

Franklin LifeSmart(TM) 2060 Retirement Target Fund

Asset Allocation
June 30, 2021

Fund Fact Sheet | Share Class: Advisor

Fund Description

The fund's investment goal is to seek the highest level of long-term total return consistent with its asset allocation. Total return consists of both capital appreciation and income, with the fund placing an increasing emphasis on fixed income as the target date 2060 approaches, and reaching its final and most conservative asset allocation approximately seven years after the target year. The fund invests primarily in a combination of other Franklin Templeton mutual funds and Franklin Templeton and third party exchange-traded funds (ETFs).

What Are the Risks?

The investment risk of the retirement target fund changes over time as its asset allocation changes. Since the fund invests in underlying funds, including exchange-traded funds (ETFs), which may engage in a variety of investment strategies involving certain risks, the Franklin LifeSmart 2060 Retirement Target Fund is subject to those same risks. All investments involve risks, including possible loss of principal. Principal invested is not guaranteed at any time, including at or after the fund's retirement target date; nor is there any guarantee that the fund will provide sufficient income at or through the investor's retirement. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the fund adjust to arise in interest rates, the fund's share price may decline. Foreign investing carries additional risks such as currency and market volatility and political or social instability, risks which are heightened in developing countries. These risks are described more fully in the fund's prospectus. Investors should consult their financial professional for help selecting the appropriate fund of funds, or fund combination, based on an evaluation of their investment objectives, retirement time horizons and risk tolerance.
