

ClearBridge International Growth ADR ESG Portfolios

Separately Managed Accounts | Fact Sheet as of June 30, 2025

Investment overview

ClearBridge International Growth ADR ESG Portfolios were designed to allow investors to diversify their portfolios by participating in the potential growth of international markets. The portfolios invest approximately 80-90% in larger companies and primarily in ADRs.

The ESG Investment Program actively incorporates environmental, social and governance (ESG) factors into the fundamental research platform and the stock selection process. In addition, ongoing company engagement and shareholder advocacy are key components of the Program.

A few examples of the ESG considerations include:

- Innovative workplace policies, employee benefits and programs
- Environmental management system strength, eco-efficiency and life-cycle analysis
- Community involvement, strategic philanthropy and reputation management
- Strong corporate governance and independence on the board

ClearBridge is a Signatory to the UN Principles for Responsible Investment and is affiliated with the Investor Network on Climate Risk, the Carbon Disclosure Project, the Interfaith Center on Corporate Responsibility, the Global Impact Investing Network, and the US Forum for Sustainable and Responsible Investment.

Investment objective

Seeks:

- Long-term capital appreciation, complemented by issuer and portfolio risk management. Our strategy aims to outperform the MSCI EAFE Index over a full market cycle.
- To actively evaluate a company's ESG drivers of business performance to gauge its level of social awareness.

Investment philosophy

We believe:

- International equities may vary significantly from fair value due to macroeconomic/exogenous factors and company specific endogenous issues.
- Through fundamental analysis, we seek to identify companies with superior capital appreciation prospects and competitive risk-adjusted returns achieved by capitalizing on the convergence between a company's investment potential and its ESG management aspects.

Portfolio positioning

- Core international developed market portfolio
- Low turnover — seeks tax efficiency

Key differentiators

- High-quality developed markets focus
- Focus on companies able to grow through a variety of economic market conditions as a result of product or service leadership
- 80% + of portfolio in large-cap (more than \$10B franchises)
- Usually no more than 15% in emerging markets domiciled exposure
- Will usually have 30-50 names in portfolio
- Explicit limits at sector, country and position levels

Strategy Inception: 1996

Management team

ClearBridge Investments is a well-established global investment manager focusing on proprietary research and fundamental investing. With over 60 years of experience building portfolios for clients seeking income solutions, high active share or low volatility, long-tenured portfolio managers provide strong leadership in a centralized investment structure.

Investment management team

Elisa Mazen
Managing Director, Head of Global Growth Equity
Portfolio Manager
Industry since 1996

Michael Testorf, CFA
Managing Director
Portfolio Manager
Industry since 1987

Pawel Wroblewski, CFA
Managing Director
Portfolio Manager
Industry since 1996

Active share is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index

Diversification does not ensure a profit or protect against market loss.

There is no guarantee low turnover will continue. Actual percentages may vary due to economic conditions and other factors. Managers may deviate from these allocations in order to seek to meet these objectives.

Investment process

STEP 1

Define the investment universe

Consider companies that have strong balance sheets, good management, offer unique products or services, or have strong niche positions locally or globally.

STEP 2

Apply fundamental analysis

Use a bottom-up approach to evaluate current and future prospects and ensure that accounting compliance, data accuracy and global comparability goals are met.

STEP 3

Select securities and construct portfolio

Build a diversified portfolio with approximately 30 - 50 stocks across 10 - 20 countries. Complement larger core holdings (approximately 80-90%) with tactical investments (approximately 10-20%) in smaller companies that have met our ESG criteria.

STEP 4

Monitor continuously

Re-examine a current holding when unit growth/earnings deteriorate, when valuation exceeds expectations, and when there is an adverse acquisition or a loss of franchise or market share.

The investment process may change over time. The characteristics set forth above are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee that investment objectives will be achieved.

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintempleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

¹ **Fees:** Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. *For illustrative purposes only. Assumes no withdrawals or contributions. These statistics are based on pure gross and net-of-fees quarterly composite returns, were calculated assuming reinvestment of dividends and income, and take into account both realized and unrealized capital gains and losses.

Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

Terms and definitions:

Dividend yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **price-to-book ratio (P/B)** is a stock's price divided by the stock's per share book value. Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

Weighted median market capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted average market capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Market capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Standard deviation measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

The **up-capture ratio** measures the manager's overall performance to the benchmark's overall performance, considering only quarters that are positive in the benchmark. An up-capture ratio of more than 100 indicates a manager who outperforms the relative benchmark in the benchmark's positive quarters.

The **down-capture ratio** is the ratio of the manager's overall performance to the benchmark's overall performance, considering only quarters that are negative in the benchmark. A down-capture ratio of less than 100 indicates a manager who outperforms the relative benchmark in the benchmark's negative quarters and protects more of a portfolio's value during down markets.

Alpha is a measure of performance vs. a benchmark on a risk-adjusted basis. A positive alpha of 1.0 means the portfolio has outperformed its benchmark index by 1%. Correspondingly, a similar negative alpha would indicate an underperformance of 1%. Alpha is a measure of the difference between actual returns and expected performance measuring sensitivity to index movements.

Beta measures the sensitivity of an investment to the movement of its benchmark. A beta higher than 1.0 indicates the investment has been more volatile than the benchmark and a beta of less than 1.0 indicates that the investment has been less volatile than the benchmark.

Sharpe ratio is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better a portfolio's historical risk-adjusted performance.

R-squared measures the strength of the linear relationship between a portfolio and its benchmark. R-squared at 1.00 implies perfect linear relationship and zero implies no relationship exists.

The **MSCI EAFE Index** is a free float-adjusted market capitalization-weighted index designed to measure developed market equity performance, excluding the U.S. and Canada. Source: MSCI makes no warranties and shall have no liability with respect to any MSCI data reproduced herein. No further redistribution or use is permitted. This report is not prepared or endorsed by MSCI.

What are the risks?

All investments involve risks, including possible loss of principal. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. The managers' **environmental, social and governance (ESG) strategies** may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance.

Any information, statement or opinion set forth herein is general in nature, is not directed to or based on the financial situation or needs of any particular investor, and does not constitute, and should not be construed as, investment advice, forecast of future events, a guarantee of future results, or a recommendation with respect to any particular security or investment strategy or type of retirement account. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies should consult their financial professional.

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC (FTPPG), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: ClearBridge Investments, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.
