FRANKLIN ONCHAIN U.S. GOVERNMENT MONEY FUND™ FRANKLIN TEMPLETON TRUST

SUMMARY PROSPECTUS | August 1, 2025

TICKER: FOBXX

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, statement of additional information, reports to shareholders and other information about the Fund online at www.franklintempleton.com/prospectus. You can also get this information at no cost by calling (800) DIAL BEN/342-5236 or by sending an e-mail request to prospectus.us.franklintempleton@fisglobal.com. The Fund's prospectus and statement of additional information, both dated August 1, 2025, as may be supplemented, are all incorporated by reference into this Summary Prospectus.

**FRANKLIN TEMPLETON TRUST
SUPPLEMENT DATED APRIL 24, 2026
TO THE SUMMARY PROSPECTUS, PROSPECTUS AND
STATEMENT OF ADDITIONAL INFORMATION (“SAI”)
EACH DATED AUGUST 1, 2025 OF
FRANKLIN ONCHAIN U.S. GOVERNMENT MONEY FUND (THE
“FUND”)**

Effective on or about May 18, 2026, the Summary Prospectus, Prospectus and SAI of the Fund are amended as follows:

- I. The following is added below the “Fund Summary—Investment Manager” section of the Summary Prospectus and Prospectus for the Fund:**

Sub-Advisor

Western Asset Management Company, LLC (Western Asset). For purposes of the Fund’s investment strategies, techniques and risks, the term “investment manager” includes the sub-advisor.

- II. The following replaces the second paragraph in the “Fund Details—Management” section of the Prospectus for the Fund:**

Under a separate agreement with Franklin Advisers, Inc. (Advisers), Western Asset Management Company, LLC (Western Asset) provides the day-to-day portfolio management of the Fund. Western Asset, established in 1971, has offices at 385 East Colorado Boulevard, Pasadena, California 91101 and One Madison Avenue, New York, New York 10010. Western Asset acts as investment adviser to institutional accounts, such as corporate pension plans, mutual funds and endowment funds. As of March 31, 2026, the total assets under management of Western Asset and its supervised affiliates were approximately \$223.97 billion. Western Asset is an indirect, wholly owned subsidiary of Franklin Resources, Inc. (Resources).

The Fund pays Advisers a fee for managing the Fund's assets and Advisers pays Western Asset for its services.

III. The last sentence in the "Fund Details—Management—Manager of Managers Structure" section of the Prospectus for the Fund is hereby deleted.

IV. The following replaces the second and third sentences, respectively, of the "Fund Details—Distributions and Taxes— Income and Capital Gain Distributions" section of the Prospectus for the Fund:

The Fund intends to declare income dividends from its net investment income each day when it makes its final net asset value (NAV) calculation. Your account (via the App or Institutional Web Portal) begins to receive dividends beginning on the day the Fund receives your investment, provided the investment is received by the Fund on any business day in good order prior to 2 p.m. Pacific time or the fund's final (close of business) NAV calculation time, whichever is earlier.

V. The following replaces the applicable disclosure in all places in the "Your Account—Buying Shares" table that discuss the timing for making a same day investment in the Prospectus for the Fund:

To make a same day investment, your order must be received and accepted by us prior to 2 p.m. Pacific time (or such earlier time as described in the section entitled "Calculating Share Price" below) on any day on which the Fund is open for business.

VI. The following replaces the applicable disclosure in all places in the "Your Account—Selling Shares" table that discuss the timing for making a same day investment in the Prospectus for the Fund:

If we receive your request in proper form prior to 2 p.m. Pacific time (or such earlier time as described in the section entitled "Calculating Share Price" below) on any day on which the Fund is open for business, proceeds will be sent to you by the method you request. Proceeds sent by ACH generally will be available within two to three business days.

VII. The following replaces the second and fourth bullets in the section titled “Your Account—Peer-to-Peer Transfer of Shares” in the Prospectus for the Fund:

- Upon the Fund’s next final (close of business) NAV calculation time after any transfer requests have been completed, the Fund’s transfer agent will use Franklin Templeton’s patent pending method to distribute Intraday Yield by calculating the portion of the Fund’s income dividends from its net investment income for that NAV cycle that will be allocated to the transferor and the transferee based on the period of time each of the transferor and transferee held such transferred shares during such NAV cycle. Thus, the transferee will effectively begin accruing income dividends from the Fund’s net investment income immediately upon the transfer. For example, if the transferor and the transferee each held the shares for 12 hours of a 24-hour NAV cycle, each would receive 50% of the dividend distribution for that NAV cycle. Despite the simplicity of this example, the Fund’s dividend distribution calculation can take into account any number of transfers of any amounts between any number of participants during a NAV cycle.
- Scheduled transfers requested through the Benji mobile app will be processed at the Fund’s next NAV calculation time on the date of the scheduled transfer.

VIII. The following replaces the second paragraph in the section titled “Your Account—Account Policies—Calculating Share Price” in the Prospectus for the Fund:

The Fund is open for business and calculates its NAV every day on which both the New York Stock Exchange (NYSE) and the Federal Reserve Bank of New York (FRBNY) are open for business. Therefore, the Fund will be closed on the days on which the following holidays are observed: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day and Christmas Day. Both the NYSE and FRBNY are also closed on weekends and may be closed because of an emergency or other unanticipated event. In the

event the Federal Reserve wire payment system is open and the NYSE is open, the Fund may not calculate its NAV and may close for purchase or redemption transactions if—due to an emergency or other unanticipated event—the bond markets are closed for business as recommended by the Securities Industry and Financial Markets Association (SIFMA). In the event the NYSE does not open for business because of an emergency or other unanticipated event, the Fund may, but is not required to, calculate its NAV and open for purchase or redemption transactions if the Federal Reserve wire payment system is open and the bond markets are open.

The Fund typically calculates its NAV as of each hour from 8:00 a.m. (Eastern time) until its close of business on each Fund business day (normally, 5:00 p.m. (Eastern time)). However, at the Board's discretion, the Fund could, without advance notice, determine not to make one or more intraday calculations on a given day for a number of reasons such as unusual conditions in the bond, credit or other markets or unusual Fund purchase or redemption activity. If the Fund determined not to make an intraday calculation, purchases or redemptions would be effected at the next determined NAV, which may be greater or less than the price at which the purchase or redemption would otherwise have been effected.

On any day when the NYSE, the FRBNY or the bond markets (as recommended by SIFMA) close early due to an unanticipated event, or if trading on the NYSE is restricted, an emergency arises or as otherwise permitted by the SEC, the Fund reserves the right to close early and make its final NAV calculation as of the time of its early close.

The Fund normally closes for business at 5:00 p.m. (Eastern time). When SIFMA recommends an early close to the bond markets on a business day before or after a day on which a holiday is celebrated, the Fund reserves the right to close at or prior to the SIFMA recommended closing time. For calendar year 2026, SIFMA recommends an early close of the bond markets on April 3, 2026; May 22, 2026; July 2, 2026; November 27, 2026; December 24, 2026 and December 31, 2026. The schedule may be changed by SIFMA due to market conditions.

IX. The following is added as a new section under the “Management and Other Services” section of the SAI for the Fund:

Sub-Advisor The Fund's sub-advisor is Western Asset Management Company, LLC (Western Asset). The sub-advisor has a sub-advisory agreement with Advisers and regularly provides with respect to the portion of the Fund's assets allocated to it by the investment manager, investment research, advice, management and supervision; furnishes a continuous investment program for the allocated assets consistent with the Fund's investment goals, policies and restrictions; and places orders pursuant to its investment determinations. The sub-advisor may delegate to companies that the sub-advisor controls, is controlled by, or is under common control with, certain of the sub-advisor's duties under the sub-advisory agreement, subject to the sub-advisor's supervision, provided the sub-advisor will not be relieved of its duties or obligations under the sub-advisory agreement as a result of any delegation. The sub-advisor's activities are subject to the board's review and direction, as well as Advisers' instruction and supervision.

Advisers pays Western Asset for its services to the Fund.

X. The following replaces the first sentence of the "Proxy Voting Policies and Procedures" section of the SAI for the Fund:

The investment manager delegates to the sub-advisor the responsibility to vote proxies related to the portfolio securities held by the Fund. The sub-advisor votes proxies in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the sub-advisor.

XI. The following replaces the first paragraph of the "Distributions and Taxes" section in the SAI for the Fund:

Distributions The Fund intends to declare income dividends from its net investment income each day when it makes its final net asset value calculation and reinvests them daily. Capital gains, if any, may be paid at least annually. The Fund may distribute income dividends and capital gains more frequently, if necessary or appropriate in the board's discretion. The amount of any distribution will vary, and there is no guarantee the Fund will pay either income dividends or capital gain distributions. Your income dividends and capital gain distributions will be automatically reinvested in additional shares at net asset value on the payable date, which has the effect of compounding of dividends.

Please retain this supplement for future reference.

Fund Summary

Investment Goal

To provide investors with as high a level of current income as is consistent with the preservation of shareholders' capital and liquidity. The Fund also tries to maintain a stable \$1.00 share price.

Fees and Expenses of the Fund

These tables describe the fees and expenses that you may pay if you buy, hold and sell shares of the Fund.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management fees	0.15%
Distribution and service (12b-1) fees	None
Other expenses	0.07%
Total annual Fund operating expenses	0.22%
Fee waiver and/or expense reimbursement ¹	-0.02%
Total annual Fund operating expenses after fee waiver and/or expense reimbursement	0.20%

¹ The investment manager has agreed to waive fees and/or reimburse operating expenses (excluding certain non-routine expenses or costs, such as those relating to litigation, indemnification, reorganizations and liquidations) for the Fund so that the ratio of total annual fund operating expenses will not exceed 0.20% until July 31, 2026. During the term, the fee waiver and expense reimbursement agreement may not be terminated or amended without approval of the board of trustees except to add series or classes, to reflect the extension of the termination date or to lower the waiver and expense limitation (which would result in lower fees for shareholders).

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example reflects adjustments made to the Fund's operating expenses due to the fee waivers and/or expense reimbursements by management for the 1 Year numbers only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Franklin OnChain U.S. Government Money Fund	\$20	\$69	\$122	\$278

Principal Investment Strategies

The Fund invests at least 99.5% of its total assets in Government securities, cash and repurchase agreements collateralized fully by Government securities or cash. For purposes of this policy, "Government securities" means any securities issued or guaranteed as to principal or interest by the United States, or by a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States; or any certificate of deposit for any of the foregoing. Government securities include those issued by government agencies or instrumentalities, such as the Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Federal Home Loan Banks and Federal Farm Credit Banks, whose securities are neither issued nor guaranteed by the U.S. Government. The Fund intends to be a "Government money market fund," as such term is defined in or interpreted under Rule 2a-7 under the Investment Company Act of 1940 (1940 Act). Shareholders will be given at least 60 days' advance notice of any change to the 99.5% policy.

The Fund uses the amortized cost method of valuation to seek to maintain a stable \$1.00 share price and does not currently intend to impose liquidity fees on Fund redemptions. Please note, however, that the board of trustees reserves the ability to subject the Fund to a liquidity fee in the future, after providing prior notice to shareholders.

The Fund invests in:

U.S. government securities which may include fixed, floating and variable rate securities.

Repurchase agreements which are agreements by the Fund to buy Government securities and then to sell the securities back on an agreed upon date (generally, less than seven days) at a higher price, which reflects prevailing short-term interest rates.

Portfolio maturity and quality The Fund only buys securities that at the time of acquisition are "eligible securities," as defined by applicable regulation (e.g., government securities, securities issued by a money market fund, and securities that the investment manager determines present minimal credit risks). The Fund maintains a dollar-weighted average portfolio maturity of 60 calendar days or less, maintains a dollar-weighted average life for its portfolio of 120 calendar days or less, and only buys securities that mature or are deemed to mature in 397 calendar days or less (or securities otherwise permitted to be purchased because of maturity shortening provisions under applicable regulation).

Use of Blockchain

The Fund's transfer agent maintains the official record of share ownership via a proprietary blockchain-integrated system that utilizes features of traditional book-entry form and one or more public blockchain networks. The use of blockchain technology is relatively new and still evolving for mutual funds. Similar to traditional fund recordkeeping systems, all Fund and shareholder records in the blockchain-integrated system are under the full and complete control of the Fund's transfer agent.

A blockchain is an open, distributed ledger that records transactions between two parties in a verifiable and append-only manner using cryptography. Transactions on the blockchain are verified and authenticated by computers on the network. The process of authenticating a transaction before it is recorded ensures that only valid and authorized transactions are permanently recorded on the blockchain in collections of transactions called "blocks." Blockchain networks are based upon software source code that establishes and governs their respective cryptographic systems for verifying transactions.

The transfer agent's blockchain-integrated system is distinguishable from distributed ledgers/blockchains that lack access controls and other restrictions on which permissionless tokens are issued and transferred. Permissionless tokens include, for example, the native digital asset of distributed blockchains that are: (1) issued in a decentralized manner under no one entity's control; and (2) unconstrained in accessibility and movement. Examples of native digital assets include Bitcoin (BTC) on the Bitcoin network and Ether (ETH) on the Ethereum network.

The Fund's blockchain-integrated recordkeeping system is a permissioned system created by the transfer agent on a public blockchain network using smart contract technology to incorporate a whitelist of permissioned wallets into the relevant smart contract (or token configuration in the case of Stellar) alongside various administrative control functions. Unlike permissionless tokens, Fund shares recorded on the transfer agent's blockchain-integrated system are under the unilateral control of the transfer agent. The transfer agent is responsible for maintaining the accuracy of Fund share ownership on any blockchain network used by the blockchain-integrated system and has the ability to correct errors and unauthorized transactions in, and limit the transferability of, Fund shares.

The recording of Fund shares on the blockchain will not affect the Fund's investments. The Fund intends to be a Government money market fund. Accordingly, the Fund will invest, consistent with Rule 2a-7 under the 1940 Act, at least 99.5% of its total assets in Government securities, cash and repurchase

agreements collateralized fully by Government securities or cash. The Fund will not invest in any native crypto assets of public permissionless blockchains.

Complex information technology and communications systems, such as blockchain networks, are subject to a number of different threats or risks that could adversely affect the Fund. If such an event occurs, the Fund may incur substantial costs. In addition, market events also may trigger a volume of transactions that overloads current information technology and communication systems and processes, impacting the ability to conduct the Fund's operations. The Fund may never achieve market acceptance and may not be able to attract sizable assets or achieve scale.

The Fund's investment manager expects that the blockchain-integrated recordkeeping system will provide operational efficiencies without negatively impacting the quality of the transfer agent's services. For more information regarding the Fund's use of blockchain technology, see "Use of Blockchain" in the Fund Details section of this prospectus. More detailed information about blockchain technology and the public blockchain networks used by the Fund's transfer agent, including the regulatory, operational and technological risks associated with distributed ledger technology, as well as detailed information about the Fund and its policies and risks, can be found in the Fund's Statement of Additional Information (SAI).

Principal Risks

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

Interest Rate: When interest rates rise, debt security prices generally fall. The opposite is also generally true: debt security prices rise when interest rates fall. Interest rate changes are influenced by a number of factors, including government policy, monetary policy, inflation expectations, perceptions of risk, and supply of and demand for debt securities. The Fund's yield will vary. A low interest rate environment may prevent the Fund from providing a positive yield or paying Fund expenses out of current income and could impair the Fund's ability to maintain a stable net asset value. A sharp and unexpected rise in interest rates could cause the Fund's share price to drop below a dollar. In general, securities with longer maturities or durations are more sensitive to these interest rate changes.

Credit: U.S. government investments generally have the least credit risk but are not completely free of credit risk. The Fund may incur losses on debt securities that are inaccurately perceived to present a different amount of credit risk by the market, the investment manager or the rating agencies than such securities actually do. Any downgrade of securities issued by the U.S. government may result in a downgrade of securities issued by its agencies or instrumentalities.

Income: The Fund's distributions to shareholders may decline when prevailing interest rates fall, when the Fund experiences defaults on debt securities it holds or when the Fund realizes a loss upon the sale of a debt security. Because the Fund limits its investments to high-quality, short-term securities, its portfolio generally will earn lower yields than a portfolio with lower-quality, longer-term securities subject to more risk.

U.S. Government Securities: Not all obligations of the U.S. Government, its agencies and instrumentalities are backed by the full faith and credit of the United States. Some obligations are backed only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer. Government agency or instrumentality issues have different levels of credit support.

U.S. government-sponsored entities ("GSEs"), such as Fannie Mae and Freddie Mac, may be chartered by Acts of Congress, but their securities are neither issued nor guaranteed by the U.S. government. Although the U.S. government has provided financial support to Fannie Mae, Freddie Mac and certain other GSEs in the past, no assurance can be given that the U.S. government will continue to do so. Accordingly, securities issued by Fannie Mae and Freddie Mac may involve a risk of non-payment of principal and interest. Investors should remember that guarantees of timely repayment of principal and interest do not apply to the market prices and yields of the securities or to the net asset value or performance of the Fund, which will vary with changes in interest rates and other market conditions.

Repurchase Agreements: A repurchase agreement exposes the Fund to the risk that the party that sells the securities to the Fund may default on its obligation to repurchase such securities.

Market: The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. The market value of a security or other investment may be reduced by market activity or other results of supply and demand unrelated to the issuer. This is a basic risk associated with all investments. When there are more sellers than buyers, prices tend to fall. Likewise, when there are more buyers than sellers, prices tend to rise. In addition, the value of the Fund's investments may go up or down due to general market or other conditions that are not specifically related to a particular issuer, such as: real or

perceived adverse economic changes, including widespread liquidity issues and defaults in one or more industries; changes in interest, inflation or exchange rates; unexpected natural and man-made world events, such as diseases or disasters; financial, political or social disruptions, including terrorism and war; and U.S. trade disputes or other disputes with specific countries that could result in additional tariffs, trade barriers and/or investment restrictions in certain securities in those countries. Any of these conditions can adversely affect the economic prospects of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen.

Blockchain Technology: There are risks associated with the issuance, redemption, transfer, custody and record keeping of shares maintained and recorded on a blockchain, including, for example, the possibility of: (i) delays in transaction processing resulting from, among other things, the inability of nodes to reach consensus on transactions; (ii) security, privacy or other regulatory concerns resulting from the rapidly-evolving regulatory landscape that could require changes in the way transactions are recorded; (iii) undiscovered technical flaws in the transfer agent's blockchain-integrated system, or the manner in which private keys are held and secured; (iv) cryptographic or other security measures that authenticate transactions for a blockchain to be compromised or "hacked"; (v) new technologies or services that may inhibit access to a blockchain; (vi) a breach of one blockchain that could cause investors to lose trust in blockchain technology; (vii) differences between the way the shares are issued and recorded as compared to traditional mutual fund, which could make the resolution of issues involving Fund shares more difficult under existing law; (viii) the native digital asset of a supported network being deemed to be a security or is being offered and sold as an investment contract, and thus a security, which could impact the transfer agent's ability to acquire the native digital asset for purposes of paying blockchain transaction fees, and/or otherwise disrupt the operations of the network; (ix) the volatility of blockchain network transaction fees; and (x) a blockchain network experiencing a "fork" (i.e., "split") of the network, which would result in the existence of two or more versions of the blockchain network running in parallel, but with each version's native asset lacking interchangeability, potentially competing with each other for users and other participants. Investors that use investor-managed wallets are responsible for securing their private key against loss or theft.

Large Redemptions: Certain shareholders, including other funds or accounts advised by the investment manager or an affiliate of the investment manager and shareholders concentrated in a particular industry or group of industries, may from time to time own a substantial amount of the Fund's shares. The Fund may experience adverse effects when shareholders make large redemptions from the Fund that equate to a large percentage of the Fund's assets. In order to meet such

redemption requests, the Fund may need to sell securities at times when it would not otherwise do so, which could result in losses to the Fund, increase the Fund's transaction costs and expense ratios, accelerate the realization of taxable income, if any, to shareholders, and adversely affect the Fund's liquidity.

Management: The Fund is subject to management risk because it is an actively managed investment portfolio. The investment manager applies investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

Cybersecurity: Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the investment manager, authorized participants, or index providers (as applicable) and listing exchanges, and/or their service providers (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality or prevent Fund investors from purchasing, redeeming shares or receiving distributions. The investment manager has limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the investment manager. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in an effort to prevent or mitigate future cybersecurity incidents. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

Because technology is frequently changing, new ways to carry out cyber attacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. Like other funds and business enterprises, the Fund, the investment manager, and their service providers are subject to the risk of cyber incidents occurring from time to time.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year. The table shows the Fund's average annual returns for 1 year, 5 years, 10 years or since inception, as applicable. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future. You can obtain updated performance information at www.franklintempleton.com/FOBXX or the App

or the Institutional Web Portal (as defined below in "Purchase and Sale of Fund Shares") or by calling (800) DIAL BEN/342-5236.

Annual Total Returns

Best Quarter:	2023, Q4	1.31%
Worst Quarter:	2022, Q1	0.01%

As of June 30, 2025, the Fund's year-to-date return was 2.03%.

Average Annual Total Returns

For periods ended December 31, 2024

	1 Year	Since Inception
Franklin OnChain U.S. Government Money Fund	5.09%	3.12% ¹

¹ Since inception April 6, 2021.

Investment Manager

Franklin Advisers, Inc. (Advisers or investment manager)

Purchase and Sale of Fund Shares

Individual investors opening an account with the Fund must first download Benji by Franklin Templeton, a mobile application available through the Apple App Store and Google Play (App). The App is free to download and use. Institutional investors may open a new account by using our Institutional Web Portal. For more information about our Institutional Web Portal, please contact us at FTDigitalAssets@franklintempleton.com.

All fees associated with the use of public blockchain networks will be the responsibility of the investment manager or its affiliates.

Prior to opening your account, the Fund will collect certain information from you in accordance with its anti-money laundering and know-your-customer policies and procedures. You may purchase or redeem shares of the Fund at any time through the App or the Institutional Web Portal (as applicable), although purchases and redemptions of Fund shares will only be processed during normal business hours on business days. You may only purchase and redeem Fund shares using the App or the Institutional Web Portal (as applicable). For more information, please see the sections of this prospectus entitled “Your Account – Account Application” and “Your Account – Privileges via the App and the Institutional Web Portal”. The minimum initial purchase for most accounts is \$20, although you may be subject to a higher investment minimum. For more information regarding eligibility criteria and investment minimums for the available blockchain networks, see “Buying Shares” in the “Your Account” section of the prospectus. There is no minimum investment for subsequent purchases.

Taxes

The Fund's distributions are generally taxable to you as ordinary income. It is not anticipated that the Fund will be available to tax-deferred investors.
