Letter from the president

Dear Shareholder,

We are pleased to provide the annual report of Western Asset High Income Fund II Inc. for the twelve-month reporting period ended April 30, 2025. Please read on for a detailed look at prevailing economic and market conditions during the Fund's reporting period and to learn how those conditions have affected Fund performance.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website, www.franklintempleton.com. Here you can gain immediate access to market and investment information, including:

- · Fund prices and performance,
- · Market insights and commentaries from our portfolio managers, and
- A host of educational resources.

ane Lux

We look forward to helping you meet your financial goals.

Sincerely,

Jane Trust, CFA

President and Chief Executive Officer

May 30, 2025

Fund overview

Q. What is the Fund's investment strategy?

A. The Fund seeks to maximize current income. As a secondary objective, the Fund seeks capital appreciation to the extent consistent with its objective of seeking to maximize current income. Under normal market conditions, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in high-yield debt securities. The Fund may invest up to 35% of its total assets in debt securities of issuers located in emerging market countries. It may also invest up to 30% of its assets in zero coupon securities, payment-in-kind bonds and deferred payment securities, and up to 20% of its assets in equity securities. The Fund may utilize a variety of derivative instruments for investment or risk management purposes, such as options, futures contracts, swap agreements including credit default swaps. We employ an actively managed approach that is risk-controlled and assimilates top-down macroeconomic views with industry sector insights and bottom-up credit research to derive the general framework for the Fund's predominantly non-investment grade credit mandate. This framework provides the foundation for how the portfolio is positioned with respect to risk (aggressive, neutral, conservative), as well as identifying sector overweights and underweights.

Risk and weightings are reviewed on a regular basis. Our bottom-up process provides the basis for populating the targeted industry weightings through individual credit selection. Analysts work closely with portfolio managers to determine which credits provide the best risk/reward relationship within their respective sectors. The research team focuses on key fundamental measures such as leverage, cash flow adequacy, liquidity, amortization schedule, underlying asset value and management integrity/track record.

At Western Asset Management Company, LLC (Western Asset), the Fund's subadviser, we utilize a fixed income team approach, with decisions derived from interaction among various investment management sector specialists. The sector teams are comprised of Western Asset's senior portfolio management personnel, research analysts and an in-house economist. Under this team approach, management of client fixed income portfolios will reflect a consensus of interdisciplinary views within the Western Asset organization. The individuals responsible for development of investment strategy, day-to-day portfolio management, oversight and coordination of the Fund are Michael C. Buchanan, Christopher F. Kilpatrick and Walter Kilcullen.

Q. What were the overall market conditions during the Fund's reporting period?

A. The overall U.S. fixed income market experienced periods of volatility, but generated a solid return over the twelve months ended April 30, 2025. The market was driven by several factors, including overall resilient economic growth, moderating but "sticky" inflation, shifting U.S. Federal Reserve (Fed) monetary policy, a U.S. trade war, and several geopolitical issues.

The Fed lowered interest rates in September 2024 (the first reduction since 2020) and again in November and December 2024. The December 2024 reduction put the federal funds target rate at 4.25%-4.50%, the lowest level since December 2022. However, since that

Fund overview (cont'd)

time the Fed has remained on hold as it weighs the impact of President Trump's tariffs on the economy and inflation. The March 2025 Summary of Economic Projections showed that Fed officials now anticipate lowering rates twice for a total of 50 basis points (one-half percent) in 2025.

The two-year Treasury yield began the reporting period at 5.04% and ended at 3.60%, whereas the ten-year Treasury yield began the reporting period at 4.69% and ended at 4.17%. All told, the Bloomberg U.S. Aggregate Indexi returned 8.02% for the twelve months ended April 30, 2025. For comparison purposes, riskier fixed income securities, including high-yield bonds and emerging market debt, produced stronger results. Over the fiscal year, the Bloomberg U.S. Corporate High Yield — 2% Issuer Cap Indexii and the JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global)iii returned 8.69% and 8.82%, respectively.

Q. How did we respond to these changing market conditions?

A. A number of changes were made to the portfolio during the reporting period. Spreads widened at the beginning of April 2025, and we took the opportunity to complete multiple book yield swaps and trim some investment-grade rated securities, while buying high-yield bonds. We favored high-quality, high-yield corporates, specifically BB-rated securities. As rates were higher into April, we felt it was prudent to add to high-yield and collateralized loan obligations, while reducing emerging markets debt, given elevated inflation and slowing growth, but strong fundamentals.

During the reporting period, we tactically utilized leverage in the Fund. We ended the period with leverage as a percentage of total assets of approximately 33%, versus roughly 29% when the period began. The use of leverage contributed to results given most spread sectors posted positive total returns during the period.

Currency forwards, which were used to help manage the Fund's currency exposures, detracted from performance. Index credit default swaps, which were used to help manage the Fund's credit exposures, also detracted from performance.

Performance review

For the twelve months ended April 30, 2025, Western Asset High Income Fund II Inc. returned 8.11% based on its net asset value (NAV)^{iv} and 7.52% based on its New York Stock Exchange (NYSE) market price per share. The Fund's benchmark, the Composite Index, comprised of 80% Bloomberg U.S. Corporate High Yield (2% constrained) and 20% JPM EMBI Global^v, and unmanaged benchmarks, the Bloomberg U.S. Corporate High Yield — 2% Issuer Cap Index and the JPM EMBI Global, returned 8.72%, 8.69% and 8.82%, respectively, for the same period.

The Fund has a practice of seeking to maintain a relatively stable level of distributions to shareholders. This practice has no impact on the Fund's investment strategy and may reduce the Fund's NAV. The Fund's investment manager believes the practice helps maintain the

Fund's competitiveness and may benefit the Fund's market price and premium/discount to the Fund's NAV.

During the twelve-month period, the Fund made distributions to shareholders totaling \$0.59 per share of which \$0.19 will be treated as a return of capital for tax purposes.* The performance table shows the Fund's twelve-month total return based on its NAV and market price as of April 30, 2025. **Past performance is no guarantee of future results.**

Performance Snapshot as of April 30, 2025	
Price Per Share	12-Month Total Return**
\$4.26 (NAV)	8.11%†
\$4.08 (Market Price)	7.52%‡

All figures represent past performance and are not a guarantee of future results.

- ** Total returns are based on changes in NAV or market price, respectively. Returns reflect the deduction of all Fund expenses, including management fees, operating expenses, and other Fund expenses. Returns do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares.
- † Total return assumes the reinvestment of all distributions, including returns of capital, at NAV.
- ‡Total return assumes the reinvestment of all distributions, including returns of capital, in additional shares in accordance with the Fund's Dividend Reinvestment Plan.

Q. What were the leading contributors to performance?

A. Within our developed market high-yield allocation, several positions were rewarded. Examples of overweight positions that outperformed within the communications space were EchoStar, Altice France SA, Virgin Media Finance, Telecom Italia Capital SA and Viasat. Issuers in the transportation space also contributed to returns, including overweight positions in Carnival, Royal Caribbean Cruises, Norwegian Cruise Lines (NCL Finance) and American Airlines. Finally, examples of consumer facing issuer overweights that outperformed were betting and gaming company Evoke (formerly known as 888 Acquisitions), as well as private prison operators CoreCivic and the Geo Group.

Investment-grade rated debt in general underperformed lower quality, higher levered, and shorter duration spread products during the reporting period. However, a handful of overweights were materially additive to performance. Examples of overweights that outperformed were subordinated exposure to several large global money center banks, such as Lloyds Banking Group, BNP Paribas SA and UBS Group AG. In addition, exposures to communications companies, such as Sprint Capital and Charter Communications, were beneficial.

* For the character of distributions paid during the fiscal year ended April 30, 2025, please refer to page 70 of this report.

Fund overview (cont'd)

In emerging markets, many of the Fund's positions performed well. Examples of overweights that were beneficial included provincial debt in Argentina, specifically Provincia de Buenos Aires and Provincia de Cordoba, as well as Brazilian state-run energy company Petrobras Global Finance BV, Colombian energy company Ecopetrol SA and Argentina's YPF SA.

Q. What were the leading detractors from performance?

A. While the Fund performed well, there were a handful of positions that were not rewarded during the reporting period. Specifically, the escrow receipt resulting from our opportunistic allocation to Credit Suisse AT1s in March 2023 traded down in price and was a detractor from performance. Overweight allocations in Venture Global LNG, the holding company parent of the LNG project Venture Global Calcasieu Pass, global specialty pharmaceutical and medical devices company Bausch Health, and American ultra-low-cost carrier Spirit Airlines were other examples of underperformers. Within our bank loan allocation, an overweight allocation to Weight Watchers International secured loans performed poorly.

Despite many emerging market positions performing well, our positioning in the space was ultimately a slight negative, as our overweights to Mexican and Brazilian local sovereign debt underperformed. In addition, the fact that the Fund did not hold benchmark exposures to Republic of Argentina and Republic of Indonesia, which performed well, detracted from performance.

Looking for additional information?

The Fund is traded under the symbol "HIX" and its closing market price is available in most newspapers under the NYSE listings. The daily NAV is available online under the symbol "XHGIX" on most financial websites. *Barron's* and *The Wall Street Journal's* Monday edition both carry closed-end fund tables that provide additional information. In addition, the Fund issues a quarterly press release that can be found on most major financial websites as well as www.franklintempleton.com.

In a continuing effort to provide information concerning the Fund, shareholders may call 1-888-777-0102 (toll free), Monday through Friday from 8:00 a.m. to 5:30 p.m. Eastern Time, for the Fund's current NAV, market price and other information.

Thank you for your investment in the Western Asset High Income Fund II Inc. As always, we appreciate that you have chosen us to manage your assets and we remain focused on achieving the Fund's investment goals.

Sincerely,

Western Asset Management Company, LLC

May 30, 2025

RISKS: The Fund is a diversified closed-end management investment company designed primarily as a long-term investment and not as a trading vehicle. The Fund is not intended to be

a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objective. The Fund's common stock is traded on the New York Stock Exchange, Similar to stocks, the Fund's share price will fluctuate with market conditions and, at the time of sale, may be worth more or less than the original investment. Shares of closed-end funds often trade at a discount to their net asset value. Diversification does not assure against market loss. The Fund's investments are subject to a number of risks, such as credit risk, inflation risk and interest rate risk. As interest rates rise, bond prices fall, reducing the value of the Fund's holdings. The Fund may use derivatives, such as options and futures, which can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance. High-yield bonds, known as "junk bonds," involve greater credit and liquidity risks than investment grade bonds. Foreign securities are subject to certain risks not associated with domestic investing, such as currency fluctuations and changes in political and economic conditions which could result in significant fluctuations. These risks are magnified in emerging markets. Emerging market countries tend to have economic, political and legal systems that are less developed and are less stable than those of more developed countries. The Fund is also permitted purchases of equity securities. Equity securities generally have greater price volatility than fixed income securities. Leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder's risk of loss. The market values of securities or other assets will fluctuate, sometimes sharply and unpredictably, due to changes in general market conditions, overall economic trends or events, governmental actions or intervention, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by trade disputes or other factors, political developments, armed conflicts, economic sanctions and countermeasures in response to sanctions, major cybersecurity events, investor sentiment, the global and domestic effects of a pandemic, and other factors that may or may not be related to the issuer of the security or other asset. The Fund may also invest in money market funds, including funds affiliated with the Fund's manager and subadvisers. For more information on Fund risks, see Summary of information regarding the Fund - Principal Risk Factors in this report.

Portfolio holdings and breakdowns are as of April 30, 2025, and are subject to change and may not be representative of the portfolio managers' current or future investments. Please refer to pages 10 through 44 for a list and percentage breakdown of the Fund's holdings.

The mention of sector breakdowns is for informational purposes only and should not be construed as a recommendation to purchase or sell any securities. The information provided regarding such sectors is not a sufficient basis upon which to make an investment decision. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies discussed should consult their financial professional. The Fund's top five sector holdings (as a percentage of net assets) as of April 30, 2025 were: consumer discretionary (26.1%), communication services (20.4%), industrials (17.8%), energy (16.0%) and financials (14.1%). The Fund's portfolio composition is subject to change at any time.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

t

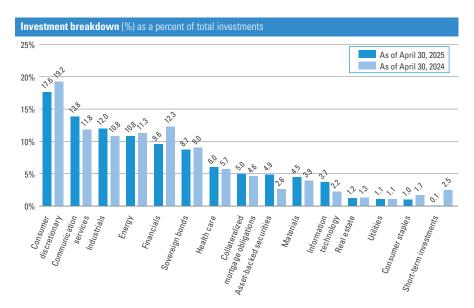

Fund overview (cont'd)

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

- The Bloomberg U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgageand asset-backed issues, rated investment grade or higher, and having at least one year to maturity.
- The Bloomberg U.S. Corporate High Yield 2% Issuer Cap Index is an index of the 2% Issuer Cap component of the Bloomberg U.S. Corporate High Yield Index, which covers the U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market.
- The JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global) tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds and local market instruments.
- Net asset value (NAV) is calculated by subtracting total liabilities, including liabilities associated with financial leverage (if any), from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.
- v The Composite Index is comprised of 80% Bloomberg U.S. Corporate High Yield (2% constrained) and 20% JPM EMBI Global. The Bloomberg U.S. Corporate High Yield 2% Issuer Cap Index is an index of the 2% Issuer Cap component of the Bloomberg U.S. Corporate High Yield Index, which covers the U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market. The JPM EMBI Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds and local market instruments.

Western Asset High Income Fund II Inc.

- † Face amount denominated in U.S. dollars, unless otherwise noted.
- †† Represents less than 0.1%.
- * Non-income producing security.
- (a) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to quidelines approved by the Board of Directors.
- (b) All or a portion of this security is pledged as collateral pursuant to the loan agreement (Note 5).
- (c) Payment-in-kind security for which the issuer has the option at each interest payment date of making interest payments in cash or additional securities.
- (d) Security is exempt from registration under Regulation S of the Securities Act of 1933. Regulation S applies to securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States. This security has been deemed liquid pursuant to guidelines approved by the Board of Directors.
- (e) All or a portion of this security is held by the counterparty as collateral for open reverse repurchase agreements.
- (f) Securities traded on a when-issued or delayed delivery basis.
- (g) Variable rate security. Interest rate disclosed is as of the most recent information available. Certain variable rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities do not indicate a reference rate and spread in their description above.
- (h) Security has no maturity date. The date shown represents the next call date.
- (i) Security is fair valued in accordance with procedures approved by the Board of Directors (Note 1).
- (i) Security is valued using significant unobservable inputs (Note 1).
- (k) Value is less than \$1.
- (1) The maturity principal is currently in default as of April 30, 2025.
- (m) Interest rates disclosed represent the effective rates on senior loans. Ranges in interest rates are attributable to multiple contracts under the same loan.
- (n) Senior loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the agent bank and/or borrower prior to the disposition of a senior loan.
- (a) Collateralized mortgage obligations are secured by an underlying pool of mortgages or mortgage pass-through certificates that are structured to direct payments on underlying collateral to different series or classes of the obligations. The interest rate may change positively or inversely in relation to one or more interest rates, financial indices or other financial indicators and may be subject to an upper and/or lower limit.
- (p) Restricted security (Note 10).
- (q) Rate shown is one-day yield as of the end of the reporting period.
- In this instance, as defined in the Investment Company Act of 1940, an "Affiliated Company" represents Fund ownership of at least 5% of the outstanding voting securities of an issuer, or a company which is under common ownership or control with the Fund. At April 30, 2025, the total market value of investments in Affiliated Companies was \$722,961 and the cost was \$722,961 (Note 9).

^{**} Including accrued interest.

^{***}TBD — To Be Determined; These reverse repurchase agreements have no maturity dates because they are renewed daily and can be terminated by either the Fund or the counterparty in accordance with the terms of the agreements. The rates for these agreements are variable. The rate disclosed is the rate as of April 30, 2025.

Schedule of investments (cont'd)

April 30, 2025

Western Asset High Income Fund II Inc.

- If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected loss (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period end. Decreasing market values (sell protection) or increasing market values (buy protection), when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.
- † Percentage shown is an annual percentage rate.

Net Increase in Cash and Restricted Cash

Cash and restricted cash at beginning of year

Cash and restricted cash at end of year

^{*}Included in operating expenses is \$10,977,368 paid for interest and commitment fees on borrowings.

The following table provides a reconciliation of cash (including foreign currency) and restricted cash reported within the Statement of Assets and Liabilities that sums to the total of such amounts shown on the Statement of Cash Flows.

Cash Restricted cash	\$2,456,279 927.000
Total cash and restricted cash shown in the Statement of Cash Flows	\$3.383.279

Restricted cash consists of cash that has been segregated to cover the Fund's collateral or margin obligations under derivative contracts and for reverse repurchase agreements. It is separately reported on the Statement of Assets and Liabilities as Deposits with brokers.

Financial highlights (cont'd)

- ¹ Per share amounts have been calculated using the average shares method.
- ² Audited, but not covered by the current report of the independent registered public accounting firm.
- ³ Calculation of the net gain per share (both realized and unrealized) does not correlate to the aggregate realized and unrealized loss presented in the Statement of Operations due to the timing of the sales and repurchases of Fund shares in relation to fluctuating market values of the investments of the Fund.
- ⁴ The repurchase plan was completed at an average repurchase price of \$4.91 for 917,344 shares and \$4,506,248 for the year ended April 30, 2020, and \$5.98 for 1,047,640 shares and \$6,268,230 for the year ended April 30, 2019.
- ⁵ The rights offering was completed at a price of \$4.30 for 22,508,740 shares and \$96,787,582 for the year ended April 30, 2024, and \$5.17 for 6,001,836 shares and \$31,029,492 for the year ended April 30, 2023 (Note 8).
- ⁶ The tender offer was completed at a price of \$7.01 for 25,577,060 shares and \$179,295,192 for the year ended April 30, 2021.
- Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results.
- 8 The total return calculation assumes that distributions are reinvested at NAV. Past performance is no guarantee of future results.
- ⁹ The total return calculation assumes that distributions are reinvested in accordance with the Fund's dividend reinvestment plan. Past performance is no guarantee of future results.
- ¹⁰ Included in the expense ratios are certain non-recurring legal and transfer agent fees that were incurred by the Fund during the period. Without these fees, the gross and net expense ratios would have been 2.37% and 2.35%, respectively.
- ¹¹ The manager has agreed to waive the Fund's management fee to an extent sufficient to offset the net management fee payable in connection with any investment in an affiliated money market fund.
- ¹² Reflects fee waivers and/or expense reimbursements.
- ¹³ Represents value of net assets plus the loan outstanding at the end of the period divided by the loan outstanding at the end of the period.

Notes to financial statements

1. Organization and significant accounting policies

Western Asset High Income Fund II Inc. (the "Fund") was incorporated in Maryland and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund seeks to maximize current income by investing at least 80% of its net assets, plus any borrowings for investment purposes, in high-yield debt securities. As a secondary objective, the Fund seeks capital appreciation to the extent consistent with its objective of seeking to maximize current income.

The Fund follows the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, *Financial Services — Investment Companies* ("ASC 946"). The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles ("GAAP"), including, but not limited to, ASC 946. Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

(a) Investment valuation. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services typically use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Investments in openend funds are valued at the closing net asset value per share of each fund on the day of valuation. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. When the Fund holds securities or other assets that are denominated in a foreign currency, the Fund will normally use the currency exchange rates as of 4:00 p.m. (Eastern Time). If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the manager to be unreliable, the market price may be determined by the manager using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved by the Fund's Board of Directors (the "Board").

Pursuant to policies adopted by the Board, the Fund's manager has been designated as the valuation designee and is responsible for the oversight of the daily valuation process. The Fund's manager is assisted by the Global Fund Valuation Committee (the "Valuation Committee"). The Valuation Committee is responsible for making fair value determinations, evaluating the effectiveness of the Fund's pricing policies, and reporting to the Fund's manager and the Board. When determining the reliability of third party pricing information for investments owned by the Fund, the Valuation Committee, among other things, conducts due diligence reviews of pricing vendors, monitors the daily change in prices and reviews transactions among market participants.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer's financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts' research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such back testing monthly and fair valuation occurrences are reported to the Board quarterly.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are summarized in the three broad levels listed below:

- Level 1 unadjusted quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities carried at fair value:

- * Amount represents less than \$1.
- †† Reflects the unrealized appreciation (depreciation) of the instruments.

(b) Forward foreign currency contracts. The Fund enters into a forward foreign currency contract to hedge against foreign currency exchange rate risk on its non-U.S. dollar denominated securities or to facilitate settlement of a foreign currency denominated portfolio transaction. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price with delivery and settlement at a future date. The contract is marked-to-market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Fund recognizes a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it is closed.

Forward foreign currency contracts involve elements of market risk in excess of the amounts reflected on the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(c) Swap agreements. The Fund invests in swaps for the purpose of managing its exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with other portfolio transactions. Swap agreements are privately negotiated in the over-the-counter market and may be entered into as a bilateral contract ("OTC Swaps") or centrally cleared ("Centrally Cleared Swaps"). Unlike Centrally Cleared Swaps, the Fund has credit exposure to the counterparties of OTC Swaps.

In a Centrally Cleared Swap, immediately following execution of the swap, the swap agreement is submitted to a clearinghouse or central counterparty (the "CCP") and the CCP becomes the ultimate counterparty of the swap agreement. The Fund is required to interface with the CCP through a broker, acting in an agency capacity. All payments are

settled with the CCP through the broker. Upon entering into a Centrally Cleared Swap, the Fund is required to deposit initial margin with the broker in the form of cash or securities.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). The daily change in valuation of Centrally Cleared Swaps, if any, is recorded as a net receivable or payable for variation margin on the Statement of Assets and Liabilities. Gains or losses are realized upon termination of the swap agreement. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Securities posted as collateral for swap contracts are identified in the Schedule of Investments and restricted cash, if any, is identified on the Statement of Assets and Liabilities. Risks may exceed amounts recorded in the Statement of Assets and Liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

OTC Swap payments received or made at the beginning of the measurement period are reflected as a premium or deposit, respectively, on the Statement of Assets and Liabilities. These upfront payments are amortized over the life of the swap and are recognized as realized gain or loss in the Statement of Operations. Net periodic payments received or paid by the Fund are recognized as a realized gain or loss in the Statement of Operations.

The Fund's maximum exposure in the event of a defined credit event on a credit default swap to sell protection is the notional amount. As of April 30, 2025, the total notional value of all credit default swaps to sell protection was \$4,280,000. This amount would be offset by the value of the swap's reference entity, upfront premiums received on the swap and any amounts received from the settlement of a credit default swap where the Fund bought protection for the same referenced security/entity.

For average notional amounts of swaps held during the year ended April 30, 2025, see Note 4.

Credit default swaps

The Fund enters into credit default swap ("CDS") contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where the Fund has exposure to an issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event

occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a CDS agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of CDS agreements on corporate or sovereign issues are disclosed in the Schedule of Investments and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for credit derivatives. For CDS agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/performance risk.

The Fund's maximum risk of loss from counterparty risk, as the protection buyer, is the fair value of the contract (this risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty). As the protection seller, the Fund's maximum risk is the notional amount of the contract. CDS are considered to have credit risk-related contingent features since they require payment by the protection seller to the protection buyer upon the occurrence of a defined credit event.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk in excess of the related amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

(d) Loan participations. The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance

by the borrower with the terms of the loan agreement related to the loan, or any rights of offset against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower.

(e) Reverse repurchase agreements. The Fund may enter into reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a fund sells a security subject to an obligation to repurchase the security from the buyer at an agreed upon time and price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds of the agreement may be restricted pending a determination by the counterparty, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. In entering into reverse repurchase agreements, the Fund will pledge cash, U.S. government securities or other liquid debt obligations at least equal in value to its obligations with respect to reverse repurchase agreements or will take other actions permitted by law to cover its obligations. If the market value of the collateral declines during the period, the Fund may be required to post additional collateral to cover its obligation. Cash collateral that has been pledged to cover obligations of the Fund under reverse repurchase agreements, if any, will be reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral are noted in the Schedule of Investments. Interest payments made on reverse repurchase agreements are recognized as a component of "Interest expense" on the Statement of Operations. In periods of increased demand for the security, the Fund may receive a fee for use of the security by the counterparty, which may result in interest income to the Fund

(f) Securities traded on a when-issued and delayed delivery basis. The Fund may trade securities on a when-issued or delayed delivery basis. In when-issued and delayed delivery transactions, the securities are purchased or sold by the Fund with payment and delivery taking place in the future in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction.

Purchasing such securities involves risk of loss if the value of the securities declines prior to settlement. These securities are subject to market fluctuations and their current value is determined in the same manner as for other securities.

(g) Cash flow information. The Fund invests in securities and distributes dividends from net investment income and net realized gains, which are paid in cash and may be reinvested at the discretion of shareholders. These activities are reported in the Statements

of Changes in Net Assets and additional information on cash receipts and cash payments is presented in the Statement of Cash Flows.

(h) Foreign currency translation. Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from fluctuations in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, including gains and losses on forward foreign currency contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the values of assets and liabilities, other than investments in securities, on the date of valuation, resulting from changes in exchange rates.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

(i) Credit and market risk. The Fund invests in high-yield and emerging market instruments that are subject to certain credit and market risks. The yields of high-yield and emerging market debt obligations reflect, among other things, perceived credit and market risks. The Fund's investments in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investments in non-U.S. dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.

Investments in securities that are collateralized by real estate mortgages are subject to certain credit and liquidity risks. When market conditions result in an increase in default rates of the underlying mortgages and the foreclosure values of underlying real estate

properties are materially below the outstanding amount of these underlying mortgages, collection of the full amount of accrued interest and principal on these investments may be doubtful. Such market conditions may significantly impair the value and liquidity of these investments and may result in a lack of correlation between their credit ratings and values.

(j) Foreign investment risks. The Fund's investments in foreign securities may involve risks not present in domestic investments. Since securities may be denominated in foreign currencies, may require settlement in foreign currencies or may pay interest or dividends in foreign currencies, changes in the relationship of these foreign currencies to the U.S. dollar can significantly affect the value of the investments and earnings of the Fund. Foreign investments may also subject the Fund to foreign government exchange restrictions, expropriation, taxation or other political, social or economic developments, all of which affect the market and/or credit risk of the investments.

(k) Counterparty risk and credit-risk-related contingent features of derivative instruments. The Fund may invest in certain securities or engage in other transactions where the Fund is exposed to counterparty credit risk in addition to broader market risks. The Fund may invest in securities of issuers, which may also be considered counterparties as trading partners in other transactions. This may increase the risk of loss in the event of default or bankruptcy by the counterparty or if the counterparty otherwise fails to meet its contractual obligations. The Fund's subadviser attempts to mitigate counterparty risk by (i) periodically assessing the creditworthiness of its trading partners, (ii) monitoring and/or limiting the amount of its net exposure to each individual counterparty based on its assessment and (iii) requiring collateral from the counterparty for certain transactions. Market events and changes in overall economic conditions may impact the assessment of such counterparty risk by the subadviser. In addition, declines in the values of underlying collateral received may expose the Fund to increased risk of loss.

With exchange traded and centrally cleared derivatives, there is less counterparty risk to the Fund since the exchange or clearinghouse, as counterparty to such instruments, guarantees against a possible default. The clearinghouse stands between the buyer and the seller of the contract; therefore, the credit risk is limited to failure of the clearinghouse. While offset rights may exist under applicable law, the Fund does not have a contractual right of offset against a clearing broker or clearinghouse in the event of a default of the clearing broker or clearinghouse.

The Fund has entered into master agreements, such as an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement, with certain of its derivative counterparties that govern over-the-counter ("OTC") derivatives and provide for general obligations, representations, agreements, collateral posting terms, netting provisions in the event of default or termination and credit related contingent features. The credit related contingent features include, but are not limited to, a percentage decrease in the Fund's net assets or net asset value per share over a specified period of time. If these credit related contingent features were triggered, the

derivatives counterparty could terminate the positions and demand payment or require additional collateral.

Under an ISDA Master Agreement, the Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted and create one single net payment. However, absent an event of default by the counterparty or a termination of the agreement, the terms of the ISDA Master Agreements do not result in an offset of reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities across transactions between the Fund and the applicable counterparty. The enforceability of the right to offset may vary by jurisdiction.

Collateral requirements differ by type of derivative. Collateral or margin requirements are set by the broker or exchange clearinghouse for exchange traded derivatives while collateral terms are contract specific for OTC traded derivatives. Cash collateral that has been pledged to cover obligations of the Fund under derivative contracts, if any, will be reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral, if any, for the same purpose are noted in the Schedule of Investments.

As of April 30, 2025, the Fund held forward foreign currency contracts with credit related contingent features which had a liability position of \$494,254. If a contingent feature in the master agreements would have been triggered, the Fund would have been required to pay this amount to its derivatives counterparties.

(I) Security transactions and investment income. Security transactions are accounted for on a trade date basis. Interest income (including interest income from payment-in-kind securities) is recorded on the accrual basis. Amortization of premiums and accretion of discounts on debt securities are recorded to interest income over the lives of the respective securities, except for premiums on certain callable debt securities, which are amortized to the earliest call date. Paydown gains and losses on mortgage- and asset-backed securities are recorded as adjustments to interest income. Dividend income is recorded on the ex-dividend date for dividends received in cash and/or securities. Foreign dividend income is recorded on the ex-dividend date or as soon as practicable after the Fund determines the existence of a dividend declaration after exercising reasonable due diligence. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Fund may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

(m) Distributions to shareholders. Distributions from net investment income of the Fund, if any, are declared quarterly and paid on a monthly basis. Distributions of net realized gains, if any, are declared at least annually. Distributions to shareholders of the Fund are recorded on the ex-dividend date and are determined in accordance with income tax regulations, which may differ from GAAP.

- (n) Compensating balance arrangements. The Fund has an arrangement with its custodian bank whereby a portion of the custodian's fees is paid indirectly by credits earned on the Fund's cash on deposit with the bank.
- **(o) Federal and other taxes.** It is the Fund's policy to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986 (the "Code"), as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute its taxable income and net realized gains, if any, to shareholders in accordance with timing requirements imposed by the Code. Therefore, no federal or state income tax provision is required in the Fund's financial statements.

Management has analyzed the Fund's tax positions taken on income tax returns for all open tax years and has concluded that as of April 30, 2025, no provision for income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue

Under the applicable foreign tax laws, a withholding tax may be imposed on interest, dividends and capital gains at various rates. As of April 30, 2025, there were \$814 of capital gains tax liabilities accrued on unrealized gains.

(p) Reclassification. GAAP requires that certain components of net assets be reclassified to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. During the current year, the Fund had no reclassifications.

2. Investment management agreement and other transactions with affiliates

Franklin Templeton Fund Adviser, LLC ("FTFA") is the Fund's investment manager. Western Asset Management Company, LLC ("Western Asset"), Western Asset Management Company Limited ("Western Asset London") and Western Asset Management Company Pte. Ltd. ("Western Asset Singapore") are the Fund's subadvisers. FTFA, Western Asset, Western Asset London and Western Asset Singapore are indirect, wholly-owned subsidiaries of Franklin Resources, Inc. ("Franklin Resources").

FTFA provides administrative and certain oversight services to the Fund. The Fund pays FTFA an investment management fee, calculated daily and paid monthly, at an annual rate of 0.80% of the Fund's average weekly net assets plus the proceeds of any outstanding borrowings used for leverage and any proceeds from the issuance of preferred stock.

FTFA delegates to Western Asset the day-to-day portfolio management of the Fund. Western Asset London and Western Asset Singapore provide certain subadvisory services to the Fund relating to currency transactions and investments in non-U.S. dollar denominated debt securities. Western Asset London and Western Asset Singapore do not receive any compensation from the Fund and are paid by Western Asset for their services to

the Fund. For its services, FTFA pays Western Asset a fee monthly, at an annual rate equal to 70% of the net management fee it receives from the Fund. In turn, Western Asset pays Western Asset London and Western Asset Singapore a monthly subadvisory fee in an amount equal to 100% of the management fee paid to Western Asset on the assets that Western Asset allocates to each such non-U.S. subadviser to manage.

During periods in which the Fund utilizes financial leverage, the fees paid to FTFA will be higher than if the Fund did not utilize leverage because the fees are calculated as a percentage of the Fund's assets, including those investments purchased with leverage.

The manager has agreed to waive the Fund's management fee to an extent sufficient to offset the net management fee payable in connection with any investment in an affiliated money market fund (the "affiliated money market fund waiver").

Effective June 1, 2024, FTFA implemented a voluntary investment management fee waiver of 0.05% that will continue until June 30, 2026.

During the year ended April 30, 2025, fees waived and/or expenses reimbursed amounted to \$278,723, which included an affiliated money market fund waiver of \$4,965.

All officers and one Director of the Fund are employees of Franklin Resources or its affiliates and do not receive compensation from the Fund.

3. Investments

During the year ended April 30, 2025, the aggregate cost of purchases and proceeds from sales of investments (excluding short-term investments) and U.S. Government & Agency Obligations were as follows:

		U.S. Government &	
	Investments	Agency Obligations	
Purchases	\$277,461,355	\$3,498,194	
Sales	296,458,501	3,445,625	

At April 30, 2025, the aggregate cost of investments and the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were as follows:

				Net
		Gross	Gross	Unrealized
	Cost/Premiums	Unrealized	Unrealized	Appreciation
	Paid (Received)	Appreciation	Depreciation	(Depreciation)
Securities	\$557,380,754	\$29,394,717	\$(19,849,563)	\$9,545,154
Forward foreign currency contracts	_	_	(494,254)	(494,254)
Swap contracts	249,477	_	(94,594)	(94,594)

Transactions in reverse repurchase agreements for the Fund during the year ended April 30, 2025, were as follows:

Average Daily	Weighted Average	Maximum Amount
Balance*	Interest Rate*	Outstanding
\$36,054,390	5.319%	\$37,175,249

^{*} Averages based on the number of days that the Fund had reverse repurchase agreements outstanding.

Interest rates on reverse repurchase agreements ranged from 4.720% to 6.000% during the year ended April 30, 2025. Interest expense incurred on reverse repurchase agreements totaled \$1.944.474.

4. Derivative instruments and hedging activities

Below is a table, grouped by derivative type, that provides information about the fair value and the location of derivatives within the Statement of Assets and Liabilities at April 30, 2025.

LIABILITY DERIVATIVES¹

	Foreign	Credit	
	Exchange Risk	Risk	Total
Forward foreign currency contracts	\$494,254	_	\$494,254
Centrally cleared swap contracts ²	_	\$94,594	94,594
Total	\$494,254	\$94,594	\$588,848

¹ Generally, the balance sheet location for asset derivatives is receivables/net unrealized appreciation and for liability derivatives is payables/net unrealized depreciation.

The following tables provide information about the effect of derivatives and hedging activities on the Fund's Statement of Operations for the year ended April 30, 2025. The first table provides additional detail about the amounts and sources of gains (losses) realized on derivatives during the period. The second table provides additional information about the change in net unrealized appreciation (depreciation) resulting from the Fund's derivatives and hedging activities during the period.

AMOUNT OF NET REALIZED GAIN (LOSS) ON DERIVATIVES RECOGNIZED

	Foreign	Credit	
	Exchange Risk	Risk	Total
Swap contracts	_	\$(15,741)	\$ (15,741)
Forward foreign currency contracts	\$443,979	_	443,979
Total	\$443,979	\$(15,741)	\$428,238

Includes cumulative unrealized appreciation (depreciation) of centrally cleared swap contracts as reported in the Schedule of Investments. Only net variation margin is reported within the receivables and/or payables on the Statement of Assets and Liabilities.

CHANGE IN NET UNREALIZED APPRECIATION (DEPRECIATION) ON DERIVATIVES RECOGNIZED

	Foreign	Credit	
	Exchange Risk	Risk	Total
Swap contracts	_	\$(94,594)	\$ (94,594)
Forward foreign currency contracts	\$(681,990)	_	(681,990)
Total	\$(681,990)	\$(94,594)	\$(776,584)

During the year ended April 30, 2025, the volume of derivative activity for the Fund was as follows:

	Average Market Value
Forward foreign currency contracts (to buy)†	\$ 4,682,508
Forward foreign currency contracts (to sell)	23,946,447
	Average Notional
	Balance
Credit default swap contracts (sell protection)	\$ 1,975,385

[†] At April 30, 2025, there were no open positions held in this derivative.

The following table presents the Fund's OTC derivative assets and liabilities by counterparty net of amounts available for offset under an ISDA Master Agreement and net of the related collateral pledged (received) by the Fund as of April 30, 2025.

		Gross	Net Assets		
	Gross Assets	Liabilities	(Liabilities)		
	Subject to	Subject to	Subject to	Collateral	
	Master	Master	Master	Pledged	Net
Counterparty	Agreements	Agreements ¹	Agreements	(Received)	Amount ^{2,3}
Bank of America N.A.	_	\$(494,254)	\$(494,254)	_	\$(494,254)

Absent an event of default or early termination, derivative assets and liabilities are presented gross and not offset in the Statement of Assets and Liabilities.

5. Loan

The Fund has a Margin Loan and Security Agreement (the "BofA Credit Agreement") with the Bank of America, N.A. ("BofA"). The BofA Credit Agreement allows the Fund to borrow up to an aggregate amount of \$190,000,000 effective August 2, 2024 (\$220,000,000 prior to August 2, 2024) and renews daily for a 179-day term unless notice to the contrary is given to the Fund. The Fund pays interest on borrowings calculated based on SOFR plus applicable margin. The Fund pays a commitment fee on the unutilized portion of the loan commitment amount at an annual rate of 0.15% except that the commitment fee is 0.10% when the aggregate outstanding balance of the loan is equal to or greater than 50% of the maximum commitment amount. To the extent of the borrowing outstanding, the Fund is required to maintain collateral in a special custody account at the Fund's custodian on

Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

³ Represents the net amount receivable (payable) from (to) the counterparty in the event of default.

behalf of BofA. The BofA Credit Agreement contains customary covenants that, among other things, may limit the Fund's ability to pay distributions in certain circumstances, incur additional debt, change certain material investment policies and engage in certain transactions, including mergers and consolidations, and require asset coverage ratios in addition to those required by the 1940 Act. In addition, the BofA Credit Agreement may be subject to early termination under certain conditions and may contain other provisions that could limit the Fund's ability to utilize borrowing under the agreement. Interest expense related to the Credit Agreement for the year ended April 30, 2025 was \$9,052,172. For the year ended April 30, 2025, the Fund incurred commitment fees of \$42,187. For the year ended April 30, 2025, based on the number of days during the reporting period that the Fund had a loan balance outstanding, the average daily loan balance was \$156,035,616 and the weighted average interest rate was 5.72%. At April 30, 2025, the Fund had \$157,000,000 of borrowings outstanding.

6. Distributions subsequent to April 30, 2025

The following distributions have been declared by the Fund's Board and are payable subsequent to the period end of this report:

Record Date	Payable Date	Amount
4/23/2025	5/1/2025	\$0.0490
5/22/2025	6/2/2025	\$0.0490
6/23/2025	7/1/2025	\$0.0490
7/24/2025	8/1/2025	\$0.0490
8/22/2025	9/2/2025	\$0.0490

7. Stock repurchase program

On November 16, 2015, the Fund announced that the Fund's Board had authorized the Fund to repurchase in the open market up to approximately 10% of the Fund's outstanding common stock when the Fund's shares are trading at a discount to net asset value. The Board has directed management of the Fund to repurchase shares of common stock at such times and in such amounts as management reasonably believes may enhance stockholder value. The Fund is under no obligation to purchase shares at any specific discount levels or in any specific amounts. During the years ended April 30, 2025, and April 30, 2024, the Fund did not repurchase any shares.

Since the commencement of the stock repurchase program through April 30, 2025, the Fund repurchased 1,964,984 shares or 2.28% of its common shares outstanding for a total amount of \$10,774,478.

8. Capital shares

On January 19, 2024, the Fund announced that the Fund's Board had approved a transferable rights offering ("Rights") to common shareholders of record ("Record Date") as of January 29, 2024, to subscribe for additional shares of common stock for up to an aggregate offering 22,508,740 shares. The Rights offering expired on February 26, 2024.

Each Record Date stockholder received one right for each outstanding whole common share held. The Rights holders were entitled to purchase one additional share of common stock for every three Rights held ("Primary Subscription") at the final subscription price ("Subscription Price") per share. Stockholders who held fewer than three common shares on Record Date were entitled to subscribe for one common share, and fractional shares were not issued. The Subscription Price was determined based upon a formula equal to 92.5% of the average of the last reported sales price per share of the Fund's common stock on the New York Stock Exchange ("NYSE") on the expiration date and each of the four preceding trading days ("Formula Price"). If, however, the Formula Price was less than 90% of the net asset value per share of common stock at the close of trading on the NYSE on the expiration date, then the Subscription Price was 90% of the Fund's net asset value per share of common stock at the close of trading on the NYSE on that day. Record Date stockholders who fully exercised their Rights in the Primary Subscription were eligible for an over-subscription privilege entitling those stockholders to subscribe for any additional shares of common stock not purchased pursuant to the Primary Subscription, subject to certain limitations, allotment and the right of the Board to have eliminated the oversubscription privilege. Holders of Rights acquired in the secondary market were not able to participate in the over-subscription privilege. The Rights offering resulted in the issuance of 22,508,740 shares of common stock. The gross proceeds from the Rights offering were \$96,787,582. The Fund received the gross proceeds of the Rights offering less fees and expenses totaling \$419,377. The shares of common stock subscribed were issued on March 4, 2024.

On March 29, 2022, the Fund announced that the Fund's Board had approved a transferable rights offering ("Rights") to common shareholders of record ("Record Date") as of April 8. 2022, to subscribe for additional shares of common stock for up to an aggregate offering price of \$175,000,000. The Rights offering expired on May 6, 2022. Each Record Date stockholder received one right for each outstanding whole common share held. The Rights holders were entitled to purchase one additional share of common stock for every three Rights held ("Primary Subscription") at the final subscription price ("Subscription Price") per share. Stockholders who held fewer than three common shares on Record Date were entitled to subscribe for one common share, and fractional shares were not issued. The Subscription Price was determined based upon a formula equal to 92.5% of the average of the last reported sales price per share of the Fund's common stock on the New York Stock Exchange ("NYSE") on the expiration date and each of the four preceding trading days ("Formula Price"). If, however, the Formula Price was less than 90% of the net asset value per share of common stock at the close of trading on the NYSE on the expiration date, then the Subscription Price was 90% of the Fund's net asset value per share of common stock at the close of trading on the NYSE on that day. Record Date stockholders who fully exercised their Rights in the Primary Subscription were eligible for an over-subscription privilege entitling those stockholders to subscribe for any additional shares of common stock not purchased pursuant to the Primary Subscription, subject to certain limitations, allotment

and the right of the Board to have eliminated the over-subscription privilege. Holders of Rights acquired in the secondary market were not able to participate in the over-subscription privilege. The Rights offering resulted in the issuance of 6,001,836 shares of common stock. The gross proceeds from the Rights offering were \$31,029,492. The Fund received the gross proceeds of the Rights offering less fees and expenses totaling \$361,849. The shares of common stock subscribed were issued on May 13, 2022.

The Fund filed a registration statement with the Securities and Exchange Commission, effective December 9, 2022, authorizing the Fund to offer and sell shares of common stock having an aggregate offering price of up to \$143,970,507. Under the equity shelf offering program, the Fund, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above the Fund's then-current net asset value per common share. Costs incurred by the Fund in connection with the shelf offering are recorded as a prepaid expense. These costs are amortized on a pro-rata basis as shares are sold and are presented as a reduction to the net proceeds from sale of shares on the Statement of Changes in Net Assets. Any deferred charges remaining at the end of the life of the shelf offering period will be expensed.

The Fund filed a new registration statement with the Securities and Exchange Commission on March 21, 2025, but the registration statement has not yet been declared effective.

For the year ended April 30, 2025, the Fund incurred net offering costs of \$339,401. For the year ended April 30, 2024, the Fund sold 23,611,515 shares of common stock and the proceeds from such sales were \$102,068,931, net of offering costs and sales charges of \$91,993 and \$53,215, respectively.

9. Transactions with affiliated company

V tt:1: -+-

As defined by the 1940 Act, an affiliated company is one in which the Fund owns 5% or more of the outstanding voting securities, or a company which is under common ownership or control with the Fund. The following company was considered an affiliated company for all or some portion of the year ended April 30, 2025. The following transactions were effected in such company for the year ended April 30, 2025.

	Value at April 30, 2024	Purch	ased	So	ld
		Cost	Shares	Proceeds	Shares
Western Asset Premier Institutional Government Reserves, Premium Shares	\$5,390,472	\$194,085,319	194,085,319	\$198,752,830	198,752,830

Notes to financial statements (cont'd)

(cont'd)	Realized Gain (Loss)	Dividend Income	Net Increase (Decrease) in Unrealized Appreciation (Depreciation)	Affiliate Value at April 30, 2025
Western Asset Premier Institutional Government Reserves, Premium Shares	_	\$208,436	_	\$722,961

10. Restricted securities

The following Fund investments are restricted as to resale and, in the absence of readily ascertainable market values, are fair valued in accordance with procedures approved by the Board.

Security	Number of Shares/ Warrants	Acquisition Date	Cost	Fair Value at 4/30/2025	Value Per Share/Warrant	Percent of Net Assets
Spirit Airlines LLC, Common Shares	422	3/25	\$ 5,137	\$ 3,524	\$8.35	0.00%(a)
Spirit Airlines LLC, Warrants	51,648	3/25	628,730	431,261 ^(b)	8.35	0.11
			\$633,867	\$434,785		0.11%

⁽a) Amount represents less than 0.005%.

11. Income tax information and distributions to shareholders

The tax character of distributions paid during the fiscal years ended April 30, was as follows:

	2025	2024
Distributions paid from:		
Ordinary income	\$36,134,012	\$32,947,370
Tax return of capital	16,806,544	8,737,521
Total distributions paid	\$52,940,556	\$41,684,891

As of April 30, 2025, the components of distributable earnings (loss) on a tax basis were as follows:

Total distributable earnings (loss) — net	\$(276,275,193)
Unrealized appreciation (depreciation)(b)	8,969,283
Other book/tax temporary differences ^(a)	(6,227,468)
Deferred capital losses*	\$(279,017,008)

⁽b) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board.

- * These capital losses have been deferred in the current year as either short-term or long-term losses. The losses will be deemed to occur on the first day of the next taxable year in the same character as they were originally deferred and will be available to offset future taxable capital gains.
- (a) Other book/tax temporary differences are attributable to the realization for tax purposes of unrealized gains (losses) on forward contracts, deferral of certain late year losses for tax purposes and book/tax differences in the timing of the deductibility of various expenses.
- (b) The difference between book-basis and tax-basis unrealized appreciation (depreciation) is attributable to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium on fixed income securities; book/tax differences in the accrual of interest income on securities in default.

12. Recent accounting pronouncement

In December 2023, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2023-09, *Income Taxes (Topic 740) — Improvements to Income Tax Disclosures*. The amendments enhance income tax disclosures by requiring greater disaggregation in the rate reconciliation and income taxes paid by jurisdiction, while removing certain disclosure requirements. The ASU is effective for annual periods beginning after December 15, 2024, with early adoption permitted. Management is currently evaluating the impact and believes that the adoption of the ASU will not have a material impact on the financial statements.

13. Operating segments

The Fund has adopted the Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2023-07, *Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures.* The update is limited to disclosure requirements and does not impact the Fund's financial position or results of operations.

The Fund operates as a single operating segment, which is an investment portfolio. The Fund's Investment Manager serves as the Chief Operating Decision Maker (CODM), evaluating fund-wide results and performance under a unified investment strategy. The CODM uses these measures to assess fund performance and allocate resources effectively. Internal reporting provided to the CODM aligns with the accounting policies and measurement principles used in the financial statements.

For information regarding segment assets, segment profit or loss, and significant expenses, refer to the Statement of Assets and Liabilities and the Statement of Operations, along with the related Notes to Financial Statements. The Fund's Schedule of Investments provides details of the Fund's investments that generate returns such as interest, dividends, and realized and unrealized gains or losses. Performance metrics, including portfolio turnover and expense ratios, are disclosed in the Financial Highlights.

Report of independent registered public accounting firm

To the Board of Directors and Shareholders of Western Asset High Income Fund II Inc.

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of Western Asset High Income Fund II Inc. (the "Fund") as of April 30, 2025, the related statements of operations and cash flows for the year ended April 30, 2025, the statement of changes in net assets for each of the two years in the period ended April 30, 2025, including the related notes, and the financial highlights for each of the five years in the period ended April 30, 2025 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of April 30, 2025, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period ended April 30, 2025 and the financial highlights for each of the five years in the period ended April 30, 2025 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of April 30, 2025 by correspondence with the custodian, agent banks, and brokers; when replies were not received, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/PricewaterhouseCoopers LLP

Baltimore, Maryland June 19, 2025

We have served as the auditor of one or more investment companies in the Franklin Templeton Group of Funds since 1948.

- † Directors who are not "interested persons" of the Fund within the meaning of Section 2(a)(19) of the 1940 Act.
- * Effective November 15, 2024, Ms. Sale and Messrs. Grillo and Mason became Directors of the Fund.
- ** Effective November 15, 2024, Ms. Kamerick became Chair of the Board.
- 1 The Fund's Board of Directors is divided into three classes: Class I, Class II and Class III. The terms of office of the Class I, II and III Directors expire at the Annual Meetings of Stockholders in the year 2026, year 2027 and year 2025, respectively, or thereafter in each case when their respective successors are duly elected and qualified. The Fund's executive officers are chosen each year, to hold office until their successors are duly elected and qualified.
- 2 Ms. Trust is an "interested person" of the Fund as defined in the 1940 Act because Ms. Trust is an officer of FTFA and certain of its affiliates

Daniel P. Cronin and Paolo M. Cucchi resigned from the Board effective December 31, 2024.

The term "fund complex" means two or more registered investment companies that:

- (a) hold themselves out to investors as related companies for purposes of investment and investor services; or
- (b) have a common investment adviser or that have an investment adviser that is an affiliated person of the investment adviser of any of the other registered investment companies.

Annual chief executive officer and principal financial officer certifications (unaudited)

The Fund's Chief Executive Officer ("CEO") has submitted to the NYSE the required annual certification and the Fund also has included the Certifications of the Fund's CEO and Principal Financial Officer required by Section 302 of the Sarbanes-Oxley Act in the Fund's Form N-CSR filed with the SEC for the period of this report.

Other shareholder communications regarding accounting matters (unaudited)

The Fund's Audit Committee has established guidelines and procedures regarding the receipt, retention and treatment of complaints regarding accounting, internal accounting controls or auditing matters (collectively, "Accounting Matters"). Persons with complaints or concerns regarding Accounting Matters may submit their complaints to the Chief Compliance Officer ("CCO"). Persons who are uncomfortable submitting complaints to the CCO, including complaints involving the CCO, may submit complaints directly to the Fund's Audit Committee Chair. Complaints may be submitted on an anonymous basis.

The CCO may be contacted at: Franklin Resources Inc. Compliance Department One Madison Avenue, 17th Floor New York, NY 10010

Complaints may also be submitted by telephone at 1-800-742-5274. Complaints submitted through this number will be received by the CCO.

Important information to shareholders (unaudited)

UPDATED DISCLOSURES FOR THE FUND

The following additional information is provided for the Fund as of the fiscal year ended April 30, 2025.

Summary of Fund Expenses

Sales Load (as a percentage of offering price)(1)	1.00%
Offering Expense (as a percentage of offering price) ⁽²⁾	0.09%
Dividend Reinvestment Plan Fees ⁽³⁾	\$5.00

Annual Operating Expenses

	Percentage of Net Assets Attributable to Common Shares		
Management Fees ⁽⁴⁾	1.18%		
Interest Payments on Borrowed Funds ⁽⁵⁾	2.71%		
Other Expenses ⁽⁶⁾	0.18%		
Total Annual Fund Operating Expenses	4.07%		

- (1) Represents the estimated commission with respect to the Common Stock being sold in at-the-market offerings. Jones Trading will be entitled to compensation of up to 1.00% of the gross proceeds of the sale of any Common Stock under the Sales Agreement, with the exact amount of such compensation to be mutually agreed upon in writing by the Fund and Jones Trading from time to time.
- (2) Costs incurred by the Fund in connection with the shelf offering are recorded as a prepaid expense. These costs are amortized on a pro-rata basis as shares are sold and are presented as a reduction to the net proceeds from the sale of shares. Any deferred charges remaining at the end of the life of the shelf offering period will be expensed.
- (3) Common Stockholders will pay brokerage charges if they direct the Plan Agent to sell shares of Common Stock held in a dividend reinvestment account. There are no fees charged to stockholders for participating in the Fund's dividend reinvestment plan. However, stockholders participating in the Plan that elect to sell their shares obtained pursuant to the plan would pay \$5.00 per transaction to sell shares.
- (4) The Investment Manager receives an annual fee, payable monthly, in an amount equal to 0.80% of the Fund's average weekly "Managed Assets". Managed Assets means net assets plus the amount of any borrowings (including loans from certain financial institutions, the use of reverse repurchase agreements and/or the issuance of debt securities, collectively "Borrowings"). For the purposes of this table, we have assumed that the Fund has utilized Borrowings in an aggregate amount of 28% of its Managed assets, which equals the average level of Borrowings for the Fund's fiscal year ended April 30, 2025. If the Fund were to use Borrowings in excess of 28%, the amount of management fees paid to the Investment Manager would be higher because the fees paid are calculated on the Fund's Managed Assets, which include assets purchased with Borrowings.
- (5) The Fund has utilized Borrowings in an aggregate amount of 28% of its Managed Assets, which equals the average level of leverage for the Fund's fiscal year ended April 30, 2025. The expenses and rates associated with leverage may vary.
- (6) "Other Expenses" are based on amounts incurred in the fiscal year ended April 30, 2025.

Examples

An investor would pay the following expenses (including a sales load of \$10.00 and offering costs of \$0.90) on a \$1.000 investment in the Fund, assuming a 5% annual return:

One Year	Three Years	Five Years	Ten Years
\$51	\$133	\$217	\$433

Important information to shareholders (unaudited) (cont'd)

The above table and example are intended to assist investors in understanding the various costs and expenses directly or indirectly associated with investing in Shares of the Fund. The "Example" assumes that all dividends and other distributions are reinvested at net asset value and that the percentage amounts listed in the table above under Total Annual Operating Expenses remain the same in the years shown. The above table and example and the assumption in the example of a 5% annual return are required by regulations of the SEC that are applicable to all investment companies; the assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Fund's Common Shares

The example should not be considered a representation of past or future expenses, and the Fund's actual expenses may be greater than or less than those shown. The Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

Market Price and Net Asset Valuation (NAV) Information

The Fund's Common Stock is traded on the NYSE under the symbol "HIX". The below table details for the period indicated the high and low closing market prices, the NAV, and premium to or discount from NAV, on the date of each of the high and low market prices.

				Quarterly Closing		Quarterly Closing	
	Quarterly Closing		NAV Price		Premium/(Discount)		
	Marke	Market Price		on Date of Market Price		on Date of Market Price	
	High	Low	High	Low	High	Low	
Fiscal Year 2025:							
July 31, 2024	\$4.52	\$4.34	\$4.57	\$4.53	(1.09)%	(4.19)%	
October 31, 2024	\$4.53	\$4.31	\$4.64	\$4.49	(2.37)%	(4.01)%	
January 31, 2025	\$4.53	\$4.18	\$4.56	\$4.44	(0.66)%	(5.86)%	
April 30, 2025	\$4.41	\$3.75	\$4.49	\$4.18	(1.78)%	(10.29)%	
Fiscal Year 2024:							
July 31, 2023	\$4.96	\$4.39	\$4.80	\$4.58	3.33%	(4.15)%	
October 31, 2023	\$5.07	\$4.18	\$4.78	\$4.41	6.07%	(5.22)%	
January 31, 2024	\$4.99	\$4.31	\$4.84	\$4.42	3.10%	(2.49)%	
April 30, 2024	\$4.58	\$4.23	\$4.81	\$4.54	(4.78)%	(6.83)%	

Source of market prices: NYSE.

The NAV per Common Share on April 30, 2025 was \$4.26 and the market price per Common Stock at the close of business on April 30, 2025 was \$4.08, representing a 4.23% discount from such net asset value. As of April 30, 2025, the Fund has 90,034,960 outstanding shares of Common Stock

Shares of a closed-end investment company may frequently trade at prices lower than NAV. The Fund's Common Stock has traded in the market below, at and above net asset value since the commencement of the Fund's operations. The Fund cannot determine the reasons why the Fund's Common Stock trades at a premium to or discount from NAV, nor can the Fund predict whether its Stock will trade in the future at a premium to or discount from NAV, or the level of any premium or discount. The Board regularly monitors the relationship between the market price and NAV of the Common Stock. If the Common Stock were to trade at a substantial discount to NAV for an extended period of time, the Board may consider the repurchase of the Fund's Common Stock on the open market, the making of a tender offer for such shares or other programs intended to reduce the discount. The Fund cannot assure you that its Board will decide to take or propose any of these actions, or that share repurchases or tender offers will actually reduce market discount.

Senior Securities Table

The Fund engaged in senior securities during the prior ten years as follows:

Fiscal Year Ended	Total Amount Outstanding ⁽¹⁾	Asset Coverage per \$1,000 ⁽²⁾	Market Value Per Unit ⁽³⁾
Revolving Credit Facility:			
April 30, 2025*	\$157,000,000	\$3,444	N/A
April 30, 2024*	\$147,000,000	\$3,752	N/A
April 30, 2023*	\$106,000,000	\$3,959	N/A
April 30, 2022*	\$154,500,000	\$3,236	N/A
April 30, 2021*	\$158,000,000	\$3,654	N/A
April 30, 2020*	\$208,000,000	\$3,506	N/A
April 30, 2019*	\$246,500,000	\$3,524	N/A
April 30, 2018	\$235,000,000	\$3,710	N/A
April 30, 2017	\$240,000,000	\$3,796	N/A
April 30, 2016	\$240,000,000	\$3,557	N/A

^{*} The Fund had open reverse repurchase agreements at April 30, 2025, 2024, 2023, 2022, 2021, 2020 and 2019.

UNRESOLVED STAFF COMMENTS

The Fund believes that there are no material unresolved written comments, received 180 days or more before April 30, 2025, from the Staff of the Securities and Exchange Commission regarding any of its periodic or current reports under the Securities Exchange Act of 1934 or the 1940 Act, or its registration statement.

Average

⁽¹⁾ Total amount of senior securities outstanding at the end of the period presented.

⁽²⁾ Asset coverage per \$1,000 of indebtedness is the value of net assets plus the senior securities outstanding at the end of the period divided by the senior securities outstanding at the end of the period.

⁽³⁾ Not applicable, as these senior securities were not registered for public trading.

Summary of information regarding the Fund (unaudited)

Investment Objectives

The Fund's primary investment objective is to maximize current income by investing at least 80% of its net assets, plus any borrowings for investment purposes, in high-yield debt securities. As a secondary objective, the Fund seeks capital appreciation to the extent consistent with its objective of seeking to maximize current income.

Principal Investment Policies and Strategies

Under normal conditions, the Fund will invest at least 80% of its net assets plus any borrowings for investment purposes in high-yield debt securities. The Fund's investment manager is free to invest in debt securities of any maturity. Certain of the debt securities purchased by the Fund may be rated as low as "C" by Moody's Investor Service ("Moody's") or "D" by Standard & Poor's Ratings Services ("S&P") or may be comparable to securities so rated. The Fund is not required to dispose of a debt security if its credit rating or credit quality declines.

The Fund invests up to 35% of its total assets in debt securities of issuers located in emerging market countries. "Emerging market country" is defined to include any country which is, at the time of investment, (i) represented in the J.P. Morgan Emerging Market Bond Index Global or the J.P. Morgan Corporate Emerging Market Bond Index Broad or (ii) categorized by the World Bank in its annual categorization as middle- or low-income. The Fund may also invest in securities denominated in currencies of emerging market countries. There is no minimum rating criteria for the Fund's investments in such securities. The Fund's investments in debt securities of emerging market issuers may include dollar and non-dollar-denominated (a) debt obligations issued or guaranteed by foreign national, provincial, state, municipal or other governments with taxing authority or by their agencies or instrumentalities; (b) debt obligations of supranational entities; (c) debt obligations and other fixed-income securities of foreign corporate issuers; (d) debt obligations of U.S. corporate issuers; and (e) debt securities issued by corporations that generate significant profits from emerging market countries.

The Fund may invest up to 30% of its assets in zero coupon securities, pay-in-kind bonds and deferred payment securities. The Fund may also invest up to 20% of its total assets in common stock, convertible securities, warrants, preferred stock or other equity securities of U.S. and foreign issuers when consistent with its objectives.

The Fund may invest in high-yield foreign and U.S. corporate securities including bonds, debentures, notes, commercial paper and preferred stock and will generally be unsecured. The Fund may invest in corporate debt securities with variable rates of interest or which involve equity features, such as contingent interest or participations based on revenues, sales or profits (i.e., interest or other payments, often in addition to a fixed rate of return, that are based on the borrower's attainment of specified levels of revenues, sales or profits

and thus enable the holder of the security to share in the potential success of the venture). The Fund may invest in high-yield debt securities with floating interest rates.

The Fund may invest in fixed and floating rate loans arranged through private negotiations between a corporate borrower or a foreign sovereign entity and one or more financial institutions in the form of participations in loans and assignments of all or a portion of loans from third parties.

In times of adverse market conditions, the Fund may employ alternative strategies, including investment of a substantial portion of the Fund's assets in securities rated higher than "Baa" by Moody's or "BBB" by S&P, or in unrated securities of comparable quality. In addition, in order to maintain liquidity, the Fund may invest up to 35% of its total assets in high-quality short-term money market instruments. Such instruments may include obligations of the U.S. Government or its agencies or instrumentalities; commercial paper of issuers rated, at the time of purchase, A-2 or better by S&P or P-2 or better by Moody's or which, in the opinion of management, are of comparable creditworthiness; certificates of deposit, banker's acceptances or time deposits of United States banks with total assets of at least \$1 billion (including obligations of foreign branches of such banks) and of the 75 largest foreign commercial banks in terms of total assets (including domestic branches of such banks); and repurchase agreements with respect to the foregoing obligations.

In times of adverse market conditions, the Fund may invest its assets without limit in high-quality short-term money market instruments.

Pursuant to the 1940 Act, the Fund may use leverage through borrowings in an aggregate amount of up to approximately 33 1/3% of the Fund's total assets less all liabilities and indebtedness not represented by senior securities (for these purposes, "total net assets") immediately after such borrowings. Furthermore, the Fund may use leverage through the issuance of preferred stock in an aggregate amount of liquidation preference attributable to the preferred stock combined with the aggregate amount of any borrowings of up to approximately 50% of the Fund's total net assets immediately after such issuance.

The Fund may, in addition to engaging in the transactions described above, borrow money for temporary or emergency purposes (including, for example, clearance of transactions, share repurchases or payments of dividends to stockholders) in an amount not exceeding 5% of the value of the fund's total assets (including the amount borrowed).

Under Rule 18f-4(d), the Fund may enter into reverse repurchase agreements or similar financing transactions in reliance on the rule if the Fund either (i) complies with the asset coverage requirements of Section 18 of the 1940 Act, and combines the aggregate amount of indebtedness associated with all reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing

Summary of information regarding the Fund (unaudited) (cont'd)

indebtedness when calculating its asset coverage ratio; or (ii) treats all reverse repurchase agreements or similar financing transactions as derivatives transactions for all purposes under the rule

The Fund may engage in currency transactions with counterparties to hedge the value of portfolio securities denominated in particular currencies against fluctuations in relative value or to generate income or gain. Currency transactions include currency forward contracts, exchange-listed currency futures contracts and options thereon, exchange-listed and OTC options on currencies and currency swaps.

The Fund may use a variety of derivative instruments as part of its investment strategies or for hedging or risk management purposes. Examples of derivative instruments that the fund may use include options contracts, futures contracts, options on futures contracts, credit default swaps and other swap agreements. The Fund may purchase and sell futures contracts, purchase and sell (or write) exchange-listed and over-the-counter put and call options on securities, financial indices and futures contracts, enter into various interest rate and currency transactions and enter into other similar transactions which may be developed in the future to the extent the management determines that they are consistent with the fund's investment objectives and policies and applicable regulatory requirements. The Fund may use any or all of these techniques at any time, and the use of any particular derivative transaction will depend on market conditions.

The Fund may enter into interest rate swaps and may purchase interest rate caps, floors and collars and may sell interest rate caps, floors and collars that it has purchased.

The Fund may also enter into (a) contracts for the purchase or sale for future delivery ("futures contracts") of debt securities, aggregates of securities, indices based upon the prices thereof and other financial indices and (b) put or call options on such futures contracts

The Fund may purchase or sell exchange-traded or over-the-counter put or call options on securities and indices based upon the prices, yields or spreads of securities.

The Fund may purchase securities on a firm commitment basis, including when-issued securities. The Fund may also invest in delayed-delivery securities.

The Fund may lend portfolio securities to brokers or dealers or other financial institutions. The Fund does not currently intend to make loans of portfolio securities with a value in excess of 33 1/3% of the value of its total assets.

The Fund may invest, without limitation, in illiquid securities, which are securities that cannot be sold within seven days at a price which the fund would determine to be fair value. The Fund may purchase Rule 144A securities for which there is a secondary market of qualified institutional buyers, as defined in Rule 144A promulgated under the Securities

Act. The Fund may purchase securities for which there is a limited trading market or which are subject to restrictions on resale to the public.

The Fund may invest in dollar rolls, asset-backed securities and mortgage-backed securities.

Principal Risk Factors

There is no assurance that the Fund will meet its investment objectives. You may lose money on your investment in the Fund. The value of the Fund's shares may go up or down, sometimes rapidly and unpredictably. Market conditions, financial conditions of issuers represented in the Fund's portfolio, investment strategies, portfolio management, and other factors affect the volatility of the Fund's shares. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

The following section includes a summary of the principal risks of investing in the Fund.

Investment Risk and Market Risk. An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in the Fund represents an indirect investment in the securities owned by the Fund. The value of these securities may increase or decrease, at times rapidly and unexpectedly. Your investment in the Fund may at any point in the future be worth less than your original investment even after taking into account the reinvestment of dividends and distributions.

Below Investment Grade Securities (High-Yield) Risk. At any one time, substantially all of the Fund's Managed Assets may be invested in high-yield debt securities. High yield debt securities are generally subject to greater credit risks than higher-grade debt securities, including the risk of default on the payment of interest or principal. High yield debt securities are considered speculative, typically have lower liquidity and are more difficult to value than higher grade bonds. High yield debt securities tend to be volatile and more susceptible to adverse events, credit downgrades and negative sentiments and may be difficult to sell at a desired price, or at all, during periods of uncertainty or market turmoil.

Low Rated and Unrated Securities. The Fund may invest in instruments that are low rated or unrated. Debt securities of emerging market issuers may be considered to have a credit quality rated below investment grade by internationally recognized credit rating organizations such as Moody's and S&P. Non-investment grade securities (that is, rated Ba1 or lower by Moody's or BB+ or lower by S&P) are commonly referred to as "junk bonds" and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk exposure to adverse conditions. Some of the emerging market issuer securities held by the Fund, which may not be paying interest currently or may be in payment default, may be comparable to securities rated as low as C by Moody's or CCC or lower by S&P. These securities are considered to have extremely poor prospects of ever attaining any real

Summary of information regarding the Fund (unaudited) (cont'd)

investment standing, to have a current identifiable vulnerability to default, to be unlikely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions and/or to be in default or not current in the payment of interest or principal.

Low rated and unrated debt instruments generally offer a higher current yield than that available from higher grade issues, but typically involve greater risk. Low rated and unrated securities are especially subject to adverse changes in general economic conditions, to changes in the financial condition of their issuers and to price fluctuation in response to changes in interest rates. During periods of economic downturn or rising interest rates, issuers of low rated and unrated instruments may experience financial stress that could adversely affect their ability to make payments of principal and interest and increase the possibility of default. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of low rated and unrated securities especially in a market characterized by a low volume of trading.

Default Risk. Investments in fixed-income securities are subject to the risk that the issuer of the security could default on its obligations, causing a fund to sustain losses on those investments. A default could impact both interest and principal payments. High-yield fixed-income securities (commonly known as "junk bonds") are considered speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations. This means that, compared to issuers of higher rated securities, issuers of medium and lower rated securities are less likely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions and/or may be in default or not current in the payment of interest or principal.

The market values of medium and lower rated securities tend to be more sensitive to company-specific developments and changes in economic conditions than higher rated securities. The companies that issue these securities often are highly leveraged, and their ability to service their debt obligations during an economic downturn or periods of rising interest rates may be impaired. In addition, these companies may not have access to more traditional methods of financing, and may be unable to repay debt at maturity by refinancing. The risk of loss due to default in payment of interest or principal by these issuers is significantly greater than with higher rated securities because medium and lower rated securities generally are unsecured and subordinated to senior debt.

Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in the Common Stock. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings.

Foreign (Non-U.S.) Investment Risk. A fund that invests in foreign (non-U.S.) securities may experience more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Investments in foreign securities (including those denominated in U.S. dollars) are subject to economic and political developments in the countries and regions where the issuers operate or are domiciled, or where the securities are traded, such as changes in economic or monetary policies. Values may also be affected by restrictions on receiving the investment proceeds from a foreign country. Less information may be publicly available about foreign companies than about U.S. companies. Foreign companies are generally not subject to the same accounting, auditing and financial reporting standards as are U.S. companies. In addition, the Fund's investments in foreign securities may be subject to the risk of nationalization or expropriation of assets, imposition of currency exchange controls or restrictions on the repatriation of foreign currency, confiscatory taxation, political or financial instability and adverse diplomatic developments. In addition, there may be difficulty in obtaining or enforcing a court judgment abroad. Dividends or interest on, or proceeds from the sale of, foreign securities may be subject to non-U.S. withholding taxes, and special U.S. tax considerations may apply.

The risks of foreign investment are greater for investments in emerging markets. Emerging market countries typically have economic and political systems that are less fully developed, and that can be expected to be less stable, than those of more advanced countries. Low trading volumes may result in a lack of liquidity and in price volatility. Emerging market countries may have policies that restrict investment by foreigners, that require governmental approval prior to investments by foreign persons, or that prevent foreign investors from withdrawing their money at will. An investment in emerging market securities should be considered speculative.

Economic and Political Risks. The economies of individual emerging market countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payments position. Further, the economies of developing countries generally are heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries with which they trade.

With respect to any emerging market country, there is the possibility of nationalization, expropriation or confiscatory taxation, political changes, governmental regulation, social

Summary of information regarding the Fund (unaudited) (cont'd)

instability or diplomatic developments (including war) which could affect adversely the economies of such countries or the value of the Fund's investments in those countries.

Investment Controls; Repatriation. Foreign investment in certain emerging market issuers is restricted or controlled to varying degrees. These restrictions or controls may at times limit or preclude foreign investment in certain emerging market issuers and increase the costs and expenses of the Fund. Certain emerging market countries require governmental approval prior to investments by foreign persons in a particular issuer, limit the amount of investment by foreign persons in a particular issuer, limit the investment by foreign persons only to a specific class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of the countries and/or impose additional taxes on foreign investors. Certain emerging market countries may also restrict investment opportunities in issuers in industries deemed important to national interests.

Emerging market countries may require governmental approval for the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors. In addition, if a deterioration occurs in an emerging market country's balance of payments, the country could impose temporary restrictions on foreign capital remittances. The Fund could be adversely affected by delays in, or a refusal to grant, any restrictions on investments. Investing in local markets in emerging market countries may require the Fund to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to the Fund.

Market Illiquidity. No established secondary markets may exist for many of the emerging market issuer securities in which the Fund may invest. Markets may become illiquid quickly. Reduced secondary market liquidity may have an adverse effect on market price and the Fund's ability to dispose of particular instruments when necessary to meet its liquidity requirements or in response to specific economic events such as a deterioration in the creditworthiness of the issuer. Reduced secondary market liquidity for certain emerging market issuer securities may also make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing its portfolio and calculating its net asset value. Market quotations are generally available on many emerging market issuer securities only from a limited number of dealers and may not necessarily represent firm bids of those dealers or prices for actual sales.

Currency Devaluations and Fluctuations. The value of investments in securities denominated in foreign currencies increases or decreases as the rates of exchange between those currencies and the U.S. dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile, and are affected by factors such as general economic conditions, the actions of the U.S. and foreign governments or central banks, the imposition

of currency controls and speculation. The Fund may be unable or may choose not to hedge its foreign currency exposure.

Financial Information and Standards. Issuers in emerging market countries generally are subject to accounting, auditing and financial standards and requirements that differ, in some cases significantly, from those applicable to U.S. issuers. In particular, the assets and profits appearing on the financial statements of an emerging market country issuer may not reflect its financial position or results of operations in the way they would be reflected had the financial statements been prepared in accordance with U.S. generally accepted accounting principles. In addition, for an issuer that keeps accounting records in local currency, inflation accounting rules may require, for both tax and accounting purposes, that certain assets and liabilities be restated on the issuer's balance sheet in order to express items in terms of currency of constant purchasing power. Inflation accounting may indirectly generate losses or profits. Consequently, financial data may be materially affected by restatements for inflation and may not accurately reflect the real condition of those issuers and securities markets. Substantially less information may be publicly available about issuers in emerging market countries than is available about U.S. issuers.

Smaller Company Risk. The general risks associated with income-producing securities are particularly pronounced for securities issued by companies with smaller market capitalizations. These companies may have limited product lines, markets or financial resources or they may depend on a few key employees. As a result, they may be subject to greater levels of credit, market and issuer risk. Securities of smaller companies may trade less frequently and in lesser volume than more widely held securities and their values may fluctuate more sharply than other securities. Companies with medium-sized market capitalizations may have risks similar to those of smaller companies.

Interest Rate Risk. The market price of the Fund's investments will change in response to changes in interest rates and other factors. During periods of declining interest rates, the market price of fixed income securities generally rises. Conversely, during periods of rising interest rates, the market price of such securities generally declines. The magnitude of these fluctuations in the market price of fixed income securities is generally greater for securities with longer maturities. Additionally, such risk may be greater during a period of historically low interest rates. Fluctuations in the market price of the Fund's securities will not affect interest income derived from securities already owned by the Fund, but will be reflected in the Fund's net asset value. The U.S. Federal Reserve has raised interest rates from historically low levels. It may continue to raise interest rates. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Any additional interest rate increases in the future could cause the value of the fund's holdings to decrease. It cannot be predicted when inflation will return to more normalized levels or how long financial authorities will counter inflationary pressures with monetary tightening.

Summary of information regarding the Fund (unaudited) (cont'd)

The Fund may utilize certain strategies, including investments in structured notes or interest rate swap or cap transactions, for the purpose of reducing the interest rate sensitivity of the portfolio and decreasing the Fund's exposure to interest rate risk, although there is no assurance that it will do so or that such strategies will be successful.

Credit Risk and Counterparty Risk. If an issuer or guarantor of a security held by the Fund or a counterparty to a financial contract with the Fund defaults or its credit is downgraded, or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of your investment will typically decline. Changes in actual or perceived creditworthiness may occur quickly. The Fund could be delayed or hindered in its enforcement of rights against an issuer, guarantor or counterparty. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer and will be disproportionately affected by a default, downgrade or perceived decline in creditworthiness.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called debt obligations at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the price of Common Stock or the Fund's overall return.

Liquidity Risk. The Fund has no limit on its ability to purchase illiquid securities. Liquidity risk exists when particular investments are difficult to sell. Securities may become illiquid after purchase by the Fund, particularly during periods of market turmoil. When the Fund holds illiquid investments, the portfolio may be harder to value, especially in changing markets, and if the Fund is forced to sell these investments in order to segregate assets or for other cash needs, the Fund may suffer a loss.

Duration Risk. The duration of a fixed-income security is a measure of the portfolio's sensitivity to changes in interest rates. Prices of fixed-income securities with longer effective maturities are more sensitive to interest rate changes than those with shorter effective maturities. Holding long duration investments may expose the Fund to certain magnified risks. These include interest rate risk, credit risk and liquidity risk, as discussed above.

Management Risk. The Fund is subject to management risk because it is an actively managed investment portfolio. The Manager and each individual portfolio manager will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Leverage Risk. The Fund generally utilizes leverage, and under current market conditions intends to continue to use leverage. The value of your investment may be more volatile if the fund borrows or uses instruments, such as derivatives, that have a leveraging effect on the fund's portfolio. Other risks described in the Prospectus also will be compounded

because leverage generally magnifies the effect of a change in the value of an asset and creates a risk of loss of value on a larger pool of assets than the fund would otherwise have had. The fund may also have to sell assets at inopportune times to satisfy its obligations created by the use of leverage or derivatives. The use of leverage is considered to be a speculative investment practice and may result in the loss of a substantial amount, and possibly all, of the fund's assets. In addition, the fund's portfolio will be leveraged if it exercises its right to delay payment on a redemption, and losses will result if the value of the fund's assets declines between the time a redemption request is deemed to be received by the fund and the time the fund liquidates assets to meet redemption requests.

Derivatives Risk. The Fund may utilize a variety of derivative instruments for investment or risk management purposes, such as options, futures contracts, swap agreements and credit default swaps. Using derivatives can increase Fund losses and reduce opportunities for gains when market prices, interest rates, currencies, or the derivatives themselves behave in a way not anticipated by the Fund. Using derivatives also can have a leveraging effect and increase Fund volatility. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. Derivatives may not be available at the time or price desired, may be difficult to sell, unwind or value, and the counterparty may default on its obligations to the Fund. Derivatives are generally subject to the risks applicable to the assets, rates, indices or other indicators underlying the derivative. The value of a derivative may fluctuate more than the underlying assets, rates, indices or other indicators to which it relates. Use of derivatives may have different tax consequences for the Fund than an investment in the underlying security, and those differences may affect the amount, timing and character of income distributed to shareholders. The U.S. government and foreign governments are in the process of adopting and implementing regulations governing derivatives markets, including mandatory clearing of certain derivatives, margin and reporting requirements. The ultimate impact of the regulations remains unclear. Additional regulation of derivatives may make derivatives more costly, limit their availability or utility, otherwise adversely affect their performance or disrupt markets.

Effective August 19, 2022, the Fund began operating under Rule 18f-4 under the 1940 Act which, among other things, governs the use of derivative investments and certain financing transactions (e.g. reverse repurchase agreements) by registered investment companies. Among other things, Rule 18f-4 requires funds that invest in derivative instruments beyond a specified limited amount to apply a value at risk (VaR) based limit to their use of certain derivative instruments and financing transactions and to adopt and implement a derivatives risk management program. A fund that uses derivative instruments in a limited amount is not subject to the full requirements of Rule 18f-4. Compliance with Rule 18f-4 by the Fund could, among other things, make derivatives more costly, limit their availability or utility, or otherwise adversely affect their performance. Rule 18f-4 may limit the Fund's ability to use

Summary of information regarding the Fund (unaudited) (cont'd)

derivatives as part of its investment strategy and may not work as intended to limit losses from derivatives.

Credit default swap contracts involve heightened risks and may result in losses to the Fund. Credit default swaps may be illiquid and difficult to value. When the Fund sells credit protection via a credit default swap, credit risk increases since the Fund has exposure to both the issuer whose credit is the subject of the swap and the counterparty to the swap.

Dollar Rolls, Asset-Backed Securities and Mortgage-Backed Securities Risk. The Fund may invest in dollar rolls, asset-backed securities and mortgage-backed securities. Under a dollar roll transaction, the Fund sells securities for delivery in the current month, or sells securities it has purchased on a "to-be-announced" basis, and simultaneously contracts to repurchase substantially similar (same type and coupon) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the purchased securities. Dollar rolls are speculative techniques involving leverage, and are considered borrowings by the Fund if the Fund does not establish and maintain a segregated account. In addition, dollar rolls involve the risk that the market value of the securities the Fund is obligated to repurchase may decline below the repurchase price. In the event the buyer of securities under a dollar roll files for bankruptcy or becomes insolvent, the Fund's use of proceeds may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. Successful use of dollar rolls may depend upon the ability of the Fund's investment manager to correctly predict interest rates and prepayments. There is no assurance that dollar rolls can be successfully employed.

Mortgage-backed securities may be issued by private companies or by agencies of the U.S. Government and represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by real property. Asset-backed securities represent participations in, or are secured by and payable from, assets such as installment sales or loan contracts, leases, credit card receivables and other categories of receivables. Certain debt instruments may only pay principal at maturity or may only represent the right to receive payments of principal or payments of interest on underlying pools of mortgages, assets or government securities, but not both. The value of these types of instruments may change more drastically than debt securities that pay both principal and interest during periods of changing interest rates. The Fund may obtain a below market yield or incur a loss on such instruments during periods of declining interest rates. Principal only and interest only instruments are subject to extension risk. For mortgage derivatives and structured securities that have imbedded leverage features, small changes in interest or prepayment rates may cause large and sudden price movements. Mortgage derivatives may be illiquid and hard to value in declining markets.

Interest Rate Transactions Risk. The Fund may enter into a swap or cap transaction to attempt to protect itself from increasing interest expenses on borrowings resulting from increasing short-term interest rates or dividend expenses on any preferred shares. A decline in interest rates may result in a decline in net amounts receivable by the Fund from the counterparty under the swap or cap (or an increase in the net amounts payable by the Fund to the counterparty under the swap), which may result in a decline in the net asset value of the Fund.

Valuation Risk. The sales price the Fund could receive for any particular portfolio investment may differ from the Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued using a fair value methodology. These differences may increase significantly and affect Fund investments more broadly during periods of market volatility. The Fund's ability to value its investments may be impacted by technological issues and/or errors by pricing services or other third party service providers. The valuation of the Fund's investments involves subjective judgment.

Risks of Warrants and Rights. Warrants and rights are subject to the same market risks as stocks, but may be more volatile in price. Warrants and rights do not carry the right to dividends or voting rights with respect to their underlying securities, and they do not represent any rights in the assets of the issuer. An investment in warrants or rights may be considered speculative. In addition, the value of a warrant or right does not necessarily change with the value of the underlying security and a warrant or right ceases to have value if it is not exercised prior to its expiration date. The purchase of warrants or rights involves the risk that the Fund could lose the purchase value of a warrant or right if the right to subscribe to additional shares is not exercised prior to the warrants' or rights' expiration. Also, the purchase of warrants and rights involves the risk that the effective price paid for the warrant or right added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the price of the underlying security.

Temporary Defensive Strategies Risk. When Western Asset anticipates unusual market or other conditions, the Fund may temporarily depart from its principal investment strategies as a defensive measure and invest all or a portion of its assets in obligations of the U.S. government, its agencies or instrumentalities; other investment grade debt securities; investment grade commercial paper; certificates of deposit and bankers' acceptances; repurchase agreements with respect to any of the foregoing investments or any other fixed income securities that Western Asset considers consistent with this strategy. To the extent that the Fund invests defensively, it may not achieve its investment objectives.

Market Price Discount from Net Asset Value. Shares of closed-end investment companies frequently trade at a discount from their net asset value. This risk is separate and distinct from the risk that the Fund's net asset value could decrease as a result of its investment

95

Summary of information regarding the Fund (unaudited) (cont'd)

activities and may be a greater risk to investors expecting to sell their Common Stock in a relatively short period following completion of this offering. Whether investors will realize gains or losses upon the sale of the Common Stock will depend not upon the Fund's net asset value but upon whether the market price of the Common Stock at the time of sale is above or below the investor's purchase price for the Common Stock.

Inflation/Deflation Risk. Inflation risk is the risk that the value of certain assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Stock and distributions on the Common Stock can decline. In addition, during any periods of rising inflation, the dividend rates or borrowing costs associated with the Fund's use of leverage would likely increase, which would tend to further reduce returns to stockholders. Deflation risk is the risk that prices throughout the economy decline over time—the opposite of inflation.

Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer defaults more likely, which may result in a decline in the value of the Fund's portfolio.

Market Events Risk. The market values of securities or other assets will fluctuate, sometimes sharply and unpredictably, due to factors such as economic events, governmental actions or intervention, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by trade disputes, labor strikes or other factors, political developments, armed conflicts, economic sanctions and countermeasures in response to sanctions, major cybersecurity events, the global and domestic effects of widespread or local health, weather or climate events, and other factors that may or may not be related to the issuer of the security or other asset. Economies and financial markets throughout the world are increasingly interconnected. Economic, financial or political events, trading and tariff arrangements, public health events, terrorism, wars, natural disasters and other circumstances in one country or region could have profound impacts on global economies or markets. As a result, whether or not the fund invests in securities of issuers located in or with significant exposure to the countries or markets directly affected. the value and liquidity of the investments may be negatively affected. The United States and other countries are periodically involved in disputes over trade and other matters. which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the United States has recently enacted and proposed to enact significant new tariffs and President Trump has directed various federal agencies to further evaluate key aspects of U.S trade policy, which could potentially lead to significant changes to current policies, treaties and tariffs. There continues to exist significant uncertainty about the future relationship between the U.S. and other countries with respect to such trade policies, treaties and tariffs. These developments, or the perception that any of them could occur, may have a material adverse effect on global

economic conditions and the stability of global financial markets, and may significantly reduce global trade and, in particular, trade between the impacted nations and the U.S.

Raising the ceiling on U.S. government debt has become increasingly politicized. Any failure to increase the total amount that the U.S. government is authorized to borrow could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets in the U.S. and elsewhere. Recently, inflation and interest rates have increased and may rise further. These circumstances could adversely affect the value and liquidity of the fund's investments, impair the fund's ability to satisfy redemption requests, and negatively impact the fund's performance.

The United States and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the United States has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the United States and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The United States government has prohibited U.S. persons from investing in Chinese companies designated as related to the Chinese military. These and possible future restrictions could limit the fund's opportunities for investment and require the sale of securities at a loss or make them illiquid. Moreover, the Chinese government is involved in a longstanding dispute with Taiwan that has included threats of invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the fund's assets may go down.

Legislative and Regulatory Risk. Prices for high-yield securities may be affected by legislative and regulatory developments which could adversely affect the Fund's net asset value and investment practices, the secondary market for high-yield securities, the financial condition of issuers of these securities and the value of outstanding high-yield securities. These risks generally are higher than issuers in emerging market countries.

Anti-Takeover Provisions Risk. The Fund's Charter and Bylaws include provisions that are designed to limit the ability of other entities or persons to acquire control of the Fund for short-term objectives, including by converting the Fund to open-end status or changing the composition of the Board, that may be detrimental to the Fund's ability to achieve its primary investment objective of seeking to maximize current income. The Bylaws provide that the Fund shall be subject to the provisions of the MCSAA (as defined below). There can be no assurance, however, that the provisions of the MCSAA will be sufficient to deter professional arbitrageurs that seek to cause the Fund to take actions that may not be

Summary of information regarding the Fund (unaudited) (cont'd)

consistent with its investment objective or aligned with the interests of long-term stockholders, such as liquidating debt investments prior to maturity, triggering taxable events for stockholders and decreasing the size of the Fund. See "Certain Provisions in the Charter and Bylaws" and "Certain Provisions in the Charter and Bylaws—Maryland Control Share Acquisition Act" ("MCSAA"). Such provisions may limit the ability of stockholders to sell their shares at a premium over prevailing market prices by discouraging an investor from seeking to obtain control of the Fund.

Valuation Risk. The sales price the Fund could receive for any particular portfolio investment may differ from the Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued using a fair value methodology. These differences may increase significantly and affect Fund investments more broadly during periods of market volatility. The Fund's ability to value its investments may be impacted by technological issues and/or errors by pricing services or other third party service providers. The valuation of the Fund's investments involves subjective judgment.

Tax Risks. To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, among other things, the Fund must derive in each taxable year at least 90% of its gross income from certain prescribed sources and satisfy certain distribution and asset diversification requirements. If for any taxable year the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for distributions to stockholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current or accumulated earnings and profits.

Operational Risk. The valuation of the Fund's investments may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third party service providers or trading counterparties. It is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund could be negatively impacted as a result.

Cybersecurity Risk. Like other funds and business enterprises, the Fund, the Manager, Western Asset, the relevant listing exchange and their service providers are subject to the risk of cybersecurity incidents occurring from time to time. Cybersecurity incidents, whether intentionally caused by third parties or otherwise, may allow an unauthorized party to gain access to fund assets, fund or customer data (including private stockholder information) or proprietary information, cause the Fund, the Manager, Western Asset, the relevant listing exchange and/or their service providers (including, but not limited to, fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality, or prevent fund investors from

purchasing, redeeming or exchanging shares, receiving distributions or receiving timely information regarding the fund or their investment in the fund. The Fund, Western Asset, and the subadvisers have limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the Manager. Cybersecurity incidents may result in financial losses to the Fund and its stockholders, and substantial costs may be incurred in order to prevent any future cybersecurity incidents. Issuers of securities in which the fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

More Information

For a complete list of the Fund's fundamental investment restrictions and more detailed descriptions of the Fund's investment policies, strategies and risks, see the Fund's registration statement on Form N-2 that was declared effective by the SEC on March 23, 2022. The Fund's fundamental investment restrictions may not be changed without the approval of the holders of a majority of the outstanding voting securities, as defined in the 1940 Act.

Dividend reinvestment plan (unaudited)

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain dividends and return of capital distributions, on your Common Stock will be automatically reinvested by Computershare Trust Company, N.A., as agent for the stockholders (the "Plan Agent"), in additional shares of Common Stock under the Fund's Dividend Reinvestment Plan (the "Plan"). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all cash distributions paid by check mailed directly to you by Computershare Trust Company, N.A., as dividend paying agent.

If you participate in the Plan, the number of shares of Common Stock you will receive will be determined as follows:

- (1) If the market price of the Common Stock (plus \$0.03 per share commission) on the payment date (or, if the payment date is not a NYSE trading day, the immediately preceding trading day) is equal to or exceeds the net asset value per share of the Common Stock at the close of trading on the NYSE on the payment date, the Fund will issue new Common Stock at a price equal to the greater of (a) the net asset value per share at the close of trading on the NYSE on the payment date or (b) 95% of the market price per share of the Common Stock on the payment date.
- (2) If the net asset value per share of the Common Stock exceeds the market price of the Common Stock (plus \$0.03 per share commission) at the close of trading on the NYSE on the payment date, the Plan Agent will receive the dividend or distribution in cash and will buy Common Stock in the open market, on the NYSE or elsewhere, for your account as soon as practicable commencing on the trading day following the payment date and terminating no later than the earlier of (a) 30 days after the dividend or distribution payment date, or (b) the payment date for the next succeeding dividend or distribution to be made to the stockholders; except when necessary to comply with applicable provisions of the federal securities laws. If during this period: (i) the market price (plus \$0.03 per share commission) rises so that it equals or exceeds the net asset value per share of the Common Stock at the close of trading on the NYSE on the payment date before the Plan Agent has completed the open market purchases or (ii) if the Plan Agent is unable to invest the full amount eligible to be reinvested in open market purchases, the Plan Agent will cease purchasing Common Stock in the open market and the Fund shall issue the remaining Common Stock at a price per share equal to the greater of (a) the net asset value per share at the close of trading on the NYSE on the day prior to the issuance of shares for reinvestment or (b) 95% of the then current market price per share.

Common Stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all shares of Common Stock you have received under the Plan. You may withdraw from the Plan (i.e., opt-out) by notifying the Plan Agent in writing at P.O. Box 43006, Providence, RI 02940-3078 or by calling the Plan Agent at 1-888-888-0151. Such withdrawal will be effective immediately if notice is received by the Plan Agent not less than ten business days prior to any dividend or distribution record date; otherwise such

withdrawal will be effective as soon as practicable after the Plan Agent's investment of the most recently declared dividend or distribution on the Common Stock

Plan participants who sell their shares will be charged a service charge (currently \$5.00 per transaction) and the Plan Agent is authorized to deduct brokerage charges actually incurred from the proceeds (currently \$0.05 per share commission). There is no service charge for reinvestment of your dividends or distributions in Common Stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases. Because all dividends and distributions will be automatically reinvested in additional shares of Common Stock, this allows you to add to your investment through dollar cost averaging, which may lower the average cost of your Common Stock over time. Dollar cost averaging is a technique for lowering the average cost per share over time if the Fund's net asset value declines. While dollar cost averaging has definite advantages, it cannot assure profit or protect against loss in declining markets.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions. Investors will be subject to income tax on amounts reinvested under the Plan.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board of Directors, the change is warranted. The Plan may be terminated, amended or supplemented by the Fund upon notice in writing mailed to stockholders at least 30 days prior to the record date for the payment of any dividend or distribution by the Fund for which the termination or amendment is to be effective. Upon any termination, you will be sent cash for any fractional share of Common Stock in your account. You may elect to notify the Plan Agent in advance of such termination to have the Plan Agent sell part or all of your Common Stock on your behalf. Additional information about the Plan and your account may be obtained from the Plan Agent at P.O. Box 43006, Providence, RI 02940-3078 or by calling the Plan Agent at 1-888-888-0151.

101

Important tax information (unaudited)

By mid-February, tax information related to a shareholder's proportionate share of distributions paid during the preceding calendar year will be received, if applicable. Please also refer to www.franklintempleton.com for per share tax information related to any distributions paid during the preceding calendar year. Shareholders are advised to consult with their tax advisors for further information on the treatment of these amounts on their tax returns.

The following tax information for the Fund is required to be furnished to shareholders with respect to income earned and distributions paid during its fiscal year.

The Fund hereby reports the following amounts, or if subsequently determined to be different, the maximum allowable amounts, for the fiscal year ended April 30, 2025:

	Pursuant to:	Amount Reported
Qualified Net Interest Income (QII)	§871(k)(1)(C)	\$14,583,228
Qualified Business Income Dividends Earned	§199A	\$56,184
Section 163(j) Interest Earned	§163(j)	\$45,910,310
Interest Earned from Federal Obligations	Note (1)	\$356,583

Note (1) - The law varies in each state as to whether and what percentage of dividend income attributable to Federal obligations is exempt from state income tax. Shareholders are advised to consult with their tax advisors to determine if any portion of the dividends received is exempt from state income taxes.

Franklin Templeton Funds Privacy and Security Notice

Your Privacy and the Security of Your Personal Information is Very Important to Us

This Privacy and Security Notice (the "Privacy Notice") addresses the Funds' privacy and data protection practices with respect to nonpublic personal information the Fund receives. The Legg Mason Funds include the Western Asset Money Market Funds (Funds) sold by the Funds' distributor, Franklin Distributors, LLC, as well as Legg Mason-sponsored closed-end funds. The provisions of this Privacy Notice apply to your information both while you are a shareholder and after you are no longer invested with the Funds.

The Type of Nonpublic Personal Information the Funds Collect About You

The Funds collect and maintain nonpublic personal information about you in connection with your shareholder account. Such information may include, but is not limited to:

- Personal information included on applications or other forms;
- Account balances, transactions, and mutual fund holdings and positions;
- · Bank account information, legal documents, and identity verification documentation; and
- Online account access user IDs, passwords, security challenge question responses.

How the Funds Use Nonpublic Personal Information About You

The Funds do not sell or share your nonpublic personal information with third parties or with affiliates for their marketing purposes, unless you have authorized the Funds to do so. The Funds do not disclose any nonpublic personal information about you except as may be required to perform transactions or services you have authorized or as permitted or required by law. The Funds may disclose information about you to:

- Employees, agents, and affiliates on a "need to know" basis to enable the Funds to conduct ordinary business or to comply with obligations to government regulators;
- Service providers, including the Funds' affiliates, who assist the Funds as part of the
 ordinary course of business (such as printing, mailing services, or processing or servicing
 your account with us) or otherwise perform services on the Funds' behalf, including
 companies that may perform statistical analysis, market research and marketing services
 solely for the Funds;
- Permit access to transfer, whether in the United States or countries outside of the
 United States to such Funds' employees, agents and affiliates and service providers as
 required to enable the Funds to conduct ordinary business, or to comply with obligations
 to government regulators;
- The Funds' representatives such as legal counsel, accountants and auditors to enable the Funds to conduct ordinary business, or to comply with obligations to government regulators;
- Fiduciaries or representatives acting on your behalf, such as an IRA custodian or trustee of a grantor trust.

Except as otherwise permitted by applicable law, companies acting on the Funds' behalf, including those outside the United States, are contractually obligated to keep nonpublic

Franklin Templeton Funds Privacy and Security Notice (cont'd)

personal information the Funds provide to them confidential and to use the information the Funds share only to provide the services the Funds ask them to perform.

The Funds may disclose nonpublic personal information about you when necessary to enforce their rights or protect against fraud, or as permitted or required by applicable law, such as in connection with a law enforcement or regulatory request, subpoena, or similar legal process. In the event of a corporate action or in the event a Fund service provider changes, the Funds may be required to disclose your nonpublic personal information to third parties. While it is the Funds' practice to obtain protections for disclosed information in these types of transactions, the Funds cannot guarantee their privacy policy will remain unchanged.

Keeping You Informed of the Funds' Privacy and Security Practices

The Funds will notify you annually of their privacy policy as required by federal law. While the Funds reserve the right to modify this policy at any time, they will notify you promptly if this privacy policy changes.

The Funds' Security Practices

The Funds maintain appropriate physical, electronic and procedural safeguards designed to guard your nonpublic personal information. The Funds' internal data security policies restrict access to your nonpublic personal information to authorized employees, who may use your nonpublic personal information for Fund business purposes only.

Although the Funds strive to protect your nonpublic personal information, they cannot ensure or warrant the security of any information you provide or transmit to them, and you do so at your own risk. In the event of a breach of the confidentiality or security of your nonpublic personal information, the Funds will attempt to notify you as necessary so you can take appropriate protective steps. If you have consented to the Funds using electronic communications or electronic delivery of statements, they may notify you under such circumstances using the most current email address you have on record with them.

In order for the Funds to provide effective service to you, keeping your account information accurate is very important. If you believe that your account information is incomplete, not accurate or not current, if you have questions about the Funds' privacy practices, or our use of your nonpublic personal information, write the Funds using the contact information on your account statements, email the Funds by clicking on the Contact Us section of the Funds' website at www.franklintempleton.com, or contact the Funds at 1-877-721-1926 for the Western Asset Money Market Funds or 1-888-777-0102 for the Legg Mason-sponsored closed-end funds. For additional information related to certain state privacy rights, please visit https://www.franklintempleton.com/help/privacy-policy.

Revised December 2023.

Western Asset High Income Fund II Inc.

Western Asset High Income Fund II Inc. One Madison Avenue 17th Floor New York, NY 10010

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that from time to time the Fund may purchase, at market prices, shares of its stock.

The Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Fund's Forms N-PORT are available on the SEC's website at www.sec.gov. To obtain information on Form N-PORT, shareholders can call the Fund at 1-888-777-0102.

Information on how the Fund voted proxies relating to portfolio securities during the prior 12-month period ended June 30th of each year and a description of the policies and procedures that the Fund uses to determine how to vote proxies related to portfolio transactions are available (1) without charge, upon request, by calling 1-888-777-0102, (2) at www.franklintempleton.com and (3) on the SEC's website at www.sec.gov.

Quarterly performance, semi-annual and annual reports, current net asset value and other information regarding the Fund may be found on Franklin Templeton's website, which can be accessed at www.franklintempleton.com. Any reference to Franklin Templeton's website in this report is intended to allow investors public access to information regarding the Fund and does not, and is not intended to, incorporate Franklin Templeton's website in this report.

This report is transmitted to the shareholders of Western Asset High Income Fund II Inc. for their information. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this report.

Computershare Inc. P.O. Box 43006 Providence. RI 02940-3078
