Advisor	3.37	7.10	5.47	1.91	6.14	7.17	9/30/2008	

### Calendar Year Total Returns %

Share Class	2018	2017	2016	2015	2014	2013	2012	2011	2010	2009
Advisor	2.03	3.09	8.66	-4.64	0.62	3.81	19.31	-0.91	15.31	24.18

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit [franklintempleton.com](http://franklintempleton.com) for the most recent month-end performance.

Advisor Class shares do not have sales charges or 12b-1 fees and are offered only to certain eligible investors as stated in the prospectus.

The fund has a fee waiver associated with any investment it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through April 30, 2020. Fund investment results reflect the fee waiver; without this waiver, the results would have been lower.

### Fund Measures

Average Duration	-2.20 Years
Average Weighted Maturity	1.39 Years
Standard Deviation (3 Yrs) - Advisor Class	6.00%

### Morningstar Rating™—Advisor Class

#### Overall Morningstar Rating™

As of June 30, 2019 the fund's Advisor Class shares received a 5 star overall Morningstar Rating™, measuring risk-adjusted returns against 192, 181 and 110 U.S.-domiciled World Bond funds over the 3-, 5- and 10- year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics.

Cash & Cash Equivalents	30.62 / 0.00
Others	0.01 / 8.86

## Portfolio Data Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration and Average Weighted Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

## What Are the Risks?

All investments involve risks, including possible loss of principal. Foreign securities involve special risks, including currency fluctuations (which may be significant over the short term) and economic and political uncertainties; investments in developing markets involve heightened risks related to the same factors. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the fund to participate in losses on an amount that exceeds the fund's initial investment. The fund may not achieve the anticipated benefits, and may realize losses when a counterparty fails to perform as promised. The markets for particular securities or types of securities are or may become relatively illiquid. Reduced liquidity will have an adverse impact on the security's value and on the fund's ability to sell such securities when necessary to meet the fund's liquidity needs or in response to a specific market event. Sovereign debt securities are subject to various risks in addition to those relating to debt securities and foreign securities generally, including, but not limited to, the risk that a government entity may be unwilling or unable to pay interest and repay principal on its sovereign debt, or otherwise meet its obligations when due. Bond prices generally move in the opposite direction of interest rates. As the prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Changes in the financial strength of a bond issuer or in a bond's credit rating may affect its value. These and other risks are discussed in the fund's prospectus.

## Glossary

**Average Duration:** A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. The weighted average duration of a fund reflects the effective duration of the underlying issues, based on the size of each holding.

**Average Weighted Maturity:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

## Important Information

*Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.*

Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Indexes are unmanaged, and one cannot invest directly in an index. They do not reflect any fees, expenses or sales charges.

**Performance:** The fund offers other share classes subject to different fees and expenses, which will affect their performance.

**30-Day Standardized Yield:** The fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

**Morningstar Rating™:** Source: Morningstar®, 6/30/19. For each mutual fund and ETF with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on how a fund ranks on a Morningstar Risk-Adjusted Return measure against other funds in the same category. This measure takes into account variations in a fund's monthly performance, and does not take into account the effects of sales charges and loads, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Fund's Advisor Class shares received a Morningstar Rating of 5, 4 and 5 star(s) for the 3-, 5- and 10-year periods, respectively. Morningstar Rating™ is for the named share class only; other classes may have different performance characteristics. **Past performance is not an indicator or a guarantee of future performance.** Source: ©Morningstar.
