

Franklin Mutual Global Discovery Fund

Global
June 30, 2018

Fund Fact Sheet | Share Class: Z

Fund Description

The fund seeks capital appreciation. Its strategy is focused on undervalued mid- and large-cap equity securities, with a significant portion of its assets in foreign securities and, to a lesser extent, distressed securities and merger arbitrage.

Morningstar Rating™—Class Z

Overall Morningstar Rating™ As of June 30, 2018 the fund's Class Z shares received a 4 star overall Morningstar Rating™, measuring risk-adjusted returns against 721, 596 and 343 U.S.-domiciled World Large Stock funds over the 3-, 5- and 10- year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics.

What are the Risks?

All investments involve risks, including possible loss of principal. Value securities may not increase in price as anticipated or may decline further in value. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Because the fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Current political and financial uncertainty surrounding the European Union may increase market volatility and the economic risk of investing in companies in Europe. Smaller-company stocks have exhibited greater price volatility than larger-company stocks, particularly over the short term. The fund's investments in companies engaged in mergers, reorganizations or liquidations also involve special risks as pending deals may not be completed on time or on favorable terms. The fund may invest in lower-rated bonds, which entail higher credit risk. Please consult the prospectus for a more detailed description of the fund's risks.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

Composition of Fund: Percentage may not equal 100% due to rounding.

Morningstar Rating™: Source: Morningstar®, 6/30/18. For each mutual fund and ETF with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on how a fund ranks on a Morningstar Risk-Adjusted Return measure against other funds in the same category. This measure takes into account variations in a fund's monthly performance, and does not take into account the effects of sales charges and loads, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Fund's Class Z shares received a Morningstar Rating of 2, 2 and 5 star(s) for the 3-, 5- and 10-year periods, respectively. Morningstar Rating™ is for the named share class only; other classes may have different performance characteristics. **Past performance is not an indicator or a guarantee of future performance.** Source: ©Morningstar.
