

# Western Asset Diversified Income Fund (WDI)

Multi-Sector | Factsheet as of June 30, 2025

## Investment Overview

**Diverse opportunity set:** Anticipates investing in a wide range of fixed income securities, seeking to go beyond traditional bond benchmarks to access a broad range of opportunities for income and capital appreciation

**Income-focused:** Potential access to fixed income sectors and private debt not typically available through traditional mutual funds.

**Flexible and dynamic:** Anticipates rotating sectors and securities in response to market conditions, focusing on what we believe are undervalued securities with attractive fundamentals.

**Deep experience:** Will draw on Western Asset's 50 years as an active fixed income manager, with \$476 billion in assets under management, including \$181 billion in multi-sector strategies (as of 3/31/21)

**Limited Term:** The Fund intends to dissolve as of the first business day following the twelfth anniversary of the effective date of the Fund's initial registration statement (the "Dissolution Date"), provided that the Board may extend the Dissolution Date for up to two years. Within 6-18 months of the liquidation date the Board may approve a tender offer for 100% of the shares outstanding. If, upon expiration of the tender offer, the Fund has in excess of \$200 million aggregate net assets the Board may remove the Fund's termination date.

## Growth of \$10,000

Inception through June 30, 2025

Market Price Returns, assuming dividends reinvested

The Growth of \$10,000 chart reflects a hypothetical \$10,000 investment on Market Price and assumes reinvestment of dividends and capital gains. Fund expense, including management fees and other expenses were deducted.

## Total Returns (%)

	Cumulative			Average Annual				Inception	
	3-Mth	6-Mth	YTD	1-Yr	3-Yr	5-Yr	10-Yr	Inception	Date
Market Price Return	5.87	10.62	10.62	16.00	15.04	—	—	3.24	6/25/2021
NAV Returns	3.16	4.33	4.33	8.28	10.08	—	—	2.56	6/25/2021
Benchmark	3.53	4.57	4.57	10.29	9.93	—	—	3.79	—

## Calendar Year Total Returns (%)

	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
Market Price Return	13.78	24.97	-23.44	—	—	—	—	—	—	—
NAV Returns	9.10	17.32	-18.07	—	—	—	—	—	—	—
Benchmark	8.19	13.44	-11.18	—	—	—	—	—	—	—

**Performance shown represents past performance and is no guarantee of future results.** Current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so shares, when sold, may be worth more or less than the original cost. Returns based on Market Price or NAV, and assume the reinvestment of all distributions at the Dividend Reinvestment Plan Price or NAV, respectively. All returns include the deduction of management fees, operating expenses and all other fund expenses, and do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares. When applicable, performance would have been lower if fees had not been waived in various periods. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. Please visit [franklintempleton.com](http://franklintempleton.com) for the most recent month-end performance.

The total annual operating expenses are as of the fund's annual report available at the time of publication. Actual expenses may be higher and may impact portfolio returns. **NAV** is total assets less total liabilities divided by the number of shares outstanding. **Market Price**, determined by supply and demand, is the price an investor purchases or sells the fund. The Market Price may differ from a fund's NAV. **Premium / Discount** reflects the difference between the NAV and the Market Price of the fund, and represents the amount that the fund is trading above or below its NAV, expressed as a percentage of the NAV. **Distribution Rate** is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and excludes special distributions. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance. The difference between total assets and net assets, if any, is due primarily to the fund's use of borrowings and other liabilities; net assets do not include borrowings. The fund may employ leverage in the form of loans, preferred stock, reverse repurchase agreements and/or other instruments. When the fund engages in transactions that have a leveraging effect on the fund's portfolio, the value of the fund will be more volatile and all other risks will tend to be compounded.

## Portfolio Data Information

**Credit Quality** is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by Standard and Poor's, Moody's Investors Service and/or Fitch Ratings, Ltd. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, if two or more of the agencies have assigned differing ratings to a security, the highest rating is used. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the fund's portfolio does not apply to the stability or safety of the fund. These ratings are updated monthly and may change over time. **Please note, the Fund itself has not been rated by an independent rating agency.**

## Portfolio Description

Western Asset Management is one of the world's leading global fixed income managers. Founded in 1971, the firm is known for team management and proprietary research, supported by robust risk management and a long-term fundamental value approach. Each group of sector specialists utilizes their expertise in bottom-up analysis of each portfolio sector.

## What should I know before investing?

**All investments involve risks, including possible loss of principal. Fixed income securities** involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls.

**Low-rated, high-yield bonds** are subject to greater price volatility, illiquidity and possibility of default. **Asset-backed, mortgage-backed or mortgage-related securities** are subject to prepayment and extension risks. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. **Derivative instruments** can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. **Leverage** increases the volatility of investment returns and subjects investments to magnified losses and a decline in value. **Diversification** does not assure against market loss.

## Glossary

**Average Life:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Average Coupon** is the average interest rate stated on the securities held by a portfolio. **Average Coupon is calculated without the deduction of fees and expenses.**

## Important Information

**Distributions are not guaranteed and are subject to change.**

**The Closed-End Funds are not sold or distributed by Franklin Distributors, LLC, or any affiliate of Franklin Resources, Inc.** Unlike open-end funds, shares are not continually offered. Like other public companies, closed-end funds have a one-time initial public offering, and once their shares are first issued, are generally bought and sold through non-affiliated broker/dealers and trade on nationally recognized stock exchanges. Share prices will fluctuate with market conditions and, at the time of sale, may be worth more or less than your original investment. Shares of exchange-traded closed-end funds may trade at a discount or premium to their original offering price, and often trade at a discount to their net asset value. Investment return, market price and net asset value will fluctuate with changes in market conditions. The Funds are subject to investment risks, including the possible loss of principal invested.

The **Bloomberg U.S. Corporate High Yield - 2% Issuer Cap Index** measures the performance of U.S. dollar-denominated, non-investment-grade, fixed-rate, taxable corporate bond market. The Index limits the maximum exposure to any one issuer to 2%. Source: Bloomberg Indices.
