

Separately Managed Accounts

ClearBridge All Cap Growth Portfolios

3Q 2025

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: ClearBridge Investments, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

Your trusted partner for what's ahead™

For our clients, we are:

At-a-glance

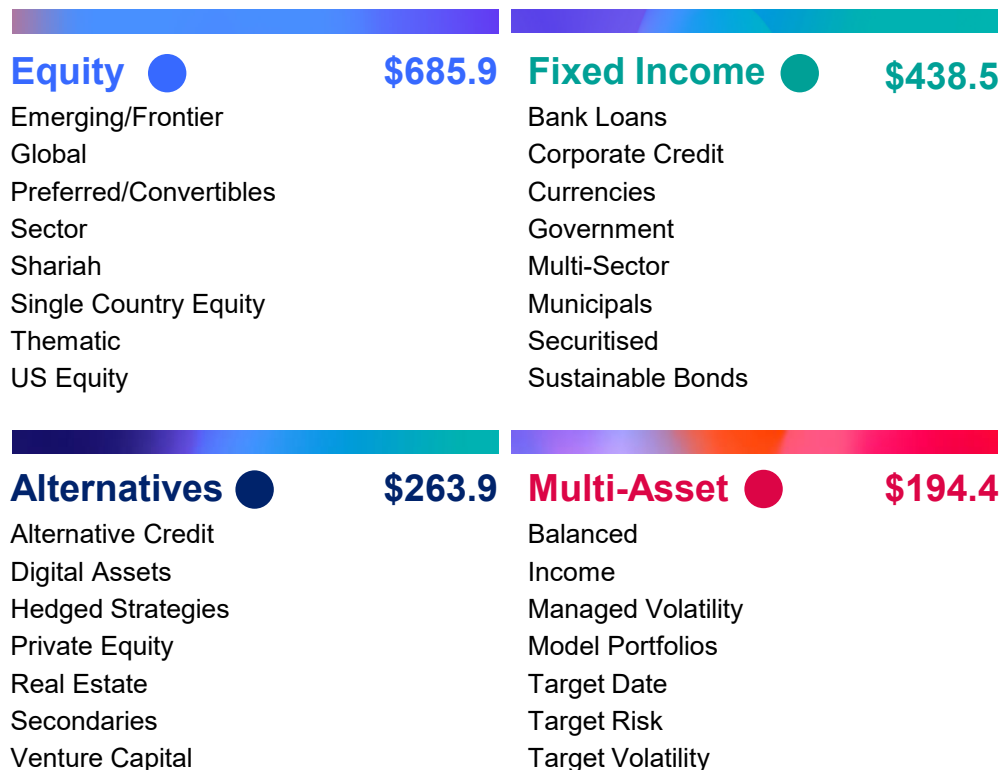

75+	years of asset management experience
\$1.6tn	total assets under management ¹
10	investment managers added to our platform since 2019
1,600+	investment professionals in 25+ countries
150	countries with clients

1. AUM is in USD as of 30 September 2025. Total AUM of \$1.6tn includes \$78.5 Billion in cash management that is not represented here.

Investment specialisation across public and private markets

- 35+ year history of ESG investing with a fully-integrated approach

About ClearBridge Investments

US\$214.8 billion in assets under management

Headquartered in New York, USA with offices in Baltimore, USA, Calgary, CA, Edinburgh, UK, Fort Lauderdale, USA, Leeds, UK, London, UK, Melbourne, AU, Sydney, AU

Operating with investment autonomy, wholly-owned subsidiary of Franklin Resources

PRI Signatory since 2008

Data as of Sept. 30, 2025.

ClearBridge Investments consists of ClearBridge Investments, LLC (CBI) and its affiliated managers whose businesses have been operationally integrated with CBI's, including ClearBridge Investments Limited and its subsidiary in Australia, a part of Franklin Templeton Australia Limited doing business as ClearBridge Investments in Australia, a part of Franklin Templeton Investments Corp. doing business as ClearBridge Investments in Canada and ClearBridge Investment Management Limited in the United Kingdom. The business of Franklin Real Asset Advisors has been aligned with ClearBridge Investments.

Not all ClearBridge strategies have an ESG objective.

Firm values

Embedded in organization from the bottom up

Cultivate consistency in all we do

We approach every opportunity with patience and diligence to better assess, and act with knowledge of, the full picture. Together, we use our diverse talents and expertise to seek to create success and stability for our clients.

Go above and beyond

We seek to exceed expectations in every aspect of our business, from engaging with the companies we own, to supporting our employees and delivering superior customer service.

Ensure responsiveness and accountability

We succeed when clients succeed. Our culture of collaboration creates a strong sense of loyalty and accountability, encourages diverse contributions and enables responsiveness.

Promote a long-term perspective

We are committed to long-term strategies and authentic active management to move our clients forward. We approach portfolio companies as business owners and hold stocks for an average of five years.

Advocate for sustainability

Integrating ESG considerations into our fundamental research process, promoting sustainability in company engagements and following such practices across the firm can offer clients a return on their investments while making a positive impact.

Act with conviction

Differentiated thinking is the basis of our approach, giving us the confidence to invest where our research identifies opportunity that the consensus may overlook and to develop new solutions that benefit our clients.

ClearBridge All Cap Growth Portfolios

Overview

ClearBridge All Cap Growth Portfolios (ACG) seeks long-term capital appreciation through investment in large-, mid-, and small-capitalization stocks that have the potential for above average long-term earnings and/or cash flow growth.

Philosophy

We believe that:

- Competitive returns may be achieved by investing in a diversified portfolio of large-, medium-, and small-capitalization stocks that have the potential for above-average long-term growth and returns.
- An intensive, bottom-up investment process can help find inefficiently priced companies with strong fundamentals, incentive-driven management teams, dominant positions in niche markets, and/or goods and services customers are practically compelled to use.
- Consistency in our investment process, research, performance and client service is the key to excellence.

Objectives

The strategy seeks:

Long-term capital appreciation.

Key differentiators

- The strategy combines the expertise of five seasoned portfolio managers.
- High-conviction stock selection that offers potential for growth across market cycles.
- Portfolio managers evaluate each position daily and may decide to invest portfolios gradually or all at once based on market conditions, valuations and/or factors they consider to be relevant.

Portfolio positioning

- Core growth option, which can be complemented by other investments or asset classes for further diversification.
- Designed for investors looking for a growth portfolio that invests across multiple market capitalizations with a buy-and-hold strategy. This strategy does not force buy or sell decisions based on market capitalization. The potential result may be reduced portfolio turnover over time.

What are the risks?

All investments involve risks, including possible loss of principal. To the extent the portfolio invests in a **concentration of certain securities, regions or industries**, it is subject to increased volatility. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks.

ACG portfolios invest primarily in large-capitalization stocks, investing much smaller portions of the portfolios in small- and mid-capitalization company stocks.

Diversification does not ensure a profit or protect against market loss.

Market, security and/or other investment considerations may result in higher turnover from time to time. Also, all capitalization ranges will not necessarily be represented in an individual account.

ClearBridge All Cap Growth Portfolios

investment process

ClearBridge

STEP 1

Idea generation

Identify companies with strong business models, capital structures, and management teams, generally with market capitalizations of \$3 billion or greater.

STEP 2

Fundamental analysis

Determine valuation considering the size of a business's addressable market, free cash flow yield, P/E, EV/Sales¹, PEG Ratio², Identify key risks, and potential downside.

STEP 3

Portfolio construction

Actively select investments across the growth spectrum, allocated into three growth buckets (Cyclical, Stable, and Select) with distinct risk/return characteristics. Managers are willing to pay a premium for companies with sustainable growth characteristics and superior ROIC³.

STEP 4

Risk management/Evaluation discipline

Understand security level and portfolio level risks. Actively review investment rationales, position sizes and diversification metrics.

¹Enterprise-Value-To- Sales (EV/Sales): A valuation measure that compares the enterprise value of a company to the company's sales. EV/sales gives investors an idea of how much it costs to buy the company's sales. Generally, the lower the EV/sales the more attractive or undervalued the company is believed to be.

²Price/Earnings To Growth – PEG Ratio: A stock's price-to-earnings ratio divided by the growth rate of its earnings for a specified time period. The price/earnings to growth (PEG) ratio is used to determine a stock's value while taking the company's earnings growth into account and is considered to provide a more complete picture than the P/E ratio. While a high P/E ratio may make a stock look like a good buy, factoring in the company's growth rate to get the stock's PEG ratio can tell a different story. The lower the PEG ratio, the more the stock may be undervalued given its earnings performance.

³Return On Invested Capital (ROIC): A calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments. The return on invested capital measure gives a sense of how well a company is using its money to generate returns.

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

Actual allocation may vary.

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintempleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

Compliance Statement:

ClearBridge Investments, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ClearBridge Investments, LLC has been independently verified for the periods January 1, 1997 - December 31, 2024. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information:

ClearBridge Investments, LLC ("ClearBridge") is a wholly owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"). In July 2020 Legg Mason, Inc., its parent company, was purchased by Franklin. The investment advisory business now known as ClearBridge was registered in September 2005 to facilitate Legg Mason's acquisition of substantially all the equity asset management businesses known as Citigroup Asset Management. These former businesses serve as the foundation of ClearBridge and its claim of GIPS compliance for institutional accounts through predecessor firms, effective as of January 1997. In June 2008, ClearBridge combined this business with its retail business to form a single GIPS firm. As of April 1, 2013, January 1, 2016, May 1, 2020 and January 1, 2024 ClearBridge affiliates, Global Currents Investment Management, LLC, ClearBridge, LLC, ClearBridge Investments Limited (f/k/a RARE Infrastructure Limited) and Franklin Bissett Asset Management Equity Team have become part of the ClearBridge GIPS firm.

Composite Information:

The ClearBridge All Cap Growth SMA composite consists of discretionary wrap accounts with an account minimum of US \$25,000. Accounts within the composite seek long-term capital appreciation by investing in a mix of large, mid and small capitalization stocks believed to have the potential for above-average long term earnings and/or cash flow growth. The strategy is implemented by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), formerly known as Legg Mason Private Portfolio Group, LLC ("LMPPG"). FTPPG claims compliance with the Global Investment Performance Standards (GIPS®). FTPPG has been independently verified for the periods January 1, 2013 - December 31, 2024. FTPPG is a wholly owned indirect subsidiary of Franklin Resources, Inc and together with its sub-advisers, including ClearBridge, provides investment services primarily in investment programs sponsored by Sponsor Firms. To obtain a GIPS Report and/or the firm's list of composite descriptions, please contact info@clearbridge.com. The main risks of this strategy are General Investment Risk, Industry and Issuer Concentration Risk, Small Cap Risk, Mid Cap Risk, High Volatility Risk, and Non-U.S. Investment Risk.

Input and Calculation Data:

The fee schedule currently in effect is 3.00% on all assets. Net of fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest "bundled" fee charged (3.00%) annually, prorated to a monthly ratio. The "bundled" fee includes transaction costs, investment management, custodial, and other administrative fees. The internal dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio returns included in the composite for the entire year. The composite employs a 10% significant cash flow policy which started in January 2021. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance is not necessarily indicative of future results. Gross returns are used to calculate presented risk measures. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Primary Benchmark Information:

For comparison purposes, composite returns are shown against returns of the Russell 3000® Growth Index.

Term definitions

Earnings before interest, taxes, depreciation and amortization (EBITDA) approximates a firm's operating cash flow by considering its earnings before interest, taxes, depreciation and amortization.

Free Cash Flow measures the cash remaining after accounting for a firm's cash expenditures to support its operations and maintain its capital assets.

Market Capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Weighted Median Market Capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted Average Market Capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Dividend Yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend Yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

Earnings Per Share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.
