FRANKLIN TEMPLETON | WESTERN ASSET

Western Asset Intermediate-Term Municipals Fund

Class A: SBLTX Class I: SBTYX **Commentary | as of September 30, 2026**

Key Takeaways

- **Markets:** During the third quarter, global markets remained heavily influenced by developments in the Middle East, as repeated military escalations and disruptions to global energy supplies drove renewed inflation concerns and a significant repricing of the interest-rate outlook. As a result, risk assets generally underperformed, aside from AI-related winners.
- **Contributors**: Sector allocations, issue selection.
- **Detractors**: Rates positioning.
- **Outlook**: Greater uncertainty from geopolitical risks, technological change and increased scrutiny of private credit is impacting fixed-income markets, resulting in higher inflation and renewed expectations for central bank rate hikes. Although inflation is elevated in the short term, longer-term inflation expectations remain stable and the US is likely to outperform other regions thanks to its energy independence, fiscal support and strong fundamentals.

Performance Review

- Overweight to industrial revenue contributed to performance.
- Issue selection was positive largely due to selection within the leasing and transportation sectors.
- Rates positioning detracted from performance as the municipal yield curve bear-flattened.
- A lower-quality bias detracted from performance.

Outlook

- Global fixed-income markets are navigating heightened uncertainty driven by geopolitical tensions in the Middle East, rapid technological change and increased scrutiny of private credit markets. Energy-related supply disruptions have lifted near-term inflation and triggered a sharp reset in market expectations for central bank policy, with investors pricing rate hikes rather than the cuts anticipated earlier in the year.
- While near-term inflation pressures are evident, longer-term inflation expectations remain well anchored, and we believe the magnitude of the recent rate repricing may be somewhat overdone.
- Global growth is expected to moderate, with the US remaining relatively more resilient than other regions due to energy independence, fiscal support and strong underlying fundamentals.

Morningstar Rating™

Overall Rating as of September 30, 2026

★★★ **(3-Star)** Class A

★★★★ **(4-Star)** Class I

As of 09/30/2026 the fund's Class I shares received a 4 star and Class A shares received a 3 star overall Morningstar rating™, measuring risk-adjusted returns against 253, 238 and 179 Muni National Intermediate funds over the 3-, 5- and 10-year periods, respectively. A fund's overall rating is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) rating metrics. The number of funds in the category for the Overall Rating are listed under the 3-year period.

Performance data quoted represents past performance, which does not guarantee future results. *Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit franklintempleton.com.*
Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 12/31/2027 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice.

What are the Risks?

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Low-rated, high-yield bonds** are subject to greater price volatility, illiquidity and possibility of default. **Derivative instruments** can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. An investor may be subject to the federal **Alternative Minimum Tax**, and state and local taxes may apply. These and other risks are discussed in the fund's prospectus.

The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders.

Morningstar Rating™: Source: Morningstar®, 09/30/2026. For each mutual fund and ETF with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on how a fund ranks on a Morningstar Risk-Adjusted Return measure against other funds in the same category. This measure takes into account variations in a fund's monthly performance, and does not take into account the effects of sales charges and loads, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The fund's Class I shares received a Morningstar Rating of 3, 4 and 4 and fund's Class A shares received a Morningstar Rating of 3, 3 and 3 star(s) for the 3-, 5- and 10-year periods, respectively. Franklin Templeton provides this fund's Morningstar Rating™ for Class I and Class A shares only. Other share classes may have different Morningstar ratings.
