CAPTURING BOND OPPORTUNITIES GLOBALLY

Franklin Templeton Investments

Gain From Our Perspective

At Franklin Templeton Investments, we're dedicated to one goal: delivering exceptional asset management for our clients. By bringing together multiple, world-class investment teams in a single firm, we're able to offer specialized expertise across styles and asset classes, all supported by the strength and resources of one of the world's largest asset managers. This has helped us to become a trusted partner to individual and institutional investors across the globe.

Focus on Investment Excellence

At the core of our firm, you'll find multiple independent investment teams—each with a focused area of expertise—from traditional to alternative strategies and multi-asset solutions. And because our portfolio groups operate autonomously, their strategies can be combined to deliver true style and asset class diversification.

All of our investment teams share a common commitment to excellence grounded in rigorous, fundamental research and robust, disciplined risk management. Decade after decade, our consistent, research-driven processes have helped Franklin Templeton earn an impressive record of strong, long-term results.

Global Perspective Shaped by Local Expertise

In today's complex and interconnected world, smart investing demands a global perspective. Franklin Templeton pioneered international investing over 60 years ago, and our expertise in emerging markets spans more than a quarter of a century. Today, our investment professionals are on the ground across the globe, spotting investment ideas and potential risks firsthand. These locally based teams bring in-depth understanding of local companies, economies and cultural nuances, and share their best thinking across our global research network.

Strength and Experience

Franklin Templeton is a global leader in asset management serving clients in over 150 countries.¹ We run our business with the same prudence we apply to asset management, staying focused on delivering relevant investment solutions, strong long-term results and reliable, personal service. This approach, focused on putting clients first, has helped us to become one of the most trusted names in financial services.

1. As of 6/30/14.

The Strategy

For over 25 years, **Templeton Global Bond Fund** has scoured the globe for the best bond values in order to meet its goal of providing current income with capital appreciation and growth of income. The fund invests predominantly in bonds of governments and government agencies located around the world, with a focus on investment grade securities.

1 | Global Economic Overview

We take a top-down approach, looking at countries around the world and their respective economies, geopolitical risks, interest rates and currencies, to find investment opportunities for the fund. The fund's flexibility to invest in any country or currency, including emerging markets, allows us to take advantage of prevailing macroeconomic trends.

2 | Local Market Research

Our quantitative and qualitative analysis is supplemented with on-the-ground research. In addition to our own travels and meetings with foreign government and bank officials, we leverage the resources of our offices around the world to provide us with additional local insight on the countries we are considering investing in. We believe this hands-on research is essential to our process and has enabled us to identify investment opportunities and risks over the years that a solely U.S.-based manager might miss.

3 | Portfolio Construction

Our investment decisions are ultimately driven by valuations. We invest in countries where we believe bonds are underpriced and country fundamentals offer the potential for price appreciation. We typically invest in local currencies, though we may hedge our currency exposure depending on valuations. We also take country interest rate environments into account. If rates are poised to rise, we'll invest in short duration debt. In this way, we actively manage interest rate risk on a country-by-country basis.

“Our investment teams in the U.S., U.K., Brazil, China, India, Korea, Canada, Mexico, Malaysia and the United Arab Emirates search the world for investment opportunities in currencies, interest rates and sovereign credit that can offer attractive potential returns and provide diversification benefits.”

MICHAEL HASENSTAB, PH.D., Portfolio Manager

The Benefits

Experienced Management Team

Portfolio Manager Michael Hasenstab has 19 years of industry experience and is backed by a large team of investment professionals located around the world.²

Foreign Markets Provide Opportunity

The world's best-performing bond markets vary from year to year. In fact, over the past 10 calendar years, the U.S. bond market was never the world's top performer.³ Adding global fixed income securities to a portfolio of domestic securities offers U.S. investors greater diversification and the potential for reduced volatility. Please remember, diversification does not assure a profit or protect against a loss.

Low Costs Relative to Peers

Fund managers keep an eye on the bottom line. With a modest expense ratio, Class A shares of the fund were 34% lower than the Lipper peer group average as of June 30, 2014.⁴

Expense Ratio⁴

As of June 30, 2014

Record of Low Correlation to U.S. Stock and Bond Markets

Correlation is an indication of the degree of correspondence in movement between different asset classes, and is an important consideration in constructing a well-diversified portfolio. For the 20-year period ended June 30, 2014, Templeton Global Bond Fund-Class A shares' correlation to U.S. stocks and bonds, as represented by the S&P 500 Index and Barclays U.S. Aggregate Index, was just 0.39 and 0.39, respectively.⁵

Low Correlation of Returns⁵

20-Year Period Ended June 30, 2014

	S&P 500 Index	Barclays U.S. Aggregate Index
Templeton Global Bond Fund-Class A	0.39%	0.39%

Correlation: 1 = perfect positive correlation, 0 = no correlation, -1 = perfect negative correlation

Global Portfolio Diversification

As of June 30, 2014, the fund included investments in 229 holdings, 22 countries and 18 currencies.⁶ Global portfolio diversification may help provide a hedge against U.S. interest rate cycles, economic conditions and other domestic risks.

Credit Quality Breakdown^{6, 7, 8}

(As of June 30, 2014)

7. Ratings shown are assigned by one or more Nationally Recognized Statistical Credit Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When ratings from all three agencies are available, the middle rating is used; when two are available, the lowest rating is used; and when only one is available, that rating is used. Foreign government bonds without a specific rating are assigned the country rating provided by an NRSRO, if available. The NR category consists of rateable securities that have not been rated by an NRSRO. Cash and equivalents (defined as bonds with stated maturities, or that can be redeemed at intervals, of seven days or less) as well as derivatives are excluded from this breakdown. As a result, the chart does not reflect the fund's total net assets.

8. Due to rounding, the sum of portfolio holdings may not equal 100%.

9. EMU countries consist of Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Luxembourg, the Netherlands, Portugal, Slovenia, Spain, Estonia, Cyprus, Slovakia and Malta.

10. A supranational is an entity formed by two or more central governments through international treaties to promote economic development for the member countries.

11. Duration shown is the option-adjusted duration. Duration is an indication of a fund's sensitivity to changes in interest rates. The option-adjusted duration formula takes into account embedded call options and redemption features that impact a bond's expected cash flow, and thus its interest rate sensitivity.

The Results

As of October 31, 2014, Morningstar® awarded the fund's Class A shares a 5-star overall Morningstar Rating™, measuring risk-adjusted returns against 285, 230 and 138 U.S.-domiciled World Bond funds over the 3-, 5- and 10-year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics.¹²

Total Annual Operating Expenses:¹⁸

Without waiver: Class A: 0.89%; Class C: 1.29%; **With waiver:** Class A: 0.88%; Class C: 1.28%

Unless otherwise noted, fund performance figures in this brochure reflect Class A and do not include the maximum 4.25% initial sales charge. If they had, returns would have been lower. Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment return and principal value will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton Investments at (800) DIAL BEN/342-5236 or visit franklintempleton.com for most recent month-end performance.

12. Source: Morningstar, 10/31/14. For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effects of all sales charges), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive a Morningstar Rating™ of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. Each share class is counted as a fraction of one fund and rated separately. The fund received Morningstar Ratings of 3, 3 and 5 stars for the 3-, 5- and 10-year periods, respectively. Past performance does not guarantee future results. Morningstar Rating™ is for Class A shares only; other share classes may have different performance characteristics.

13. Source: © 2014 Morningstar. Indexes are unmanaged, and one cannot invest directly in an index.

14. Source: Lipper, Inc., 10/31/14. Lipper figures do not include sales charges and encompass all share classes. Past performance does not guarantee future results.

A Solid Risk/Reward Profile

Solid, long-term performance is important, but prudent investors are also concerned about volatility. The flexibility and wide variety of opportunities Templeton Global Bond Fund invests in around the world may help reduce overall portfolio volatility, as illustrated in the chart to the right. Please note that past performance does not guarantee future results.

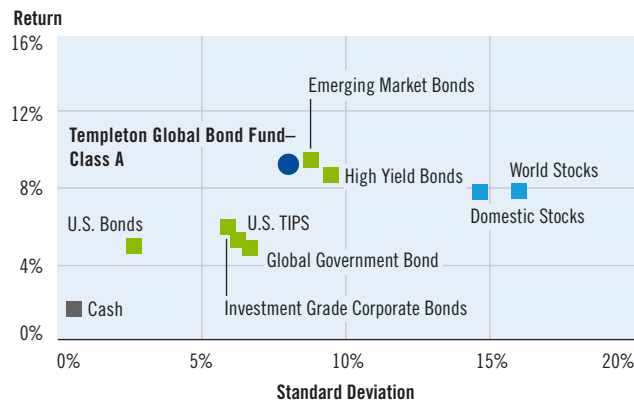

If the sales charge had been included, fund returns would have been lower.

Strong, Long-Term Performance Results

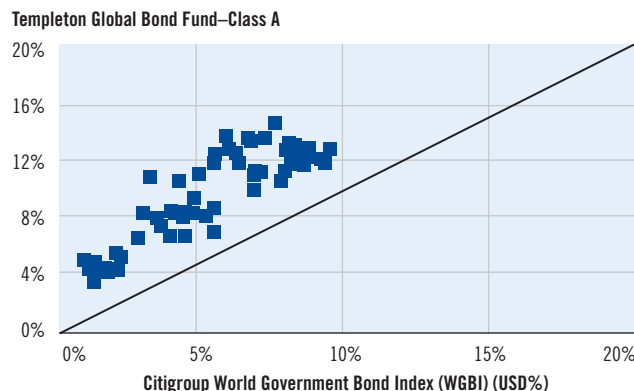

Over the past 5 years, Templeton Global Bond Fund—Class A outperformed its benchmark, the Citigroup World Government Bond Index, 60 out of 60 monthly rolling 3-year periods, as illustrated in the chart to the right. Please note that past performance does not guarantee future results.

If the sales charge had been included, fund returns would have been lower.

Risk vs. Return (Without Sales Charge)¹⁹
10-Year Period Ended June 30, 2014

Monthly Rolling 3-Year Returns (Without Sales Charge)²⁰
5-Year Period Ended June 30, 2014

15. Class A: On 1/1/93, the fund implemented a Rule 12b-1 plan, which affects subsequent performance. Class C: Prior to 1/1/04, these shares were offered with an initial sales charge; thus actual returns would have differed. The fund offers other share classes, subject to different fees and expenses that will affect their performance.

16. The 30-Day Standardized Yield reflects an estimated yield to maturity. It should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

17. Based on the annualization of the fund's October 2014 dividend and maximum offering price per share on 10/31/14.

18. The fund has a fee waiver associated with its investments in a Franklin Templeton money fund, contractually guaranteed through at least its current fiscal year end. Fund investment results reflect the fee waiver; without this reduction, the results would have been lower.

19. Source: © 2014 Morningstar, as of 6/30/14. Global Government Bonds are represented by the Citigroup World Government Bond Index; U.S. Bonds are represented by the Barclays U.S. Aggregate Index; U.S. TIPS are represented by the Barclays U.S. TIPS Index; Emerging Market Bonds are represented by the JP Morgan Emerging Markets Bond Index Global; High Yield Bonds are represented by the Credit Suisse High Yield Index; Investment Grade Corporate Bonds are represented by the Barclays U.S. Corporate Investment Grade Index; Domestic Stocks are represented by the S&P 500 Index; World Stocks are represented by the MSCI World Index; Cash represented by the P&R 90-Day U.S. Treasury Index. All MSCI data is provided "as is." In no event shall MSCI, its affiliates or any MSCI data provider have any liability of any kind in connection with the MSCI data described herein. Copying or redistributing the MSCI data is strictly prohibited. Indexes are unmanaged, and one cannot invest directly in an index. Volatility as measured by annualized standard deviation.

20. Annualized rolling periods are plotted on a monthly basis. The leading diagonal line links points of return for the index (lower axis). For every point of return along this line there is a corresponding return for the fund represented by the blue square (left axis). Any point above the line represents fund outperformance relative to the index for that period. Any point below the line represents fund underperformance relative to the index for that period. Indexes are unmanaged, and one cannot invest directly in an index.

WHAT ARE THE RISKS?

All investments involve risks, including possible loss of principal. Changes in interest rates will affect the value of the fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. Currency rates may fluctuate significantly over short periods of time, and can reduce returns. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the fund to participate in losses (as well as enable gains) on an amount that exceeds the fund's initial investment. The fund may not achieve the anticipated benefits, and may realize losses when a counterparty fails to perform as promised. Special risks are associated with foreign investing, which may be heightened in developing markets, including currency rate fluctuations, economic instability and political developments. The fund is also non-diversified, which involves the risk of greater price fluctuation than a more diversified portfolio. Changes in the financial strength of a bond issuer or in a bond's credit rating may affect its value. These and other risk considerations are discussed in the fund's prospectus.
