

Investing for the future

Franklin Growth Fund

We seek to buy great businesses and own them across multiple business cycles, mixing proven and emerging industry leaders to form a portfolio designed for durable long-term growth."

Serena Perin Vinton, CFAPortfolio Manager

Why Franklin Growth?

Focus on capital appreciation

We invest primarily in US-based companies across the market cap spectrum with potential for sustainable long-term earnings and cash flow growth. The portfolio comprises current and emerging market leaders as well as newer high-growth companies.

Focus on quality companies

The Fund's strategy emphasizes investing in quality companies, which can be held for multiple years: companies with wide economic moats, strong management teams, sustainable growth opportunities through multiple business cycles.

Attractive risk-adjusted return potential

Franklin Growth Fund has historically delivered lower volatility and higher risk-adjusted returns relative to its Morningstar Large Growth category peer average.*

The strategy

The foundation of our investment philosophy is the belief that attractive risk-adjusted returns can result from identifying companies with strong prospects for sustainable growth that is not already reflected in their current stock prices. We utilize fundamental, bottom-up research to focus on companies that we believe have sustainable growth characteristics—meeting our criteria of growth potential, quality and valuation.

Growth

Focus on companies with the potential to produce sustainable earnings and cash-flow growth

- Evaluate the long-term market opportunity to best identify emerging and current market leaders
- Assess the competitive position within the industry and overall market share

Quality

Seek high-quality companies with strong management teams and financial strength

- Focus on companies with strong balance sheets, good profitability, high free cash flow generation and return on capital
- Seek companies with a strong track record and perceived ability to consistently deliver on financial and business goals

Valuation

Assess whether the growth opportunity is already reflected in the stock price

- Consider a range of potential outcomes based on an assessment of multiple scenarios
- Determine the balance of sustainable growth opportunities relative to the business and financial risks

Experienced management team*

The portfolio management team is supported by the Franklin Equity Group which consists of 79 investment professionals. This strength and expertise allow analysts to conduct extensive research on thousands of stocks in over 100 industries.

The benefits

Differentiated buy-and-hold strategy supports long-term growth

We invest substantially in the equity securities of companies that are leaders in their industries and which we believe are suitable for a buy-and-hold strategy. We focus on identifying areas of risk and opportunity to build a diversified portfolio of businesses we are confident owning through multiple cycles.

We define market leaders as companies with wide economic moats and strong recurring cash flow. Market leaders represent the majority of the portfolio and typically have larger position sizes.

Emerging leaders are generally characterized by strengthening brands, rapid earnings and market share growth. When a company enters this phase, we may increase its position size as our conviction in the stock grows.

New growth companies are in the first stages of operations and have exponential growth potential. To manage risks, we typically have smaller position sizes within the portfolio.

Long-term approach and low turnover

Our long-term approach allows us to establish positions in up-and-coming companies and patiently grow with them. The result of our buy-and-hold approach is a low-turnover strategy, with many holdings that have been in the portfolio for years.

Top Ten Holdings¹

Broad diversification

Equity markets are not homogeneous—sectors often experience varying degrees of cyclicality, and within sectors, industries may also undergo differentiated cycles of expansion and contraction. By aiming to invest in high-quality companies across the size and sector spectrum, Franklin Growth Fund seeks to benefit from diversification across industries and markets. We believe this diversification can contribute to generating consistent risk-adjusted returns throughout full market cycles.

Sector Allocation (%)⁵

As of September 30, 2025

Focused on strong business models

When selecting stocks for the portfolio, we seek out companies with strong business models.

Business model	Network effect	Data moat	Infrastructure provider
What it is:	Network effects occur when a product or service becomes more valuable as the number of its users increases. As more users join, new data helps improve the product, which attracts more users, creating a virtuous cycle.	Data moats are the strategic advantage a company gains by accumulating unique data that competitors can't easily replicate, allowing it to deliver better products.	Infrastructure providers sell tools, services or technology that are used to create a final product; investing in these suppliers can offer a lower risk way to gain industry exposure.
How companies benefit:	Create barriers to entryProvide insights for innovation	Create competitive advantagesDeliver strategic insights	 Reduce volatility with diversified revenue and more stable cash flows Grows with the end-market customer base
Investment examples from our portfolio:	Smart phones with a dominant operating system can get more/better apps for their platforms, which attracts more users and creates a powerful ecosystem	As more users search for information, the platform gathers data that enables more accurate searches and may create other revenue streams (i.e., advertising, shopping and travel)	Invest in semiconductors, graphics processing units (GPUs) and battery testing equipment versus a single auto manufacturer

The results

Differentiated performance through active management

Over longer holding periods, Franklin Growth Fund has historically outperformed its benchmark and produced more attractive risk-adjusted returns than its peer category average. The Sharpe ratio is a risk-adjusted measure that's calculated using standard deviation and excess returns to determine reward per unit of risk.

Rolling Returns: Franklin Growth Fund

Sales Charges: Advisor Class: None; Class A: Maximum 5.50% initial sales charge; Class C: 1%; contingent deferred sales charge in the first year only. **Total Annual Operating Expenses:** Advisor Class: 0.54%; Class A: 0.79%; Class C: 1.54%.

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed. may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please call Franklin Templeton at (800) DIAL BEN/342-5236 or visit www.franklintempleton.com.

The total annual operating expenses are as of the fund's prospectus available at the time of publication. Actual fees may be higher and may impact portfolio returns.

franklintempleton.com Franklin Growth Fund

^{8.} The fund offers other share classes subject to different fees and expenses, which will affect their performance. Please see the prospectus for details.

^{9.} Advisor: Effective 12/31/96, the fund began offering Advisor Class Shares. For periods prior to the fund's Advisor Class inception date, a restated figure is used based on the fund's oldest share class, Class A performance, excluding the effect of Class A's maximum initial sales charge but reflecting the effect of the Class A Rule 12b-1 fees; and for periods after the fund's Advisor Class inception date, actual Advisor Class performance is used, reflecting all charges and fees applicable to that class.

^{10.} Prior to 9/10/18, these shares were offered at a higher initial sales charge of 5.75%; thus, actual returns would have differed. Total returns with sales charges have been restated to reflect the current maximum initial sales charge of 5.50%.

^{11.} Class A: Effective 5/1/94, the fund implemented a Rule 12b-1 plan, which affects subsequent performance. Class C: Prior to 1/1/04, these shares were offered with an initial sales charge; thus actual returns would have differed.

IMPORTANT INFORMATION

The S&P 500 Index features 500 leading US publicly traded companies, with a primary emphasis on market capitalization. Source: © 2025 S&P Dow Jones Indices LLC. All rights reserved.

The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the US equity universe. Source: FTSE Russell.

WHAT ARE THE RISKS?

All investments involve risks, including possible loss of principal. To the extent the portfolio invests in a concentration of certain securities, regions or industries, it is subject to increased volatility. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. The investment style may become out of favor, which may have a negative impact on performance. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the fund's prospectus.

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial professional, call us at (800) DIAL BEN/342-5236 or visit **franklintempleton.com**. Please carefully read a prospectus before you invest or send money.
