| Market Price Return | 7.40       | 10.03 | 18.13 | 10.01          | 17.52 | 5.20  | 6.74  | 3.31      | 3/28/2012 |
| NAV Returns         | 4.77       | 9.55  | 13.50 | 7.58           | 12.68 | 2.26  | 4.08  | 3.10      | 3/28/2012 |
| Benchmark           | 0.60       | 5.14  | 7.91  | 2.40           | 5.45  | -1.56 | 1.15  | 0.79      | _         |

#### **Calendar Year Total Returns (%)**

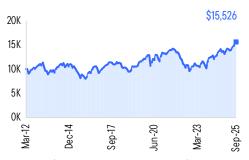

|                     | 2024  | 2023  | 2022   | 2021  | 2020 | 2019  | 2018   | 2017  | 2016  | 2015   |
|---------------------|-------|-------|--------|-------|------|-------|--------|-------|-------|--------|
| Market Price Return | 7.18  | 15.94 | -21.56 | 0.69  | 6.20 | 30.44 | -12.13 | 17.10 | 12.84 | -20.83 |
| NAV Returns         | 1.38  | 18.16 | -20.69 | -5.99 | 7.77 | 21.94 | -9.49  | 14.96 | 10.02 | -19.40 |
| Benchmark           | -1.69 | 5.72  | -16.25 | -4.71 | 9.20 | 6.84  | -1.19  | 7.39  | 2.09  | -3.15  |

Performance shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so shares, when sold, may be worth more or less than the original cost. Returns based on Market Price or NAV, and assume the reinvestment of all distributions at the Dividend Reinvestment Plan Price or NAV, respectively. All returns include the deduction of management fees, operating expenses and all other fund expenses, and do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares. When applicable, performance would have been lower if fees had not been waived in various periods. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. Please visit franklintempleton.com for the most recent month-end performance.

Gross expenses are the fund's total annual operating expenses as of the fund's annual report available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect voluntary fee waivers, expense caps and/or reimbursements. Voluntary waivers may be modified or discontinued at any time without notice. NAV is total assets less total liabilities divided by the number of shares outstanding. Market Price, determined by supply and demand, is the price an investor purchases or sells the fund. The Market Price may differ from a fund's NAV. Premium / Discount reflects the difference between the NAV and the Market Price of the fund, and represents the amount that the fund is trading above or below its NAV, expressed as a percentage of the NAV. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income, capital gains and return of capital (excluding special distributions). The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance. The difference between total assets and net assets, if any, is due primarily to the fund's use of borrowings and other liabilities; netassets do not include borrowings. The fund may employ leverage in the form of loans, preferred stock, reverse repurchase agreementsand/or other instruments. When the fund engages in transactions that have a leveraging effect on the fund's portfolio, the value of thefund will be more volatile and all other risks will tend to be compounded.

# Growth of \$10,000

Inception through September 30, 2025
Market Price Returns, assuming dividends reinvested

The Growth of \$10,000 chart reflects a hypothetical \$10,000 investment on Market Price and assumes reinvestment of dividends and capital gains. Fund expense, including management fees and other expenses were deducted.

| CCC                     | 9.84  |
| Cash & Cash Equivalents | 2.42  |

# **Portfolio Data Information**

**Exposure:** Notional exposure figures are estimated and are intended to show the portfolio's direct exposure to securities and indirect exposure, through derivatives. Direct and indirect exposures are subject to change over time and methodologies for calculating indirect exposures vary by derivative type. Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of derivatives, unsettled trades or other factors.

Credit Quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by Standard and Poor's, Moody's Investors Service and/or Fitch Ratings, Ltd. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, the manager assigns each security the middle rating from these three agencies. When only two agencies provide ratings, the lower of the two ratings will be assigned. When only one agency assigns a rating, that rating will be used. Foreign government bonds without a specific rating are assigned a country rating, if available. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the Fund's portfolio does not apply to the stability or safety of the Fund. These ratings are updated monthly and may change over time. Please note, the Fund itself has not been rated by an independent rating agency.

#### **Portfolio Management**

|                       | Years with Firm | Years of Experience |
|-----------------------|-----------------|---------------------|
| David F. Hoffman, CFA | 30              | 50                  |
| Jack P. McIntyre      | 26              | 38                  |
| Anujeet Sareen        | 9               | 32                  |
| Brian Kloss           | 15              | 30                  |
| Tracy Chen, CFA       | 17              | 28                  |
| Paul Mielczarski      | 2               | 26                  |

Acting with conviction and discipline, Brandywine Global looks beyond short-term, conventional thinking to rigorously pursue long-term value across differentiated fixed income, equity and alternative solutions.

# What should I know before investing?

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Asset-backed, mortgage-backed or mortgage-related securities are subject to prepayment and extension risks. Liquidity risk exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. Leverage increases the volatility of investment returns and subjects investments to magnified losses and a decline in value. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated.

#### Glossary

Fund

**Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Average Coupon** is the average interest rate stated on the securities held by a portfolio. **Average Coupon is calculated without the deduction of fees and expenses.** 

#### **Important Information**

Distributions are not guaranteed and are subject to change.

The Closed-End Funds are not sold or distributed by Franklin Distributors, LLC, or any affiliate of Franklin Resources, Inc. Unlike open-end funds, shares are not continually offered. Like other public companies, closed-end funds have a one-time initial public offering, and once their shares are first issued, are generally bought and sold through non-affiliated broker/dealers and trade on nationally recognized stock exchanges. Share prices will fluctuate with market conditions and, at the time of sale, may be worth more or less than your original investment. Shares of exchange-traded closed-end funds may trade at a discount or premium to their original offering price, and often trade at a discount to their net asset value. Investment return, market price and net asset value will fluctuate with changes in market conditions. The Funds are subject to investment risks, including the possible loss of principal invested.
