

# Western Asset Inflation Indexed Plus Bond Fund

**Class I: WAIIX Class A: WAFAX Class C: WAFCX Class FI: WATPX Class IS: WAFSX Class R: WAFRX**

**Government | Factsheet as of December 31, 2025**

## Investment Overview

Seeks to maximize total return and preserve capital by investing primarily in inflation-indexed fixed income securities. Uses the global breadth of Western Asset's investment platform, fundamental value-oriented investment philosophy and a process that combines top down macro economic views with bottom up fundamental research. Investors seeking inflation protection may find this fund appropriate.

**Performance data quoted represents past performance, which does not guarantee future results.** Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit [franklintempleton.com](http://franklintempleton.com).

Effective August 2, 2021, except as noted below, Class C [including Class C, Class C-1 & Class C-2] shares will automatically convert to Class A shares after the shares have been held for 8 years from their original purchase date. The initial conversion took place on August 16, 2021. Refer to the fund's prospectus or contact your Service Agent for more information.

## Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)		30-Day SEC Yield (%)	
			Max	CDSC	Gross	Net	Without Waiver	With Waiver
Class I	957663883	WAIIX	0.00	—	0.80	0.80	3.46	3.46
Class A	957663362	WAFAX	3.75	—	1.02	0.90	3.20	3.20
Class C	957663354	WAFCX	0.00	1.00	1.76	1.65	2.37	2.56
Class FI	957663875	WATPX	0.00	—	1.08	0.85	3.15	3.38
Class IS	957663545	WAFSX	0.00	—	0.69	0.69	3.66	3.66
Class R	957663347	WAFRX	0.00	—	1.70	1.15	2.64	3.08

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 12/31/2026 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. There is a 1% CDSC on any Class C shares you sell within 12 months of purchase. Maximum sales charges have been updated as of August 15, 2022, please refer the Fund's prospectus for more information. **During periods of rising inflation, fund yields can vary significantly from month-to-month and may not be repeated.**

Portfolio Data Information

**Credit Quality** is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by S&P Global Ratings, Moody's Investors Service and/or Fitch Ratings, Inc. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, if two or more of the agencies have assigned differing ratings to a security, the highest rating is used. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the portfolio does not apply to the stability or safety of the portfolio. The methodology used for the calculation of credit quality ratings displayed may differ from the methodology for monitoring investment limits, if applicable. **Please note, the portfolio itself has not been rated by an independent rating agency.**

Portfolio Description

Western Asset Management is one of the world's leading global fixed income managers. Founded in 1971, the firm is known for team management and proprietary research, supported by robust risk management and a long-term fundamental value approach.

What should I know before investing?

**All investments involve risks, including possible loss of principal. Fixed income securities** involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Derivative instruments** can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. **Leverage** increases the volatility of investment returns and subjects investments to magnified losses and a decline in value. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets. Asset-backed, mortgage-backed or mortgage-related securities** are subject to prepayment and extension risks. These and other risks are discussed in the fund's prospectus.

Glossary

**Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Average Life:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes.

Important Information

The yield includes adjustments for inflation to both U.S. and foreign portfolio securities that are linked to inflation indices. Please note, inflation adjustments to U.S. securities often occur at different intervals than foreign securities. These adjustments can cause the yield to change substantially from month-to-month. Increases in the inflation rate may result in the Fund reporting an exceptionally high yield, which may not be repeated." The **Bloomberg U.S. TIPS Index** is an unmanaged index that measures the performance of intermediate (one to ten year) U.S. Treasury inflation-protected securities.
