

Franklin Low Duration Total Return Fund

Multi-Sector
March 31, 2019

Fund Fact Sheet | Share Classes: A, C

Fund Description

The fund seeks to provide a high level of current income consistent with prudent investing, while seeking preservation of capital. The fund invests primarily in investment grade debt securities, which may be represented by derivatives that provide exposure to debt securities. The fund targets an estimated average portfolio duration of three years or less.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit franklintempleton.com for the most recent month-end performance.

If the sales charge had been included, the return would have been lower.

The fund has an expense reduction and a fee waiver associated with any investments it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through February 29, 2020. Fund investment results reflect the expense reduction and fee waiver; without these reductions, the results would have been lower.

Fund Measures

Average Duration	1.60 Years
Average Weighted Maturity	3.06 Years
Standard Deviation (3 Yrs) - Class A	0.87%

Others	12.02 / 3.59

Portfolio Data Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Interest Rate Derivatives sector consists of Treasury, interest rate and other derivatives that are primarily used for duration management. Average Duration and Average Weighted Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

What Are the Risks?

All investments involve risks, including possible loss of principal. Interest rate movements and mortgage prepayments will affect the fund's share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Changes in the financial strength of a bond issuer or in a bond's credit rating may affect its value. The risks associated with higher-yielding, lower-rated securities include higher risk of default and loss of principal. Investment in foreign securities also involves special risks, including currency fluctuations, and political and economic uncertainty. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the fund to participate in losses (as well as gains) on an amount that exceeds the fund's initial investment. The fund may not achieve the anticipated benefits, and may realize losses when a counterparty fails to perform. These and other risk considerations are discussed in the fund's prospectus.

Glossary

Average Duration: A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. The weighted average duration of a fund reflects the effective duration of the underlying issues, based on the size of each holding.

Average Weighted Maturity: An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Fund Description: Although U.S. government-sponsored entities may be chartered by Acts of Congress, their securities are neither issued nor guaranteed by the U.S. government. Please see the fund's prospectus for a detailed discussion regarding various levels of credit support for government agency or instrumentality securities. The fund's yield and share price are not guaranteed and will vary with market conditions.

Indexes are unmanaged, and one cannot invest directly in an index. They do not reflect any fees, expenses or sales charges.

Fund Management: CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Performance: The fund offers other share classes subject to different fees and expenses, which will affect their performance.

Class C: The fund began offering Class C shares on 10/1/12. Total returns are calculated as follows: a) for periods prior to 10/1/12, a restated figure is used based on the fund's oldest share class, Class A, performance excluding its maximum initial sales charge, but including Class C's sales charges and Rule 12b-1 fees as though in effect from the fund's inception; and b) for periods after 10/1/12, actual Class C performance is used, reflecting all charges and fees applicable to that class.

30-Day Standardized Yield: The fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.
