

Franklin Municipal Green Bond ETF (FLMB)

Municipals Factsheet as of March 31, 2024

Investment Overview

The fund seeks to maximize income that is exempt from regular federal taxes consistent with prudent investing and the preservation of shareholders' capital by investing predominantly in municipal "green bonds" that promote environmental sustainability and pay interest that is exempt from federal income taxes, including the federal alternative minimum tax.

Total Returns (%)

	Cumulative			Average Annual					Inception	
	3-Mth	6-Mth	YTD	1-Yr	3-Yr	5-Yr	10-Yr	Inception	Date

Benchmark	6.40	-8.53	1.52	5.21	7.54	1.28	—	—	—	—

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. For current month-end performance, please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit www.franklintempleton.com. Net Asset Value (NAV) returns are based on the NAV of the ETF; Market Price returns are based upon the official closing price of the ETF's shares. Returns are average annualized total returns, except for those periods of less than one year, which are cumulative. Market Price returns are calculated using the closing price as of 1 p.m. Pacific time on each trading day (when NAV is normally determined for most funds), and do not represent the returns you would receive if you traded shares at other times. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading September 5, 2017, the NAV of the Fund is used as a proxy for the Market Price to calculate market returns.

The total annual operating expenses are as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.

Growth of \$10,000

The Growth of \$10,000 chart reflects a hypothetical \$10,000 investment on Market Price and assumes reinvestment of dividends and capital gains. Fund expense, including management fees and other expenses were deducted.

Portfolio Data Information

Ratings shown are assigned by one or more Nationally Recognized Statistical Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch. When ratings from multiple agencies are available, the highest is used, consistent with the portfolio investment process. Ratings reflect an NRSRO's opinion of an issuer's creditworthiness and typically range from AAA (highest) to D (lowest). The Refunded category consists of refunded bonds secured by U.S. government or other high-quality securities. The Not Rated category consists of ratable securities that have not been rated by an NRSRO. The Not Applicable category consists of third-party ETFs and securities that only have a short-term rating and are not cash equivalents. Cash includes equivalents, which may be rated. **Please note, the fund itself has not been rated by an independent rating agency.**

What should I know before investing?

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Changes in the credit rating** of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. **Low-rated, high-yield bonds** are subject to greater price volatility, illiquidity and possibility of default. **Green bonds** may not result in direct environmental benefits, and the issuer may not use proceeds as intended or to appropriate new or additional projects. The managers' **environmental, social and governance (ESG) strategies** may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance. These and other risks are discussed in the fund's prospectus.

Glossary

Standard Deviation: Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. The **30-day SEC yield** is calculated using the net income (interest and dividends) per share earned over a trailing 30-day period (annualized), divided by the fund's share price at the end of that period. It may not equal the fund's actual income distribution rate, which reflects the fund's past dividends paid to shareholders. **Taxable Equivalent Yield:** The Taxable Equivalent Yield assumes the maximum regular federal income tax rate, maximum state personal income tax, and Medicare tax in effect on December 2023. **Weighted Average Maturity:** An estimate of the number of years to maturity for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes.

Important Information

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. ETF shares may be bought or sold throughout the day at their market price, not their Net Asset Value (NAV), on the exchange on which they are listed. Shares of ETFs are tradable on secondary markets and may trade either at a premium or a discount to their NAV on the secondary market. **Canada:** This content is intended only for Canadian institutional investors that qualify as "permitted clients" as defined in National Instrument 31-103 - Registration Requirements, Exemptions and Ongoing Registrant Obligations. U.S. securities laws generally limit a non-U.S. fund's purchase of a U.S. registered mutual fund or ETF (a "U.S. Fund") to no more than 3% of the U.S. Fund's voting stock. You should consult your legal counsel prior to investing in a U.S. Fund. **CFA®** and Chartered Financial Analyst® are trademarks owned by CFA Institute. The **Bloomberg Municipal Bond Index** is a broad measure of the municipal bond market with maturities of at least one year. Source: Bloomberg Indices.
