Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit franklintempleton.com.

Effective August 2, 2021, except as noted below, Class C [including Class C, Class C-1 & Class C-2] shares will automatically convert to Class A shares after the shares have been held for 8 years from their original purchase date. The initial conversion took place on August 16, 2021. Refer to the fund's prospectus or contact your Service Agent for more information.

Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)		30-Day SEC Yield (%)	
			Max	CDSC	Gross	Net	Without Waiver	With Waiver
Class A	52469H545	CFLGX	5.50	—	1.36	1.36	1.02	1.02
Class C	52469H529	SMDLX	0.00	1.00	2.10	2.10	0.30	0.30
Class I	52469H511	LADIX	0.00	—	1.13	1.13	1.32	1.32
Class IS	52471R747	LCBDX	0.00	—	1.02	1.02	1.42	1.42

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Net expenses are capped under a contractual agreement, which cannot be terminated prior to 12/31/2027 without Board consent. Actual expenses may be higher and may impact portfolio returns. There is a 1% CDSC on any Class C shares you sell within 12 months of purchase. Maximum sales charges have been updated as of August 15, 2022, please refer the Fund's prospectus for more information.

ClearBridge Investments is an active equity manager offering a broad range of strategies across global developed and emerging markets, local markets, real assets, and income.

What should I know before investing?

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. **Short selling** is a speculative strategy. Unlike the possible loss on a security that is purchased, there is no limit on the amount of loss on an appreciating security that is sold short. **Derivative instruments** can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The **investment style** may become out of favor, which may have a negative impact on performance. **Real estate investment trusts (REITs)** are closely linked to the performance of the real estate markets. REITs are subject to illiquidity, credit and interest rate risks, and risks associated with small- and mid-cap investments. Investments in energy-related **master limited partnerships and midstream entities** are subject to risks of declines in energy and commodity prices, decreases in energy demand, adverse weather conditions, natural or other disasters, changes in government regulation, and changes in tax laws. **Dividends** may fluctuate and are not guaranteed, and a company may reduce or eliminate its dividend at any time. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. The manager may consider **environmental, social and governance (ESG) criteria** in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the fund's prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta. **Information Ratio:** In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark. **Tracking Error** measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

Important Information

CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

The **Dow Jones U.S. Select Dividend Index** consists of 100 of the highest dividend-yielding securities (excluding real estate investment trusts, REITs) in the Dow Jones U.S. Index, a broad-based index representative of the total market for U.S. equity securities. The **Composite Benchmark** is a representation of the performance of the major asset classes in which the fund may typically invest, consisting of 60% Russell 3000 Value Index, 20% Alerian MLP Index and 20% MSCI US REIT Index. The Russell 3000 Value Index measures the performance of the broad value segment of the U.S. equity value universe. The Alerian MLP Index is a composite of the 50 most prominent energy master limited partnerships (MLPs). The MSCI US REIT Index is comprised of U.S. large-, mid- and small-cap REITs. Source: FTSE.
