Average Annual Total Returns⁸ (%)

	3 Mths	YTD	1 Yr	3 Yrs	5 Yrs	10 Yrs	20 Yrs	Since Inception (03/18/1986)
Advisor Class	0.53	1.38	1.79	2.85	4.62	5.56	4.43	6.04
Bloomberg Barclays Municipal Bond Index	-0.15	-0.40	0.35	2.24	3.54	4.75	4.50	5.87

Total Annual Operating Expenses: 0.55%

30-Day Standardized Yield⁹: 2.66%

Taxable Equivalent Yield: 4.49%

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment return and principal value will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton Investments at (800) DIAL BEN/342-5236 or visit franklintempleton.com for the most recent month-end performance.

Advisor Class shares are offered only to certain eligible investors as stated in the prospectus. They are offered without sales charges or Rule 12b-1 fees. The fund offers other share classes subject to different fees and expenses, which will affect their performance. Please see the prospectus for details.

Calendar Year Returns (%)

	2017	2016	2015	2014	2013	2012	2011	2010	2009	2008
Advisor Class	3.86	1.14	3.37	14.04	-6.71	11.26	12.55	2.90	27.80	-17.10

1. All holdings are subject to change.

2. Information is historical and may not reflect current or future portfolio characteristics. Percentage may not equal 100% due to rounding. All holdings are subject to change.

3,4. The negative cash position reflects a temporary position that is a result of a delay in securities settlement transactions.

7. Source for Index: FactSet. Indexes are unmanaged, and one cannot invest directly in an index. They do not reflect any fees, expenses or sales charges.

8. Periods shorter than one year are shown as cumulative total returns.

9. The fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

Not FDIC Insured | May Lose Value | No Bank Guarantee

Portfolio Manager Insight¹⁰

Performance Review

QUARTERLY KEY PERFORMANCE DRIVERS

HELPED	The fund's underweight to the intermediate portion of the yield curve (maturities five- to 10-years) contributed to relative performance.
	Our overweight allocation to pre-refunded securities also enhanced results.
	Relative returns were supported further by the fund's exposure to Puerto Rico Electric Power Authority bonds.
HURT	The fund's overweight to the longer end of the yield curve (maturities 20 years and longer) detracted from relative performance.
	Our overweight allocation to the health care and industrial revenue sectors also hampered results.
	—

Outlook & Strategy

- We continue to manage our funds with a focus on maximizing tax-free income for investors. Our strategy of maximizing tax-free income relies heavily upon our research capabilities and credit analysis.
- In general, the performance and volatility of the municipal bond market is typically driven by supply, demand, and interest rates. From a credit perspective there has been little change in underlying market fundamentals, in our view, as general creditworthiness and low default rates remain stable.
- As interest rates continue to rise, our strategies typically sell lower-yielding positions and replace them with higher-yielding securities. We may also have opportunities to sell higher-quality positions and buy bonds rated BBB and below if spreads widen or volatility increases. In both cases, we would expect an increase in portfolio turnover and higher distributions of tax-free income for shareholders.
- Regardless of the market environment, our long history of navigating the various cycles of the municipal market provides a steady source of tax-free income for our shareholders. As we continue to monitor the market, we seek to improve our income production and take advantage of market volatility, while maintaining our long-standing philosophy of investing conservatively in high-quality, diversified municipal bond portfolios.

10. The information provided is not a complete analysis of every material fact regarding any country, market, industry, security or fund. Because market and economic conditions are subject to change, comments, opinions and analyses are rendered as of the date of this material and may change without notice. A portfolio manager's assessment of a particular security, investment or strategy is not intended as individual investment advice or a recommendation or solicitation to buy, sell or hold any security or to adopt any investment strategy; it is intended only to provide insight into the fund's portfolio selection process. Holdings are subject to change.

Portfolio Characteristics^{11,12,13}

	Portfolio	Bloomberg Barclays Municipal Bond Index
Average Duration	5.36 Yrs	6.16 Yrs

Investment Philosophy**Focus on Income**

Franklin municipal managers aim to maximize monthly tax-free income for shareholders. Historically, the income return from municipal bonds has contributed much more to municipal bond returns than changes in municipal bond prices. Additionally, Franklin managers generally limit fund exposure to bonds with income that is subject to the Alternative Minimum Tax.

No Leverage, No Derivatives, No Options

Franklin managers avoid investment practices that may expose shareholder capital to unnecessary risk. For example, we don't use leverage or invest in derivatives or futures, because they can increase portfolio volatility.

19. Securities, except for those labeled Not Rated ("NR"), are assigned ratings by one or more Nationally Recognized Statistical Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch, that can be considered by the investment manager as part of its independent securities analysis. When ratings from multiple agencies are available, the highest is used, consistent with the portfolio investment process. Ratings reflect an NRSRO's opinion of an issuer's creditworthiness and typically range from AAA (highest) to D (lowest). The Refunded ("RF") category consists of refunded bonds secured by U.S. government or other high-quality securities and not rated by an NRSRO. The Not Rated category consists of ratable securities that have not been rated by an NRSRO. Cash includes equivalents, which may be rated. Information is historical and may not reflect current or future portfolio characteristics. All holdings are subject to change.

20,21. The negative cash position reflects a temporary position that is a result of a delay in securities settlement transactions.

22. Information is historical and may not reflect current or future portfolio characteristics. Percentage may not equal 100% due to rounding. All holdings are subject to change.

23. Information Ratio and Tracking Error information are displayed for the product versus the Bloomberg Barclays Municipal Bond Index.

24. Information Ratio is a way to evaluate a manager's ability to outperform a benchmark in relation to the risk that manager is assuming, with risk defined as deviation from the benchmark. This measure is calculated by dividing the portfolio's excess return (portfolio return less the benchmark return) by the tracking error (derived by taking the standard deviation of the monthly differences between the portfolio return and the benchmark return over time).

Strict Internal Analysis

Our analysts are responsible for conducting research on credit-driven securities in the municipal market. They are responsible for evaluating an issuer's credit strengths and weaknesses and working with the portfolio managers on select fund purchase and sale decisions.

Buy and Hold for the Long Term

Franklin managers are focused on seeking to maximize income; we don't actively trade bonds to try to capture capital gains. We typically sell holdings only if we see an opportunity to enhance a fund's portfolio structure or its income earning potential.

Investment Process**Market Analysis**

On a daily basis, we analyze current market conditions, including:

- Trading activity
- Yield spreads
- Call option spreads
- New offerings
- Secondary market offerings
- Credit ratings
- Event risk

Research

We search for high-quality, undervalued bonds that we believe should provide a high level of income until maturity.

We often make site visits to identify potential problems and opportunities that may not be readily visible on paper.

Analysts focus on credit-driven bond issues where we believe they can add the most value to the security selection process.

Portfolio Construction

We build portfolios with diversification in mind, taking into consideration allocations to sectors, regions, coupons, calls, maturities and quality, as appropriate.

We don't make significant allocation shifts based on expected market conditions. Rather, we look for the best value in the marketplace from an income-oriented perspective.

Additional Resources

Municipals

AMT Exposure: Percentage of a fund's assets invested in bonds with income subject to the alternative minimum tax (AMT). For investors subject to the alternative minimum tax, a small portion of fund dividends may be taxable. Distributions of capital gains are generally taxable

Annual Turnover Ratio: Percentage of a fund's holdings replaced with other holdings during a fund's most recent full fiscal year.

Average Duration: A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years.

Average Weighted Maturity: An estimate of the number of terms to maturity, taking the possibility of early payments into account, for the underlying holdings. Maturity is expressed as a number of years.

Information Ratio: In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark.

Sharpe Ratio: To calculate a Sharpe ratio, an asset's excess returns (its return in excess of the return generated by risk-free assets such as Treasury bills) are divided by the asset's standard deviation.

Standard Deviation: A measure of the degree to which returns vary from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that performance will fluctuate from the average return.

Tracking Error: Measure of the deviation of the return of a product compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment is managed, the smaller the tracking error.

What Are The Risks?

All investments involve risks, including possible loss of principal. Because municipal bonds are sensitive to interest rate movements, the fund's yield and share price will fluctuate with market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Investments in lower-rated bonds include higher risk of default and loss of principal. Puerto Rico municipal bonds have been impacted by recent adverse economic and market changes, which may cause the fund's share price to decline. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. The fund may invest a significant part of its assets in municipal securities that finance similar types of projects, such as utilities, hospitals, higher education and transportation. A change that affects one project would likely affect all similar projects, thereby increasing market risk.

Important Legal Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

5. Dividends are generally subject to state and local taxes, if any. For investors subject to the alternative minimum tax, a small portion of fund dividends may be taxable. Distributions of capital gains are generally taxable.

6. Effective 01/03/2006, the fund began offering Advisor Class Shares. For periods prior to the fund's Advisor Class inception date, a restated figure is used based on the fund's oldest share class, Class A1 performance, excluding the effect of Class A1's maximum initial sales charge but reflecting the effect of the Class A1 Rule 12b-1 fees; and b) for periods after the fund's Advisor Class inception date, actual Advisor Class performance is used, reflecting all charges and fees applicable to that class.
