

Franklin LifeSmart 2040 Retirement Target Fund

Advisor Class: FLSHX Class A: FLADX Class C: FLOLX Class R: FLSGX Class R6: FLREX

Target Date | Factsheet as of March 31, 2026

Investment Overview

The fund seeks the highest level of long-term total return consistent with its asset allocation. Total return consists of both capital appreciation and income, with the fund placing an increasing emphasis on fixed income investments as the target date 2040 approaches, and reaching its final and most conservative asset allocation in approximately eight years after the target year. The fund invests primarily in a combination of other Franklin Templeton mutual funds and Franklin Templeton and third party exchange-traded funds (ETFs).

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit franklintempleton.com.

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 04/30/2026 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. There is a 1% CDSC on any Class C shares you sell within 12 months of purchase.

Morningstar Rating™

Overall Rating as of March 31, 2026

★★★★ Advisor Class

★★★ Class A

As of 03/31/2026 the fund's Advisor Class shares received a 4 star and Class A shares received a 3 star overall Morningstar rating™, measuring risk-adjusted returns against 174, 169 and 115 Target-Date 2040 funds over the 3-, 5- and 10- year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics. The number of funds in the category for the Overall Rating are listed under the 3-year period.

What should I know before investing?

All investments involve risks, including possible loss of principal. Principal invested is not guaranteed at any time, including at or after the fund's retirement target date; nor is there any guarantee that the fund will provide sufficient income at or through the investor's retirement. The investment risk of the retirement target fund changes over time as its asset allocation changes. Investments in **underlying funds** are subject to the same risks as, and indirectly bear the fees and expenses of, the underlying funds. **Equity securities** are subject to price fluctuation and possible loss of principal. **Fixed income securities** involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. These and other risks are discussed in the fund's prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover.

Important Information

Effective 1/29/2021, the fund modified the landing point of its glide path (the strategic asset allocation of a target date fund over time) to be in line with the new required minimum distribution (RMD) age of 72. Effective 5/1/19, the fund made changes to its glide path and asset allocation, including removing its strategic allocation to alternative investments. Such changes can impact performance. The fund's investment goal has remained the same.

The **Blended Benchmark** is currently allocated to the MSCI All Country World Index-NR and Bloomberg Multiverse Index. Blended Benchmark index allocations are based on an asset class allocation that matches the fund's glide path over time. The **MSCI All Country World Index** is a market capitalization-weighted index that is designed to measure equity market performance of developed and emerging markets. The **Bloomberg Multiverse Index** provides a broad-based measure of the global fixed-income bond market. Important data provider notices and terms available at www.franklintempletondatasources.com. Morningstar Rating™: Source: Morningstar®, 03/31/2026. For each mutual fund and ETF with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on how a fund ranks on a Morningstar Risk-Adjusted Return measure against other funds in the same category. This measure takes into account variations in a fund's monthly performance, and does not take into account the effects of sales charges and loads, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The fund's Advisor Class shares received a Morningstar Rating of 4, 4 and 3 and fund's Class A shares received a Morningstar Rating of 3, 3 and 3 star(s) for the 3-, 5- and 10-year periods, respectively. Franklin Templeton provides this fund's Morningstar Rating™ for Advisor Class and Class A shares only. Other share classes may have different Morningstar ratings.
