Pursuant to its managed distribution policy, each Fund intends to make regular monthly distributions to shareholders at a fixed rate per common share, which rate may be adjusted from time to time by the Fund's Board of Trustees. Under each Fund's managed distribution policy, if, for any monthly distribution, the value of the Fund's net investment income and net realized capital gain is less than the amount of the distribution, the difference will be distributed from the Fund's net assets (and may constitute a "return of capital"). The Board of Trustees may modify, terminate or suspend the managed distribution policy at any time. Any such modification, termination or suspension could have an adverse effect on the market price of the Fund's shares.

Each Fund's distributions have been set based on the current level of income generated from the Fund's investment portfolio and accumulated capital gains, if any. Based on the Funds' tax accounting records, which also factors in currency fluctuations, each Fund's estimated source of cumulative fiscal year-to-date distributions is presented in the table below:

Fund	Fiscal Year End	Income	Short-Term Capital Gains	Long-Term Capital Gains	Return of Capital
WIA	Nov 30	100.00%	-	-	- ^(a)
WIW	Nov 30	100.00%	-	-	- ^(a)

^(a) Sources of cumulative fiscal year-to-date distributions are estimated through February 28, 2023.

The updated estimated components of the distributions announced today will be provided to shareholders of record in a separate notice when the distributions are paid.

This press release is not for tax reporting purposes but is being provided to announce the amount of each Fund's distributions that have been declared by the Board of Trustees. In early 2023 and early 2024, after definitive information is available, each Fund will send shareholders a Form 1099-DIV, if applicable, specifying how the distributions paid by each Fund during the prior calendar year should be characterized for purposes of reporting the distributions on a shareholder's tax return (e.g., ordinary income, long-term capital gain or return of capital).

The Funds' common shares are traded on the New York Stock Exchange. Similar to stocks, Fund share prices will fluctuate with market conditions and, at the time of sale, may be worth more or less than the original investment. Shares of closed-end funds often trade at a discount to their net asset value, and can increase an investor's risk of loss.
