

Franklin LifeSmart 2025 Retirement Target Fund

Advisor Class: **FLRFX** Class A: **FTRTX** Class C: **FTTCX** Class R: **FRELX** Class R6: **FTLMX**

Target Date Factsheet as of March 31, 2024

Investment Overview

The fund seeks the highest level of long-term total return consistent with its asset allocation. Total return consists of both capital appreciation and income, with the fund placing an increasing emphasis on fixed income investments as the target date 2025 approaches, and reaching its final and most conservative asset allocation in approximately eight years after the target year. The fund invests primarily in a combination of other Franklin Templeton mutual funds and Franklin Templeton and third party exchange-traded funds (ETFs).

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit www.franklintempleton.com.

Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)	
			Max	CDSC	Gross	Net
Advisor Class	35472P570	FLRFX	0.00	—	0.74	0.45
Class A	35472P612	FTRTX	5.50	—	0.99	0.70
Class C	35472P596	FTTCX	0.00	1.00	1.74	1.45
Class R	35472P588	FRELX	0.00	—	1.24	0.95
Class R6	35472P380	FTLMX	0.00	—	0.61	0.40

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 04/30/2024 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. There is a 1% CDSC on any Class C shares you sell within 12 months of purchase.

What should I know before investing?

All investments involve risks, including possible loss of principal. Principal invested is not guaranteed at any time, including at or after the fund’s retirement target date; nor is there any guarantee that the fund will provide sufficient income at or through the investor’s retirement. The investment risk of the retirement target fund changes over time as its asset allocation changes. Investments in underlying funds are subject to the same risks as, and indirectly bear the fees and expenses of, the underlying funds. Equity securities are subject to price fluctuation and possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. These and other risks are discussed in the fund’s prospectus.

Glossary

Beta: A measure of the fund’s volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation:** Measure of the degree to which a fund’s return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund’s performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio’s actual returns and its expected performance given its level of market risk, as measured by beta. **Turnover** is a measure of the fund’s trading activity which represents the portion of the fund’s holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover.
