

Separately Managed Account

ClearBridge Appreciation Portfolios

1Q 2025

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: ClearBridge Investments, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

Client focus

- Alignment of interests with clients
- Innovative compensation plan

Robust fundamental research platform

- Bottom-up, quality focus
- Proprietary research and ESG ratings
- 35+ year history of ESG investing with a fully-integrated approach

About ClearBridge Investments

US\$180.4 billion in assets under management

Headquartered in New York with offices in Baltimore, Calgary, Fort Lauderdale, London, San Mateo and Sydney

Operating with investment autonomy, wholly-owned subsidiary of Franklin Resources

PRI Signatory since 2008

Firm Values

Embedded in Organization from the Bottom Up

Cultivate consistency in all we do

We approach every opportunity with patience and diligence to better assess, and act with knowledge of, the full picture. Together, we use our diverse talents and expertise to seek to create success and stability for our clients.

Go above and beyond

We seek to exceed expectations in every aspect of our business, from engaging with the companies we own, to supporting our employees and delivering superior customer service.

Ensure responsiveness and accountability

We succeed when clients succeed. Our culture of collaboration creates a strong sense of loyalty and accountability, encourages diverse contributions and enables responsiveness.

Promote a long-term perspective

We are committed to long-term strategies and authentic active management to move our clients forward. We approach portfolio companies as business owners and hold stocks for an average of five years.

Advocate for sustainability

Integrating ESG considerations into our fundamental research process, promoting sustainability in company engagements and following such practices across the firm can offer clients a return on their investments while making a positive impact.

Act with conviction

Differentiated thinking is the basis of our approach, giving us the confidence to invest where our research identifies opportunity that the consensus may overlook and to develop new solutions that benefit our clients.

ClearBridge Appreciation Portfolios

Overview

The Appreciation portfolios were designed for investors seeking long-term capital appreciation through investments primarily in a core portfolio of high-quality, large-capitalization companies. By investing in a diversified portfolio of growth and value stocks, the managers believe that they are able to position the portfolios to take advantage of changes in the economic and market cycles.

Portfolio positioning

- Low-volatility, core holding.
 - Balance upside participation in good markets, while trying to limit downside risk during difficult markets.
 - Core equities: manager has the flexibility to take advantage of both growth and value-oriented markets.
 - Typically focused on dominant “blue chips”.
 - Demonstrates both growth & value characteristics.
 - Great growth companies at reasonable prices.
- The managers may sometimes hold significant cash reserves as a portion of the portfolio while waiting for buying opportunities.

Key differentiators

- Clear Investment Philosophy & Objective.
 - Seeks long-term appreciation of capital.
- Disciplined Approach to Security Selection.
 - Look for high margin, lower leverage companies.
 - Focus on balance sheet strength and free cash flow measures.
 - Use multiple valuation measures to ensure not over-paying for future growth.
 - Occasionally incorporate top-down themes to drive areas for security selection.
- Performance Risk.
 - De-risk business model at security level.
 - Aware of active bets at sector and security level, leveraging ClearBridge Investments risk management team.

Objectives

The strategy seeks long-term capital appreciation.

Philosophy

- The managers seek to provide consistent and competitive risk-adjusted returns through a market cycle by balancing upside participation in good markets, while trying to limit downside risk during difficult markets.
- The managers invest in both growth and value stocks, consisting primarily of large-cap, blue chip companies, that tend to have dominant market positions.
- Generally, companies in the portfolio fall into one of the following categories:
 - Companies that have assets or earning power that are undervalued or unrecognized by the market, or companies whose stock price has been driven down by cyclical factors.
 - Companies with superior demonstrated and expected growth characteristics, whose stocks are available at reasonable prices due to temporary market or stock specific reasons.
 - Companies the managers believe are well positioned to sustain or increase growth at a faster rate than market expectations.
- The managers use a disciplined valuation process that attempts to measure upside potential and downside exposure.

What are the risks?

All investments involve risks, including possible loss of principal. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**.

ClearBridge Appreciation Portfolios investment process

ClearBridge

STEP 1

Define the investment universe

Emphasize domestic large-capitalization stocks, but also consider mid- and small-capitalization companies and ADRs of non-U.S. companies opportunistically.

STEP 2

Evaluate stocks using proprietary discipline

Screen for companies across all market sectors with either an attractive dividend yield, a history of (or prospects for) dividend growth, strong balance sheets, dominant positions, and/or reasonable valuations.

STEP 3

Select securities and construct portfolio

Conduct fundamental research and dividend analysis to identify companies with attractive growth characteristics relative to their valuation levels.

STEP 4

Review process

Re-examine a current holding when valuation is realized, fundamentals deteriorate, and/or cyclical shifts alter industry's attractiveness. The managers may sometimes hold significant cash reserves as a portion of the portfolio while waiting for buying opportunities.

Equity portfolio characteristics

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

Risk/return profile

Pure gross and net of fees (based on 10-year period ending March 31, 2025)

Modern portfolio statistics as of March 31, 2025

	Appreciation Pure Gross	Appreciation Net	S&P 500 Index

Compliance Statement:

ClearBridge Investments, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ClearBridge Investments, LLC has been independently verified for the periods January 1, 1997 - December 31, 2023. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information:

ClearBridge Investments, LLC ("ClearBridge") is a wholly owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"). In July 2020 Legg Mason, Inc., its parent company, was purchased by Franklin. The investment advisory business now known as ClearBridge was registered in September 2005 to facilitate Legg Mason's acquisition of substantially all the equity asset management businesses known as Citigroup Asset Management. These former businesses serve as the foundation of ClearBridge and its claim of GIPS compliance for institutional accounts through predecessor firms, effective as of January 1997. In June 2008, ClearBridge combined this business with its retail business to form a single GIPS firm. As of April 1, 2013, January 1, 2016, May 1, 2020 and January 1, 2024 ClearBridge affiliates, Global Currents Investment Management, LLC, ClearBridge, LLC, ClearBridge Investments Limited (f/k/a RARE Infrastructure Limited) and Franklin Bissett Asset Management have become part of the ClearBridge GIPS firm.

Composite Information:

The ClearBridge Appreciation SMA composite consists of discretionary wrap accounts with an account minimum of US \$25,000. Accounts within the composite are invested primarily in large capitalization companies, but may also invest in mid and small capitalization companies. The managers seek to create a diversified portfolio with investments in companies believed to have superior demonstrated or expected growth characteristics at reasonable prices. The strategy is implemented by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), formerly known as Legg Mason Private Portfolio Group, LLC ("LMPPG"). FTPPG claims compliance with the Global Investment Performance Standards (GIPS®). FTPPG has been independently verified for the periods January 1, 2013 - December 31, 2023. FTPPG is a wholly owned indirect subsidiary of Franklin Resources, Inc and together with its sub-advisers, including ClearBridge, provides investment services primarily in investment programs sponsored by Sponsor Firms. To obtain a GIPS Report and/or the firm's list of composite descriptions, please contact info@clearbridge.com. The main risks of this strategy are General Investment Risk, Small Cap Risk, Mid Cap Risk and Non-U.S. Investment Risk.

Input and Calculation Data:

The fee schedule currently in effect is 3.00% on all assets. Net of fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest "bundled" fee charged (3.00%) annually, prorated to a monthly ratio. The "bundled" fee includes transaction costs, investment management, custodial, and other administrative fees. The internal dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio returns included in the composite for the entire year. The composite employs a 10% significant cash flow policy which started in January 2021. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance is not necessarily indicative of future results. Gross returns are used to calculate presented risk measures. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Benchmark Information:

For comparison purposes, composite returns are shown against returns of the S&P 500® Total Return Index.

Definitions

Term definitions

Market Capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Weighted Median Market Capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted Average Market Capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Dividend Yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends.

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

Earnings Per Share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.
