FRANKLIN TEMPLETON | ClearBridge

Separately Managed Account

ClearBridge International Growth ADR Portfolios

3Q 2026

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: Franklin Advisers, Inc. (Franklin) Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.

These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

- Bottom-up, quality focus
- Proprietary research and ESG ratings
- 35+ year history of ESG investing with a fully-integrated approach

Data as of September 30, 2026.

*ClearBridge Investments consists of ClearBridge Investments, LLC (CBI) and its affiliated managers whose businesses have been operationally integrated with CBI's, including ClearBridge Investments Limited and its subsidiary in Australia, a part of Franklin Templeton Australia Limited doing business as ClearBridge Investments in Australia, a part of Franklin Templeton Investments Corp. doing business as ClearBridge Investments in Canada and ClearBridge Investment Management Limited in the United Kingdom. The business of Franklin Real Asset Advisors has been aligned with ClearBridge Investments.

Not all ClearBridge strategies have an ESG objective.

Firm values

Embedded in organization from the bottom up

Cultivate consistency in all we do	We approach every opportunity with patience and diligence to better assess, and act with knowledge of, the full picture. Together, we use our diverse talents and expertise to seek to create success and stability for our clients.
Go above and beyond	We seek to exceed expectations in every aspect of our business, from engaging with the companies we own, to supporting our employees and delivering superior customer service.
Ensure responsiveness and accountability	We succeed when clients succeed. Our culture of collaboration creates a strong sense of loyalty and accountability, encourages diverse contributions and enables responsiveness.
Promote a long-term perspective	We are committed to long-term strategies and authentic active management to move our clients forward. We approach portfolio companies as business owners and hold stocks for an average of five years.
Advocate for sustainability	Integrating ESG considerations into our fundamental research process, promoting sustainability in company engagements and following such practices across the firm can offer clients a return on their investments while making a positive impact.
Act with conviction	Differentiated thinking is the basis of our approach, giving us the confidence to invest where our research identifies opportunity that the consensus may overlook and to develop new solutions that benefit our clients.

Not all ClearBridge strategies have an ESG objective.

ClearBridge International Growth ADR Portfolios

Overview

The International Growth ADR portfolios were designed to allow investors to diversify their portfolios by participating in the potential growth of international markets. The portfolios invest approximately 80-90% in larger companies and primarily in ADRs.

Portfolio positioning

- Core international developed market portfolio.
- Low turnover—seeks tax efficiency.[1]

Key differentiators

- High, Quality Developed Markets.
  - Focus on companies able to grow through a variety of economic market conditions as a result of product or service leadership.
  - Focus on sound financial structure and how these companies will finance future growth.
  - 80% + of portfolio in large cap (more than $10b franchises).
  - Usually no more than 15% in emerging markets domiciled exposure.
- Patient, Concentrated Approach to Security Selection.
  - Will usually have 40-60 names in portfolio.
  - Take deliberate approach to understand a company's "ecosystem".
  - Seek multi-year opportunities.
  - Will have lower turnover vs. peer group.
- Defined Risk Management at Security and Portfolio Level.
  - De-risk stock via understanding downside case.
  - Explicit limits at sector, country and position level.
- Strategy Inception: 1996.

[1]Please see last page for important tax information.
Managers seek to keep portfolio turnover low to allow for the positive compounding effect of dividends over time, although market, security and other investment considerations may cause turnover to be higher from time to time.
All capitalization ranges will not necessarily be represented in an individual account.
Diversification does not assure a profit or protect against market loss.

ClearBridge International Growth ADR Portfolios

Philosophy

- We believe international equities may vary significantly from fair value due to macroeconomic/exogenous factors and company-specific endogenous issues.
- Through fundamental analysis, we seek to identify companies with superior capital appreciation prospects.

Objectives

To provide above-market returns with market-level volatility by investing in growth companies where we have a differentiated view on the duration and/or magnitude of growth.

There is no guarantee low turnover will continue. Actual percentages may vary due to economic conditions and other factors. Managers may deviate from these allocations in order to seek to meet these objectives.

Actual percentages may vary due to economic conditions and other factors. Managers may deviate from these allocations in order to seek to meet these objectives.

Diversification does not assure a profit or protect against market loss.

ClearBridge International Growth ADR Portfolios

Investment process

STEP 1

Define the investment universe

Consider companies that have strong balance sheets, good management, offer unique products or services, or have strong niche positions locally or globally.

STEP 2

Apply fundamental analysis

Use a bottom-up approach to evaluate current and future prospects and ensure that accounting compliance, data accuracy and global comparability.

STEP 3

Select securities and construct portfolio

Build a diversified portfolio with approximately 30-50 stocks across 10-20 countries. Complement larger core holdings (approximately 80-90%) with tactical investments (approximately 10-20%) in smaller companies.

STEP 4

Monitor continuously

Re-examine a current holding when unit growth/earnings deteriorate, valuation exceeds expectations, and when there is an adverse acquisition or a loss of franchise or market share.

Actual percentages may vary due to economic conditions and other factors. Managers may deviate from these allocations in order to seek to meet these objectives.
Diversification does not assure a profit or protect against market loss.
The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.
All data is subject to change.

Source: FactSet. Portfolio characteristics are based on a model portfolio, not an actual client account. The model portfolio is a hypothetical portfolio whereby the portfolio characteristics are based on simulated trading and account activity of a client account invested in this strategy. The model portfolio assumes no withdrawals, contributions or client-imposed restrictions. Portfolio characteristics of individual client accounts may differ from those of the model portfolio as a result of account size, client-imposed restrictions, the timing of client investments, market conditions, contributions, withdrawals and other factors. Please see Endnotes for additional information. **Please see appendix for term definitions.**
P/E ratio Year 1 and Long-term EPS growth are provided by I/B/E/S, are inherently limited and should not be used as an indication of future performance.
Yields and dividends represent past performance and there is no guarantee they will continue to be paid.
Dividend Yield is calculated without the deduction of fees and expenses.

Effective March 1, 2026, the MSCI EAFE Growth Index was added as an additional benchmark for the portfolio.
Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.
For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

What are the risks?

ClearBridge International Growth ADR Portfolios

All investments involve risks, including possible loss of principal. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks.

Compliance Statement:
ClearBridge Investments, LLC claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ClearBridge Investments, LLC has been independently verified for the periods January 1, 1997 - December 31, 2024. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verifica tion provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm -wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information:
ClearBridge Investments, LLC ("ClearBridge") is a wholly owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"). In July 2020 Legg Mason, Inc., its parent company, was purchased by Franklin. The investment advisory business now known as ClearBridge was registered in September 2005 to facilitate Legg Mason's acquisition of substantially all the equity asset management businesses known as Citigroup Asset Management. These former businesses serve as the foundation of ClearBridge and its claim of GIPS compliance for i nstitutional accounts through predecessor firms, effective as of January 1997. In June 2008, ClearBridge combined this business with its retail business to form a single GIPS firm. As of April 1, 2013, January 1, 2016, May 1, 2020 and January 1, 2024 ClearBridge affiliates, Global Currents Investment Management, LLC, ClearBridge, LLC, ClearBridge Investments Limited (f/k/a RARE Infrastructure Limited) and Franklin Bissett Asset Management Equity Team have become part of the ClearBridge GIPS firm.

Composite Information:
The ClearBridge International Growth ADR SMA composite consists of discretionary wrap accounts with an account minimum of US $25,000. Accounts within the composite seek long-term growth of capital by investing in well managed businesses whose intrinsic value does not appear to be recognized by the markets. Investments are primarily in ADRs, but may also make limited investments in U.S.-traded stocks of non-U.S. and U.S. companies engaged in significant non-U.S. business. The strategy is implemented by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), formerly known as Legg Mason Private Portfolio Group, LLC ("LMPPG"). FTPPG claims compliance with the Global Investment Performance Standards (GIPS®). FTPPG has been independently verified for the periods January 1, 2013 - December 31, 2024. FTPPG is a wholly owned indirect subsidiary of Franklin Resources, Inc and together with its sub-advisers, including ClearBridge, provides investment services primarily in investment programs sponsored by Sponsor Firms. To obtain a GIPS Report and/or the firm's list of composite descriptions, please contact info@clearbridge.com. The main risks of this strategy are General Investment Risk, Non-U.S. Investment Risk, Small Cap Risk and Mid Cap Risk.

Input and Calculation Data:
The fee schedule currently in effect is 3.00% on all assets. Net of fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest "bundled" fee charged (3.00%) annually, prorated to a monthly ratio. The "bundled" fee includes transaction costs, investment management, custodial, and other administrative fees. The internal dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio returns included in the composite for the entire year. The composite employes a 10% significant cash flow policy which started in January 2021. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance is not necessarily indicative of future results. Gross returns are used to calculate presented risk measures. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

GIPS Composite Report

Primary Benchmark Information:
For comparison purposes, composite returns are shown against returns of the MSCI® EAFE (Net) Index.

Definitions

Term definitions

Earnings before interest, taxes, depreciation and amortization (EBITDA) approximates a firm's operating cash flow by considering its earnings before interest, taxes, depreciation and amortization.

Free Cash Flow measures the cash remaining after accounting for a firm's cash expenditures to support its operations and maintain its capital assets.

Market Capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Weighted Median Market Capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted Average Market Capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Dividend Yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend Yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

Earnings Per Share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.
