Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit [franklintempleton.com](http://franklintempleton.com) for the most recent month-end performance.

If the sales charge had been included, the return would have been lower.

The fund has a fee waiver associated with any investment it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through April 30, 2020. Fund investment results reflect the fee waiver; without this waiver, the results would have been lower.

**Portfolio Data Disclosures**

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Weighted Maturity reflects certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

**What Are the Risks?**

All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments; investments in emerging markets involve heightened risks related to the same factors. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. The risks associated with higher-yielding, lower-rated debt securities include higher risk of default and loss of principal. The markets for a particular security or instrument or type of security or instrument are or may become relatively illiquid. Reduced liquidity will have an adverse impact on the security's value and on the fund's ability to sell such securities or instruments when necessary to meet the fund's liquidity needs or in response to a specific market event. The fund's investment in derivative securities, such as swaps, financial futures and option contracts, and use of foreign currency techniques involve special risks as such may not achieve the anticipated benefits and/or may result in losses to the fund. The fund's risk considerations are discussed in the prospectus.

**Glossary**

**Average Weighted Maturity:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

**Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

**Important Information**

**Fund Management:** CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

**Performance:** The fund offers other share classes subject to different fees and expenses, which will affect their performance.

**Class A:** Prior to 9/10/18, these shares were offered at a higher initial sales charge of 5.75%; thus actual returns would have differed. Total returns with sales charges have been restated to reflect the current maximum initial sales charge of 5.50%. Effective 9/27/11, Class A shares closed to new investors, were renamed Class A1 Shares, and a new Class A with different expense structure became available. Class A performance shown has been calculated as follows: (a) for periods prior to 9/27/11 a restated figure is used based on Class A1 performance and including the Rule 12b-1 rate differential between Class A and A1, and (b) for periods after 9/27/11, actual Class A performance is used, reflecting all charges and fees applicable to that class. **Class C:** Effective 7/1/11, Class C shares closed to new investors, were renamed Class C1 shares, and a new Class C share with a different expense structure became available. Class C performance shown has been calculated as follows: (a) for periods prior to 7/1/11 a restated figure is used based on Class C1 performance and including the Rule 12b-1 rate differential between Class C and C1, and (b) for periods after 7/1/11, actual Class C performance is used, reflecting all charges and fees applicable to that class.

**30-Day Standardized Yield:** The fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

**Top Ten Equity Holdings:** The portfolio manager for the fund reserves the right to withhold release of information with respect to holdings that would otherwise be included.

**Fund Measures:** Source: FactSet. The portfolio characteristics listed are based on the fund's underlying holdings, and do not necessarily reflect the fund's characteristics. Average weighted maturity data pertains to the fixed income component of the fund.
