THE CASE FOR STAYING INVESTED

Although short-term volatility swings can be difficult to stomach, it’s important for long-term investors to persevere. While it may be tempting to pull out of the stock market, investors may miss out on a potential market rebound and opportunity for gains while they are on the sidelines.

In the chart below, the blue bars represent the largest declines from a “peak” (high) to a “trough” (low) that occurred each year. Despite intra-year volatility, the S&P 500 Index had positive year-end total returns 25 out of the last 31 years.

STAY THE COURSE WITH FRANKLIN TEMPLETON

Many investors know that the best way to endure volatility is to stay the course with a long-term plan and well-diversified portfolio. However, sticking to these fundamentals is sometimes easier said than done. If you’re rethinking your investment strategy or considering a new direction altogether, we recommend that you contact your registered representative before making any changes to your portfolio.

All investments involve risks, including possible loss of principal. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Diversification does not guarantee a profit or protect against a loss. These and other risk considerations are discussed in a fund’s prospectus.

Investors should carefully consider a fund’s investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.
