WHAT ARE THE RISKS?

All investments involve risks, including possible loss of principal. Growth stock prices reflect projections of future earnings or revenues, and can, therefore, fall dramatically if the company fails to meet those projections. Smaller, mid-sized and relatively new or unseasoned companies can be particularly sensitive to changing economic conditions, and their prospects for growth are less certain than those of larger, more established companies. Historically, these securities have experienced more price volatility than larger company stocks, especially over the short-term. To the extent the fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, it may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments. Foreign securities involve special risks, including currency fluctuations and economic and political uncertainties. These and other risks are described more fully in the fund's prospectus.

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

MANAGER'S PERSPECTIVE

"We employ an investment approach that allows us the flexibility to look for companies in any industry and of any market cap size. We utilize fundamental bottom-up research to seek high-quality, sustainable growth companies that meet our growth, quality and valuation criteria. Our analysis seeks companies with large market opportunities and strong competitive positions, and that have capable management teams as well as exceptional financial strength. We look for companies that can profitably grow their business, generating stock price appreciation over the long term. For every investment decision we make, we consider the trade-off between perceived risks and potential return."

GAIN FROM OUR PERSPECTIVE®

Franklin Templeton's distinct multi-manager structure combines the specialized expertise of three world-class investment management groups—Franklin, Templeton and Mutual Series.

Specialized Expertise

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

- Franklin. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth- and value-style U.S. equity investing.
- Templeton. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.
- Mutual Series. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching
 aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and
 distressed securities.
