

ClearBridge Large Cap Growth ESG Catholic Portfolios

ClearBridge

Separately Managed Accounts | Fact Sheet as of December 31, 2025

Investment overview

The ClearBridge Large Cap Growth ESG Catholic Portfolios are designed for investors seeking long-term capital appreciation aligned with Catholic values, investing in large-capitalization companies with the potential for high future earnings growth.

The ESG Investment Program actively incorporates environmental, social and governance (ESG) factors into the fundamental research platform and the stock-selection process. In addition, ongoing company engagement and shareholder advocacy are key components of the Program.

A few examples of the ESG considerations include:

- Innovative workplace policies, employee benefits and programs
- Environmental management system strength, eco-efficiency and life-cycle analysis
- Community involvement, strategic philanthropy and reputation management
- Strong corporate governance and independence on the board

ClearBridge is a Signatory to the UN Principles for Responsible Investment and is affiliated with the Investor Network on Climate Risk, the Carbon Disclosure Project, the Interfaith Center on Corporate Responsibility, the Global Impact Investing Network, and the US Forum for Sustainable and Responsible Investment.

Investment objective

Seeks to:

- Focus on consistent growth of capital while managing volatility
- Outperform the Russell 1000 Growth Index over a full market cycle, and with potential less risk
- Perform well in rising markets and outperform the Russell 1000 Growth Index in declining markets
- Actively evaluate a company's "non-financial" drivers of business performance to gauge its level of social awareness and consistency with Catholic values

Investment philosophy

- Invest in leadership companies where we believe the market price underestimates the magnitude of future growth
- Use stock selection as the primary driver — identify category leaders with characteristics to sustain that position
- Find secular tailwinds to support multi-year investment opportunities, allowing for compounding of earnings and cash flow
- Perform rigorous analysis to understand company fundamentals, key competitive dynamics and industry structure

Believe that the best business models win over time

- Identify barriers to entry and prefer companies with innovation prowess, regardless of size
- Look for businesses that protect and grow market share consistently
- Gravitate to self-funding business models with significant recurring revenue

Seek businesses with the ability to generate superior free cash flow over time

- Stress test the sustainability of profitability and growth

Take a disciplined approach to valuation

Key differentiators

- High-conviction, concentrated, low-turnover approach
- Bottom-up driven investment decision
- Diversification across growth spectrum (Cyclical, Stable, Select)

Management team

ClearBridge Investments is an active equity manager offering a broad range of strategies across global developed and emerging markets, local markets, and income.

Investment management team

Erica Furfaro
Director
Portfolio Manager
Industry since 2005

Margaret Vitrano
Managing Director
Portfolio Manager
Industry since 1996

Active share is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index.

Diversification does not ensure a profit or protect against market loss.

Guidelines for Catholic Issues Screening:* The Environmental, Social and Governance (ESG) Investment Program applies ESG integration, active company engagement and shareholder advocacy to ClearBridge investment strategies. For clients who wish their portfolios to reflect Catholic values, we offer portfolios managed in a manner that is consistent with the socially responsible investment guidelines of the United States Conference of Catholic Bishops (USCCB).

All of the following screens are applied to exclude companies:**

- Involved in the provision of abortion services
- Involved in the manufacture of contraceptive products
- That conduct medical research using human embryonic stem cells and/or fetal tissue
- Which derive a significant portion of revenues from production of weapons
 - Which derive a small portion of revenues from controversial weapons including, nuclear, biological, chemical, landmines and weapons of mass destruction
- Which derive a significant portion of revenues from tobacco products, alcoholic beverages, gambling services, adult entertainment and nuclear power
- With an ongoing record of significant controversies, suits and/or fines based on gender, race, ethnicity, age, religion or social conditions
- That have alignments with governments associated with human rights violations or repressive regimes

To ensure portfolios remain fully invested, portfolio managers may add more companies or increase weights of companies that affirmatively pass through our screening process. Additionally, upon a client's request we will exclude companies that conduct medical research using replicated cells derived from fetal cell lines (a more conservative interpretation of this restriction favored by some investors).

* Last updated based on November 2021 USCCB Guidelines. ** Screening generally involves the exercise of discretion by the ESG team and is based on company and/or other information believed to be reliable, although the accuracy and completeness of such information cannot be guaranteed.

Investment process

STEP 1

Idea generation

- Sector analysts and PMs each propose companies with attractive business models and good long-term growth prospects for further review.
- Idea generation is an ongoing and continual process.

STEP 2

Fundamental analysis

- Analysts and PMs work together to understand the durability of a company's growth and profit.
- Meet with target company management, competitors and industry experts.
- Determine appropriate entry price.

STEP 3

Portfolio construction

- Own companies with a range of growth and volatility.
- Monitor sector weightings and correlations among current holdings.

STEP 4

Risk management/Evaluation discipline

- Assess risk regularly, and re-examine a current holding when fundamentals decline, full value is reached, or a decline in company's social/environmental performance causes it to violate social and Catholic values screens.

The investment process may change over time. The characteristics set forth above are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee that investment objectives will be achieved.

Portfolio Information†

As of December 31, 2025

Top Ten Holdings (%)

	Portfolio

† Source: FactSet. Portfolio characteristics listed are based on a model portfolio, not an actual client account. The model portfolio is a hypothetical portfolio whereby the portfolio characteristics are based on simulated trading and account activity of a client account invested in this strategy. The model portfolio assumes no withdrawals, contributions or client-imposed restrictions. Portfolio characteristics of individual client accounts may differ from those of the model portfolio as a result of account size, client-imposed restrictions, the timing of client investments, market conditions, contributions, withdrawals and other factors. **Dividend Yield is calculated without the deduction of fees and expenses.**

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintermpleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

¹ Fees: Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. These statistics are based on pure gross and net-of-fees quarterly composite returns, were calculated assuming reinvestment of dividends and income, and take into account both realized and unrealized capital gains and losses.

Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

Terms and definitions:

Dividend yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **price-to-book ratio (P/B)** is a stock's price divided by the stock's per share book value. Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

Weighted median market capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted average market capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Market capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Standard deviation measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

The **up-capture ratio** measures the manager's overall performance to the benchmark's overall performance, considering only quarters that are positive in the benchmark. An up-capture ratio of more than 100 indicates a manager who outperforms the relative benchmark in the benchmark's positive quarters.

The **down-capture ratio** is the ratio of the manager's overall performance to the benchmark's overall performance, considering only quarters that are negative in the benchmark. A down-capture ratio of less than 100 indicates a manager who outperforms the relative benchmark in the benchmark's negative quarters and protects more of a portfolio's value during down markets.

Alpha is a measure of performance vs. a benchmark on a risk-adjusted basis. A positive alpha of 1.0 means the portfolio has outperformed its benchmark index by 1%. Correspondingly, a similar negative alpha would indicate an underperformance of 1%. Alpha is a measure of the difference between actual returns and expected performance measuring sensitivity to index movements.

Beta measures the sensitivity of an investment to the movement of its benchmark. A beta higher than 1.0 indicates the investment has been more volatile than the benchmark and a beta of less than 1.0 indicates that the investment has been less volatile than the benchmark.

Sharpe ratio is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better a portfolio's historical risk-adjusted performance.

R-squared measures the strength of the linear relationship between a portfolio and its benchmark. R-squared at 1.00 implies perfect linear relationship and zero implies no relationship exists.

The **Russell 1000 Growth Index** measures the performance of the large-cap growth segment of the U.S. equity universe. Source: FTSE.

What are the risks?

All investments involve risks, including possible loss of principal. The managers' environmental, social and governance (ESG) strategies may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance.
