

Franklin Municipal Income ETF (FTMU)

Municipals | Factsheet as of March 31, 2026

Investment Overview

The fund seeks as high a level of current income exempt from federal income tax as is consistent with preservation of capital. The fund is actively managed by one of the largest muni bond teams in the nation and invests in investment-grade bonds with intermediate- to long-term maturities from many states and market sectors.

Total Returns (%)

	Cumulative			Average Annual				Inception

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. For current month-end performance, please visit franklintempleton.com.

The NAV returns include returns of the Class R6 Shares of the predecessor mutual fund prior to the ETF's commencement of operations on 10/24/25. Prior to the ETF's listing on 10/27/2025, the NAV performance for the Class R6 shares of the predecessor mutual fund is used as a proxy for market price returns, which are typically calculated using the official closing price of the ETF. If the predecessor mutual fund had been structured as an exchange-traded fund, its performance may have differed. Returns for periods prior to inception of Class R6 shares are based on previous share classes. Returns for those shares were not adjusted for the lower operating expenses; had they been adjusted, performance would be higher.

Net Asset Value (NAV) returns are based on the NAV of the ETF; Market Price returns are based upon the official closing price of the ETF's shares. Returns are average annualized total returns, except for those periods of less than one year, which are cumulative. Market Price returns are calculated using the closing price as of 4 p.m. Eastern time on each trading day (when NAV is normally determined for most funds), and do not represent the returns you would receive if you traded shares at other times. Performance for the ETF and its benchmark index are as of the ETF's last trading day before the end of the period.

The total annual operating expenses are as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.

Growth of \$10,000

Inception through March 31, 2026

Market Price Returns, assuming dividends reinvested

What should I know before investing?

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Active management** does not ensure gains or protect against market declines. An investor may be subject to the federal **Alternative Minimum Tax**, and state and local taxes may apply. These and other risks are discussed in the fund's prospectus.

Glossary

Standard Deviation: Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders. The **Taxable Equivalent Yield** assumes the maximum regular federal income tax rate and the Medicare tax in effect.

Important Information

Effective October 24, 2025, Putnam Tax Exempt Income Fund reorganized into this ETF. This fund has an identical investment goal and substantially similar investment strategies as its predecessor fund.

ETFs and ETPs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs/ETPs net asset value. Brokerage commissions and ETF expenses will reduce returns. ETF/ETP shares may be bought or sold throughout the day at their market price, not their Net Asset Value (NAV), on the exchange on which they are listed. Shares of ETFs/ETPs are tradable on secondary markets and may trade either at a premium or a discount to their NAV on the secondary market.

Canada: This content is intended only for Canadian institutional investors that qualify as "permitted clients" as defined in National Instrument 31-103 - Registration Requirements, Exemptions and Ongoing Registrant Obligations. U.S. securities laws generally limit a non-U.S. fund's purchase of a U.S. registered mutual fund or ETF/ETP (a "U.S. Fund") to no more than 3% of the U.S. Fund's voting stock. You should consult your legal counsel prior to investing in a U.S. Fund.
