

# Putnam BDC Income ETF (PBDC)

Business Development Co | Factsheet as of June 30, 2025

## Investment Overview

The fund seeks current income. The fund invests mainly in BDCs (business development companies) that contribute to stability of dividend income and return potential.

## Total Returns (%)

	Cumulative		Average Annual				Inception Date
	3-Mth	YTD	1-Yr	3-Yr	5-Yr	10-Yr	
Market Price Return	0.14	0.84	7.58	—	—	—	22.54 9/29/2022
NAV Returns	0.20	0.86	7.48	—	—	—	22.47 9/29/2022
Benchmark	-0.40	0.48	5.99	—	—	—	20.68 —

## Calendar Year Total Returns (%)

	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
Market Price Return	19.41	30.45	—	—	—	—	—	—	—	—
NAV Returns	19.33	30.29	—	—	—	—	—	—	—	—
Benchmark	16.61	27.58	—	—	—	—	—	—	—	—

**Performance data quoted represents past performance, which does not guarantee future results.** Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. For current month-end performance, please visit [franklintempleton.com](http://franklintempleton.com).

Net Asset Value (NAV) returns are based on the NAV of the ETF; Market Price returns are based upon the official closing price of the ETF's shares. Returns are average annualized total returns, except for those periods of less than one year, which are cumulative. Market Price returns are calculated using the closing price as of 4 p.m. Eastern time on each trading day (when NAV is normally determined for most funds), and do not represent the returns you would receive if you traded shares at other times. Performance for the ETF and its benchmark index are as of the ETF's last trading day before the end of the period.

The total annual operating expenses are as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.

A fund that invests in BDCs discloses the expenses of the BDCs as acquired fund fees and expenses (AFFEs). AFFEs make the expense ratios look much higher for this fund compared with other equity funds, but it is important to remember that AFFEs are indirect expenses not borne by the fund. AFFEs are shown as a line item in an expense table to distinguish them from the fees of the fund. Under SEC rules, the fund must report a total expense ratio that combines the fees paid directly out of the fund's assets (direct fees) and the proportional expense ratios of the funds in which it invests.

Acquired fund fees and expenses are 13.19% and are based on estimated amounts for the current fiscal year. Total Expenses Ratio is 13.94% which includes the Management Fees of 0.75%.

**Please see the fund prospectus to learn more about acquired fund fees and expenses.**

## Growth of \$10,000

Inception through June 30, 2025

Market Price Returns, assuming dividends reinvested

The Growth of \$10,000 chart reflects a hypothetical \$10,000 investment on Market Price and assumes reinvestment of dividends and capital gains. Fund expense, including management fees and other expenses were deducted.

What should I know before investing?

**All investments involve risks, including possible loss of principal. Business development companies (BDCs)** are subject to liquidity, credit, interest rate, small company and leverage risks. The portfolio is **non-diversified** and may invest in a relatively small number of issuers, which may negatively impact the performance and result in greater fluctuation in value. **Liquidity risk** exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. **Active management** does not ensure gains or protect against market declines. The manager may consider **environmental, social and governance (ESG) criteria** in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the fund's prospectus.

Glossary

The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds.

Important Information

**ETFs and ETPs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs/ETPs net asset value. Brokerage commissions and ETF expenses will reduce returns.**

ETF/ETP shares may be bought or sold throughout the day at their market price, not their Net Asset Value (NAV), on the exchange on which they are listed. Shares of ETFs/ETPs are tradable on secondary markets and may trade either at a premium or a discount to their NAV on the secondary market.

**Canada:** This content is intended only for Canadian institutional investors that qualify as "permitted clients" as defined in National Instrument 31-103 - Registration Requirements, Exemptions and Ongoing Registrant Obligations. U.S. securities laws generally limit a non-U.S. fund's purchase of a U.S. registered mutual fund or ETF/ETP (a "U.S. Fund") to no more than 3% of the U.S. Fund's voting stock. You should consult your legal counsel prior to investing in a U.S. Fund.
