

ClearBridge International Value Fund

Class A: SBIEX Class C: SBICX Class I: SBIYX Class IS: LSIUX Class R: LIORX

Value | Factsheet as of June 30, 2025

Investment Overview

Employs an active approach to invest in multi-cap, non-U.S. companies. Seeks geographical diversification by region and country in both developed and emerging markets. Emphasizes attractive companies as measured by valuation; quality of financial condition; product development and marketing; competitiveness; and other factors.

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit franklintempleton.com.

Effective August 2, 2021, except as noted below, Class C [including Class C, Class C-1 & Class C-2] shares will automatically convert to Class A shares after the shares have been held for 8 years from their original purchase date. The initial conversion took place on August 16, 2021. Refer to the fund's prospectus or contact your Service Agent for more information.

Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)	
			Max	CDSC	Gross	Net
Class A	52469X607	SBIEX	5.50	—	1.47	1.29
Class C	52469X805	SBICX	0.00	1.00	2.07	2.04
Class I	52469X888	SBIYX	0.00	—	1.06	0.94
Class IS	52469X870	LSIUX	0.00	—	0.97	0.84
Class R	52471R515	LIORX	0.00	—	1.59	1.54

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 12/31/2026 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. There is a 1% CDSC on any Class C shares you sell within 12 months of purchase. Maximum sales charges have been updated as of August 15, 2022, please refer the Fund's prospectus for more information.

With a legacy dating back over 60 years, ClearBridge Investments is a leading global equity manager committed to delivering differentiated long-term results through authentic active management.

What should I know before investing?

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. The **investment style** may become out of favor, which may have a negative impact on performance. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. **Fixed income securities** involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. The manager may consider **environmental, social and governance (ESG) criteria** in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the fund's prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance.

Standard Deviation: Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta.

Information Ratio: In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark. **Tracking Error** measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

Important Information

Effective September 1, 2023, the MSCI EAFE Index-NR was added as an additional benchmark for the fund.
