INVESTMENT PHILOSOPHY

The investment management team¹ manages portfolios composed primarily of high quality intermediate-term municipal bonds. Using a bottom-up, income-focused strategy, we seek to offer capital preservation and appreciation, along with a high level of current tax-free income.

INVESTMENT PROCESS

Our separately managed accounts (SMA) team invests approximately 60% of the portfolio in individual municipal bonds and approximately 40% of the portfolio in a pooled investment vehicle that invests in high-yield, tax-free municipal securities managed by Franklin Advisors, Inc.

We follow a disciplined approach that focuses on investing in strong credits within the municipal bond sector that we believe can provide attractive tax-free income for our clients. We focus on municipals that meet the strategies' maturity and credit parameters while avoiding riskier credits and bonds subject to the alternative minimum tax. Each holding is analyzed for a variety of factors including coupon structure and call provisions as well as relative value to other securities in the market. By focusing on credits with strong fundamentals and attractive valuations, we seek to construct a high-quality portfolio that does not take undue risk. The process leverages the broad credit research capabilities of the Municipal Bond department at Franklin Templeton when analyzing individual credits. When implementing portfolio positions, the strategy also utilizes the trading capability that comes with being one of the largest municipal bond managers in the market today. We construct portfolios that seek to maximize income without taking undue risk. We do not manage portfolios in anticipation of interest rate movements. Rather, we focus on maximizing tax-exempt income by investing the individual securities portion in high-quality intermediate maturity bonds generally in the 5- to 15-year portion of the curve where we believe the best balance of risk and reward exists. Once constructed, portfolios are then monitored by the municipal bond team to ensure investments remain consistent with investment guidelines and client restrictions.

EXPLANATORY NOTES

The information and opinions stated are as of June 30, 2019, and are based on the composite, unless otherwise indicated.

- Franklin Separately Managed Accounts and Franklin are defined as separate firms within the broader Franklin organization for the purpose of GIPS® compliance. Franklin Separately Managed Accounts, part of the Franklin Templeton Fixed Income Group, manages separately managed account portfolios for high-net-worth individuals and institutional clients. Franklin is a sub-adviser to Franklin Separately Managed Accounts since the inception date of the composite.
- The calculation for the weighted average coupon includes the imputed coupon rate of zero coupon bonds. If the imputed coupons were not included, the coupon rate would be 4.98%.
- The calculation for the weighted average price is based on market value weights. If the prices were weighted by par, the weighted average price would be \$105.68.
- Weighted average gross yield is calculated by adding 60% of the current yield of Franklin Intermediate Municipal SMA accounts that opened 60 days prior to June 30, 2019 and 40% of the gross distribution rate of the Franklin pooled investment vehicle as of June 30, 2019, which is calculated by taking the net distribution rate of the Franklin pooled investment vehicle and adding back the annual expense ratio. The client's return will be reduced by investment management fees and other expenses.
- Cumulative total returns.
- Inception: 9/30/06.
- Information is supplemental to the historical performance of the Franklin Multi Strategy Municipal SMA Composite, comprising the portfolios of all sponsors following that mandate, and is based on "pure" gross-of-fees performance for that composite. Periods over one year are annualized.
- Figures may not add up to 100% due to rounding. Cash and equivalents is deemed to have a 0% Maturity and Duration, be Non-Callable and have an AAA rating. Information is based on the Franklin Multi Strategy Municipal SMA Composite model portfolio, representative of the investment strategy. The model portfolio represents the allocation that would be used for new accounts coming in. The allocation of existing accounts may differ from the allocation used for new accounts due to differences in the timing of purchases and sales, changes in the purchase and sell list during the course of a quarter, and factors specific to each existing account due to client considerations.
- Quality Weightings: Ratings shown are assigned by one or more Nationally Recognized Statistical Credit Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When ratings from all three agencies are available, the middle rating is used; when two are available, the lowest rating is used; and when only one is available, that rating is used. Foreign government bonds without a specific rating are assigned to the country rating provided by an NRSRO, if available. The AA category includes unrated cash equivalents maturing in 7 days or less. The NR category consists of rateable securities that have not been rated by an NRSRO. The N/A category may encompass negative cash, net currency forwards, negative derivative exposure (market value), and nonrateable securities (e.g., equities).

FRANKLIN TEMPLETON INVESTMENTS

For over six decades, individuals and institutions around the world have viewed Franklin Templeton Investments as a trusted partner in asset management. We leverage the expertise of multiple, independent investment teams to deliver truly specialized expertise across a wide range of styles and asset classes, from traditional to alternative strategies and multi-asset solutions. Our over 620 investment professionals are on the ground across the globe, spotting investment ideas and potential risks firsthand. Collectively, they allow us to offer clients a unique investment perspective, shaped by local expertise, global context and a long-term investment horizon.

COMPLIANCE STATEMENT

Franklin Separately Managed Accounts claims compliance with the Global Investment Performance Standards (GIPS®).

Franklin Separately Managed Accounts (the “firm”) manages domestic equity and fixed income portfolios for high net worth individuals and institutional clients, applying a bottom-up, research-oriented process that utilizes proprietary screening models and top-down risk controls in managing its portfolios. Franklin Separately Managed Accounts is a division of Franklin Templeton Portfolio Advisors, Inc. (“FTPA”), a subsidiary of Franklin Resources, Inc. (“FRI”) and is a unit of the broader Franklin organization. At Franklin Separately Managed Accounts, brokerage, administrative, custodial and investment management fees are charged together as a percentage of the portfolios’ assets (comprehensive fee or “wrap-fee”) or may in some instances be charged separately (unbundled fee). Retail and Institutional separate accounts managed by affiliated Franklin entities are not included in the firm definition. Franklin Separately Managed Accounts was previously known as Franklin Portfolio Advisors prior to June 30, 2012. Franklin Portfolio Advisors was previously known as the Franklin Private Client Group prior to October 1, 2004.

Franklin (the “firm”) encompasses the equity, fixed income and balanced accounts managed by Franklin Advisers, Inc., and related Franklin affiliates, including, effective January 1, 2007, the equity accounts managed by the institutional investment teams of Franklin Templeton Institutional, LLC under the former firm name of Fiduciary Global Advisors. The combined equity assets of Franklin and Fiduciary Global Advisors form the Franklin Global Advisers unit of Franklin going forward. Effective January 1, 2006, the fixed income assets managed from that date forward by Franklin Templeton Institutional, LLC (“FTI”) or its related affiliates (managed previously by Fiduciary Trust Company International—Institutional Division or “FTCI’s Institutional Division”) that went through the institutional portfolio review process were combined with the fixed income assets of Franklin to form the Franklin Templeton Fixed Income unit of Franklin.

Franklin Multi Strategy Municipal SMA Composite consists of all fully discretionary accounts with a multi-strategy municipal investment objective and for which the brokerage (including trading expenses), administrative, custodial, and investment management fees are charged together as a percentage of the portfolios’ assets (“wrap fee”). Franklin Separately Managed Accounts directly manages the portion of the strategy that is invested in intermediate municipal fixed income securities (typically 60%) and invests the balance (typically 40%) of each portfolio in a pooled investment vehicle managed by Franklin Separately Managed Account’s affiliate, Franklin Advisers, Inc. (“FAI”), which invests in high yield tax-free municipal securities. All accounts in the composite have a wrap fee (also known as a bundled or “comprehensive” fee) for all time periods presented. The primary risks inherent in this strategy include interest rate risk and credit risk. Issuers of lower-rated or “high yield” debt securities are not as strong financially as those with higher credit ratings and the prices of high yield debt securities generally fluctuate more than those of higher credit quality. Between June 30, 2012 and December 31, 2012, the composite name was Franklin Multi Strategy Municipal SMA Wrap Fee Composite. Prior to June 30, 2012, the composite name was Franklin Portfolio Advisors Multi Strategy Municipal Composite—Wrap Fee. The primary benchmark for this composite is the Bloomberg Barclays Municipal Bond Index. The Bloomberg Barclays Municipal Bond Index is a sector market value capitalization weighted fixed income index comprised of general obligation, revenue, insured and pre-refunded/escrowed municipal bonds selected to be representative of the market. The Bloomberg Barclays Municipal Bond Index is an unmanaged index representing the investment environment existing during the time periods shown. It is presented for comparison purposes only and is provided to represent the investment environment existing during the periods shown.

The information contained in this piece is not a complete analysis of every material fact regarding the market and any industry sector, a security or a portfolio. Statements of fact cited by the manager have been obtained from sources considered reliable but no representation is made as to the completeness or accuracy. Because market and economic conditions are subject to rapid change, opinions provided are valid only as of the date of the material. Portfolio holdings and the manager’s analysis of these issuers, market sectors, and of the economic environment may have changed since the date of the material. The manager’s opinions are intended solely to provide insight into how the manager analyzes securities and are not a recommendation or individual investment advice for any particular security, strategy or investment product.

Risk Statistic Definitions:

Standard Deviation: A measure of the degree to which a composite’s returns varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a composite’s performance will fluctuate from the average return.

Tracking Error: The active risk of the portfolio that measures the dispersion of the portfolio’s return minus the benchmark’s return.

Information Ratio: A measure of consistency in excess return. The excess return over a benchmark divided by the standard deviation of excess return.

Sharpe Ratio: The difference between the average portfolio return and the average risk-free return, where risk is defined as the standard deviation of portfolio returns.

Additional information regarding the firm’s policies and procedures for calculating and reporting performance results is available upon request. To receive a complete list of composite descriptions and/or a presentation that adheres to the GIPS® standards for any composite, contact your Franklin Templeton separately managed account sales team at (800) 822-8464 or visit www.franklintempleton.com.
