

Franklin Templeton Model Portfolios

Model Portfolios built by an industry leader available on the SMartY Platform by SMartX Advisory Solutions

Carefully crafted portfolios intended to meet your investment goals

Franklin Templeton is not affiliated with SMartX Advisory Solutions..

Not FDIC Insured | No Bank Guarantee | May Lose Value

Portfolios powered by your goals and tailored to your needs

At Franklin Templeton Investment Solutions, we begin with client goals then translate them into portfolios powered by Franklin Templeton's best thinking around the globe.

You, your financial professional and the power of outcome investing

Your financial professional is dedicated to understanding your unique goals and future aspirations. Whether you're focused on income, growth, or a balance of both, they will leverage their expertise to identify a diversified Franklin Templeton model portfolio that aligns with where you are today—and where you want to go.

Your financial professional can help you:

Prioritize your goals

...even if they seem to be competing with each other

Measure your progress

Demonstrate over time how your model is working towards achieving your goal

Stick to your plan

Regardless of what happens in the markets, your diversified portfolio is closely monitored and adjusted by experts to help you stay on track

Diversification does not guarantee a profit or protect against a loss.

This information is not personalized investment advice or an investment recommendation to you. It is intended for use as a resource to help build a portfolio or for your financial professional (if applicable) to use as an input in the development of investment advice for his/her own clients. Such financial professionals are responsible for making their own independent judgment as to how to use this information. Your adviser and not Franklin Templeton, maintains discretionary authority over your client account and will direct the purchase, sale or exchange of assets in any portfolio or account. Franklin Templeton does not have, nor expects to receive information regarding your individual financial situation, investment needs or objectives. Please review the disclosures at the end of this document and consult your financial professional for more information.

Franklin Templeton

Your trusted partner for what's ahead

Success requires more than just expertise—it demands powerful partnerships. As a forward-thinking asset manager, Franklin Templeton helps advisors build dynamic relationships with their clients, understand their goals, and navigate the complexities of the market together. Our team leverages cutting-edge strategies and deep industry insights to unlock opportunities to help grow wealth. With Franklin Templeton by their side, investors don't prepare for the future—they shape it.

% Mutual Fund	48.00	48.40	48.80	48.90	49.10	49.20	49.50	49.70

Allocations are subject to change. Actual underlying fund allocations may vary over time as markets change. The cash portion (if any) of the portfolios is made up of cash or cash equivalents. **Weighted Avg Expense Ratio** is calculated as the percent allocated to the individual underlying fund/ETFs multiplied by each expense ratio stated in the current prospectus. **Duration** is calculated as a % of fixed income holdings.

Weighted Annualized Yield is calculated by multiplying each fund's 12-Month Yield at NAV (Net Asset Value) by the fund's weight in the model. The 12-Month Yield at NAV reflects the sum of income distributions over the preceding 12-month period divided by the NAV at the end of the period. Source: Morningstar.

Yield is net of underlying mutual fund investment management fees and expenses (if any) but does not reflect the deduction of any account advisory fees (whether charged by a financial professional or Franklin Templeton, if applicable), brokerage or other commissions or any other expenses that an investor would have paid or actually paid.

The strategy returns shown are preliminary returns, subject to future revision (downward or upward). Performance data represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your shares: Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees.

Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for the equity and balanced portfolios and 1.5% is the maximum anticipated wrap fee for fixed income portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs.

Refer to the Franklin Templeton affiliated funds' factsheets or visit the Franklin Templeton website for the underlying funds' performance. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. The portfolios shown do not represent a complete list of models managed by FTIS. For a complete list of portfolios and performance, please call (800) DIAL-BEN / 342-5236.

To obtain specific information on available products and services or a GIPS® Report, contact your Franklin Templeton separately managed account sales team at (800) DIAL BEN / 342-5236. Alternative Completion Model Roster

This portfolio seeks to complement traditional equity and fixed income by investing in affiliated funds and third-party ETFs that offer more flexibility from traditional investment constraints.

Pursues Alternative Return Sources	Flexible Multi-Manager Strategy	Simplifies Alternative Allocations
Aims to build a liquid alternative portfolio of low-correlated strategies designed to deliver return potential in any equity market or interest rate environment.	Utilizes a blend of mutual funds and ETFs from Franklin Templeton and other reputable managers to enhance diversification.	Combines a mix of alternative equity and fixed income strategies into one professionally managed portfolio—built to complement your traditional investments.

Alternative Completion Portfolio Performance

Average Annual Total Returns (%)

As of December 31, 2025

Portfolio	1-M	3-M	1-Y	3-Y	5-Y	10-Y	Since Inception	Inception Date
Alternative Completion (gross)	0.51	1.36	7.22	4.58	1.09	--	1.51	3/31/18
Alternative Completion (net)	0.26	0.61	4.10	1.54	-1.86	--	-1.45	
Benchmark	0.58	1.41	7.14	5.16	2.87	--	3.02	

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Please visit www.franklintempleton.com for the latest performance figures. YTD numbers and performance numbers less than one year are not annualized. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

Fees: Returns for periods less than one year are not annualized. Pure gross of fee returns do not reflect the deduction of any expenses, including transaction costs. Net performance includes the deduction of a 3.0% annual wrap fee, which is the maximum anticipated wrap fee for equity and balanced portfolios.

Actual fees vary. For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group (FTPPG), refer to FTPPG's Form ADV disclosure document. Returns reflect the reinvestment of dividends and other earnings. On December 1, 2022, LMPPG changed its name to Franklin Templeton Private Portfolio Group (FTPPG). All performance is reported in US dollars.

The performance shown for the Franklin Templeton Alternative Completion strategy reflects the performance of an account that is invested in the Class IS shares of the Franklin Templeton affiliated mutual funds that are included in the portfolios. Sponsor firms offering the Franklin Templeton Alternative Completion strategy on their platform may request that Franklin Templeton Investment Solutions (FTIS) provide a model portfolio for the Franklin Templeton Alternative Completion strategy utilizing the Class I share of the Franklin Templeton affiliated mutual funds. Because Class IS shares have a lower expense ratio than Class I shares, the performance shown for the strategy is higher than it would have been had Class I shares been utilized.

Past performance is not a guarantee of future results. To obtain specific information on available products and services or GIPS® Report, contact your Franklin Templeton separately managed account sales team at (800) 822-8464. Franklin Templeton claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs.

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC (FTPPG), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: Franklin Templeton Investment Solutions. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.

Historical performance – Underlying holdings and waivers

Annual Total Returns (%)

As of December 31, 2025

Performance data represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will change with market conditions, and you may have a gain or a loss when you sell your shares. Please call Franklin Templeton at (800) DIAL BEN/(800) 342-5236 or visit franklintempleton.com for the most recent month-end performance.

There is no sales charge for Advisor Class and Class I shares. Advisor Class and Class I shares are only offered to certain eligible investors as stated in the prospectus. The funds offer multiple share classes, which are subject to different fees and expenses that will affect their performance. Please see the prospectus for details. The 30-day SEC yield, calculated pursuant to the standard SEC formula, is based on a Fund's investments over an annualized trailing 30-day period and not on the distributions paid by the Fund, which may differ. **During periods of rising inflation, fund yields can vary significantly from month-to-month and may not be repeated.**

Source: Franklin Templeton and Morningstar

*Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to specific date without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. Voluntary waivers (if any) may be modified or discontinued at any time without notice. Please see below for applicable waiver information.

Model Portfolio Construction:

The Franklin Templeton Investment Solutions (FTIS) model portfolio construction process consists of an assessment of specific model parameters and goals, including allocation targets, volatility limits, income levels, and investable regions, as well as other objectives or constraints. Longer-term strategic asset allocation and shorter-term views provide an allocation framework for each model. Portfolio managers customize model allocations according to specific objectives including a wide range of targets for growth and income as well as risk expectations. Managers also consider fund recommendations from the FTIS manager research to find the right fit for each model. FTIS portfolio managers review models regularly, applying the team's latest views to each model.

While FTIS takes an active approach to fund selection by comparing the attractiveness of in-house funds with third-party managers to support potential alpha creation, the model portfolios focus on, and often consist largely of Franklin Templeton proprietary funds. As part of the portfolio construction analysis, portfolio managers consider several key factors when selecting underlying investments. The criteria used may include, but are not limited to: dealer platform constraints, underlying currencies, volatility ranges, the mix of active and passive strategies and/or an allocation mix of Franklin Templeton and third-party funds. Considerations like investment objectives, competitive rankings and positioning, expense ratio cap, historical risk and returns, are additional factors that may be used for final fund recommendations and allocations.

Potential Conflicts of Interest:

Franklin Templeton may not receive a fee for developing and updating these model portfolios, however, Franklin Templeton has a financial interest in the models as they include funds for which Franklin Templeton serves as investment advisor, and from which Franklin Templeton or its affiliates receives fees for investment management, shareholder servicing, and transfer agent services.

Suitability/Recommendations:

Any investment products or services named herein are for illustrative purposes only and should not be considered an offer to buy or sell, or an investment recommendation for any specific security, strategy or investment product or service.

There can be no assurance that any or all funds included in the models will be available for investment. An investment in any fund that appears in a model is subject to satisfaction of eligibility and applicable account opening requirements, for which Franklin Templeton takes no responsibility. The model portfolios described may not be appropriate for all investors or available for investment to all investors.

Neither Franklin Templeton nor its affiliates conducts investor suitability analysis regarding the models or their underlying investments. Suitability determination is the responsibility of the financial advisor or sponsor firm.

Additional Information:

The Franklin Templeton Model Portfolios are provided on a non-discretionary basis to sponsor firms and Financial Advisors on whose platform the models are available. It is the sponsor firm/Financial Advisor that has investment authority and discretion over accounts on their platform. The Franklin Templeton Model Portfolios are not available as investable products through Franklin Distributors, LLC.

The Model Portfolios may be offered with different share classes and/or placed on trading platforms that require changes such as an allocation to cash and a pro rata allocation of the remainder according to the Model Portfolio(s). These modifications will change reported specifics such as performance, estimated portfolio yield, etc. Refer to the materials and terms of the offering and/or platform for additional information.

The composition of the models may change without notice. Investment allocations may not achieve model objectives and actual underlying fund allocations may vary over time as markets change. Any periodic rebalancing or allocation changes to the models are initiated by and at the discretion of FTIS.

Please note that allocation changes to the underlying funds for some of the models may also be made at the discretion of the sponsor firm or Financial Advisor.

This communication is general in nature and should not be considered or relied upon as legal, tax or investment advice or an investment recommendation, or as a substitute for legal or tax counsel. Franklin Templeton does not provide legal or tax advice.

Risks of the Underlying Investments:

All investments involve risks, including possible loss of principal. These models include funds which engage in a variety of investment strategies involving certain risks. The model's risks are directly related to the risks of the underlying funds and may include, but is not limited to, the risks as described below. Model allocation strategies are not designed to maximize return or predict the highest performing fund or group of funds within each class in the model. There are expenses associated with the underlying funds in addition to any fees charged by the sponsor firm.

Equity securities are subject to price fluctuation and possible loss of principal.

Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks.

Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls.

Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default.

International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets.

Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance.

Short selling is a speculative strategy. Unlike the possible loss on a security that is purchased, there is no limit on the amount of loss on an appreciating security that is sold short.

Real estate investment trusts (REITs) are closely linked to the performance of the real estate markets. REITs are subject to illiquidity, credit and interest rate risks, and risks associated with small- and mid-cap investments.

Asset-backed, mortgage-backed or mortgage-related securities are subject to prepayment and extension risks.

The managers' **environmental social and governance (ESG) strategies** may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance.

Diversification does not guarantee a profit or protect against a loss.

The **allocation** of assets among different strategies, asset classes and investments may not prove beneficial or produce the desired results.

Entities/Affiliates:

FTIS is a global investment management group dedicated to multi-strategy solutions.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.
