

Separately Managed Account

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios

3Q 2025

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: ClearBridge Investments, LLC, and Western Asset Management Company, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.

These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios

Overview

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios aims to meet long-term financial goals with dividend income, dividend income growth and long-term capital appreciation. The portfolios use municipal bonds to manage portfolio volatility and offer a balanced approach to diversification.

Philosophy

We believe that:

- A total return portfolio—with exposure to companies that either pay an existing dividend or have the potential to pay and/or significantly grow their dividends—combined with the potential added stability of tax-favored—has the potential to outperform over the long term.
- Consistent and competitive risk-adjusted returns may be achieved by investing in select large- and mid-cap companies complemented by investment-grade securities within the municipal bond market and by seeking to limit portfolio turnover to capitalize on potential for long-term growth.

Objectives

The strategy seeks to:

- Generate dividend income.
- Achieve growth of dividend income.
- Achieve long-term capital appreciation.
- Utilize fixed income as an anchor to manage volatility in the overall portfolio, as well as to provide income that is exempt from regular U.S. income tax and total return.

What are the risks?

All investments involve risks, including possible loss of principal. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. **Fixed income securities** involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Liquidity risk** exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued.

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios investment process

Portfolio Implementation Dividend Strategy Balanced Tax-Favored Portfolios

- Two strategies are managed independently by the Dividend Strategy Team and the Tax-Favored Fixed Income Team.
- Allocation to fixed income will vary depending upon portfolio managers' discretion and market conditions.

An account's actual allocations to its equity and fixed income segments will vary over time as markets change. An account will be rebalanced to its target allocation in the event that the account's allocations to its equity and fixed income segments drift 10% or more from their target allocations. An account generally will not be rebalanced unless such 10% drift threshold is reached. However, cash flows into and out of an account will be applied towards the account's more underweight segment in order to bring such account's allocations back towards their target allocations.

For Illustrative Purposes Only. Asset allocations are approximate and subject to change.

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios Equity investment process

STEP 1

Define the investment universe

Emphasize domestic large-capitalization stocks, but also consider mid- and small-capitalization companies and ADRs of foreign companies opportunistically

STEP 2

Evaluate stocks using proprietary discipline

Screen for companies across all market sectors with either an attractive dividend yield, a history of (or prospects for) dividend growth, strong balance sheets, dominant positions and/or reasonable valuations

STEP 3

Select securities and construct portfolio

Conduct fundamental research and dividend analysis to identify companies with attractive growth characteristics relative to their valuation levels

STEP 4

Review process

Re-examine a current holding when valuation is realized, fundamentals deteriorate, and/or cyclical shifts alter industry's attractiveness

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

Franklin Templeton Dividend Strategy Balanced Tax-Favored Portfolios Fixed Income investment process

STEP 1

Interest Rate Exposure/Duration Weighting

Western Asset's investment team comprehensively analyzes a variety of domestic and international macroeconomic factors to establish a duration target

STEP 2

Term Structure Weighting

The Firm carefully employs strategies in an attempt to take advantage of changes in the yield curve's shape and shifts in the relationship between short-, intermediate-, and long-maturity securities.

STEP 3

Sector Allocation

Western Asset believes that the value can be added to a portfolio by actively rotating among, and within, different sectors of the Municipal bond market. The investment team studies the fundamental factors that influence sector spread relationships.

STEP 4

Issue Selection

Using a bottom-up process, the Firm seeks to identify issuers with changing credit characteristics and securities that are undervalued and out of favor due to unusual circumstances.

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

Source: Western. **Sector weightings and portfolio characteristics are for a representative account for the equity portion and on the aggregate of individual client portfolios in the Current Market Muni program composites for the fixed income portion**, are for illustrative purposes only and are subject to change. Sector weightings and portfolio characteristics of individual client portfolios in these programs may differ, sometimes significantly, from those shown above. This information does not constitute, and should not be construed as, investment advice or recommendations with respect to the sectors or securities listed and should not be used as a sole basis to make any investment decisions. **Please see appendix for term definitions.** Credit quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by the following Nationally Recognized Statistical Rating Organizations ("NRSRO"): Standard and Poor's ("S&P"), Moody's Investors Service ("Moody's"), Fitch Ratings, Ltd. In the event a portfolio security is rated by more than one NRSRO, the higher rating is shown. In the case where a security is not rated by an NRSRO, these are listed as "Non Rated". The credit quality of the investments in the Portfolio does not apply to the stability or safety of the Portfolio. These ratings may change over time. The Portfolio itself has not been rated by an NRSRO.

Yield to Worst is calculated without the deduction of fees and expenses.

The **Index Mix** consists of the following: 70% S&P 500 Index and 30% Bloomberg Managed Money Short/Intermediate 1-10 Year Index, prior to 7/2022, the Bloomberg 5-Year Municipal Bond Index. Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTTPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

Investment management team

John Baldi

Managing Director, Portfolio Manager

- Industry since 1999
- Firm since 2004
- BS in Finance and Economics from Boston College
- JPMorgan Chase — Senior Analyst, Specialty Finance

Michael Clarfeld, CFA

Managing Director, Portfolio Manager

- Industry since 2000
- Firm since 2006
- Duke University — BA in History
- Member of the CFA Institute
- CFA Society New York
- Hygrove Partners, LLC — Equity Analyst
- Goldman Sachs — Equity Research, Financial Analyst

Diane Keady

Managing Director, Portfolio Manager

- Industry since 2000
- Firm since 1994
- New York University, Leonard N. Stern School of Business — MBA
- Rutgers University — BS
- Citigroup Asset Management — U.S. Sales and Distribution, Vice President
- Salomon Smith Barney — GAAP Reporting, Vice President
- Smith Barney Shearson — Technology Finance, Expense Analyst

Investment management team

Western Asset Management is one of the world's leading global fixed income managers. Founded in 1971, the firm is known for team management and proprietary research, supported by robust risk management and a long-term fundamental value approach.

Compliance Statement:

Franklin Templeton Private Portfolio Group, LLC ("FTPPG") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. FTPPG has been independently verified for the periods January 1, 2013 - December 31, 2024. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information:

Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), formerly known as Legg Mason Private Portfolio Group, LLC ("LMPPG"), is a wholly owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"). In July 2020 Legg Mason, Inc., its parent company, was purchased by Franklin. FTPPG has used Subadvisers for all periods presented. FTPPG, together with its Subadvisers, provides investment advisory services primarily in investment programs sponsored by Sponsor Firms. The investment advisory services FTPPG and the Subadvisers provide differ depending on the type of Sponsor Firm investment program in which a client participates.

Composite Information:

The Franklin Templeton Dividend Strategy Balanced Tax-Favored 70/30 composite consists of discretionary wrap accounts with an account minimum of US \$25,000. The strategy aims to meet long term financial goals with dividend income, dividend income growth and long-term capital appreciation. The portfolios use municipal bonds to manage portfolio volatility, and offer a balanced approach to diversification. The main risks of this strategy are General Investment Risk, Small Cap Risk, Mid Cap Risk, Credit Risk, Interest Rate Risk, Illiquidity Risk, and Geographic Concentration Risk.

Input and Calculation Data:

The fee schedule currently in effect is 3.00% on all assets. Net of fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest "bundled" fee charged (3.00%) annually, prorated to a monthly ratio. The "bundled" fee includes transaction costs, investment management, custodial, and other administrative fees. The internal dispersion of annual returns is measured by the asset-weighted standard deviation of portfolio returns included in the composite for the entire year. Gross returns are used to calculate presented risk measures. The composite employs a 10% significant cash flow policy which started in January 2021. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance is not necessarily indicative of future results. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Primary Benchmark Information:

The composite uses a custom blended benchmark consisting of 70% S&P 500® / 30% Bloomberg Managed Money Short/Intermediate (1-10 Yr) which is calculated by weighting the respective index returns monthly.

Definitions

Term definitions

Earnings before interest, taxes, depreciation and amortization (EBITDA) approximates a firm's operating cash flow by considering its earnings before interest, taxes, depreciation and amortization.

Free Cash Flow measures the cash remaining after accounting for a firm's cash expenditures to support its operations and maintain its capital assets.

Market Capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Weighted Median Market Capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted Average Market Capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Dividend Yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend Yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

Earnings Per Share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.

Definitions

Term Definitions

Maturity is the date at which a debt instrument is due and payable. A bond due to mature on January 1, 2025, will return the bondholder's principal and final interest payment when it reaches maturity on that date. Bond yields are frequently calculated on a yield-to-maturity basis.

Duration (Modified Duration) is the measure of the price sensitivity of a fixed income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.

Yield to Worst (YTW) is based on a portfolio's current holdings on one specific day, is gross of all portfolio expenses, and is calculated based on assumptions that prepayment occurs if the bond has called or put provisions, and the issuer can offer a lower coupon rate based on current market rates. If market rates are higher than the current yield of a bond, the YTW calculation will assume no prepayments are made, and YTW will equal the yield to maturity. The YTW will be the lowest of yield to maturity or yield to call (if the bond has prepayment provisions). The YTW of a bond portfolio is the market-weighted average of the YTWs of all the bonds in the portfolio. **Yield to Worst is calculated without the deduction of fees and expenses.**

Insured municipal bonds are ones where scheduled interest and principal payments are guaranteed by AAA-rated municipal bond insurers.

General Obligation municipal bonds are backed by the credit and taxing power of the issuing jurisdiction rather than the revenue of a given project.

Revenue bonds are municipal bonds supported by the revenue from a specific project.

Pre-refunded bonds are municipal bonds that are generally backed or secured by U.S. Treasury bonds.

Effective Duration is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

Average Maturity is the average length of maturity for all fixed-rate debt instruments held in a portfolio.

Average Coupon based on the portfolio's underlying holdings, which may differ and are subject to change. Coupon rate is the annual coupon payments paid by the issuer relative to a bond's face or par value. **Average Coupon is calculated without the deduction of fees and expenses.**

Yield to Maturity - The rate of return anticipated on a bond if it is held until the maturity date. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. **Yield to Maturity is calculated without the deduction of fees and expenses.**

Weighted Average Life - An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

The **Sharpe Ratio** is a risk-adjusted measure that is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by **Beta**, where Beta measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those months that are either positive (Up) or negative (Down) for the benchmark.

An **Up-Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive months.

A **Down-Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative months.

At Franklin Templeton, everything we do has a single focus: to deliver better client outcomes.

- We have deep expertise across equity, fixed income, alternatives, multi-asset solutions and cash strategies
- We offer an unmatched range of specialist investment managers, consisting of more than 1,500 investment professionals
- Over 75 years of experience in identifying opportunities and delivering investment solutions to clients.
