What Are the Risks

All investments involve risks, including possible loss of principal. Value securities may not increase in price as anticipated or may decline further in value. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Because the Fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Current political and financial uncertainty surrounding the European Union may increase market volatility and the economic risk of investing in companies in Europe. Smaller-company stocks have exhibited greater price volatility than larger-company stocks, particularly over the short term. The fund's investments in companies engaged in mergers, reorganizations or liquidations also involve special risks as pending deals may not be completed on time or on favorable terms. The fund may invest in lower-rated bonds, which entail higher credit risk. Please consult the prospectus for a more detailed description of the fund's risks.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
