

Separately Managed Accounts

# ClearBridge Value Portfolios

3Q 2025

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: ClearBridge Investments, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

# Your trusted partner for what's ahead™

## For our clients, we are:

## At-a-glance

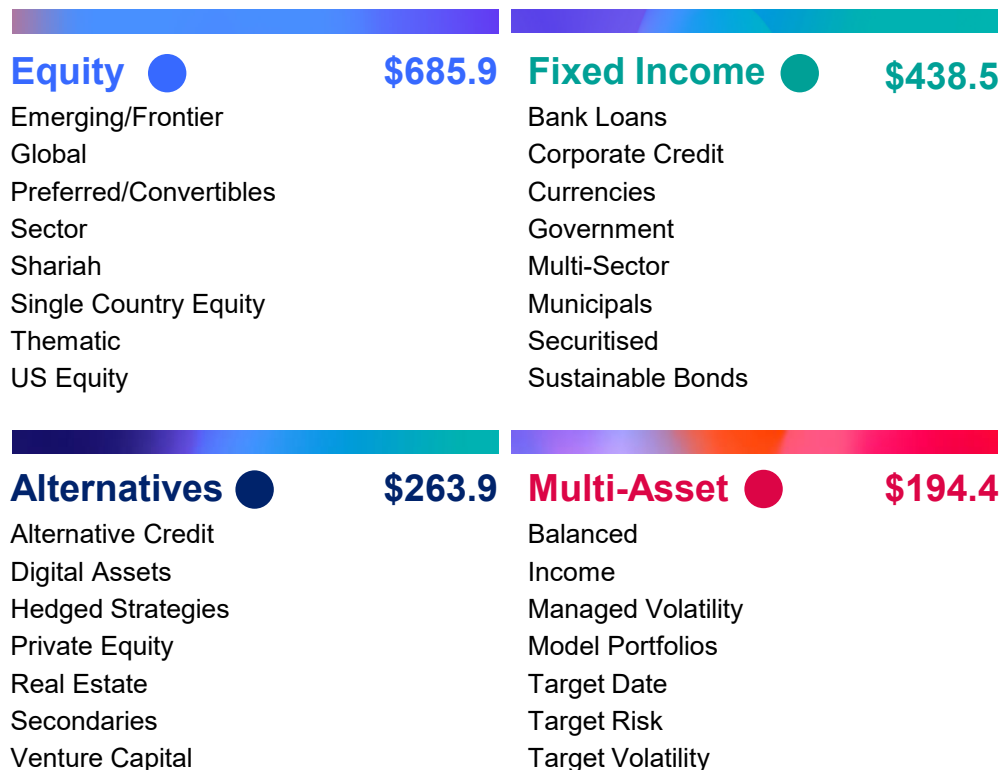

<b>75+</b>	years of asset management experience
<b>\$1.6tn</b>	total assets under management <sup>1</sup>
<b>10</b>	investment managers added to our platform since 2019
<b>1,600+</b>	investment professionals in 25+ countries
<b>150</b>	countries with clients

1. AUM is in USD as of 30 September 2025. Total AUM of \$1.6tn includes \$78.5 Billion in cash management that is not represented here.

# Investment specialisation across public and private markets

## Our Investment Capabilities (USD Billion)

### Complemented by innovations in

Sustainable and Impact investing, ETFs, Custom Indexing, Frontier Risk Alternatives, and others

## Our Investment Managers Asset Classes

- Risk considerations examined in all decisions

#### Robust fundamental research platform

- Bottom-up, quality focus
- Proprietary research and ESG ratings
- 35+ year history of ESG investing with a fully-integrated approach

### About ClearBridge Investments

US\$214.8 billion in assets under management

Headquartered in New York, USA with offices in Baltimore, USA, Calgary, CA, Edinburgh, UK, Fort Lauderdale, USA, Leeds, UK, London, UK, Melbourne, AU, Sydney, AU

Operating with investment autonomy, wholly-owned subsidiary of Franklin Resources

PRI Signatory since 2008

Data as of Sept. 30, 2025.

ClearBridge Investments consists of ClearBridge Investments, LLC (CBI) and its affiliated managers whose businesses have been operationally integrated with CBI's, including ClearBridge Investments Limited and its subsidiary in Australia, a part of Franklin Templeton Australia Limited doing business as ClearBridge Investments in Australia, a part of Franklin Templeton Investments Corp. doing business as ClearBridge Investments in Canada and ClearBridge Investment Management Limited in the United Kingdom. The business of Franklin Real Asset Advisors has been aligned with ClearBridge Investments.

Not all ClearBridge strategies have an ESG objective.

# Firm values

## Embedded in organization from the bottom up

### Cultivate consistency in all we do

We approach every opportunity with patience and diligence to better assess, and act with knowledge of, the full picture. Together, we use our diverse talents and expertise to seek to create success and stability for our clients.

### Go above and beyond

We seek to exceed expectations in every aspect of our business, from engaging with the companies we own, to supporting our employees and delivering superior customer service.

### Ensure responsiveness and accountability

We succeed when clients succeed. Our culture of collaboration creates a strong sense of loyalty and accountability, encourages diverse contributions and enables responsiveness.

### Promote a long-term perspective

We are committed to long-term strategies and authentic active management to move our clients forward. We approach portfolio companies as business owners and hold stocks for an average of five years.

### Advocate for sustainability

Integrating ESG considerations into our fundamental research process, promoting sustainability in company engagements and following such practices across the firm can offer clients a return on their investments while making a positive impact.

### Act with conviction

Differentiated thinking is the basis of our approach, giving us the confidence to invest where our research identifies opportunity that the consensus may overlook and to develop new solutions that benefit our clients.

# ClearBridge Value Portfolios

## Overview

The ClearBridge Value Portfolios — headed by Reed Cassady, Sam Peters, and Jean Yu — focus on large-, mid-, and small-capitalization stocks.

## Objectives

The strategy seeks: long-term capital growth. Current income is a secondary consideration.

## Portfolio positioning

- Designed for investors seeking a value portfolio, with the ability to invest in all market capitalizations.
- Offers a long-term buy-and-hold strategy, which may reduce portfolio turnover.

## Key differentiators

### Process

Repeatable, proprietary process designed to form explicit variant perceptions relative to expectations embedded in the stock price.

### Team

Robust, frequent communication to surface diverse perspectives and to improve the questions we ask and the assumptions we make.

### Portfolio Construction

Diversification across industries, economic drivers and macroeconomic and quantitative factors to build a resilient portfolio that maximizes risk-adjusted returns and is able to outperform in a variety of market conditions.

## Philosophy

### What we believe:

- The stock market is a complex adaptive system.
  - It dynamically aggregates the views of participants, providing assessments of investment value.
  - As such, markets broadly adjust quickly to reflect new information, making it challenging for information-driven investment strategies to earn excess returns.
- Inefficiencies occur in markets.
  - Inefficiencies occur, particularly when diversity of thought breaks down (e.g., investors panic or get greedy all at once), as well as when the time horizon extends beyond the market's often myopic frame.
- To generate excess returns consistently, we must find and exploit these inefficiencies.
  - We do this through an explicit analysis of market expectations, compared with the expectations we have developed through our review of the company's economic returns, capital allocation and competitive strategy.

Effective September 30, 2024, ClearBridge All Cap Value Portfolios was renamed to ClearBridge Value Portfolios. There was no change to the investment objective, principal investment strategies or investment policies.

## What are the risks?

**All investments involve risks, including possible loss of principal. Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**.

# ClearBridge Value Portfolios investment process

## STEP 1

### Discovery:

#### Diversity Breakdowns and Embedded Expectations

Look for diversity breakdowns:

- High-level industry trends and competitive strategy
- Quantitative screens covering multiple sources of return and risk
- Embedded expectations for growth, returns and investment needs

## STEP 2

### Valuation:

#### Probabilistic Analysis of Business Value and Variant Perception

Valuation:

- Multiple analytical tools to understand drivers of business value

Probabilistic Approach:

- Build scenario analysis and simulations to explore business value under different assumptions

Variant Perception:

- Develop an explicit narrative of how investment case differs from embedded expectations

Systematic Updating:

- Actively recalibrate model and probabilities based on new information

## STEP 3

### Portfolio Construction:

#### Balance of Risk and Return

- Bottom-up weighting decisions to maximize risk-adjusted potential return across industries, economic drivers of returns, as well as macroeconomic and quantitative factor exposures relative to strategy's benchmark
- Robust team discussions help avoid individual behavioral biases: overconfidence, anchoring, loss aversion, framing effects, confirmation bias

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

# Equity portfolio characteristics

## As of 9/30/2025

### Market capitalization breakdown in USD (%)

### Portfolio characteristics

	Value	Russell 1000 Value Index
Number of Issuers	68	870
Estimated 3-5 Year EPS Growth	12.54%	9.65%
Price to Earnings (12-Month Forward)	16.27x	18.58x
Price to Book	3.67x	4.17x
Dividend Yield	1.73%	1.88%
Median Market Cap (Millions USD)	\$52,463	\$118,137
Weighted Average Market Capitalization (Millions USD)	\$234,057	\$309,440

Source: FactSet. Portfolio characteristics and market capitalization breakdown are based on a model portfolio, not an actual client account. The model portfolio is a hypothetical portfolio whereby the Portfolio characteristics and market capitalization breakdown are based on simulated trading and account activity of a client account invested in this strategy. The model portfolio assumes no withdrawals, contributions or client-imposed restrictions. Portfolio characteristics and market capitalization breakdown of individual client accounts may differ from those of the model portfolio as a result of account size, client-imposed restrictions, the timing of client investments, market conditions, contributions, withdrawals and other factors. **Please see appendix for term definitions.**

P/E ratio Year 1 and Long-term EPS growth are provided by I/B/E/S, are inherently limited and should not be used as an indication of future performance.

**Yields and dividends represent past performance and there is no guarantee they will continue to be paid.**

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

# Risk/return profile

**Pure gross and net of fees** (based on 10-year period ending September 30, 2025)

**Modern portfolio statistics** as of September 30, 2025

	Value Pure Gross	Value Net	Russell 1000 Value Index
Annualized Return (%)	10.55	7.34	10.72
Annualized Standard Deviation (%)	17.35	17.35	15.59
Sharpe Ratio	0.55	0.38	0.60
Beta	1.08	1.08	N/A
Alpha (%)	-0.64	-3.54	N/A
R-Squared	0.95	0.95	N/A

Alpha, Beta, Sharpe Ratio, and R-Squared are shown versus the Index. Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges.

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. ### Compliance Statement:

ClearBridge Investments, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ClearBridge Investments, LLC has been independently verified for the periods January 1, 1997 - December 31, 2024. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

### Firm Information:

ClearBridge Investments, LLC ("ClearBridge") is a wholly owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"). In July 2020 Legg Mason, Inc., its parent company, was purchased by Franklin. The investment advisory business now known as ClearBridge was registered in September 2005 to facilitate Legg Mason's acquisition of substantially all the equity asset management businesses known as Citigroup Asset Management. These former businesses serve as the foundation of ClearBridge and its claim of GIPS compliance for institutional accounts through predecessor firms, effective as of January 1997. In June 2008, ClearBridge combined this business with its retail business to form a single GIPS firm. As of April 1, 2013, January 1, 2016, May 1, 2020 and January 1, 2024 ClearBridge affiliates, Global Currents Investment Management, LLC, ClearBridge, LLC, ClearBridge Investments Limited (f/k/a RARE Infrastructure Limited) and Franklin Bissett Asset Management Equity Team have become part of the ClearBridge GIPS firm.

### Composite Information:

The ClearBridge Value SMA composite consists of discretionary wrap accounts with an account minimum of US \$25,000. Accounts within the composite seek the most inefficiently priced stocks in the small, mid and large capitalization sectors. The strategy is implemented by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), formerly known as Legg Mason Private Portfolio Group, LLC ("LMPPG"). FTPPG claims compliance with the Global Investment Performance Standards (GIPS®). FTPPG has been independently verified for the periods January 1, 2013 - December 31, 2024. FTPPG is a wholly owned indirect subsidiary of Franklin Resources, Inc and together with its sub-advisers, including ClearBridge, provides investment services primarily in investment programs sponsored by Sponsor Firms. To obtain a GIPS Report and/or the firm's list of composite descriptions, please contact [info@clearbridge.com](mailto:info@clearbridge.com). The main risks of this strategy are General Investment Risk, Small Cap Risk, Mid Cap Risk and Non-U.S. Investment Risk. The composite name changed from ClearBridge All Cap Value SMA to ClearBridge Value SMA in September 2024.

### Input and Calculation Data:

The fee schedule currently in effect is 3.00% on all assets. Net of fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest "bundled" fee charged (3.00%) annually, prorated to a monthly ratio. The "bundled" fee includes transaction costs, investment management, custodial, and other administrative fees. The internal dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio returns included in the composite for the entire year. The composite employs a 10% significant cash flow policy which started in January 2021. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance is not necessarily indicative of future results. Gross returns are used to calculate presented risk measures. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

### Primary Benchmark Information:

For comparison purposes, composite returns are shown against returns of the Russell 1000® Value Index.

### Additional Benchmark Information:

The benchmark was changed from the Russell 3000® Value Index to the Russell 1000® Value Index, back to inception, in September 2024.

# Definitions

## Term definitions

**Earnings before interest, taxes, depreciation and amortization (EBITDA)** approximates a firm's operating cash flow by considering its earnings before interest, taxes, depreciation and amortization.

**Free Cash Flow** measures the cash remaining after accounting for a firm's cash expenditures to support its operations and maintain its capital assets.

**Market Capitalization** measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

**Weighted Median Market Capitalization** represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

**Weighted Average Market Capitalization** represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

**Dividend Yield** is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend Yield is calculated without the deduction of fees and expenses.**

**P/E (Year 1)** is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

**Earnings Per Share** (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

**Alpha** is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

**R-Squared** measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

**Standard Deviation** is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.
