Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. The fund's investment returns and principal values will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit franklintempleton.com for the most recent month-end performance.

Advisor Class shares do not have sales charges or 12b-1 fees and are offered only to certain eligible investors as stated in the prospectus.

The fund has an expense reduction and a fee waiver associated with any investments it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through November 30, 2019. Fund investment results reflect the expense reduction and fee waiver; without these reductions, the results would have been lower.

Morningstar Rating™—Advisor Class

Overall Morningstar Rating™ As of March 31, 2018 the fund's Advisor Class shares received a 4 star overall Morningstar Rating™, measuring risk-adjusted returns against 339 and 293 U.S.-domiciled Foreign Large Growth funds over the 3- and 5-year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics.

**What Are the Risks**

All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investments in emerging markets involve heightened risks related to the same factors, in addition to those associated with these markets' smaller size and lesser liquidity. These and other risk considerations are discussed in the fund's prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Morningstar Rating™: Source: Morningstar®, 3/31/18. For each mutual fund and ETF with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on how a fund ranks on a Morningstar Risk-Adjusted Return measure against other funds in the same category. This measure takes into account variations in a fund's monthly performance, and does not take into account the effects of sales charges, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Fund's Advisor Class shares received a Morningstar Rating of 5 and 3 star(s) for the 3- and 5-year periods, respectively. Morningstar Rating™ is for the named share class only; other classes may have different performance characteristics.
