FRANKLIN TEMPLETON

Franklin Mutual Beacon SMA

Separately Managed Accounts Factsheet | as of September 30, 2026

Investment overview

The Franklin Mutual Beacon SMA seeks capital appreciation by focusing mainly on undervalued and large-cap equity securities with a significant portion of its assets in foreign securities.

Investment philosophy

- At Franklin Mutual Series, we focus on recognizing value that other investors might miss.
- Our goal is to deliver solid, risk-adjusted returns, year in and year out. Over the last 60 years, Franklin Mutual Series' consistent, value approach has benefited shareholders with long-term investment horizons.

Opportunistic Value Investors

- Our core investments are in undervalued stocks with viable catalysts that we believe will change the way the market views their true worth.

Think and Act Like Company Owners

- We won't hesitate to become activist investors if our shareholders' interests need to be protected.

Strive To Reduce Risk

- Our strategy aims to provide lower volatility longer-term than the overall market and seeks attractive equity returns.

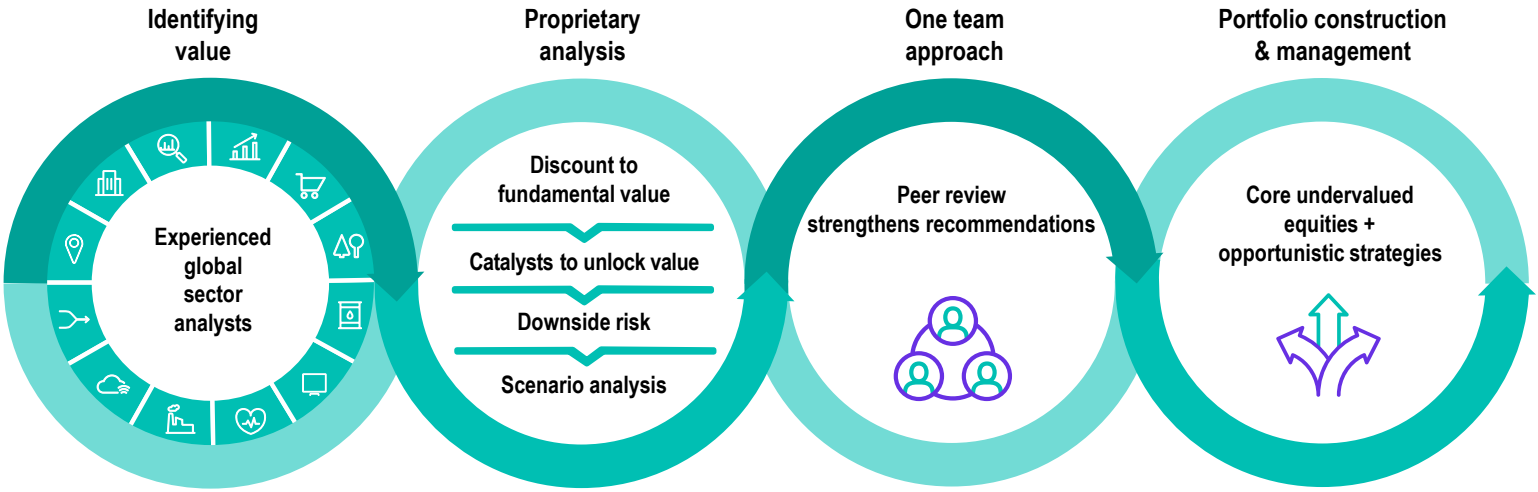

Investment management team

Aman Gupta
Portfolio Manager
Industry since 1991

Mandana Hormozi
Portfolio Manager
Industry since 2003

NOT FDIC INSURED | NO BANK GUARANTEE | MAY LOSE VALUE

Investment process

- Analyst-driven idea generation
- Bottom-up, unconstrained search for opportunities
- Focus on companies trading at market prices meaningfully below assessments of fundamental value

- In-depth proprietary analysis to understand business model, financials & competitive dynamics
- Consideration of downside risks, including environmental, social and governance (ESG) factors
- Assess current price relative to fair value & identify catalysts

- Team plays an integral role in the review of each investment idea
- Collaboration across sector, geography & strategy
- Focus on potential upside and downside risks

- Portfolio weightings result from bottom-up selection
- Opportunistic investments include distressed credit and merger arbitrage
- Active engagement with company management

INTEGRATED RISK MANAGEMENT

The investment process may change over time. The characteristics set forth above are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee that investment objectives will be achieved.

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintempleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

[1] **Fees:** Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. **To obtain specific information on available products and services or a GIPS® Report, contact your Franklin Templeton separately managed account sales team at (800) DIAL BEN/342-5236. *For illustrative purposes only. Assumes no withdrawals or contributions. These statistics are based on pure gross and net-of-fees quarterly composite returns, were calculated assuming reinvestment of dividends and income, and take into account both realized and unrealized capital gains and losses.

Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns is reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

Terms and definitions:

Dividend yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **price-to-book ratio (P/B)** is a stock's price divided by the stock's per share book value. Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

Weighted median market capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted average market capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Market capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Standard deviation measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

The **up-capture ratio** measures the manager's overall performance to the benchmark's overall performance, considering only quarters that are positive in the benchmark. An up-capture ratio of more than 100 indicates a manager who outperforms the relative benchmark in the benchmark's positive quarters.

The **down-capture ratio** is the ratio of the manager's overall performance to the benchmark's overall performance, considering only quarters that are negative in the benchmark. A down-capture ratio of less than 100 indicates a manager who outperforms the relative benchmark in the benchmark's negative quarters and protects more of a portfolio's value during down markets.

Alpha is a measure of performance vs. a benchmark on a risk-adjusted basis. A positive alpha of 1.0 means the portfolio has outperformed its benchmark index by 1%. Correspondingly, a similar negative alpha would indicate an underperformance of 1%. Alpha is a measure of the difference between actual returns and expected performance measuring sensitivity to index movements.

Beta measures the sensitivity of an investment to the movement of its benchmark. A beta higher than 1.0 indicates the investment has been more volatile than the benchmark and a beta of less than 1.0 indicates that the investment has been less volatile than the benchmark.

Sharpe ratio is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better a portfolio's historical risk-adjusted performance.

R-squared measures the strength of the linear relationship between a portfolio and its benchmark. R-squared at 1.00 implies perfect linear relationship and zero implies no relationship exists.

The **MSCI World Value Index** is a market capitalization-weighted index designed to measure the performance of stocks exhibiting overall value style characteristics in developed markets. Source: MSCI makes no warranties and shall have no liability with respect to any MSCI data reproduced herein. No further redistribution or use is permitted. This report is not prepared or endorsed by MSCI.

What are the risks?

All investments involve risks, including possible loss of principal. To the extent the portfolio invests in a **concentration of certain securities, regions or industries,** it is subject to increased volatility. **Depositary receipts** are subject to international investment risk and potentially negative effects from currency exchange rates, foreign taxation and differences in auditing and other financial standards. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets. Equity securities** are subject to price fluctuation and possible loss of principal. **Liquidity risk** exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. **Active management** does not ensure gains or protect against market declines. Investments in companies engaged in **mergers, reorganizations or liquidations** also involve special risks as pending deals may not be completed on time or on favorable terms. **Real estate investment trusts** (REITs) are closely linked to the performance of the real estate markets. REITs are subject to illiquidity, credit and interest rate risks, and risks associated with small- and mid-cap investments. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. The **investment style** may become out of favor, which may have a negative impact on performance. The manager may consider **environmental, social and governance (ESG) criteria** in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated.

Important Information

Any information, statement or opinion set forth herein is general in nature, is not directed to or based on the financial situation or needs of any particular investor, and does not constitute, and should not be construed as, investment advice, forecast of future events, a guarantee of future results, or a recommendation with respect to any particular security or investment strategy or type of retirement account. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies should consult their financial professional.

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC (FTPPG), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by affiliated subadvisors of Franklin Templeton. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.
