Franklin Templeton Investments

Gain From Our Perspective®

At Franklin Templeton Investments, we're dedicated to one goal: delivering exceptional asset management for our clients. By bringing together multiple, world-class investment teams in a single firm, we're able to offer specialized expertise across styles and asset classes, all supported by the strength and resources of one of the world's largest asset managers. This has helped us to become a trusted partner to individual and institutional investors across the globe.

Focus on Investment Excellence

At the core of our firm, you'll find multiple independent investment teams—each with a focused area of expertise—from traditional to alternative strategies and multi-asset solutions. And because our portfolio groups operate autonomously, their strategies can be combined to deliver true style and asset class diversification.

All of our investment teams share a common commitment to excellence grounded in rigorous, fundamental research and robust, disciplined risk management. Decade after decade, our consistent, research-driven processes have helped Franklin Templeton earn an impressive record of strong, long-term results.

Global Perspective Shaped by Local Expertise

In today's complex and interconnected world, smart investing demands a global perspective. Franklin Templeton pioneered international investing over 60 years ago, and our expertise in emerging markets spans more than a quarter of a century. Today, our investment professionals are on the ground across the globe, spotting investment ideas and potential risks firsthand. These locally based teams bring in-depth understanding of local companies, economies and cultural nuances, and share their best thinking across our global research network.

Strength and Experience

Franklin Templeton is a global leader in asset management serving clients in over 150 countries.¹ We run our business with the same prudence we apply to asset management, staying focused on delivering relevant investment solutions, strong long-term results and reliable, personal service. This approach, focused on putting clients first, has helped us to become one of the most trusted names in financial services.

The Strategy

Franklin Mutual Global Discovery Fund offers global diversification by investing primarily in undervalued stocks of companies from around the world.

We Are Opportunistic Value Investors

Our core investments are in undervalued stocks with viable catalysts that we believe will change the way the market views their true worth, thus unlocking value for our shareholders. Through bottom-up research, we seek to find value wherever it hides. This approach allows us to find opportunities throughout all parts of the business cycle.

We Think and Act Like Company Owners

Our portfolio managers roll up their sleeves to do their own proprietary research, determined to find the best opportunities the market has overlooked. We aim to be diligent in our analysis and disciplined in our purchases so that we only buy securities trading at a significant discount to what we think they are intrinsically worth. Additionally, we have a responsibility to our shareholders and will be activist investors if their interests need to be protected.

We Strive to Reduce Risk

Undervalued stocks are by definition discounted, which we believe reduces risk. In addition, our select investments in distressed securities and merger arbitrage, both natural extensions of our value strategy, tend to be affected less by broad market movements than by the specifics surrounding each particular situation. The Franklin Mutual Series strategy has historically provided our funds with lower volatility than the overall market and has enabled us to deliver strong and more consistent results over the long term.

“We look around the world to find where investors are discouraged, because where there’s discouragement, there’s often opportunity. We’re always looking to add holdings we believe are poised to benefit from increased market recognition and internal catalysts.”

PHILIPPE BRUGERE-TRELAT, Portfolio Manager

A Record of Lower Volatility

Generally speaking, because value stocks are already discounted, they may not have as far to fall should the market correct or a company's quarterly earnings disappoint Wall Street. For the five-year period ended June 30, 2014, Franklin Mutual Global Discovery Fund–Class A had lower volatility than its global benchmark index and its Lipper peer group average.

Risk vs. Return Comparison² (Without Sales Charge)

5-Year Period Ended June 30, 2014

If the fund's maximum 5.75% sales charge had been included, its return would have been lower.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment return and principal value will change with market conditions, and you may have a gain or a loss when you sell your shares. The Results

As of June 30, 2014, Morningstar® awarded the fund's Class A shares a four-star overall Morningstar Rating™, measuring risk-adjusted returns against 825, 661 and 334 U.S. domiciled World Stock funds over the 3-, 5- and 10-year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics.

5. Source: © 2014 Morningstar. For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effects of all sales charges), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive a Morningstar Rating™ of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund and rated separately.) The fund received Morningstar Ratings of 3, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively. **Past performance does not guarantee future results.** Morningstar Rating™ is for Class A shares only; other classes may have different performance characteristics.

6. Fund figures include the Rule 12b-1 expenses as if in effect during the entire period.

GROWTH OF A \$10,000 INVESTMENT (With Sales Charge)

December 31, 1992–June 30, 2014

7. Prior to 11/1/96, only a single class of fund shares was offered without a sales charge and Rule 12b-1 expenses. Returns shown are a restatement of the original class to include both the Rule 12b-1 expenses and the current sales charge applicable to each share class. Class A: Prior to 8/3/98, these shares were offered at a lower initial sales charge; thus, actual returns may differ. Class C: Prior to 1/1/04, these shares were offered with an initial sales charge; thus, actual returns would have differed. Class C shares have higher annual fees and expenses than Class A shares. The fund offers other share classes, subject to different fees and expenses that will affect their performance.

WHAT ARE THE RISKS?

Value securities may not increase in price as anticipated or may decline further in value. The fund's investments in foreign securities involve certain risks, including currency fluctuations, and economic and political uncertainties. Smaller-company stocks have exhibited greater price volatility than larger-company stocks, particularly over the short term. The fund's investments in companies engaged in mergers, reorganizations or liquidations also involve special risks as pending deals may not be completed on time or on favorable terms. The fund may invest in lower-rated bonds, which entail higher credit risk. These and other risks are described more fully in the fund's prospectus.
