On April 4, 2016, Franklin Double Tax-Free Income Fund shareholders approved the fund's reorganization into Franklin High Yield Tax-Free Income Fund. The fund reorganization is scheduled to be effective at close of market on or about April 29, 2016.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit franklintempleton.com for the most recent month-end performance.

If the sales charge had been included, the return would have been lower.

Cash & Cash Equivalents	4.02		

What Are the Risks

All investments involve risks, including possible loss of principal. Because municipal bonds are sensitive to interest rate movements, the fund's yield and share price will fluctuate with market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Because the fund currently invests principally in Puerto Rico, it may be subject to greater risk of adverse economic and regulatory changes in that territory than a geographically diversified fund. To the extent the fund has investments in other U.S. territories, adverse economic and regulatory changes in such territories may cause the fund's share price to decline. The fund is classified as a non-diversified fund, because it may invest a greater portion of its assets in the municipal securities of one issuer than a diversified fund. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. The fund may invest a significant part of its assets in municipal securities that finance similar types of projects, such as utilities, hospitals, higher education and transportation. A change that affects one project would likely affect all similar projects, thereby increasing market risk.

Glossary

AMT Exposure: Percentage of a fund's assets invested in bonds with income subject to the alternative minimum tax (AMT). For investors subject to the alternative minimum tax, a small portion of fund dividends may be taxable. Distributions of capital gains are generally taxable.

Average Duration: A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years.

Average Weighted Maturity: An estimate of the number of terms of maturity, taking the possibility of early payments into account, for the underlying holdings.

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of risk; the larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Indexes are unmanaged, and one cannot invest directly in an index. They do not reflect any fees, expenses or sales charges.

Performance: The fund offers other share classes subject to different fees and expenses, which will affect their performance. Advisor shares do not have sales charges or 12b-1 fees and are offered only to certain eligible investors as stated in the prospectus.

Class A: On 5/1/94, these shares implemented a Rule 12b-1 plan, which affects subsequent performance. Class C: Prior to 1/1/04, these shares were offered with an initial sales charge; thus actual returns would have differed.

Advisor: Effective 7/15/09, the fund began offering Advisor Class Shares. For periods prior to the fund's Advisor Class inception date, a restated figure is used based on the fund's oldest share class, Class A performance, excluding the effect of Class A's maximum initial sales charge but reflecting the effect of the Class A Rule 12b-1 fees; and for periods after the fund's Advisor Class inception date, actual Advisor Class performance is used, reflecting all charges and fees applicable to that class.

30-Day Standardized Yield: The 30-Day Standardized Yield reflects an estimated yield to maturity. It should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

Taxable Equivalent Yield: The Taxable Equivalent Yield assumes the maximum regular federal income tax rate and the Medicare tax in effect on December 2015.

Top 5 Holdings: The portfolio manager for the fund reserves the right to withhold release of information with respect to holdings that would otherwise be included.

Composition of Fund: Percentage may not equal 100% due to rounding.

Uninvested cash is not included in the State / U.S. Territory Exposure.
