PUTNAM TARGET DATE FUNDS
SUPPLEMENT DATED OCTOBER 26, 2026
TO THE PROSPECTUS
OF EACH FUND LISTED IN SCHEDULE A

I. Effective immediately, the following replaces the third, fourth, and fifth paragraphs, the table, and the footnotes to the table under the heading "Investments" in the "Investments, risks and performance" section of the Prospectus of each Fund listed in Schedule A, other than Franklin Retirement Advantage Maturity Fund ("Maturity Fund"):

On January 29, 2027, the Investment Manager expects to begin implementing a revised glide path for the fund. The following table presents your fund's approximate allocations to each asset class and underlying fund as of September 30, 2026 (prior to the implementation of the revised glide path), its projected approximate allocations to these asset classes and underlying funds once the implementation of the revised glide path is complete (currently anticipated to be on or around February 3, 2027), and its projected approximate allocations to these asset classes and underlying funds as of September 30, 2027. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change following the implementation of the revised glide path.

The table also shows the approximate allocations of other Franklin Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund's allocations will gradually change to resemble the allocations of the fund with the next earliest target date. The table illustrates how a fund's

allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055	2050	2045	2040	2035	2030	Maturity Fund

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations may be more or less than these percentages.

** As of September 30, 2026.

*** Equity and fixed income allocations are hypothetical estimates based on Franklin Dynamic Asset Allocation Growth Fund's, Franklin Dynamic Asset Allocation Balanced Fund's, Franklin Dynamic Asset Allocation Conservative Fund's and Franklin Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying fund's main investment strategies and related risks?", an assumption that Franklin Dynamic Asset Allocation Equity Fund is equivalent to an equity investment, and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (*e.g.*, in the average retirement age, life expectancy, savings growth rate and Social Security benefits, among other changes) that lead the fund's portfolio managers to determine that a change is advisable. The investment managers of Franklin Dynamic Asset Allocation Growth Fund, Franklin Dynamic Asset Allocation Balanced Fund, Franklin Dynamic Asset Allocation Conservative Fund and Franklin Multi-Asset Income Fund will rebalance those funds' investments towards their target allocations from time to time.

II. Effective immediately, the following replaces in its entirety the disclosure under the heading "Investments" in the "Investments, risks and performance" section of the Prospectus of Maturity Fund:

The fund employs an asset allocation strategy designed for investors who are already in retirement or who plan to retire (or otherwise begin withdrawing the invested funds) in the near future. It is assumed investors will make gradual withdrawals from the fund. The fund is designed to provide diversification among different asset classes. On

January 29, 2027, the Investment Manager expects to begin implementing a revised glide path for the Franklin Retirement Advantage Funds, which includes changes in your fund's allocations to equity and fixed income investments. The following table presents your fund's approximate allocations to each asset class and underlying fund as of September 30, 2026 (prior to the implementation of the revised glide path) and its projected approximate allocations to these asset classes and underlying funds once the implementation of the revised glide path is complete (currently anticipated to be on or around February 3, 2027). By comparing the percentage allocations of your fund in the table, you can see how its allocations and the underlying funds in which it invests are expected to change following the implementation of the revised glide path. Following the implementation of the revised glide path, the fund's target allocations among asset classes and underlying funds are not expected to change over time.

Underlying Fund	Year	Maturity Fund
Franklin Dynamic Asset Allocation Balanced Fund	Current*	0.0%
	February 3, 2027	25.7%
Franklin Dynamic Asset Allocation Conservative Fund	Current*	0.0%
	February 3, 2027	11.3%
Franklin Multi-Asset Income Fund	Current*	94.0%
	February 3, 2027	60.0%
Putnam Short Term Investment Fund	Current*	6.0%
	February 3, 2027	3.0%
Total Equity**	**Current***	**25.4%**
	February 3, 2027	**35.0%**
Total Fixed Income**	**Current***	**74.6%**
	February 3, 2027	**65.0%**

*As of September 30, 2026.

**Equity and fixed income allocations are hypothetical estimates based on Franklin Dynamic Asset Allocation Balanced Fund's, Franklin Dynamic Asset Allocation Conservative Fund's and Franklin Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying fund's main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of Franklin Dynamic Asset Allocation Balanced Fund, Franklin Dynamic Asset Allocation Conservative Fund and Franklin Multi-Asset Income Fund may adjust those

funds' allocations among asset classes from time to time consistent with their investment goals, and, consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the fund's target allocations, and the underlying funds in which it invests, at any time, although the Investment Manager generally expects these changes to be infrequent and generally in response to longer-term structural changes (*e.g.*, in the average retirement age, life expectancy, savings growth rate and Social Security benefits, among other changes) that lead the fund's portfolio managers to determine that a change is advisable. The investment managers of Franklin Dynamic Asset Allocation Balanced Fund, Franklin Dynamic Asset Allocation Conservative Fund and Franklin Multi-Asset Income Fund will rebalance those funds' investments towards their target allocations from time to time. More information about the underlying funds is included below and under "What are the funds' and each underlying fund's main investment strategies and related risks?"

Information about each underlying fund's investment strategy

Prior to the implementation of the revised glide path discussed above, the fund invested in Franklin Multi-Asset Income Fund ("Multi-Asset Income Fund") and Putnam Short Term Investment Fund ("Short Term Investment Fund") only. Following the implementation of the revised glide path, which is expected to begin on January 29, 2027 and is expected to be completed on or around February 3, 2027, the fund will also invest in Franklin Dynamic Asset Allocation Balanced Fund ("Balanced Fund") and Franklin Dynamic Asset Allocation Conservative Fund ("Conservative Fund").

Balanced Fund

Conservative Fund

Multi-Asset Income Fund

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section "What are the funds' and each underlying fund's main investment strategies and related risks?" beginning on page 118.

Short Term Investment Fund

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk,

prepayment risk, and general market conditions when deciding whether to buy or sell securities.

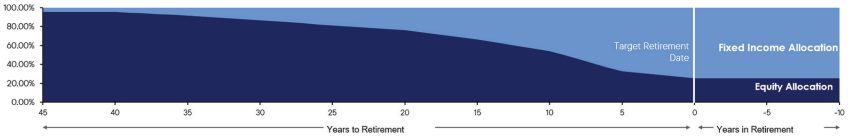

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section "What are the funds' and each underlying fund's main investment strategies and related risks?" beginning on page 118.

III. Effective immediately, the following replaces the fourth, fifth and sixth paragraphs, the glide path graph, and the text immediately following the glide path graph in the section entitled "What are the funds' and each underlying fund's main investment strategies and related risks?" of the Fund's Prospectus:

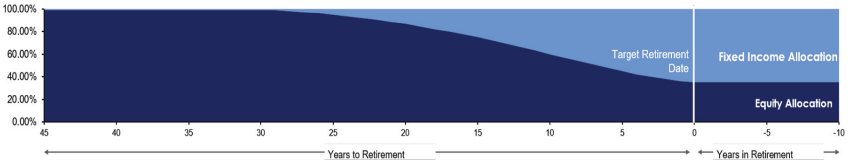

As mentioned in the fund summaries above, each fund pursues its goal by allocating its assets among underlying funds. In selecting underlying funds, the Investment Manager expects to select among affiliated mutual funds and does not expect to consider unaffiliated funds as underlying funds. For each fund other than Maturity Fund, target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the following predetermined "glide paths". The Investment Manager adjusts the fund's allocations at the end of each calendar quarter based on the applicable glide path. Over a five-year period, each fund's allocations will gradually change to resemble the allocations of the fund with the next earliest target date.

For Maturity Fund, target allocations among asset classes and underlying funds are generally not expected to change over time. The Investment Manager rebalances Maturity Fund's investments towards its target allocations on a quarterly basis. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (*e.g.*, in the average retirement age, life expectancy, savings growth rate and Social Security benefits, among other changes) that lead the fund's portfolio managers to determine that a change is advisable.

Glide Path Prior to January 29, 2027

Glide Path to be Implemented Beginning on January 29, 2027

Equity and fixed income allocations are hypothetical estimates based on Franklin Dynamic Asset Allocation Growth Fund's, Franklin Dynamic Asset Allocation Balanced Fund's, Franklin Dynamic Asset Allocation Conservative Fund's and Franklin Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set below, an assumption that Franklin Dynamic Asset Allocation Equity Fund is equivalent to an equity investment, and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary. Because of rounding in the calculation of allocations among underlying funds and of asset class weightings, actual allocations may be more or less than these percentages.

PUTNAM TARGET DATE FUNDS
SUPPLEMENT DATED APRIL 17, 2026 TO THE
PROSPECTUS AND
STATEMENT OF ADDITIONAL INFORMATION ("SAI")
OF EACH FUND LISTED IN SCHEDULES A AND B

All changes described below are effective June 1, 2026.

I. **The following replaces the reference to Jacqueline H. Kenney in the section titled "Fund summary – Your fund's management – Portfolio managers" in the Prospectus of each fund listed in Schedules A and B:**

Laura Green, CFA

Portfolio Manager of Franklin Advisers and portfolio manager of the fund since June 2026.

II. **The following replaces the reference to Jacqueline H. Kenney in the section titled "Who oversees and manages the fund? – Portfolio managers" in the Prospectus of each fund listed in Schedules A and B:**

Laura Green, CFA Portfolio Manager of Franklin Advisers
Ms. Green has been a portfolio manager of the fund since June 2026. She joined Franklin Templeton in 2010.

III. **The following replaces the reference to Jacqueline H. Kenney in the table in the section titled "PORTFOLIO MANAGERS – Other Accounts Managed by the Portfolio Managers" in the SAI of each fund listed in Schedules A and B:**

Portfolio Manager	Type of Account	Number of Accounts Managed	Total Assets Managed (Millions) ($)	Number of Accounts Managed for which Advisory Fee is Performance-Based	Assets Managed for which Advisory Fee is Performance Based (Millions) ($)
Laura Green*	Registered Investment Companies	17	14,034.50	None	None
	Other Pooled Investment Vehicles	28	6,781.40	None	None
	Other Accounts	246	5,219.30	2	81.1

*Information provided as of February 28, 2026.

IV. The following replaces the reference to Jacqueline H. Kenney in the table in the section titled "PORTFOLIO MANAGERS – Portfolio managers' securities ownership" in the SAI of each fund listed in Schedule A:

Portfolio Managers	Dollar Range of Ownership of Securities ($)
Laura Green*	100,001 - 500,000

*Information provided as of March 31, 2026.

V. The following replaces the reference Jacqueline H. Kenney in the table in the section titled "PORTFOLIO MANAGERS – Portfolio managers' securities ownership" in the SAI of each fund listed in Schedule B:

Portfolio Managers	Dollar Range of Ownership of Securities ($)
Laura Green*	None

*Information provided as of March 31, 2026.

SUPPLEMENT DATED APRIL 1, 2026
TO THE PROSPECTUS OF EACH
PUTNAM FUND LISTED IN SCHEDULE A

I. For each of the funds listed in Schedule A, the following disclosure replaces and supersedes the corresponding Merrill Lynch disclosure in each fund's Prospectus in the appendix titled "Appendix: Financial intermediary specific sales charge waiver information":

MERRILL LYNCH

Purchases or sales of front-end (for example, Class A) or level-load (for example, Class C) mutual fund shares through a Merrill platform or account will be eligible only for the following sales load waivers (front-end, contingent deferred, or back-end waivers) and discounts, which differ from those disclosed elsewhere in this fund's Prospectus. Purchasers will have to buy mutual fund shares directly from the mutual fund company or through another intermediary to be eligible for waivers or discounts not listed below.

It is the client's responsibility to notify Merrill at the time of purchase or sale of any relationship or other facts that qualify the transaction for a waiver or discount. A Merrill representative may ask for reasonable documentation of such facts and Merrill may condition the granting of a waiver or discount on the timely receipt of such documentation.

Additional information on waivers, discounts and share class exchanges is available in the Merrill Sales Load Waiver and Discounts Supplement (the "Merrill SLWD Supplement") and in the Mutual Fund Investing at Merrill pamphlet at ml.com/funds. Clients are encouraged to review these documents and speak with their financial advisor to determine whether a transaction is eligible for a waiver or discount.

Front-end Sales Load Waivers Available at Merrill

- Shares of mutual funds available for purchase by employer-sponsored retirement, deferred compensation, and employee benefit plans (including health savings accounts) and trusts used to fund those plans provided the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Shares purchased through a Merrill investment advisory program
- Brokerage class shares exchanged from advisory class shares due to the holdings moving from a Merrill investment advisory program to a Merrill brokerage account
- Shares purchased through the Merrill Edge Self-Directed platform
- Shares purchased through the systematic reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same mutual fund in the same account
- Shares exchanged from level-load shares to front-end load shares of the same mutual fund in accordance with the description in the Merrill SLWD Supplement
- Shares purchased by eligible employees of Merrill or its affiliates and their family members who purchase shares in accounts within the employee's Merrill Household (as defined in the Merrill SLWD Supplement)
- Shares purchased by eligible persons associated with the fund as defined in this Prospectus (e.g., the fund's officers or trustees)
- Shares purchased from the proceeds of a mutual fund redemption in front-end load shares provided (1) the repurchase is in a mutual fund within the same fund family, (2) the repurchase occurs within 90 calendar days from the redemption trade date, and (3) the redemption and purchase occur in the same account (known as Rights of Reinstatement). Automated transactions (i.e., systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill's account maintenance fees are not eligible for Rights of Reinstatement

Contingent Deferred Sales Charge ("CDSC") Waivers on Front-end, Back-end, and Level Load Shares Available at Merrill

- Shares sold due to the client's death or disability (as defined by Internal Revenue Code Section 22(e)(3))

- Shares sold pursuant to a systematic withdrawal program subject to Merrill's maximum systematic withdrawal limits as described in the Merrill SLWD Supplement
- Shares sold due to return of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the investor reaching the qualified age based on applicable IRS regulations
- Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g., traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund

Front-end Load Discounts Available at Merrill: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoint discounts, as described in this Prospectus, where the sales load is at or below the maximum sales load that Merrill permits to be assessed to a front-end load purchase, as described in the Merrill SLWD Supplement
- Rights of Accumulation ("ROA"), as described in the Merrill SLWD Supplement, which entitle clients to breakpoint discounts based on the aggregated holdings of mutual fund family assets held in accounts in their Merrill Household. On or about May 1, 2026, assets not held at Merrill will no longer be included in the ROA calculation. For more detail on the timing and calculation, please refer to the Merrill SLWD Supplement
- Letters of Intent ("LOI"), which allow for breakpoint discounts on eligible new purchases based on anticipated future eligible purchases within a fund family at Merrill, in accounts within your Merrill Household, as further described in the Merrill SLWD Supplement. On or about May 1, 2026, Merrill will no longer accept new LOIs. For more detail on the timing, please refer to the Merrill SLWD Supplement

II. For each of the funds listed in Schedule A, the following disclosure replaces and supersedes the corresponding Baird disclosure in each fund's Prospectus in the appendix titled "Appendix: Financial intermediary specific sales charge waiver information":

ROBERT W. BAIRD & CO. ("BAIRD")

Effective January 1, 2026, shareholders purchasing fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this Prospectus or the SAI

Front-End Sales Charge Waivers on Class A shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund
- Shares purchased by employees and registered representatives of Baird or its affiliates and their family members as designated by Baird
- Shares purchased within 90 days following a redemption from the same fund family, provided (1) the redemption and purchase occur within the purchaser's Baird household and (2) the redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the fund's Class C Shares will have their shares converted at net asset value to Class A shares of the same fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Class A and C shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable Internal Revenue Service regulations as described in the Fund's Prospectus
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulation

- Breakpoints as described in this Prospectus
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holdings of fund family assets held by accounts within the purchaser's household at Baird. Eligible fund family assets not held at Baird may be included in the rights of accumulation calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases of within a fund family through Baird, over a 13-month period of time

III. For each of the funds listed in Schedule A, the following disclosure is added to each fund's prospectus in the Appendix titled "Appendix: Financial intermediary specific sales charge waiver information":

WELLS FARGO CLEARING SERVICES, LLC AND WELLS FARGO ADVISORS FINANCIAL NETWORK, LLC (COLLECTIVELY, "WELLS FARGO ADVISORS")

Wells Fargo Clearing Services, LLC operates a First Clearing business, but these rules are not intended to include First Clearing firms.

Effective April 1, 2026, Clients of Wells Fargo Advisors purchasing fund shares through Wells Fargo Advisors are eligible for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from discounts and waivers described elsewhere in the Prospectus or statement of additional information ("SAI"). In all instances, it is the investor's responsibility to inform Wells Fargo Advisors at the time of purchase of any relationship, holdings, or other facts qualifying the investor for discounts or waivers. Wells Fargo Advisors can ask for documentation supporting the qualification.

Wells Fargo Advisors Class A share front-end sales charge waivers information.

Wells Fargo Advisors clients purchasing or converting to Class A shares of the fund in a Wells Fargo Advisors brokerage account are entitled to a waiver of the front-end load in the following circumstances:

- Wells Fargo Advisors employee and employee-related accounts according to Wells Fargo Advisors' employee account linking rules.

Legacy accounts and positions receiving affiliate discounts prior to the effective date will continue to receive discounts. Going forward, employees of affiliate businesses will not be offered NAV.

- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund.

WellsTrade, the firm's online self-directed brokerage account, generally offers no-load share classes but there could be instances where a Class A share is offered without a front-end sales charge.

Wells Fargo Advisors Contingent Deferred Sales Charge information.

- Contingent deferred sales charges (CDSC) imposed on fund redemptions will not be rebated based on future purchases.

Wells Fargo Advisors Class A front-end load discounts

Wells Fargo Advisors Clients purchasing Class A shares of the fund through Wells Fargo Advisors brokerage accounts will follow the following aggregation rules for breakpoint discounts:

- Effective April 1, 2026, SEP or SIMPLE IRAs will not be aggregated as a group plan. They will aggregate with the client's personal accounts based on Social Security Number. Previously established SEP and SIMPLE IRAs may still be aggregated as a group plan.
- Effective April 1, 2026, Employer-sponsored retirement plan (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans) accounts will aggregate with other plan accounts under the same Tax ID and will not be aggregated with other retirement plan accounts under a different Tax ID or personal accounts. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, SIMPLE IRAs, SAR-SEPs or Keogh plans.
- Gifts of shares will not be considered when determining breakpoint discounts.

Fund summary

Putnam Retirement Advantage 2070 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information ("SAI").

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees	Distribution and service (12b-1) fees	Other expenses[1]	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.45%	0.25%	13.77%	0.60%	15.07%	(14.27)%	0.80%
Class C	0.45%	1.00%	13.77%	0.60%	15.82%	(14.27)%	1.55%
Class R	0.45%	0.50%	13.92%	0.60%	15.47%	(14.27)%	1.20%
Class R3	0.45%	0.25%	13.92%	0.60%	15.22%	(14.27)%	0.95%
Class R4	0.45%	None	13.92%	0.60%	14.97%	(14.27)%	0.70%
Class R5	0.45%	None	13.78%	0.60%	14.83%	(14.28)%	0.55%
Class R6	0.45%	None	13.68%	0.60%	14.73%	(14.28)%	0.45%
Class Y	0.45%	None	13.78%	0.60%	14.83%	(14.28)%	0.55%

[1] Other expenses are estimated based on the expenses the fund expects to incur for the current fiscal year and include 2.00% of non-recurring costs related to commencement of the fund's operations. Actual expenses may differ from estimates.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2026, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years
Class A	$652	$3,321
Class C	$258	$3,087
Class C (no redemption)	$158	$3,087
Class R	$122	$3,006
Class R3	$97	$2,949
Class R4	$72	$2,892
Class R5	$56	$2,857
Class R6	$46	$2,834
Class Y	$56	$2,857

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal period from August 1, 2025 (commencement of Fund) to August 31, 2025 was 0%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2070 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually

change to resemble the allocations of the fund with the next earliest target date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070 (your fund)	2065	2060	2055	2050	2045	2040	2035	2030	Maturity Fund

	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may

also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates

decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Performance

Because the fund does not have a full calendar year of performance, annual total return information is not available and therefore is not presented. You can obtain updated performance information at www.franklintempleton.com. The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Fund summary

Putnam Retirement Advantage 2065 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information ("SAI").

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.44%	0.25%	5.12%	0.61%	6.42%	(5.62)%	0.80%
Class C	0.44%	1.00%	5.13%	0.61%	7.18%	(5.63)%	1.55%
Class R	0.44%	0.50%	5.28%	0.61%	6.83%	(5.63)%	1.20%
Class R3	0.44%	0.25%	5.28%	0.61%	6.58%	(5.63)%	0.95%
Class R4	0.44%	None	5.28%	0.61%	6.33%	(5.63)%	0.70%
Class R5	0.44%	None	5.12%	0.61%	6.17%	(5.62)%	0.55%
Class R6	0.44%	None	5.02%	0.61%	6.07%	(5.62)%	0.45%
Class Y	0.44%	None	5.12%	0.61%	6.17%	(5.62)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$2,166	$5,377
Class C	$258	$490	$2,045	$5,508
Class C (no redemption)	$158	$490	$2,045	$5,508
Class R	$122	$381	$1,881	$5,396
Class R3	$97	$303	$1,762	$5,212
Class R4	$72	$225	$1,642	$5,023
Class R5	$56	$176	$1,566	$4,901
Class R6	$46	$144	$1,517	$4,822
Class Y	$56	$176	$1,566	$4,901

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 48%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2065 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065 (your fund)	2060	2055	2050	2045	2040	2035	2030	Maturity Fund

	2026	0.5%	0.5%	0.5%	0.5%	1.4%	2.8%	3.7%	4.9%	6.0%	6.0%
Putnam Multi-Asset Income Funds	2025	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	5.2%	19.1%	94.0%
	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may

also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates

decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

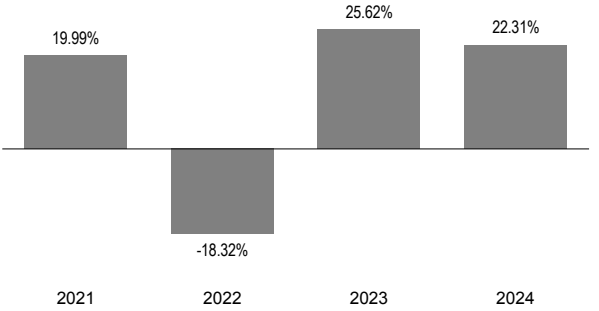

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2065 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q4 2023	11.97%
Worst Quarter:	Q2 2022	-15.63%

As of September 30, 2025, the fund's year-to-date return was 16.65%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	Since Inception
Class A before taxes	15.27%	9.33%[1]
Class A after taxes on distributions	13.26%	7.57%[1]
Class A after taxes on distributions and sale of fund shares	9.59%	6.75%[1]
Class C before taxes	20.36%	10.11%[1]
Class R before taxes	21.79%	10.51%[1]
Class R3 before taxes	22.11%	10.79%[1]
Class R4 before taxes	22.49%	11.07%[1]
Class R5 before taxes	22.67%	11.23%[1]
Class R6 before taxes	22.70%	11.32%[1]
Class Y before taxes	22.57%	11.22%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	12.36%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-2.15%[1]
S&P Target Date To 2065+ Index (no deduction for fees, expenses or taxes)	14.47%	8.45%[1]

1. Since inception December 30, 2020.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2060 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.43%	0.25%	1.21%	0.59%	2.48%	(1.68)%	0.80%
Class C	0.43%	1.00%	1.22%	0.59%	3.24%	(1.69)%	1.55%
Class R	0.43%	0.50%	1.37%	0.59%	2.89%	(1.69)%	1.20%
Class R3	0.43%	0.25%	1.37%	0.59%	2.64%	(1.69)%	0.95%
Class R4	0.43%	None	1.37%	0.59%	2.39%	(1.69)%	0.70%
Class R5	0.43%	None	1.22%	0.59%	2.24%	(1.69)%	0.55%
Class R6	0.43%	None	1.12%	0.59%	2.14%	(1.69)%	0.45%
Class Y	0.43%	None	1.22%	0.59%	2.24%	(1.69)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,359	$2,839
Class C	$258	$490	$1,220	$2,978
Class C (no redemption)	$158	$490	$1,220	$2,978
Class R	$122	$381	$1,042	$2,819
Class R3	$97	$303	$912	$2,564
Class R4	$72	$225	$782	$2,306
Class R5	$56	$176	$701	$2,146
Class R6	$46	$144	$647	$2,037
Class Y	$56	$176	$701	$2,146

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 31%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2060 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060 (your fund)	2055	2050	2045	2040	2035	2030	Maturity Fund

	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

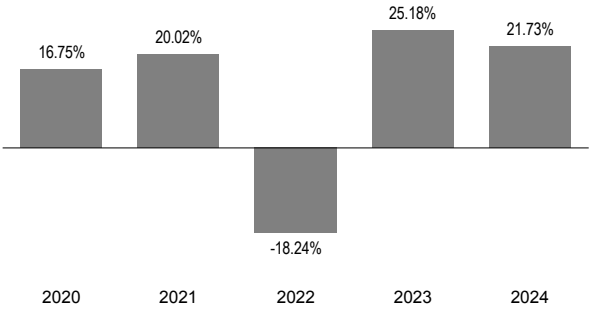

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2060 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	20.71%
Worst Quarter:	Q1 2020	-20.96%

As of September 30, 2025, the fund's year-to-date return was 16.33%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	14.73%	10.47%	10.47%[1]
Class A after taxes on distributions*	12.84%	7.82%	7.82%[1]
Class A after taxes on distributions and sale of fund shares*	9.13%	7.33%	7.33%[1]
Class C before taxes*	19.93%	10.97%	10.97%[1]
Class R before taxes*	21.34%	11.34%	11.34%[1]
Class R3 before taxes*	21.53%	11.61%	11.61%[1]
Class R4 before taxes*	21.92%	11.87%	11.87%[1]
Class R5 before taxes*	22.07%	12.03%	12.03%[1]
Class R6 before taxes	22.27%	12.17%	12.17%[1]
Class Y before taxes*	22.13%	12.05%	12.05%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2060 Index (no deduction for fees, expenses or taxes)	13.63%	9.04%	9.04%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2055 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	None[1]
Class C	1.00%	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.42%	0.25%	0.92%	0.60%	2.19%	(1.39)%	0.80%
Class C	0.42%	1.00%	0.92%	0.60%	2.94%	(1.39)%	1.55%
Class R	0.42%	0.50%	1.07%	0.60%	2.59%	(1.39)%	1.20%
Class R3	0.42%	0.25%	1.07%	0.60%	2.34%	(1.39)%	0.95%
Class R4	0.42%	None	1.07%	0.60%	2.09%	(1.39)%	0.70%
Class R5	0.42%	None	0.92%	0.60%	1.94%	(1.39)%	0.55%
Class R6	0.42%	None	0.82%	0.60%	1.84%	(1.39)%	0.45%
Class Y	0.42%	None	0.92%	0.60%	1.94%	(1.39)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,296	$2,620
Class C	$258	$490	$1,155	$2,757
Class C (no redemption)	$158	$490	$1,155	$2,757
Class R	$122	$381	$974	$2,586
Class R3	$97	$303	$844	$2,330
Class R4	$72	$225	$714	$2,065
Class R5	$56	$176	$631	$1,898
Class R6	$46	$144	$578	$1,788
Class Y	$56	$176	$631	$1,898

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 45%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2055 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055 (your fund)	2050	2045	2040	2035	2030	Maturity Fund

	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

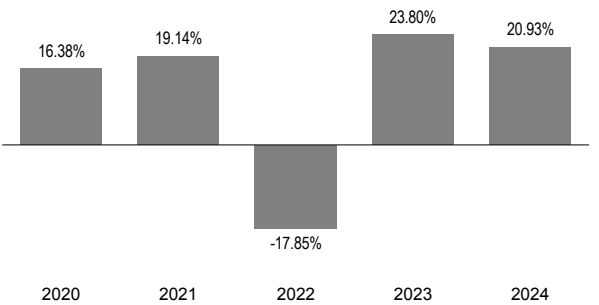

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2055 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	20.08%
Worst Quarter:	Q1 2020	-20.46%

As of September 30, 2025, the fund's year-to-date return was 15.83%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	13.97%	9.95%	9.95%[1]
Class A after taxes on distributions*	11.83%	7.63%	7.63%[1]
Class A after taxes on distributions and sale of fund shares*	8.75%	7.12%	7.12%[1]
Class C before taxes*	18.91%	10.44%	10.44%[1]
Class R before taxes*	20.46%	10.82%	10.82%[1]
Class R3 before taxes*	20.63%	11.09%	11.09%[1]
Class R4 before taxes*	20.93%	11.35%	11.35%[1]
Class R5 before taxes*	21.17%	11.52%	11.52%[1]
Class R6 before taxes	21.30%	11.63%	11.63%[1]
Class Y before taxes*	21.18%	11.52%	11.52%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2055 Index (no deduction for fees, expenses or taxes)	13.46%	8.82%	8.82%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2050 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information ("SAI").

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.41%	0.25%	0.65%	0.60%	1.91%	(1.11)%	0.80%
Class C	0.41%	1.00%	0.65%	0.60%	2.66%	(1.11)%	1.55%
Class R	0.41%	0.50%	0.80%	0.60%	2.31%	(1.11)%	1.20%
Class R3	0.41%	0.25%	0.80%	0.60%	2.06%	(1.11)%	0.95%
Class R4	0.41%	None	0.80%	0.60%	1.81%	(1.11)%	0.70%
Class R5	0.41%	None	0.65%	0.60%	1.66%	(1.11)%	0.55%
Class R6	0.41%	None	0.55%	0.60%	1.56%	(1.11)%	0.45%
Class Y	0.41%	None	0.65%	0.60%	1.66%	(1.11)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,236	$2,406
Class C	$258	$490	$1,093	$2,541
Class C (no redemption)	$158	$490	$1,093	$2,541
Class R	$122	$381	$912	$2,369
Class R3	$97	$303	$780	$2,103
Class R4	$72	$225	$649	$1,833
Class R5	$56	$176	$567	$1,664
Class R6	$46	$144	$513	$1,553
Class Y	$56	$176	$567	$1,664

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 28%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2050 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055	2050 (your fund)	2045	2040	2035	2030	Maturity Fund

	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may

also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates

decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

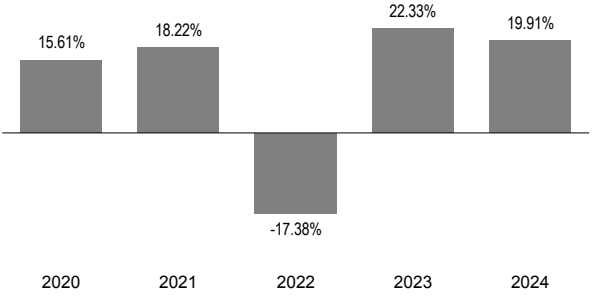

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2050 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	18.84%
Worst Quarter:	Q1 2020	-19.46%

As of September 30, 2025, the fund's year-to-date return was 15.42%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	13.01%	9.32%	9.32%[1]
Class A after taxes on distributions*	10.90%	6.75%	6.75%[1]
Class A after taxes on distributions and sale of fund shares*	8.07%	6.44%	6.44%[1]
Class C before taxes*	18.05%	9.82%	9.82%[1]
Class R before taxes*	19.40%	10.18%	10.18%[1]
Class R3 before taxes*	19.68%	10.45%	10.45%[1]
Class R4 before taxes*	20.02%	10.71%	10.71%[1]
Class R5 before taxes*	20.23%	10.88%	10.88%[1]
Class R6 before taxes	20.24%	10.99%	10.99%[1]
Class Y before taxes*	20.22%	10.87%	10.87%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2050 Index (no deduction for fees, expenses or taxes)	13.59%	8.85%	8.85%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2045 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.40%	0.25%	0.67%	0.60%	1.92%	(1.12)%	0.80%
Class C	0.40%	1.00%	0.67%	0.60%	2.67%	(1.12)%	1.55%
Class R	0.40%	0.50%	0.82%	0.60%	2.32%	(1.12)%	1.20%
Class R3	0.40%	0.25%	0.82%	0.60%	2.07%	(1.12)%	0.95%
Class R4	0.40%	None	0.82%	0.60%	1.82%	(1.12)%	0.70%
Class R5	0.40%	None	0.67%	0.60%	1.67%	(1.12)%	0.55%
Class R6	0.40%	None	0.57%	0.60%	1.57%	(1.12)%	0.45%
Class Y	0.40%	None	0.67%	0.60%	1.67%	(1.12)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,238	$2,413
Class C	$258	$490	$1,095	$2,548
Class C (no redemption)	$158	$490	$1,095	$2,548
Class R	$122	$381	$914	$2,376
Class R3	$97	$303	$784	$2,113
Class R4	$72	$225	$651	$1,840
Class R5	$56	$176	$569	$1,673
Class R6	$46	$144	$515	$1,560
Class Y	$56	$176	$569	$1,673

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 30%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2045 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055	2050	2045 (your fund)	2040	2035	2030	Maturity Fund

	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

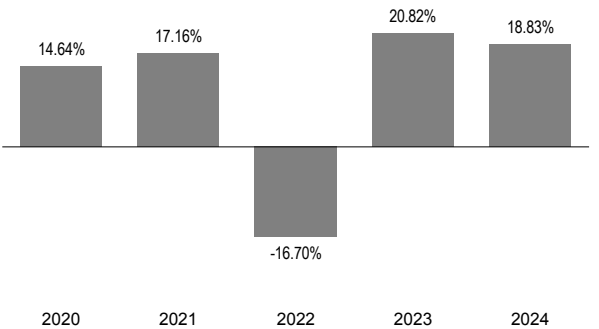

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2045 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	17.65%
Worst Quarter:	Q1 2020	-18.56%

As of September 30, 2025, the fund's year-to-date return was 14.82%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	12.00%	8.65%	8.65%[1]
Class A after taxes on distributions*	9.91%	6.43%	6.43%[1]
Class A after taxes on distributions and sale of fund shares*	7.35%	6.05%	6.05%[1]

Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2045 Index (no deduction for fees, expenses or taxes)	12.84%	8.41%	8.41%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2040 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.39%	0.25%	0.49%	0.57%	1.70%	(0.90)%	0.80%
Class C	0.39%	1.00%	0.50%	0.57%	2.46%	(0.91)%	1.55%
Class R	0.39%	0.50%	0.65%	0.57%	2.11%	(0.91)%	1.20%
Class R3	0.39%	0.25%	0.65%	0.57%	1.86%	(0.91)%	0.95%
Class R4	0.39%	None	0.65%	0.57%	1.61%	(0.91)%	0.70%
Class R5	0.39%	None	0.50%	0.57%	1.46%	(0.91)%	0.55%
Class R6	0.39%	None	0.40%	0.57%	1.36%	(0.91)%	0.45%
Class Y	0.39%	None	0.50%	0.57%	1.46%	(0.91)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,190	$2,241
Class C	$258	$490	$1,049	$2,382
Class C (no redemption)	$158	$490	$1,049	$2,382
Class R	$122	$381	$866	$2,208
Class R3	$97	$303	$735	$1,939
Class R4	$72	$225	$603	$1,665
Class R5	$56	$176	$520	$1,495
Class R6	$46	$144	$466	$1,380
Class Y	$56	$176	$520	$1,495

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 39%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2040 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055	2050	2045	2040 (your fund)	2035	2030	Maturity Fund

	2026	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	7.2%	26.0%	94.0%
Total Equity**	2025	95.2%	95.2%	91.4%	86.4%	81.2%	76.0%	66.4%	54.0%	32.5%	25.4%
	2026	95.2%	94.6%	90.7%	85.6%	80.5%	74.6%	64.6%	50.8%	31.4%	25.4%
Total Fixed Income**	2025	4.8%	4.8%	8.6%	13.6%	18.8%	24.0%	33.6%	46.0%	67.5%	74.6%
	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

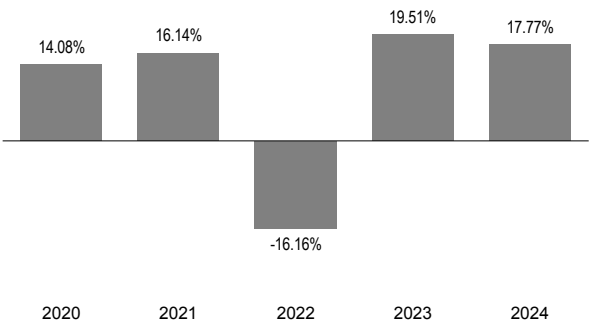

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2040 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	16.55%
Worst Quarter:	Q1 2020	-17.37%

As of September 30, 2025, the fund's year-to-date return was 13.43%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	11.00%	8.06%	8.06%[1]
Class A after taxes on distributions*	8.41%	5.69%	5.69%[1]
Class A after taxes on distributions and sale of fund shares*	6.96%	5.55%	5.55%[1]
Class C before taxes*	15.83%	8.53%	8.53%[1]
Class R before taxes*	17.29%	8.90%	8.90%[1]
Class R3 before taxes*	17.45%	9.17%	9.17%[1]
Class R4 before taxes*	17.81%	9.43%	9.43%[1]
Class R5 before taxes*	17.99%	9.59%	9.59%[1]
Class R6 before taxes	18.13%	9.71%	9.71%[1]
Class Y before taxes*	18.07%	9.59%	9.59%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2040 Index (no deduction for fees, expenses or taxes)	11.75%	7.80%	7.80%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2035 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]

Class Y	0.38%	None	0.45%	0.53%	1.36%	(0.81)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,172	$2,170
Class C	$258	$490	$1,027	$2,305
Class C (no redemption)	$158	$490	$1,027	$2,305
Class R	$122	$381	$844	$2,128
Class R3	$97	$303	$712	$1,858
Class R4	$72	$225	$579	$1,580
Class R5	$56	$176	$498	$1,410
Class R6	$46	$144	$443	$1,294
Class Y	$56	$176	$498	$1,410

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 32%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2035 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070 (your fund)	2065	2060	2055	2050	2045	2040	2035 (your fund)	2030	Maturity Fund

	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

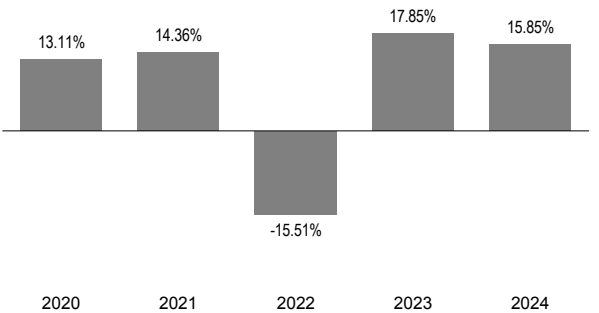

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2035 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	14.82%
Worst Quarter:	Q1 2020	-15.17%

As of September 30, 2025, the fund's year-to-date return was 11.70%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	9.19%	7.06%	7.06%[1]
Class A after taxes on distributions*	6.65%	4.78%	4.78%[1]
Class A after taxes on distributions and sale of fund shares*	5.59%	4.72%	4.72%[1]
Class C before taxes*	13.98%	7.53%	7.53%[1]
Class R before taxes*	15.32%	7.88%	7.88%[1]
Class R3 before taxes*	15.68%	8.17%	8.17%[1]
Class R4 before taxes*	16.00%	8.43%	8.43%[1]
Class R5 before taxes*	16.12%	8.57%	8.57%[1]
Class R6 before taxes	16.24%	8.69%	8.69%[1]
Class Y before taxes*	16.16%	8.58%	8.58%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2035 Index (no deduction for fees, expenses or taxes)	10.25%	7.04%	7.04%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage 2030 Fund

Goal

The fund seeks capital appreciation and current income consistent with a decreasing emphasis on capital appreciation and an increasing emphasis on current income as it approaches its target date.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $50,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	5.75%	1.00%[1]
Class C	None	1.00%[2]
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

[1] Applies only to certain redemptions of shares bought with no initial sales charge.

[2] This charge is eliminated after one year.

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees[1]	Distribution and service (12b-1) fees	Other expenses	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.37%	0.25%	0.47%	0.54%	1.63%	(0.83)%	0.80%
Class C	0.37%	1.00%	0.47%	0.54%	2.38%	(0.83)%	1.55%
Class R	0.37%	0.50%	0.60%	0.54%	2.01%	(0.81)%	1.20%
Class R3	0.37%	0.25%	0.62%	0.54%	1.78%	(0.83)%	0.95%
Class R4	0.37%	None	0.62%	0.54%	1.53%	(0.83)%	0.70%
Class R5	0.37%	None	0.47%	0.54%	1.38%	(0.83)%	0.55%
Class R6	0.37%	None	0.37%	0.54%	1.28%	(0.83)%	0.45%
Class Y	0.37%	None	0.47%	0.54%	1.38%	(0.83)%	0.55%

[1] Management fees have been restated to reflect the reduced management fee rate that took effect under the fund's management agreement effective October 1, 2025 based on the number of years remaining until the date referenced in the fund's name. Consequently, the fund's total annual fund operating expenses differ from the ratio of expenses to average net assets shown in the fund's financial highlights.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$652	$816	$1,176	$2,187
Class C	$258	$490	$1,031	$2,321
Class C (no redemption)	$158	$490	$1,031	$2,321
Class R	$122	$381	$844	$2,128
Class R3	$97	$303	$717	$1,874
Class R4	$72	$225	$585	$1,598
Class R5	$56	$176	$502	$1,426
Class R6	$46	$144	$448	$1,311
Class Y	$56	$176	$502	$1,426

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 56%.

Investments, risks, and performance

Investments

The fund’s asset allocation strategy may be attractive to investors who plan to retire or otherwise intend to begin making periodic withdrawals of their investments in or about 2030 (the target date). The fund is designed to provide diversification among different asset classes by investing its assets in other affiliated mutual funds, referred to as underlying funds.

The fund's target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the predetermined "glide path" in the chart under "What are the funds’ and each underlying fund’s main investment strategies and related risks?". The Investment Manager adjusts these allocations at the end of each calendar quarter based on the glide path.

The following table presents your fund’s approximate allocations to each asset class and underlying fund as of December 31, 2025 and its projected approximate allocations to these asset classes and underlying funds as of December 31, 2026. By comparing the percentage allocations of your fund in the table, you can see how its allocations are expected to change during the one-year period beginning on December 31, 2025.

The table also shows the approximate allocations of other Putnam Retirement Advantage Funds, which are designed for investors with different target retirement dates. Over a five-year period, each fund’s allocations will gradually change to resemble the allocations of the fund with the next earliest target

date. The table illustrates how a fund's allocations are expected to change over time to increasingly emphasize capital preservation and income.

Underlying Fund*	Year	2070	2065	2060	2055	2050	2045	2040	2035	2030 (your fund)	Maturity Fund

	2026	4.8%	5.4%	9.3%	14.4%	19.5%	25.4%	35.4%	49.2%	68.6%	74.6%

* Due to rounding, allocations shown in the table above may not total 100%. In addition, because of rounding in the calculation of allocations among underlying funds and market fluctuations, actual allocations might be more or less than these percentages.

** Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

It is assumed that investors will begin gradual withdrawals from the fund at or around the target date. As the target date year of the fund approaches, the fund's target allocations will increasingly correspond closely to those of Putnam Retirement Advantage Maturity Fund ("Maturity Fund"), a fund that seeks as high a rate of current income as the Investment Manager believes is consistent with preservation of capital, and the fund will be merged into Maturity Fund prior to the end of the target year as determined by the Investment Manager in its discretion. More information about Maturity Fund is available in this prospectus beginning on page 108**,** and more information about the underlying funds (which are not offered by this prospectus) is included below and under *"What are the funds' and each underlying fund's main investment strategies and related risks?"*

Information about each underlying fund's investment strategy

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Equity Fund invests primarily in common stocks of large and midsize companies located worldwide, including both growth and value stocks. In selecting investments for Equity Fund, Equity Fund's investment manager may consider a variety of factors, including a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. Equity Fund's investment manager may also consider other factors that it believes could contribute to an increase in the company's stock price.

Under normal circumstances, Equity Fund invests at least 80% of the value of its net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

For a further discussion of Equity Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Growth Fund invests primarily in equity securities, including both growth and value stocks, of U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed income investments, which may include U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size, as well as in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments.

Conservative Fund invests primarily in fixed income investments, including U.S. and foreign government obligations, corporate obligations, and securitized debt instruments such as mortgage-backed investments. Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size.

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

Losses may occur near, at or after the target date. There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including

mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

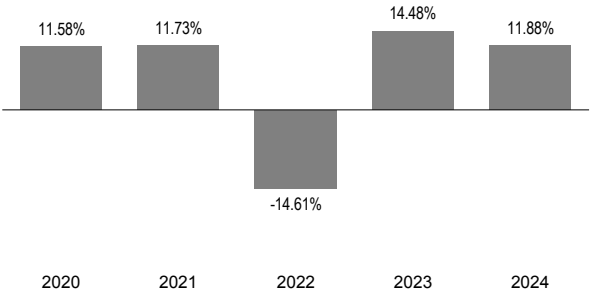

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To 2030 Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q2 2020	12.53%
Worst Quarter:	Q1 2020	-12.38%

As of September 30, 2025, the fund's year-to-date return was 9.55%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	5.44%	5.14%	5.14%[1]
Class A after taxes on distributions*	3.66%	3.32%	3.32%[1]
Class A after taxes on distributions and sale of fund shares*	3.35%	3.40%	3.40%[1]
Class C before taxes*	10.19%	5.64%	5.64%[1]
Class R before taxes*	11.53%	5.99%	5.99%[1]
Class R3 before taxes*	11.80%	6.25%	6.25%[1]
Class R4 before taxes*	12.07%	6.50%	6.50%[1]
Class R5 before taxes*	12.33%	6.67%	6.67%[1]
Class R6 before taxes	12.34%	6.76%	6.76%[1]
Class Y before taxes*	12.29%	6.66%	6.66%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
S&P Target Date To 2030 Index (no deduction for fees, expenses or taxes)	8.89%	6.08%	6.08%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Fund summary

Putnam Retirement Advantage Maturity Fund

Goal

The fund seeks as high a rate of current income as the Investment Manager (as defined below) believes is consistent with preservation of capital.

Fees and expenses

The following tables describe the fees and expenses you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least $100,000 in Putnam funds. More information about these and other discounts is available from your financial professional and in *How do I buy fund shares?* beginning on page 138 of the fund's prospectus, in the Appendix to the fund's prospectus, and in *How to buy shares* beginning on page 22 of the fund's Statement of Additional Information ("SAI").

Shareholder Fees (fees paid directly from your investment)

Share class	Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	Maximum deferred sales charge (load) (as a percentage of original purchase price or redemption proceeds, whichever is lower)
Class A	4.00%	1.00%
Class C	None	1.00%
Class R	None	None
Class R3	None	None
Class R4	None	None
Class R5	None	None
Class R6	None	None
Class Y	None	None

Annual Fund Operating Expenses
(expenses you pay each year as a percentage of the value of your investment)

Share class	Management fees	Distribution and service (12b-1) fees	Other expenses[1]	Acquired fund fees and expenses	Total annual fund operating expenses[2]	Expense reimburse-ment[3]	Total annual fund operating expenses after expense reim-bursement
Class A	0.36%	0.25%	1.28%	0.44%	2.33%	(1.53)%	0.80%
Class C	0.36%	1.00%	1.29%	0.44%	3.09%	(1.54)%	1.55%
Class R	0.36%	0.50%	1.43%	0.44%	2.73%	(1.53)%	1.20%
Class R3	0.36%	0.25%	1.43%	0.44%	2.48%	(1.53)%	0.95%
Class R4	0.36%	None	1.43%	0.44%	2.23%	(1.53)%	0.70%
Class R5	0.36%	None	1.28%	0.44%	2.08%	(1.53)%	0.55%
Class R6	0.36%	None	1.18%	0.44%	1.98%	(1.53)%	0.45%
Class Y	0.36%	None	1.28%	0.44%	2.08%	(1.53)%	0.55%

[1] Other expenses have been restated to reflect current expenses.

[2] Total annual fund operating expenses do not correlate with the ratios of expenses to average net assets reported in the fund's financial highlights, which reflect the fund's operating expenses and do not include acquired fund fees and expenses.

[3] The Investment Manager (as defined below) has contractually agreed to (1) waive fees and/or reimburse expenses in an amount equal to the fund's "acquired fund fees and expenses" and (2) waive fees and/or reimburse operating expenses of the fund (excluding payments under the fund's distribution plan, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses and extraordinary expenses) so that the total annual fund operating expenses for class A, C, R, R3, R4, R5, R6 and Y shares will not exceed 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55%, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2028, without approval of the Board of Trustees.

Example

The following hypothetical example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. It assumes that you invest $10,000 in the fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year and that the fund's operating expenses remain the same (except that any applicable fee waiver or expense reimbursement is reflected only through its expiration date). Your actual costs may be higher or lower.

Share class	1 year	3 years	5 years	10 years
Class A	$478	$645	$1,164	$2,590
Class C	$258	$490	$1,187	$2,867
Class C (no redemption)	$158	$490	$1,187	$2,867
Class R	$122	$381	$1,006	$2,695
Class R3	$97	$303	$876	$2,439
Class R4	$72	$225	$746	$2,177
Class R5	$56	$176	$664	$2,015
Class R6	$46	$144	$611	$1,907
Class Y	$56	$176	$664	$2,015

Portfolio turnover

The fund pays transaction-related costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher turnover rate may indicate higher transaction costs and may result in higher taxes when the fund’s shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or the above example, affect fund performance. The fund’s turnover rate in the most recent fiscal year was 58%.

Investments, risks, and performance

Investments

The fund employs an asset allocation strategy designed for investors who are already in retirement or who plan to retire (or otherwise begin withdrawing the invested funds) in the near future. The fund is designed to provide diversification among different asset classes. The fund invests most of its assets in Putnam Multi-Asset Income Fund, another Putnam mutual fund, which invests mainly in fixed-income investments and, to a lesser extent, in equity securities. The fund invests the rest of its assets in Putnam Short Term Investment Fund, a Putnam mutual fund that invests mainly in short duration, investment-grade money market and other fixed income securities.

The following table presents your fund’s approximate allocations to each asset class (through its investments in underlying funds) as of December 30, 2025, which are not expected to change over time.

Asset class	
Equity*	**25.4%**
Fixed Income*	**74.6%**

* Equity and fixed income allocations are hypothetical estimates based on Putnam Multi-Asset Income Fund's current strategic allocation to equity and fixed income investments as set forth under "*What are the funds' and each underlying fund's main investment strategies and related risks?*", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The managers of Putnam Multi-Asset Income Fund may adjust the fund's allocations among asset classes from time to time consistent with its investment goals, and, consequently, actual allocations will vary.

The fund's target allocations may differ from the allocations shown in the table. The Investment Manager may change the fund's target allocations, and the underlying fund(s) in which it invests, at any time, although the Investment Manager generally expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable. It is assumed investors will make gradual withdrawals from the fund. The managers of Putnam Multi-Asset Income Fund will rebalance that fund's investments towards its target allocations on a quarterly basis. More information about Putnam Multi-Asset Income Fund and Putnam Short Term Investment Fund is included under "*What are the funds' and each underlying fund's main investment strategies and related risks*?"

Information about each underlying fund's investment strategy

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Multi-Asset Income Fund invests mainly in fixed income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations, and securitized debt instruments of any credit quality, such as mortgage-backed investments. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign (including emerging market) companies of any size.

In evaluating equity investments, each fund's investment manager may consider factors such as a company's valuation, financial strength, growth potential, competitive position within its industry, projected future earnings, cash flows, and dividends. For fixed income investments, each fund's investment manager may consider credit, interest rate, and prepayment risks, as well as general market conditions. Each fund's investment manager may also select other investments that do not fall within these asset classes.

For a further discussion of each fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Short Term Investment Fund invests in a diversified portfolio of fixed income securities with a focus on short duration, investment-grade money market and other fixed income instruments.

Under normal circumstances, the effective duration of Short Term Investment Fund's portfolio will generally not exceed one year, which helps limit the fund's sensitivity to changes in interest rates. Short Term Investment Fund will maintain a dollar-weighted average portfolio maturity of three years or less.

In evaluating investments, Short Term Investment Fund's investment manager may consider factors such as credit risk, interest rate risk, prepayment risk, and general market conditions when deciding whether to buy or sell securities.

For a further discussion of Short Term Investment Fund's investment strategy, please turn to the section *What are the funds' and each underlying fund's main investment strategies and related risks?* beginning on page 118.

Risks

The principal risks of investing in the fund are summarized below. The relative significance of these risks will vary over time based on the fund's target allocations to the underlying funds and to equity and fixed-income asset classes, which may change from time to time as discussed above. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every risk described below applies to each underlying fund.

It is important to understand that you can lose money by investing in the fund.

There is no guarantee that the fund will provide adequate income at and through an investor's retirement.

Allocation risk: The fund's allocation of assets among asset classes and the underlying funds may hurt performance.

An underlying fund may change its investment program or policies without the fund's approval, which could require the fund to reduce or eliminate its allocation to the underlying fund at an unfavorable time.

Substantial shareholder risk: Certain accounts or affiliates of the Investment Manager, including other funds advised by the Investment Manager or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the fund's shares, including through seed capital arrangements. Such shareholders may at times be considered to control the fund. Dispositions of a large number of shares by these shareholders may adversely affect the fund's liquidity and net assets. These redemptions may also force the fund to sell securities, which may increase the fund's brokerage costs.

Market risk: A fund's allocation of assets among asset classes may hurt performance. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general

economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, outbreaks of infectious illnesses or other widespread public health issues, and factors related to a specific issuer, asset class, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings, may negatively impact the fund's performance, and may exacerbate other risks to which the fund is subject.

Common stock risk: Common stock represents an ownership interest in a company. The value of a company's stock may fall or fail to rise as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs.

Growth investing risk: Growth stocks may be more susceptible to earnings disappointments, and the market may not favor growth-style investing.

Value investing risk: Value stocks may fail to rebound, and the market may not favor value-style investing. Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor.

*Small and midsize companies ris*k: Stocks of small and midsize companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of these companies may therefore be more vulnerable to adverse developments than those of larger companies.

Fixed income investments risk: The risks associated with fixed income investments include interest rate risk, which is the risk that the value of the fund's investments is likely to fall if interest rates rise. Fixed income investments are also subject to credit risk, which is the risk that issuers of the fund's investments may default on payment of interest or principal. Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress. Default risk is generally higher for non-qualified mortgages. Interest rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds (sometimes referred to as "junk bonds"), which can be more sensitive to changes in markets, credit conditions, and interest rates, and may be considered speculative. Mortgage-backed investments, unlike traditional debt investments, are also subject to prepayment risk, which means that they may increase in value less than other bonds when interest rates decline and decline in value more than other bonds when interest rates rise. The fund may have to invest the proceeds from prepaid investments, including mortgage-backed investments, in other investments with less attractive terms and yields. The fund's investments in mortgage-backed securities, and in certain other securities and derivatives, may be or become illiquid.

Foreign investments risk: The value of international investments traded in foreign currencies may be adversely impacted by fluctuations in exchange rates. International investments, particularly investments in emerging markets, may carry risks associated with potentially less stable economies or governments (such as the risk of seizure by a foreign government, the imposition of economic sanctions or currency or other restrictions, or high levels of inflation), and may be or become illiquid.

Derivatives risk: The fund may have exposure to derivatives such as futures, options, swap contracts, and certain foreign currency transactions and warrants, for both hedging and investment purposes. An underlying fund's use of derivatives may increase the risks of investing in the underlying fund by increasing investment exposure (which may be considered leverage) or, in the case of many over-the-counter instruments, because of the potential inability to terminate or sell derivative positions and the potential failure of the other party to the instrument to meet its obligations. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. The value of derivatives may move in unexpected ways due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact the underlying fund's returns, obligations and exposures. Derivatives are also subject to other risks, including liquidity risk (e.g., liquidity demands arising from the requirement to make payments to a derivative counterparty), operational risk (e.g., settlement issues or system failures) and legal risk (e.g., insufficient legal documentation or contract enforceability issues).

Management and operational risk: There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. If the quantitative models or data that are used in managing the underlying fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and the fund may realize losses. The Investment Manager, or the fund's other service providers, may experience disruptions or operating errors that could negatively impact the fund.

The fund may not achieve its goal, and it is not intended to be a complete investment program. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Investor Profile

The fund is designed for investors in or near retirement or otherwise seeking an investment for use with a periodic withdrawal program. Investors are encouraged to seek the assistance of a financial advisor in developing a periodic withdrawal program that is appropriate to their personal investment goals and financial circumstances. The fund also serves as the fund into which

each of the Putnam Retirement Advantage Funds will be merged before the end of the target date year of the Putnam Retirement Advantage Fund. The fund makes no representations regarding its suitability for any particular investor or periodic withdrawal program. Investors should understand that pursuing higher returns may involve higher volatility and that a fund's performance results may not be sustainable.

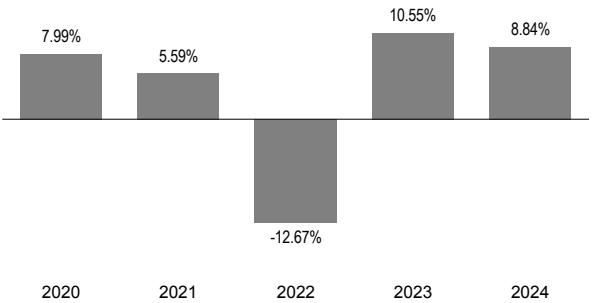

Performance

The accompanying bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the fund's performance from year to year for Class A shares. The table shows the average annual total returns of each class of the fund that has been in operation for at least one full calendar year and also compares the fund's performance with the average annual total returns of a broad measure of market performance, an additional index with characteristics relevant to the fund and the S&P Target Date To Retirement Income Index, an additional index designed to represent a small, style-specific derived consensus of asset class exposure and glide path for a specified list of target retirement dates. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The fund makes updated performance information, including its current net asset value per share, available at www.franklintempleton.com.

The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future.

Sales charges are not reflected in the accompanying bar chart, and if those charges were included, returns would be less than those shown.

Annual total returns for class A shares before sales charges

Best Quarter:	Q4 2023	7.88%
Worst Quarter:	Q2 2022	-8.29%

As of September 30, 2025, the fund's year-to-date return was 8.21%.

Average annual total returns after sales charges
(for periods ended 12/31/24)

Share class	1 year	5 years	Since Inception
Class A before taxes*	4.49%	2.84%	2.84%[1]
Class A after taxes on distributions*	2.83%	1.80%	1.80%[1]
Class A after taxes on distributions and sale of fund shares*	2.74%	1.78%	1.78%[1]
Class C before taxes*	6.97%	2.91%	2.91%[1]
Class R before taxes*	8.41%	3.26%	3.26%[1]
Class R3 before taxes*	8.64%	3.51%	3.51%[1]
Class R4 before taxes*	8.92%	3.75%	3.75%[1]
Class R5 before taxes*	9.05%	3.91%	3.91%[1]
Class R6 before taxes	9.15%	4.03%	4.03%[1]
Class Y before taxes*	9.05%	3.91%	3.91%[1]
Bloomberg U.S. Aggregate Index (no deduction for fees, expenses or taxes)	1.25%	-0.33%	-0.33%[1]
Russell 3000 Index (no deduction for fees, expenses or taxes)	23.81%	13.86%	13.86%[1]
S&P Target Date To Retirement Income Index (no deduction for fees, expenses or taxes)	6.00%	3.68%	3.68%[1]

1. Since inception December 31, 2019.

* Performance for classes A, C, R, R3, R4, R5, and Y shares prior to their inception (9/1/20) is derived from the historical performance of class R6 shares, adjusted for the higher operating expenses and, for class A and C shares, higher sales charges (in the case of after sales-charge returns) applicable to such classes.

After-tax returns reflect the historical highest individual federal marginal income tax rates and do not reflect state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are shown for class A shares only and will vary for other classes. These after-tax returns do not apply if you hold your fund shares through a 401(k) plan, an IRA, or another tax-advantaged arrangement.

Important Additional Information About All Funds

Purchase and sale of fund shares

You can open an account, purchase and/or sell fund shares, or exchange them for shares of another Putnam fund by contacting your financial professional or by calling Putnam Investor Services at 1-800-225-1581.

When opening an account, you must complete and mail a Putnam account application, along with a check made payable to the fund, to: Putnam Investor Services, P.O. Box 219697, Kansas City, MO 64121-9697. The minimum initial investment of $500 is currently waived, although the fund reserves the right to reject initial investments under $500 at its discretion. There is no minimum for subsequent investments.

You can sell your shares back to the fund or exchange them for shares of another Putnam fund any day the New York Stock Exchange (“NYSE”) is open. Shares may be sold or exchanged by mail, by phone, or, for exchanges only, online at www.franklintempleton.com. Some restrictions may apply.

Tax information

The fund’s distributions will be taxed as ordinary income or capital gains unless you hold the shares through a tax-advantaged arrangement, in which case you will generally be taxed only upon withdrawal of monies from the arrangement.

Financial intermediary compensation

If you purchase the fund through a broker/dealer or other financial intermediary (such as a bank or financial professional), the fund and its related companies may pay that intermediary for the sale of fund shares and related services. Please bear in mind that these payments may create a conflict of interest by

influencing the broker/dealer or other intermediary to recommend the fund over another investment. Ask your advisor or visit your advisor's website for more information.

What are the funds' and each underlying fund's main investment strategies and related risks?

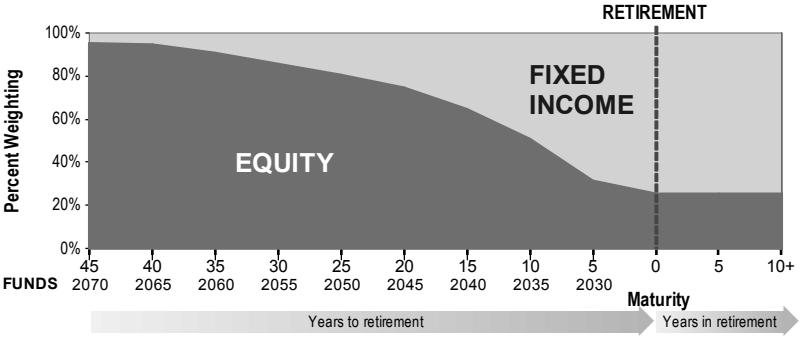

This section contains greater detail on each fund's and each underlying fund's main investment strategies and the related risks you would face as a fund shareholder. It is important to keep in mind that risk and reward generally go hand in hand; the higher the potential reward, the greater the risk.

In deciding whether a Putnam Retirement Advantage Fund is right for you, you may wish to consider a number of factors in addition to the fund's target date, including your age, how your fund investment will fit into your overall investment program, and whether you are looking for a more aggressive or more conservative allocation.

References to the fund hereafter include each fund unless otherwise stated.

As mentioned in the fund summaries above, the fund pursues its goal by allocating its assets among underlying funds. In selecting underlying funds, the Investment Manager expects to select among affiliated mutual funds and does not expect to consider unaffiliated funds as underlying funds. For each fund other than Maturity Fund, target allocations among asset classes and underlying funds will increasingly emphasize capital preservation and income over time and will change gradually based on the number of remaining years until the fund's target date, as shown in the following predetermined "glide path" below. The Investment Manager adjusts the fund's allocations at the end of each calendar quarter based on the glide path. Over a five-year period, each of the fund's allocations will gradually change to resemble the allocations of the fund with the next earliest target date.

For Maturity Fund, target allocations among asset classes and underlying funds are not expected to change over time. The Investment Manager rebalances Maturity Fund's investments towards its target allocations on a quarterly basis. The Investment Manager may change the glide path, the fund's target allocations, and the underlying funds in which it invests at any time, although the Investment Manager expects these changes to be infrequent and generally in response to longer-term structural changes (i.e., in the average retirement age or life expectancy) that lead the fund's portfolio managers to determine that a change is advisable.

Equity and fixed-income allocations are hypothetical estimates based on each Putnam Dynamic Asset Allocation Fund's and Putnam Multi-Asset Income Fund's current strategic allocations to equity and fixed income investments as set forth under "What are the funds' and each underlying funds' main investment strategies and related risks?", and an assumption that Putnam Short Term Investment Fund is equivalent to a fixed income investment. The investment managers of the underlying funds may adjust those funds' allocations among asset classes from time to time consistent with their investment goals, and consequently, actual allocations will vary. Because of rounding in the calculation of allocations among underlying funds and of asset class weightings, actual allocations may be more or less than these percentages.

References to specific investments refer to investments made by the underlying funds.

Putnam Dynamic Asset Allocation Equity Fund ("Equity Fund")

Goal

The fund seeks long-term growth.

The fund invests mainly in common stocks (growth or value stocks or both) of large and midsize companies worldwide. Under normal circumstances, the fund invests at least 80% of the fund's net assets in common stocks. This policy may be changed only after 60 days' notice to shareholders.

The fund's investment manager may consider, among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash flows and dividends when deciding whether to buy or sell investments. The fund's investment manager may also consider other factors that they believe will cause the stock price to rise. While the investment manager of the fund typically allocates approximately 75% of the fund's assets to investments in U.S. companies, and 25% of the fund's assets to investments in international companies, these allocations may vary. The fund invests mainly in developed countries, but may invest in emerging markets. The fund may also use derivatives, such as certain foreign currency transactions, futures, options, warrants and swap contracts,

for both hedging and non-hedging purposes. For example, the fund typically uses foreign currency forward contracts in connection with the fund's investments in foreign securities in order to hedge the fund's currency exposure relative to the fund's benchmark index.

Putnam Dynamic Asset Allocation Growth Fund ("Growth Fund")

Putnam Dynamic Asset Allocation Balanced Fund ("Balanced Fund")

Putnam Dynamic Asset Allocation Conservative Fund ("Conservative Fund")

Putnam Multi-Asset Income Fund ("Multi-Asset Income Fund")

Goals

Growth Fund seeks capital appreciation.

Balanced Fund seeks total return. Total return is composed of capital appreciation and income.

Conservative Fund seeks total return consistent with preservation of capital. Total return is composed of capital appreciation and income.

Multi-Asset Income Fund seeks total return consistent with conservation of capital. Within Multi-Asset Income Fund's total return orientation, the fund seeks to provide current income, along with long-term capital appreciation.

Investments

Each fund has a unique strategic, or typical, allocation between equity and fixed income investments. Using qualitative analysis and quantitative models and techniques, the investment managers of the funds adjust portfolio allocations from time to time within a certain range for each fund to try to optimize a fund's performance consistent with its goal. The strategic allocation and the range of allowable allocation for each fund are shown below.

	Growth Fund		Balanced Fund		Conservative Fund		Multi-Asset Income Fund	
Class	Strategic Allocation	Range	Strategic Allocation	Range	Strategic Allocation	Range	Strategic Allocation	Range
Equity	80%	65–95%	60%	45–75%	30%	15–45%	27%	5–50%
Fixed Income	20%	5–35%	40%	25–55%	70%	55–85%	73%	50–95%

Growth Fund invests mainly in equity securities (growth or value stocks or both) of both U.S. and foreign companies of any size. Growth Fund also invests, to a lesser extent, in fixed-income investments, including U.S. and foreign government obligations, corporate obligations and securitized debt instruments (such as mortgage-backed investments). Growth Fund may invest up to 40% of its total assets (but not more than its maximum fixed-income allocation range) in higher-yield, higher-risk debt investments that are rated

below BBB or its equivalent at the time of purchase by each nationally recognized securities rating agency, or that are unrated investments that the managers of the funds believe are of comparable quality. Growth Fund may invest up to 5% of its total assets in debt investments rated below CCC or its equivalent, at the time of purchase, by each rating agency rating such investments and in unrated investments that the managers of the fund believe are of comparable quality. Growth Fund will not necessarily sell an investment if its rating is reduced (or increased) after purchase.

Balanced Fund invests mainly in equity securities (growth or value stocks or both) of both U.S. and foreign companies of any size. Balanced Fund also invests in fixed-income investments, including U.S. and foreign government obligations, corporate obligations and securitized debt instruments (such as mortgage-backed investments). Balanced Fund may invest up to 40% of its total assets (but not more than its maximum fixed-income allocation range) in higher-yield, higher-risk debt investments that are rated below BBB or its equivalent at the time of purchase by each nationally recognized securities rating agency, or that are unrated investments that the managers of the funds believe are of comparable quality. Balanced Fund may invest up to 5% of its total assets in debt investments rated below CCC or its equivalent, at the time of purchase, by each rating agency rating such investments and in unrated investments that the managers of the fund believe are of comparable quality. Balanced Fund will not necessarily sell an investment if its rating is reduced (or increased) after purchase.

Conservative Fund invests mainly in fixed-income investments, including U.S. and foreign government obligations, corporate obligations and securitized debt instruments (such as mortgage-backed investments). Conservative Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both) of U.S. and foreign companies of any size. Conservative Fund may invest up to 40% of its total assets (but not more than its maximum fixed-income allocation range) in higher-yield, higher-risk debt investments that are rated below BBB or its equivalent at the time of purchase by each nationally recognized securities rating agency, or that are unrated investments that the managers of the funds believe are of comparable quality. However, using the same criteria, the managers of Conservative Fund currently do not intend to invest more than 20% of Conservative Fund's total assets in debt investments rated lower than BB or its equivalent. Conservative Fund may invest up to 5% of its total assets in debt investments rated below CCC or its equivalent, at the time of purchase, by each rating agency rating such investments and in unrated investments that the managers of the fund believe are of comparable quality. Conservative Fund will not necessarily sell an investment if its rating is reduced (or increased) after purchase.

Multi-Asset Income Fund invests mainly in fixed-income investments, including U.S. and foreign (including emerging market) government obligations, corporate obligations and securitized debt instruments (such as mortgage-backed investments) of any credit quality. Multi-Asset Income Fund also invests, to a lesser extent, in equity securities (growth or value stocks or both)

of U.S. and foreign (including emerging market) companies of any size. Multi-Asset Income Fund may invest without limit (up to its maximum fixed-income allocation range) in higher-yield, higher-risk debt investments that are rated below BBB or its equivalent at the time of purchase by each nationally recognized securities rating agency, or that are unrated investments that the managers of the fund believe are of comparable quality.

Each fund may consider, among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash flows and dividends when deciding whether to buy or sell equity investments. Each fund may consider, among other factors, credit, interest rate and prepayment risks, as well as general market conditions, when deciding whether to buy or sell fixed-income investments. Each fund may also select other investments that do not fall within these asset classes.

Each fund typically uses derivatives to a significant extent, such as futures, options, certain foreign currency transactions, warrants and swap contracts, for both hedging and non-hedging purposes. Multi-Asset Income Fund may also use derivative and debt instruments with terms determined by reference to a particular commodity or to all or portions of a commodities index.

Putnam Short Term Investment Fund ("Short Term Investment Fund")

Goal

The fund seeks as high a rate of current income as the fund's investment manager believes is consistent with preservation of capital and maintenance of liquidity.

Investments

The fund invests in a diversified portfolio of fixed income securities comprised of short duration, investment-grade money market and other fixed income securities. The fund's investments may include obligations of the U.S. government, its agencies and instrumentalities, which are backed by the full faith and credit of the United States (e.g., U.S. Treasury bonds and Ginnie Mae mortgage-backed bonds) or by only the credit of a federal agency or government-sponsored entity (e.g., Fannie Mae or Freddie Mac mortgage-backed bonds), domestic corporate debt obligations, municipal debt securities, securitized debt instruments (such as mortgage- and asset-backed securities), repurchase agreements, certificates of deposit, bankers acceptances, commercial paper (including asset-backed commercial paper), time deposits, Yankee Eurodollar securities and other money market instruments. The fund may also invest in U.S. dollar-denominated foreign securities of these types. Under normal circumstances, the effective duration of the fund's portfolio will generally not be greater than one year. Effective duration provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates. The fund will maintain a dollar-weighted average portfolio maturity of three years or less.

The fund invests in investment-grade investments. These are rated at least BBB or its equivalent at the time of purchase by a nationally recognized securities rating agency, or are unrated investments the managers of the fund believe are of comparable quality. The fund will not necessarily sell an investment if its rating is reduced after the fund buys it. This means the fund may at times hold securities rated below-investment-grade (sometimes referred to as “junk bonds”) if the rating for a security held by the fund is reduced to below-investment-grade.

The fund may consider, among other factors, credit, interest rate and prepayment risks, as well as general market conditions, when deciding whether to buy or sell investments. The fund may also use derivatives, such as futures, options and swap contracts, for both hedging and non-hedging purposes, although they do not represent a primary focus of the fund.

Additional information about investment strategies and related risks of the underlying funds

This section provides additional information on the investment strategies and related risks of the fund generally. Unless otherwise noted, the risks summarized below include both direct and indirect risks, and references to the fund include the risks of investing through one or more underlying funds. Additionally, unless otherwise noted, references to the Investment Manager include, as applicable, the investment manager of any underlying fund through which the fund gains exposure to a particular investment strategy or related risk. Not every investment strategy or related risk below applies to each underlying fund.

Investment Strategy-Related Risks of the Underlying Funds

EQUITY INVESTMENTS

Common stock risk: Common stock represents an ownership interest in a company. The value of a company’s stock may fall as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company’s products or services. A stock’s value may also fall because of factors affecting not just the company, but also other companies in the same industry or in a number of different industries, such as increases in production costs. From time to time, the fund may invest a significant portion of its assets in companies in one or more related industries or sectors, which would make the fund more vulnerable to adverse developments affecting those industries or sectors.

The value of a company’s stock may also be affected by changes in financial markets that are relatively unrelated to the company or its industry, such as changes in interest rates, currency exchange rates, or inflation rates. In

addition, a company's stock generally pays dividends only after the company invests in its own business and makes required payments to holders of its bonds and other debt. For this reason, the value of a company's stock will usually react more strongly than its bonds and other debt to actual or perceived changes in the company's financial condition or prospects.

Growth stocks**:** Stocks of companies the Investment Manager believes are fast-growing may trade at a higher multiple of current earnings than other stocks. The values of these stocks may be more sensitive to changes in current or expected earnings or to heightened levels of inflation than the values of other stocks. If the Investment Manager's assessment of the prospects for a company's earnings growth is wrong, or if its judgment of how other investors will value the company's earnings growth is wrong, then the price of the company's stock may fall or may not approach the value that the Investment Manager has placed on it. In addition, growth stocks, at times, may not perform as well as value stocks or the stock market in general, and may be out of favor with investors for varying periods of time.

Value stocks: Companies whose stocks the Investment Manager believes are undervalued by the market may have experienced adverse business developments or may be subject to special risks that have caused their stocks to be out of favor. If the Investment Manager's assessment of a company's prospects is wrong, or if other investors do not similarly recognize the value of the company, then the price of the company's stock may fall or may not approach the value that the Investment Manager has placed on it. In addition, value stocks, at times, may not perform as well as growth stocks or the stock market in general, and may be out of favor with investors for varying periods of time.

Small and midsize companies risk: These companies, many of which may have a market capitalization of less than $5 billion, are more likely than larger companies to have limited product lines, markets or financial resources, lack profitability or depend on a small management group. Stocks of these companies often trade in smaller volumes, and their prices may fluctuate more than stocks of larger companies. Stocks of small and midsize companies may therefore be more vulnerable to adverse developments than those of larger companies. In addition, stocks of small and midsize companies, at times, may not perform as well as stocks of larger companies or the stock market in general, and may be out of favor with investors for varying periods of time. Small companies in foreign countries could be relatively smaller than those in the United States.

FIXED INCOME INVESTMENTS

Interest rate risk: The values of bonds, money market securities and other debt instruments usually rise and fall in response to changes in interest rates. Interest rates can change in response to the supply and demand for credit, government and/or central bank monetary policy and action, inflation rates, and other factors. Declining interest rates generally result in an increase in the value of existing debt instruments, and rising interest rates generally result in a

decrease in the value of existing debt instruments. Changes in a debt instrument's value usually will not affect the amount of interest income paid to the fund, but will affect the value of the fund's shares. Interest rate risk is generally greater for investments with longer maturities.

Some investments give the issuer the option to call or redeem an investment before its maturity date. If an issuer calls or redeems an investment during a time of declining interest rates, the proceeds may need to be reinvested in an investment offering a lower yield, and, therefore, the fund might not benefit from any increase in value as a result of declining interest rates.

Some investments to which the fund may be exposed have an interest rate that changes based on a market interest rate and/or allow the holder to demand payment of principal and accrued interest before the scheduled maturity date. The maturity of these obligations is measured using the relatively short period until the interest rate resets and/or payment could be demanded. Because the interest rate on these investments can change, these investments are unlikely to be able to lock in favorable longer-term interest rates

Credit risk: Investors normally expect to be compensated in proportion to the risk they are assuming. Thus, debt of issuers with poor credit prospects usually offers higher yields than debt of issuers with more secure credit. Higher-rated investments generally have lower credit risk.

Investments rated below BBB or its equivalent are below-investment-grade in quality (sometimes referred to as "junk bonds") and may be considered speculative. This rating reflects a greater possibility that the issuers may be unable to make timely payments of interest and principal and thus default. If default occurs, or is perceived as likely to occur, the value of the investment will usually be more volatile and is likely to fall. The value of a debt instrument may also be affected by changes in, or perceptions of, the financial condition of the issuer, borrower, counterparty, or other entity, or underlying collateral or assets, or changes in, or perceptions of, specific or general market, economic, industry, political, regulatory, geopolitical, environmental, public health, and other conditions. A default or expected default could also make it difficult for the fund to sell the investment at a price approximating the value the managers of the fund had previously placed on it. Lower-rated debt usually has a more limited market than higher-rated debt, which may at times make it difficult for the fund to buy or sell certain debt instruments or to establish their fair value. Credit risk is generally greater for zero coupon bonds and other investments that are issued at less than their face value and that are required to make interest payments only at maturity rather than at intervals during the life of the investment.

Credit ratings are based largely on the issuer's historical financial condition and the rating organizations' investment analysis at the time of rating. The rating assigned to any particular investment does not necessarily reflect the issuer's current financial condition, and does not reflect an assessment of the investment's volatility or liquidity. Although credit ratings are considered when making investment decisions, the Investment Manager performs its own

investment analysis and does not rely only on ratings assigned by the rating organizations. The success in achieving the fund's goal may depend more on the Investment Manager's credit analysis when buying lower-rated debt than when buying investment-grade debt.The fund may have to participate in legal proceedings involving the issuer. This could increase the fund's operating expenses and decrease its net asset value.

Although investment-grade investments generally have lower credit risk, they may share some of the risks of lower-rated investments. U.S. government investments generally have the least credit risk, but are not completely free of credit risk. While some investments, such as U.S. Treasury obligations and Ginnie Mae certificates, are backed by the full faith and credit of the U.S. government, others are backed only by the credit of the issuer. Mortgage-backed securities may be subject to the risk that underlying borrowers will be unable to meet their obligations.

Fixed income investments may be more susceptible to downgrades or defaults during economic downturns or other periods of economic stress, which can significantly strain the financial resources of debt issuers, including the issuers of the fixed income securities in which the fund invests (or has exposure to). This may make it less likely that those issuers can meet their financial obligations when due and may adversely impact the value of their fixed income securities, which could negatively impact the performance of the fund. It is difficult to predict the level of financial stress and duration of such stress issuers may experience.

Prepayment risk: Traditional debt investments typically pay a fixed rate of interest until maturity, when the entire principal amount is due. In contrast, payments on securitized debt instruments, including mortgage-backed and asset-backed investments, typically include both interest and partial payment of principal. Principal may also be prepaid voluntarily, or as a result of refinancing or foreclosure. The fund may have to invest the proceeds from prepaid investments in other investments with less attractive terms and yields.

Compared to debt that cannot be prepaid, mortgage-backed investments are less likely to increase in value during periods of declining interest rates and have a higher risk of decline in value during periods of rising interest rates. These investments may increase the volatility of the fund. Some mortgage-backed investments receive only the interest portion or the principal portion of payments on the underlying mortgages. The yields and values of these investments are extremely sensitive to changes in interest rates and in the rate of principal payments on the underlying mortgages. The market for these investments may be volatile and limited, which may make them difficult to buy or sell. Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as motor vehicle installment sales or installment loan contracts, leases of various types of real and personal property and receivables from credit card agreements. Asset-backed securities are subject to risks similar to those of mortgage-backed securities.

Foreign investments risk: Foreign investments involve certain special risks, including:

- Unfavorable changes in currency exchange rates: Foreign investments are typically issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the U.S. dollar.
- Political and economic developments: Foreign investments may be subject to the risks of seizure by a foreign government, direct or indirect impact of sovereign debt default, imposition of economic sanctions, tariffs, trade restrictions, currency restrictions or similar actions (or retaliatory measures taken in response to such actions), and tax increases.
- Unreliable or untimely information: There may be less information publicly available about a foreign company than about most publicly-traded U.S. companies, and foreign companies are usually not subject to accounting, auditing and financial reporting standards and practices as stringent as those in the United States. As a result, the Investment Manager's ability to evaluate a foreign company may be more limited than its ability to evaluate a U.S. company. Foreign securities may trade on markets that are closed when U.S. markets are open. As a result, accurate pricing information based on foreign market prices may not always be available.
- Limited legal recourse: Legal remedies for investors may be more limited than the remedies available in the United States.
- Limited markets: Certain foreign investments may be less liquid (harder to buy and sell) and more volatile than most U.S. investments, which means the fund may at times be unable to sell these foreign investments at desirable prices. In addition, there may be limited or no markets for bonds of issuers that become distressed. For the same reason, the Investment Manager may at times find it difficult to value the fund's foreign investments.
- Trading practices: Brokerage commissions and other fees are generally higher for foreign investments than for U.S. investments. The procedures and rules governing foreign transactions and custody may also involve delays in payment, delivery or recovery of money or investments.
- Sovereign issuers: The willingness and ability of sovereign issuers to pay principal and interest on government securities depends on various economic factors, including the issuer's balance of payments, overall debt level, and cash flow from tax or other revenues. In addition, there may be no legal recourse for investors in the event of default by a sovereign government.

The risks of foreign investments are typically increased in countries with less developed markets, which are sometimes referred to as emerging markets. Emerging markets may have less developed economies and legal and regulatory systems, and may be susceptible to greater political and economic

instability than developed foreign markets. Countries with emerging markets are also more likely to experience high levels of inflation or currency devaluation, and investments in emerging markets may be more volatile and less liquid than investments in developed markets. For these and other reasons, investments in emerging markets are often considered speculative.

Certain risks related to foreign investments may also apply to some extent to U.S.-traded investments that are denominated in foreign currencies, investments in U.S. companies or issuers that are traded in foreign markets or investments in U.S. companies or issuers that have significant foreign operations.

Derivatives risk: Through investments in underlying funds, the fund may have exposure to a variety of transactions involving derivatives, such as certain foreign currency transactions, futures, options, warrants and swap contracts, including interest rate swaps and total return swaps. Derivatives are financial instruments whose value depends upon, or is derived from, the value of something else, such as one or more underlying investments, pools of investments, indexes or currencies. An underlying fund may make use of "short" derivative positions, the values of which typically move in the opposite direction from the price of the underlying investment, pool of investments, index or currency. An underlying fund may use derivatives both for hedging and non-hedging purposes. For example, to the extent consistent with its investment strategy, an underlying fund may use derivatives to increase or decrease its exposure to long or short-term interest rates (in the United States or abroad), to specific sectors, industries or securities, or to a particular currency or group of currencies or to hedge against prepayment risk. In addition, an underlying fund may also use derivatives as a substitute for a direct investment in the securities of one or more issuers. However, an underlying fund's manager may also choose not to use derivatives based on the manager's evaluation of market conditions or the availability of suitable derivatives. Investments in derivatives may be applied toward meeting a requirement to invest in a particular kind of investment if the derivatives have economic characteristics similar to that investment. An underlying fund's investment in derivatives may be limited by its intention to qualify as a regulated investment company. In addition, where relevant, derivatives positions that offset each other may be netted together for purposes of the underlying fund's policy on strategic allocation between equity and fixed-income investments.

Derivatives involve special risks and may result in losses. The successful use of derivatives depends on an underlying fund's manager's ability to manage these sophisticated instruments. Some derivatives are "leveraged," which means they provide the underlying fund with investment exposure greater than the value of the underlying fund's investment in the derivatives. As a result, these derivatives may magnify or otherwise increase investment losses to the underlying fund. The risk of loss from certain short derivative positions is theoretically unlimited. The value of derivatives may move in unexpected ways

due to unanticipated market movements, the use of leverage, imperfect correlation between the derivative instrument and the reference asset, or other factors, especially in unusual market conditions, and volatility in the value of derivatives could adversely impact an underlying fund's returns, obligations and exposures.

Other risks arise from the potential inability to terminate or sell derivative positions. Derivatives may be subject to liquidity risk due to the underlying fund's obligation to make payments of margin, collateral, or settlement payments to counterparties. A liquid secondary market may not always exist for the underlying fund's derivative positions. In fact, certain over-the-counter instruments (investments not traded on an exchange) may not be liquid. Over-the-counter instruments also involve the risk that the other party to the derivative transaction may not be willing or able to meet its obligations with respect to the derivative transaction. The risk of a party failing to meet its obligations may increase if the underlying fund has significant exposure to that counterparty. Derivative transactions may also be subject to operational risk, including due to documentation and settlement issues, system failures, inadequate controls and human error, and legal risk due to insufficient documentation, insufficient capacity or authority of a counterparty, or issues with respect to the legality or enforceability of the derivative contract. For further information about additional types and risks of derivatives, see *Miscellaneous Investments, Investment Practices and Risks* in the SAI.

Additional risks

Market risk: The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions; investor sentiment and market perceptions (including perceptions about monetary policy, interest rates, inflation or the risk of default); government actions (including protectionist measures, intervention in the financial markets or other regulation, and changes in fiscal, monetary or tax policies); geopolitical events or changes (including natural disasters, terrorism and war); outbreaks of infectious illnesses or other widespread public health issues (including epidemics and pandemics); and factors related to a specific issuer, asset class, geography, industry, or sector. Foreign financial markets have their own market risks, and they may be more or less volatile than U.S. markets and may move in different directions. During a general downturn in financial markets, multiple asset classes may decline in value simultaneously. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. During those periods, the fund may experience high levels of shareholder redemptions, and may have to sell securities at times when it would otherwise not do so, and at unfavorable prices. These risks may be exacerbated during economic downturns or other periods of economic stress.

The COVID-19 pandemic and efforts to contain its spread have resulted in, among other effects, significant market volatility, exchange trading suspensions and closures, declines in global financial markets, higher default rates, significant changes in fiscal and monetary policies, and economic

downturns and recessions. The effects of the COVID-19 pandemic have negatively affected, and may continue to negatively affect, the global economy, the economies of the United States and other individual countries, the financial performance of individual issuers, sectors, industries, asset classes, and markets, and the value, volatility, and liquidity of particular securities and other assets. The effects of the COVID-19 pandemic also are likely to exacerbate other risks that apply to the fund, including the risks disclosed in this prospectus, which could negatively impact the fund's performance and lead to losses on your investment in the fund. The duration of the COVID-19 pandemic and its effects cannot be determined with certainty.

The United States and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the United States has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the United States and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The United States government has prohibited U.S. persons from investing in Chinese companies designated as related to the Chinese military. These and possible future restrictions could limit the fund’s opportunities for investment and require the sale of securities at a loss or make them illiquid. Moreover, the Chinese government is involved in a longstanding dispute with Taiwan that has included threats of invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the fund’s assets may go down.

Management and operational risk: The fund is actively managed and its performance will reflect, in part, the Investment Manager’s ability to make investment decisions that seek to achieve the fund’s investment objective. There is no guarantee that the investment techniques, analyses, or judgments that the Investment Manager applies in making investment decisions for the fund will produce the intended outcome or that the investments selected for the fund will perform as well as other securities that were not selected for the fund. As a result, the fund may underperform its benchmark or other funds with a similar investment goal and may realize losses. In addition, the Investment Manager, or the fund’s other service providers, may experience disruptions or operating errors that could negatively impact the fund. Although service providers may have operational risk management policies and procedures and take appropriate precautions to avoid and mitigate risks that could lead to disruptions and operating errors, it may not be possible to identify all of the operational risks that may affect the fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Model and data risk: Given the nature of the fund's investments and strategies, the Investment Manager relies heavily on its proprietary models and on data supplied by third parties. The Investment Manager uses models and data to, among other things, construct sets of transactions and investments, provide risk management insights and assist in hedging the fund's investments. The Investment Manager regularly enhances and updates its models to reflect its developing research, fundamental analysis, and access to new data. If the quantitative models or data used in managing the fund prove to be incorrect or incomplete, investment decisions made in reliance on the models or data may not produce the desired results and may cause the fund to underperform its benchmark or other funds with a similar investment goal, and the fund may realize losses. For example, the Investment Manager may, in reliance on faulty models or data, be unsuccessful in its efforts to manage the fund's overall level of volatility and its efforts to diversify risk. Any hedging based on faulty models and data may prove to be unsuccessful. In addition, models may incorrectly forecast future behavior, leading to potential losses on a cash flow and/or mark-to-market basis. Use of these models in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind) also may result in losses for the fund. All models require data. Some of the models that the Investment Manager may use are typically constructed based on historical data, and the success of these models is dependent largely on the accuracy and reliability of the supplied historical data. If incorrect data is entered into a model, the resulting output will be incorrect. As a result, any investment decisions made in reliance on the incorrect output from a model may not produce the desired results and the fund may realize losses. Even when data is correctly inputted into a model, the resulting information may differ, sometimes substantially, from other available data. For example, "model prices" that are provided by a model will often differ substantially from market prices, particularly for instruments that are complex in nature, such as derivatives. Models also rely on the proper functioning of hardware and technology, which are subject to disruption risk. There is no guarantee that the hardware and technology on which the models rely will be uninterrupted or error free, or that any defects in such hardware or technology will be able to be corrected in a short time period.

Liquidity and illiquid investments risk: The fund may invest up to 15% of its net assets in illiquid investments, which may be considered speculative and which may be difficult to sell. The sale of many of these investments is prohibited or limited by law or contract. Some investments may be difficult to value for purposes of determining the fund's net asset value. Certain other investments may not have an active trading market due to adverse market, economic, industry, political, regulatory, geopolitical, environmental, public health, and other conditions, including investors trying to sell large quantities of a particular investment or type of investment, or lack of market makers or other buyers for a particular investment or type of investment. The fund may not be able to sell its illiquid investments when the Investment Manager considers it desirable to do so, or the fund may be able to sell them only at less than their value.

Large shareholder transaction risk: The fund and each underlying fund (each, for purposes of this section, a “fund”) is subject to the risk that shareholders will purchase or redeem large quantities of fund shares (such purchases or redemptions, “large shareholder transactions”). Each underlying fund may be an investment option for mutual funds that are managed by the Investment Manager and its affiliates as "funds of funds." Additionally, other investors from time to time may make substantial investments in a fund. Such shareholders may at times be considered to control the fund or underlying fund, as applicable. In addition, a large number of shareholders collectively may purchase or redeem fund shares in large amounts rapidly or unexpectedly. A number of circumstances may cause a fund to experience large shareholder transactions, such as changes in the eligibility criteria for a fund; liquidations, reorganizations, repositionings, or other announced fund events; or changes in investment objectives, strategies, policies, risks, or investment personnel. Large redemptions may be more likely during times of market stress or reduced liquidity, exacerbating the potential impact on a fund.

Large shareholder transactions may adversely affect a fund's liquidity and net assets. These transactions could adversely affect a fund’s performance if a fund is forced to sell portfolio securities to satisfy redemption requests or purchase securities for the portfolio in connection with the investment of subscription proceeds when a fund would otherwise not do so, and at unfavorable prices, which may increase a fund's brokerage costs and accelerate the realization of taxable income and/or gains to shareholders. The effects of taxable income and/or gains resulting from large shareholder transactions would particularly impact non-redeeming shareholders who do not hold their fund shares in an IRA, 401(k) plan or other tax-advantaged plan. To the extent that such transactions result in short-term capital gains, such gains will generally be taxed at the ordinary income tax rate for shareholders who hold fund shares in a taxable account. In addition, fund returns also may be adversely affected if the fund holds a portion of its assets in liquid, cash-like investments in connection with or in anticipation of shareholder redemptions.

Other investments: In addition to the main investment strategies described above, the fund may make other types of investments, such as investments in preferred stocks, convertible securities, bank loans, and hybrid and structured bonds and notes (including debt instruments with terms determined by reference to a particular commodity or to all or portions of a commodities index), real estate investment trusts, hybrid and structured bonds and notes, and preferred securities that would be characterized as debt securities under applicable accounting standards and tax laws. The fund may also invest in cash or cash equivalents, including money market instruments or short-term instruments such as commercial paper, bank obligations (e.g., certificates of deposit and bankers’ acceptances), repurchase agreements, and U.S. Treasury bills or other government obligations. The fund may also from time to time invest all or a portion of its assets, including any cash balances, in money market and/or short-term bond funds advised by the Investment Manager or its affiliates. The percentage of the fund invested in cash and cash equivalents and such money market and short-term bond funds is expected to vary over

time and will depend on various factors, including market conditions, purchase and redemption activity by fund shareholders, and the Investment Manager's assessment of the cash level that is appropriate to allow the fund to pursue investment opportunities as they arise and to meet shareholder redemption requests. Large cash positions may dampen performance and may prevent the fund from achieving its goal. The fund may also loan portfolio securities to earn income. These practices may be subject to other risks, as described under *Miscellaneous Investments, Investment Practices and Risks* in the SAI.

Temporary defensive strategies: In response to adverse market, economic, political or other conditions, the fund may take temporary defensive positions, such as investing some or all of the fund's assets in cash and cash equivalents, that differ from the fund's usual investment strategies. However, the fund may choose not to use these temporary defensive strategies for a variety of reasons, even in very volatile market conditions. If the fund employs these strategies, the fund may miss out on investment opportunities and may not achieve its goal. Additionally, while temporary defensive strategies are mainly designed to limit losses, they may not work as intended.

Changes in policies: The Trustees may change the fund's goal, investment strategies and other policies set forth in this prospectus without shareholder approval, except as otherwise provided in the prospectus or SAI.

Portfolio turnover rate: The fund's portfolio turnover rate measures how frequently the fund buys and sells investments. A portfolio turnover rate of 100%, for example, would mean that the fund sold and replaced securities valued at 100% of the fund's assets within a one-year period. Each of Balanced Fund, Conservative Fund, Growth Fund, and Multi-Asset Income Fund expect to engage in frequent trading, and, from time to time, each other underlying fund may engage in frequent trading. Funds with high turnover may be more likely to realize capital gains that must be distributed to shareholders as taxable income. High turnover may also cause a fund to pay more brokerage commissions and other transaction costs (including imputed transaction costs), which may detract from performance. The fund's portfolio turnover rate and the amount of brokerage commissions it pays and transaction costs it incurs will vary over time based on market conditions.

Portfolio holdings: The SAI includes a description of the fund's policies with respect to the disclosure of its portfolio holdings. For more specific information on the fund's portfolio, you may visit www.franklintempleton.com, where the fund's top 10 holdings and related portfolio information may be viewed monthly beginning on or after 5 business days after the end of each month, and full portfolio holdings may be viewed monthly beginning on or before the 15th calendar day after the end of each month. This information will remain available on the website at least until the fund files a Form N-CSR or publicly available Form N-PORT with the SEC for the period that includes the date of the information, after which such information can be found on the SEC's website at http://www.sec.gov.Dynamic Asset Allocation Equity Fund and Short Term Investment Fund are not currently offered to the general public and do not post portfolio holdings on the Franklin Templeton website.

Who oversees and manages the fund?

The fund's Trustees

As a shareholder of a mutual fund, you have certain rights and protections, including representation by a Board of Trustees. The Board of Trustees oversees the general conduct of the fund's business and represents the interests of fund shareholders. At least 75% of the members of the Board of Trustees are independent, which means they are not officers of the fund or affiliated with the Investment Manager.

The Trustees periodically review the fund's investment performance and the quality of other services such as administration, custody, and investor services. At least annually, the Trustees review the fees paid to the Investment Manager and its affiliates for providing or overseeing these services, as well as the overall level of the fund's operating expenses. In carrying out their responsibilities, the Trustees are assisted by an administrative staff, auditors and legal counsel that are selected by the Trustees and are independent of the Investment Manager and its affiliates.

The fund's investment manager

Franklin Advisers, One Franklin Parkway, San Mateo, CA 94403-1906, is the fund's investment manager, responsible for making investment decisions for the fund and managing the fund's other affairs and business. Franklin Advisers is a wholly-owned subsidiary of Franklin Resources, Inc. ("Resources"). Together, Franklin Advisers and its affiliates manage, as of September 30, 2025, $1.66 trillion in assets, and have been in the investment management business since 1947.

Under an agreement with the Investment Manager, Putnam Management, 100 Federal Street, Boston, MA 02110, serves as the fund's sub-adviser, responsible for providing certain advisory and related services. Putnam Management is an indirect, wholly-owned subsidiary of Resources. The Investment Manager (and not the fund) will pay a monthly fee to Putnam Management based on the costs of Putnam Management in providing these services to the fund, which may include a mark-up determined and revised from time to time in accordance with Franklin Templeton's transfer pricing policy, in line with applicable tax/transfer pricing regulations, but not to exceed 15% over such costs.

The Investment Manager has retained FTIML, Cannon Place, 78 Cannon Street, London, EC4N 6HL, England, to make investment decisions for such fund assets as may be designated from time to time by the Investment

Manager. FTIML is not currently managing any fund assets. If FTIML were to manage any fund assets, the Investment Manager (and not the fund) would pay a monthly sub-management fee to FTIML for its services at the annual rate of 0.25% of the average net asset value of any fund assets managed by FTIML. FTIML is an indirect subsidiary of Resources.

Pursuant to the arrangements described above, investment professionals who are based in foreign jurisdictions may serve as portfolio managers of the fund or provide other investment services, consistent with local regulations.

The fund pays a management fee to the Investment Manager. The fee is calculated and paid monthly based on an annual rate and the fund's average net assets for the month. For Maturity Fund, the annual rate is 0.36%. For each other fund, the annual rate is based on the number of years remaining (determined as of September 30th of each year and applicable through September 30th of the following year) until the date referenced in the fund's name (the "Target Date"), as set forth below:

Fund	Years to Target Date	Annual Rate
2070 Fund	45	0.45%
	44	0.45%
	43	0.45%
	42	0.45%
	41	0.45%

The Investment Manager has contractually agreed to waive fees and/or reimburse expenses of each fund in an amount equal to the fund's acquired fund fees and expenses (i.e., the fees and expenses incurred by the fund as a result of its investments in the underlying funds). In addition the Investment Manager has contractually agreed to waive fees and/or reimburse expenses of each class of shares of each fund in an amount sufficient to result in total annual fund operating expenses for class A, C, R, R3, R4, R5, R6, and Y shares of the fund (exclusive of payments under the fund’s distribution plans, brokerage, interest, taxes, investment-related expenses (including borrowing costs, i.e., short selling and lines of credit costs), acquired fund fees and expenses, and extraordinary expenses) that equal 0.55%, 0.55%, 0.70%, 0.70%, 0.70%, 0.55%, 0.45% and 0.55, respectively, of the fund's average net assets. These obligations may not be modified or discontinued prior to December 31, 2026 for 2070 Fund and December 31, 2028 for each other fund.

A discussion regarding the basis for the Trustees' approval of the fund's investment management contract and subadvisory agreements is available in the fund's report on Form N-CSR for the period ended August 31, 2025.

Portfolio managers. The portfolio managers identified below are jointly and primarily responsible for the day-to-day management of the fund’s portfolio.

Adrian H. Chan, CFA Portfolio Manager of Franklin Advisers
Mr. Chan has been a portfolio manager of the fund since 2021 (all funds except 2070 Fund) and 2025 for 2070 Fund. He joined Franklin Templeton in 2024. Prior to joining Franklin Templeton, Mr. Chan was a portfolio manager for Putnam Management. He joined Putnam Management in 2003.

Brett S. Goldstein, CFA Portfolio Manager of Franklin Advisers
Mr. Goldstein has been a portfolio manager of the fund since 2019 (all funds except 2070 Fund) and 2025 for 2070 Fund. He joined Franklin Templeton in 2024. Prior to joining Franklin Templeton, Mr. Goldstein was a portfolio manager for Putnam Management. He joined Putnam Management in 2010.

Jacqueline H. Kenney, CFA Portfolio Manager of Franklin Advisers
Ms. Kenney has been a portfolio manager of the fund since 2025. She joined Franklin Templeton in 2010.

Thomas A. Nelson, CFA Portfolio Manager of Franklin Advisers
Mr. Nelson has been a portfolio manager of the fund since 2025. He joined Franklin Templeton in 2007.

Jonathan M. Schreiber, CFA Portfolio Manager of Franklin Advisers
Mr. Schreiber has been a portfolio manager of the fund since 2025. He joined Franklin Templeton in 2024. Prior to joining Franklin Templeton, Mr. Schreiber was a Senior Investment Director for Putnam Management. He joined Putnam Management in 2010.

The fund's SAI provides additional information about portfolio manager compensation, other accounts that they manage and their ownership of fund shares.

How does the fund price its shares?

The price of the fund's shares is based on its net asset value, which is in turn based on the net asset value of the underlying funds in which it invests. For a description of the circumstances under which the underlying funds use fair value pricing and the effects of using fair value pricing, please see the underlying funds' prospectuses. The net asset value per share of each class equals the total value of its assets, less its liabilities, divided by the number of its outstanding shares. Shares are only valued as of the scheduled close of regular trading on the NYSE each day the exchange is open.

The fund's most recent net asset value is available at www.franklintempleton.com or by contacting Putnam Investor Services at 1-800-225-1581.

How do I buy fund shares?

Opening an account

You can open a fund account and purchase class A and C shares by contacting your financial representative or Putnam Investor Services at 1-800-225-1581 and obtaining a Putnam account application.

The completed application, along with a check made payable to the fund, must then be returned to Putnam Investor Services at the following address:

Putnam Investor Services
P.O. Box 219697
Kansas City, MO 64121-9697

You can open a fund account with as little as $500. The minimum investment is waived if you make regular investments weekly, semi-monthly or monthly through automatic deductions from your bank checking or savings account. Although Putnam is currently waiving the minimum, it reserves the right to reject initial investments under the minimum at its discretion.

The fund sells its shares at the offering price, which is the net asset value plus any applicable sales charge (class A shares only). Your financial representative or Putnam Investor Services generally must receive your completed buy order before the close of regular trading on the NYSE for your shares to be bought at that day's offering price.

If you participate in an employer-sponsored retirement plan that offers the fund, please consult your employer for information on how to purchase shares of the fund through the plan, including any restrictions or limitations that may apply.

Federal law requires mutual funds to obtain, verify, and record information that identifies investors opening new accounts. Investors must provide their full name, residential or business address, Social Security or tax identification number, and date of birth. Entities, such as trusts, estates, corporations and partnerships must also provide additional identifying documentation. For trusts, the fund must obtain and verify identifying information for each trustee listed in the account registration. For certain legal entities, the fund must also obtain and verify identifying information regarding beneficial owners and/or control persons. The fund is unable to accept new accounts if any required information is not provided. If Putnam Investor Services cannot verify identifying information after opening your account, the fund reserves the right to close your account at the then-current net asset value, which may be more or less than your original investment, net of any applicable sales charges. Putnam Investor Services may share identifying information with third parties for the purpose of verification subject to the terms of Putnam's privacy policy.

Also, the fund may periodically close to new purchases of shares or refuse any order to buy shares if the fund determines that doing so would be in the best interests of the fund and its shareholders.

Purchasing additional shares

Once you have an existing account, you can make additional investments at any time in any amount in the following ways:

- **Through a financial representative.** Your representative will be responsible for furnishing all necessary documents to Putnam Investor Services and may charge you for his or her services.
- **Through Putnam's Systematic Investing Program.** You can make regular investments weekly, semi-monthly or monthly through automatic deductions from your bank checking or savings account.
- **Via the Internet or phone.** If you have an existing Putnam fund account and you have completed and returned an Electronic Investment Authorization Form, you can buy additional shares online at www.franklintempleton.com or by calling Putnam Investor Services at 1-800-225-1581.
- **By mail.** You may also request a book of investment stubs for your account. Complete an investment stub and write a check for the amount you wish to invest, payable to the fund. Return the check and investment stub to Putnam Investor Services.
- **By wire transfer.** You may buy fund shares by bank wire transfer of same-day funds. Please call Putnam Investor Services at 1-800-225-1581 for wiring instructions. Any commercial bank can transfer same-day funds by wire. The fund will normally accept wired funds for investment on the day received if they are received by the fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you for wiring same-day funds. Although the fund's designated bank does not currently charge you for receiving same-day funds, it reserves the right to charge for this service. You cannot buy shares for employer-sponsored retirement plans by wire transfer.

Which class of shares is best for me?

Each share class represents investments in the same portfolio of securities, but each class has its own sales charge and expense structure, as illustrated in the Fund summary - Fees and expenses section, allowing you and your financial representative to choose the class that best suits your investment needs. When you purchase shares of the fund, you must choose a share class. Deciding which share class best suits your situation depends on a number of factors that you should discuss with your financial representative, including:

- How long you expect to hold your investment. Class C shares charge a contingent deferred sales charge ("CDSC") on redemptions in the first year.
- How much you intend to invest. Class A offers sales charge discounts starting at $50,000 ($100,000 for Maturity Fund).
- Total expenses associated with each share class. As shown in the section entitled Fund summary - Fees and expenses, each share class offers a different combination of up-front and ongoing expenses. Generally, the lower the up-front sales charge, the greater the ongoing expenses.

Here is a summary of the differences among the classes of shares

Class A shares

- Initial sales charge of up to 5.75% for each fund other than Maturity Fund and for Maturity Fund, 4.00%
- Lower sales charges available for investments of $50,000 ($100,000 for Maturity Fund) or more
- No deferred sales charge (except that a deferred sales charge of 1.00% may be imposed on certain redemptions of shares bought without an initial sales charge)
- Lower annual expenses, and higher dividends, than class C shares because of lower 12b-1 fees.
- Not available to employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into an agreement with Franklin Distributors, LLC (the “Distributor”) or an affiliate.

Class C shares

- No initial sales charge; your entire investment goes to work immediately
- Deferred sales charge of 1.00% if shares are sold within one year of purchase
- Higher annual expenses, and lower dividends, than class A shares because of higher 12b-1 fees
- Convert automatically to class A shares after eight years, thereby reducing future 12b-1 fees, provided that Putnam Investor Services or the financial intermediary through which a shareholder purchased class C shares has records verifying that the class C shares have been held for at least eight years, and that class A shares are available for purchase by residents in the shareholder’s jurisdiction. In certain cases, records verifying that the class C shares have been held for at least eight years may not be available (for example, participant level share lot aging may not be tracked by group retirement plan recordkeeping platforms through which class C shares of the fund are held in an omnibus account). If such records are unavailable, Putnam Investor Services or the relevant financial intermediary may not effect the conversion or may effect the conversion on a different schedule determined by Putnam Investor Services or the financial intermediary, which may be shorter or longer than eight years. Investors should consult their financial representative for more information about their eligibility for class C share conversion.
- Orders for class C shares of one or more Putnam funds, other than class C shares sold to employer-sponsored retirement plans, will be

refused when the total value of the purchase, plus existing account balances that are eligible to be linked under a right of accumulation for purchases of class A shares (as described below), is $1,000,000 ($500,000 for Maturity Fund) or more. Investors considering cumulative purchases of $1,000,000 ($500,000 for Maturity Fund) or more should consider whether class A shares would be more advantageous and consult their financial representative.

- May be exchanged automatically for class A shares if the shareholder is investing through an account or platform with a financial intermediary, to the extent described in the Appendix, provided that class A shares are available for purchase by residents in the shareholder's jurisdiction.
- Not available to employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into an agreement with the Distributor or an affiliate.

Class R6 shares

- The following investors may purchase class R6 shares:
    - employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into agreements with the Distributor or an affiliate;
    - investors purchasing shares through an asset-based fee program that is sponsored by a registered broker-dealer or other financial institution;
    - investors purchasing shares through a commission-based platform of a registered broker-dealer or other financial institution that charges you additional fees or commissions, other than those described in the prospectus and SAI, and that has entered into an agreement with the Distributor to offer class R6 shares through such a program;
    - corporations, endowments, foundations and other institutional investors that have been approved by the Distributor or an affiliate;
    - affiliated and unaffiliated investment companies (whether registered or private) that have been approved by the Distributor or an affiliate;
    - health savings accounts purchasing shares through a registered broker-dealer or other financial institution; and
    - college savings plans that qualify for tax-exempt treatment under Section 529 of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code").
- No initial sales charge; your entire investment goes to work immediately

- No deferred sales charge
- Lower annual expenses, and higher dividends, than class A, C or R shares because of no 12b-1 fees and lower investor servicing fees
- Lower annual expenses, and higher dividends, than class Y shares because of lower investor servicing fees

Class Y shares

- The following investors may purchase class Y shares if approved by the Distributor:
    - bank trust departments and trust companies that have entered into agreements with the Distributor or an affiliate and offer institutional share class pricing to their clients;
    - corporate individual retirement accounts ("IRAs") administered by Putnam, if another retirement plan of the sponsor is eligible to purchase class Y shares;
    - college savings plans that qualify for tax-exempt treatment under Section 529 of the Internal Revenue Code;
    - other funds and investment products sponsored by the Investment Manager or an affiliate, including other Franklin Templeton investment managers;
    - investors purchasing shares through an asset-based fee program that is sponsored by a registered broker-dealer or other financial institution;
    - investors purchasing shares through a commission-based platform of a registered broker-dealer or other financial institution that charges you additional fees or commissions, other than those described in the prospectus and SAI, and that has entered into an agreement with the Distributor to offer class Y shares through such a program;
    - clients of a financial representative who are charged a fee for consulting or similar services;
    - corporations, endowments, foundations, and other institutional investors that have been approved by the Distributor or an affiliate;
    - affiliated and unaffiliated investment companies (whether registered or private) that have been approved by the Distributor or an affiliate;
    - current and retired employees of Putnam or an affiliate (including affiliates of Franklin Templeton) and their immediate family members (including an employee's spouse, domestic partner, fiancé(e), or other family members who are living in the same household) as well as, in each case, Putnam-offered

health savings accounts, IRAs, and other similar tax-advantaged plans solely owned by the foregoing individuals;

- current directors of Putnam Investments, LLC who commenced service prior to January 1, 2024 and retired directors of Putnam Investments, LLC who served prior to January 1, 2024, regardless of when they retired;
- current employees of Empower Life & Annuity Insurance Company who began their employment prior to January 1, 2024 and retired employees of Empower Life & Annuity Insurance Company who were employees prior to January 1, 2024, regardless of when they retired; and current and retired Trustees of the fund. Upon the departure of any member of this group of individuals from Putnam, Empower Life & Annuity Insurance Company, or the fund's Board of Trustees, the member's class Y shares convert automatically to class A shares, unless the member's departure is a retirement, as determined by Putnam in its discretion for employees and directors of Putnam and employees of Empower Life & Annuity Insurance Company and by the Board of Trustees in its discretion for Trustees; provided that conversion will not take place with respect to class Y shares held by former Putnam employees and their immediate family members in health savings accounts where it is not operationally practicable due to platform or other limitations; and
- personal and family member IRAs of registered representatives and other employees of broker-dealers and other financial institutions having a sales agreement with the Distributor, if (1) the registered representative or other employee is the broker of record or financial representative for the account, (2) the broker-dealer or other financial institution's policies prohibit the use of class A shares or other classes of fund shares that pay 12b-1 fees in such accounts to avoid potential prohibited transactions under Internal Revenue Service rules due to the account owners' status as "disqualified persons" under those rules, and (3) the broker-dealer or other financial institution has an agreement with the Distributor related to the use of class Y shares in these accounts.

- Trust companies or bank trust departments that purchased class Y shares for trust accounts may transfer them to the beneficiaries of the trust accounts, who may continue to hold them or exchange them for class Y shares of other Putnam funds. Defined contribution plans (including corporate IRAs) that purchased class Y shares under prior eligibility criteria may continue to purchase class Y shares.
- No initial sales charge; your entire investment goes to work immediately
- No deferred sales charge
- Lower annual expenses, and higher dividends, than class A, C or R shares because of no 12b-1 fees

- Higher annual expenses, and lower dividends, than class R6 shares because of higher investor servicing fees.

Class R shares

- The following investors may purchase class R shares:
  - Employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into an agreement with the Distributor or an affiliate; and
  - Individual retirement accounts (“IRAs”) purchasing shares through a registered broker-dealer or other financial institutions.
- No initial sales charge; your entire investment goes to work immediately
- No deferred sales charge
- Higher annual expenses and lower dividends than class R3 and R4 shares because of higher 12b-1 fees
- Higher annual expenses and lower dividends than class R5 and R6 shares because of higher 12b-1 fees and higher investor servicing fees

Class R3 shares

- The following investors may purchase class R shares:
  - Employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into agreements with the Distributor or an affiliate)
- No initial sales charge; your entire investment goes to work immediately
- No deferred sales charge
- Lower annual expenses and higher dividends than class R shares, because of lower 12b-1 fees
- Higher annual expenses and lower dividends than class R4 shares because of higher 12b-1 fees
- Higher annual expenses and lower dividends than class R5 and R6 shares because of higher 12b-1 fees and higher investor servicing fees

Class R4 shares

- The following investors may purchase class R shares:
  - Employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment

Manager) that have entered into agreements with the Distributor or an affiliate)

- No initial sales charge; your entire investment goes to work immediately
- No deferred sales charge
- Lower annual expenses and higher dividends than class R and R3 shares, because of no 12b-1 fees
- Higher annual expenses and lower dividends than class R5 and R6 shares because of higher investor servicing fees

Class R5 shares

- The following investors may purchase class R5 shares
    - employer-sponsored retirement plans that are clients of third-party administrators (including affiliates of the Investment Manager) that have entered into agreements with the Distributor or an affiliate;
- No initial sales charge; your entire investment goes to work immediately
- No deferred sales charge
- Lower annual expenses, and higher dividends, than class R or R3 shares because of no 12b-1 fees and lower investor servicing fees
- Lower annual expenses, and higher dividends, than class R4 shares because of lower investor servicing fees
- Higher annual expenses, and lower dividends, than class R6 shares because of higher investor servicing fees

Initial sales charges for class A shares of all funds except Maturity Fund

Amount of investment	Sales charge as a % of offering price	Sales charge as a % of net amount invested
Less than $50,000	5.75	6.10
$50,000 but less than $100,000	4.50	4.71
$100,000 but less than $250,000	3.50	3.63
$250,000 but less than $500,000	2.50	2.56
$500,000 but less than $1 million	2.00	2.04
$1 million or more	-0-	-0-

Initial sales charges for class A shares of Maturity Fund

Amount of investment	Sales charge as a % of offering price	Sales charge as a % of net amount invested
Less than $100,000	4.00	4.17
$100,000 but less than $250,000	3.25	3.36
$250,000 but less than $500,000	2.50	2.56
$500,000 or more	-0-	-0-

Reducing your class A sales charge

The fund offers two principal ways for you to qualify for discounts on initial sales charges on class A shares, often referred to as "breakpoint discounts":

- **Right of accumulation.** You can add the amount of your current purchases of class A shares of the fund and other Putnam funds (excluding Putnam Ultra Short MAC Series) to the value of your existing accounts in the fund and other Putnam funds (excluding Putnam Ultra Short MAC Series). Individuals can also include purchases by, and accounts owned by, their spouse and minor children, including accounts established through different financial representatives. For your current purchases, you will pay the initial sales charge applicable to the total value of the linked accounts and purchases, which may be lower than the sales charge otherwise applicable to each of your current purchases. In addition to Putnam Ultra Short MAC Series, shares of Putnam money market funds, other than money market fund shares acquired by exchange from other Putnam funds, are not included for purposes of the right of accumulation.

  To calculate the total value of your existing accounts and any linked accounts, the fund will use the higher of (a) the current maximum public offering price of those shares or (b) if you purchased the shares after December 31, 2007, the initial value of the total purchases, or, if you held the shares on December 31, 2007, the market value at maximum public offering price on that date, in either case, less the market value on the applicable redemption date of any of those shares that you have redeemed.

- **Statement of intention.** A statement of intention is a document in which you agree to make purchases of class A shares in a specified amount within a period of 13 months. For each purchase you make under the statement of intention, you will pay the initial sales charge applicable to the total amount you have agreed to purchase. While a statement of intention is not a binding obligation on you, if you do not purchase the full amount of shares within 13 months, the fund will redeem shares from your account in an amount equal to the difference between the higher initial sales charge you would have paid in the absence of the statement of intention and the initial sales charge you actually paid.

Account types that may be linked with each other to obtain breakpoint discounts using the methods described above include:

- Individual accounts
- Joint accounts
- Accounts established as part of a retirement plan and IRA accounts (some restrictions may apply)
- Shares of Putnam funds owned through accounts in the name of your dealer or other financial intermediary (with documentation identifying beneficial ownership of shares)
- Accounts held as part of a Section 529 college savings plan managed by the Investment Manager or an affiliate (some restrictions may apply)

In order to obtain a breakpoint discount, you should inform your financial representative at the time you purchase shares of the existence of other accounts or purchases that are eligible to be linked for the purpose of calculating the initial sales charge. The fund or your financial representative may ask you for records or other information about other shares held in your accounts and linked accounts, including accounts opened with a different financial representative. Restrictions may apply to certain accounts and transactions. Further details about breakpoint discounts can be found at www.franklintempleton.com and in the SAI.

- **Additional reductions and waivers of sales charges.** In addition to the breakpoint discount methods described above for class A shares, the fund may sell the classes of shares specified below without a sales charge or CDSC under the circumstances described below. The sales charge and CDSC waiver categories described below do not apply to customers purchasing shares of the fund through any of the financial intermediaries specified in the Appendix to this prospectus (each, a "Specified Intermediary").

Different financial intermediaries may impose different sales charges. Please refer to the Appendix for the sales charge or CDSC waivers that are applicable to each Specified Intermediary.

Class A shares

The following categories of investors are eligible to purchase class A shares without payment of a sales charge:

(i) current and former Trustees of the fund, their family members, business and personal associates; current and former employees of Putnam Management, certain current corporate affiliates (including affiliates of Franklin Templeton), and certain former corporate affiliates, their family members, business and personal associates; employer-sponsored retirement plans for the foregoing; and

partnerships, trusts or other entities in which any of the foregoing has a substantial interest;

(ii) clients of administrators or other service providers of employer-sponsored retirement plans (for purposes of this waiver, employer-sponsored retirement plans do not include SEP IRAs, SIMPLE IRAs or SARSEPs) (not applicable to tax-exempt funds);

(iii) registered representatives and other employees of broker-dealers having sales agreements with the Distributor; employees of financial institutions having sales agreements with the Distributor or otherwise having an arrangement with any such broker-dealer or financial institution with respect to sales of fund shares; and their immediate family members (spouses and children under age 21, including step-children and adopted children);

(iv) a trust department of any financial institution purchasing shares of the fund in its capacity as trustee of any trust (other than a tax-qualified retirement plan trust), through an arrangement approved by the Distributor, if the value of the shares of the fund and other Putnam funds purchased or held by all such trusts exceeds $1 million in the aggregate;

(v) clients of (i) broker-dealers, financial institutions, financial intermediaries or registered investment advisors that charge a fee for advisory or investment services or (ii) broker-dealers, financial institutions, or financial intermediaries that have entered into an agreement with the Distributor to offer shares through a retail self-directed brokerage account with or without the imposition of a transaction fee;

(vi) college savings plans that qualify for tax-exempt treatment under Section 529 of the Internal Revenue Code; and

(vii) shareholders reinvesting the proceeds from a Putnam Corporate IRA Plan distribution into a nonretirement plan account.

Administrators and other service providers of employer-sponsored retirement plans are required to enter into contractual arrangements with Putnam Investor Services in order to offer and hold fund shares. Administrators and other service providers of employer-sponsored retirement plans seeking to place trades on behalf of their plan clients should consult Putnam Investor Services as to the applicable requirements.

Class A and class C shares

A CDSC is waived in the event of a redemption under the following circumstances:

(i) a withdrawal from a Systematic Withdrawal Plan (“SWP”) of up to 12% of the net asset value of the account (calculated as set forth in the SAI);

(ii) a redemption of shares that are no longer subject to the CDSC holding period therefor;

(iii) a redemption of shares that were issued upon the reinvestment of distributions by the fund;

(iv) a redemption of shares that were exchanged for shares of another Putnam fund, provided that the shares acquired in such exchange or subsequent exchanges (including shares of a Putnam money market fund or Putnam Ultra Short Duration Income Fund) will continue to remain subject to the CDSC, if applicable, until the applicable holding period expires; and

(v) in the case of individual, joint or Uniform Transfers to Minors Act accounts, in the event of death or post-purchase disability of a shareholder, for the purpose of paying benefits pursuant to tax-qualified retirement plans ("Benefit Payments"), or, in the case of living trust accounts, in the event of the death or post-purchase disability of the settlor of the trust.

Additional information about reductions and waivers of sales charges, including deferred sales charges, is included in the SAI. You may consult your financial representative or the Distributor for assistance.

How do I sell or exchange fund shares?

You can sell your shares back to the fund or exchange them for shares of another Putnam fund any day the NYSE is open, either through your financial representative or directly to the fund.

If you redeem your shares shortly after purchasing them, your redemption payment for the shares may be delayed until the fund collects the purchase price of the shares, which may be up to 7 calendar days after the purchase date.

Regarding exchanges, not all Putnam funds offer all classes of shares or may be open to new investors. If you exchange shares otherwise subject to a deferred sales charge, the transaction will not be subject to the deferred sales charge. When you redeem the shares acquired through the exchange, however, the redemption may be subject to the deferred sales charge, depending upon when and from which fund you originally purchased the shares. The deferred sales charge will be computed using the schedule of any fund into or from which you have exchanged your shares that would result in your paying the highest deferred sales charge applicable to your class of shares. For purposes of computing the deferred sales charge, the length of

time you have owned your shares will be measured from the date of original purchase, unless you originally purchased the shares from another Putnam fund that does not directly charge a deferred sales charge, in which case the length of time you have owned your shares will be measured from the date you exchange those shares for shares of another Putnam fund that does charge a deferred sales charge, and will not be affected by any subsequent exchanges among funds.

- **Selling or exchanging shares through your financial representative.** Your representative must receive your request in proper form before the close of regular trading on the NYSE for you to receive that day's net asset value, less any applicable deferred sales charge. Your representative will be responsible for furnishing all necessary documents to Putnam Investor Services on a timely basis and may charge you for his or her services.

- **Selling or exchanging shares directly with the fund.** Putnam Investor Services must receive your request in proper form before the close of regular trading on the NYSE in order to receive that day's net asset value, less any applicable deferred sales charge.

- **By mail.** Send a letter of instruction signed by all registered owners or their legal representatives to Putnam Investor Services.

- **By telephone.** You may use Putnam's telephone redemption privilege to redeem shares valued at less than $250,000 unless you have notified Putnam Investor Services of an address change within the preceding 15 days, in which case other requirements may apply. Unless you indicate otherwise on the account application, Putnam Investor Services will be authorized to accept redemption instructions received by telephone. A telephone exchange privilege is currently available. The telephone redemption and exchange privileges may be modified or terminated without notice.

- **Via the Internet.** You may also exchange shares via the Internet at www.franklintempleton.com.

- **Shares held through your employer's retirement plan.** For information on how to sell or exchange shares of the fund that were purchased through your employer's retirement plan, including any restrictions and charges that the plan may impose, please consult your employer.

- **Additional requirements.** In certain situations, for example, if you sell shares with a value of $250,000 or more, the signatures of all registered owners or their legal representatives must be guaranteed by a bank, broker-dealer or certain other financial institutions. In addition, Putnam Investor Services usually requires additional documents for the sale of shares by a corporation, partnership, agent or fiduciary, or surviving joint owner. For more information concerning Putnam's signature guarantee and documentation requirements, contact Putnam Investor Services.

  The fund also reserves the right to revise or terminate the exchange privilege, limit the amount or number of exchanges or reject any exchange. The fund into which you would like to exchange may also reject your exchange. These

actions may apply to all shareholders or only to those shareholders whose exchanges the Investment Manager determines are likely to have a negative effect on the fund or other Putnam funds. Consult Putnam Investor Services before requesting an exchange. Ask your financial representative or Putnam Investor Services for prospectuses of other Putnam funds. Some Putnam funds are not available in all states.

Deferred sales charges for class C and certain class A shares

A deferred sales charge of 1.00% will apply to class C shares if redeemed within one year of purchase. Class A shares that are part of a purchase of $1,000,000 ($500,000 for Maturity Fund) or more (other than by an employer-sponsored retirement plan) will be subject to a 1.00% deferred sales charge if redeemed within twelve months of purchase.

Deferred sales charges will be based on the lower of the shares' cost and current net asset value. Shares not subject to any charge will be redeemed first, followed by shares held longest. You may sell shares acquired by reinvestment of distributions without a charge at any time.

Payment information. If your account is held directly with Putnam Investor Services, the fund typically expects to send you payment for your shares the business day after your request is received in good order. If you hold your shares through certain financial intermediaries or financial intermediary programs, receipt of payment for your shares may differ based on industry standard trade settlement practices, as managed by your intermediary. However, it is possible that payment of redemption proceeds, for both accounts held with Putnam Investor Services and those held through a financial intermediary, may take up to seven days. Under unusual circumstances, the fund may suspend redemptions, or postpone payment for more than seven days, as permitted by federal securities law. Under normal market conditions, the fund typically expects to satisfy redemption requests by using holdings of cash and cash equivalents or selling portfolio assets to generate cash. Under stressed market conditions, the fund may also satisfy redemption requests by borrowing under the fund’s interfund lending arrangements. For additional information regarding the fund’s interfund lending arrangements, please see the SAI.

To the extent consistent with applicable laws and regulations, the fund reserves the right to satisfy all or a portion of a redemption request by distributing securities or other property in lieu of cash (“in-kind” redemptions), under both normal and stressed market conditions. The fund generally expects to use in-kind redemptions only in stressed market conditions or stressed conditions specific to the fund, such as redemption requests that represent a large percentage of the fund's net assets in order to minimize the effect of the large redemption on the fund and its remaining shareholders. The fund will not use in-kind redemptions for retail investors who hold shares of the fund through a financial intermediary. Any in-kind redemption will be effected through a pro rata distribution of all publicly traded portfolio securities or securities for which quoted bid prices are available, subject to certain exceptions. The securities

distributed in an in-kind redemption will be valued in the same manner as they are valued for purposes of computing the fund's net asset value. Once distributed in-kind to an investor, securities may increase or decrease in value before the investor is able to convert them into cash. Any transaction costs or other expenses involved in liquidating securities received in an in-kind redemption will be borne by the redeeming investor. The fund has committed, in connection with an election under Rule 18f-1 under the Investment Company Act of 1940, to pay all redemptions of fund shares by a single shareholder during any 90-day period in cash, up to the lesser of (i) $250,000 or (ii) 1% of the fund's net assets measured as of the beginning of such 90-day period. For information regarding procedures for in-kind redemptions, please contact the Distributor. You will not receive interest on uncashed redemption checks.

- **Redemption by the fund.** If you own fewer shares than the minimum set by the Trustees (presently 20 shares), the fund may redeem your shares without your permission and send you the proceeds after providing you with at least 60 days' notice to attain the minimum. To the extent permitted by applicable law, the fund may also redeem shares if you own more than a maximum amount set by the Trustees. There is presently no maximum, but the Trustees could set a maximum that would apply to both present and future shareholders.

- **Abandoned property.** If your account is held directly with Putnam Investor Services and is later deemed “abandoned” or “unclaimed” under state law, the fund may be required to “escheat” (transfer) the shares in your account, or to redeem those shares and remit the proceeds, to the applicable state's unclaimed property division. The state may redeem escheated shares. If you subsequently seek to reclaim from the state the proceeds of any sale of your shares, you may only be able to recover the amount received when the shares were sold (and not the amount those shares are worth currently). It is your responsibility to maintain a correct address for your account, to keep your account active by contacting Putnam Investor Services by mail, by telephone or at www.franklintempleton.com, and to cash promptly all checks for dividends, capital gains and redemptions. The fund and Putnam Investor Services, the Investment Manager, and their respective affiliates will not be liable to fund shareholders or their representatives for good faith efforts to comply with state escheatment laws. For IRA accounts escheated to a state under these abandoned property laws, the escheatment will generally be treated as a taxable distribution to you; federal and any applicable state income tax will be withheld.

Policy on excessive short-term trading

- **Risks of excessive short-term trading.** Excessive short-term trading activity may reduce the fund's performance and harm all fund shareholders by interfering with portfolio management, increasing the fund's expenses and diluting the fund's net asset value. Depending on the size and frequency of short-term trades in the fund's shares, the fund may experience increased cash volatility, which could require the fund to maintain undesirably large cash positions or buy or sell portfolio securities it would not have bought or sold otherwise. The need to execute additional portfolio transactions due to these

cash flows may also increase the fund's brokerage and administrative costs and, for investors in taxable accounts, may increase taxable distributions received from the fund.

Because the fund invests in underlying funds that invest in foreign securities, its performance may be adversely impacted and the interests of longer-term shareholders may be diluted as a result of time-zone arbitrage, a short-term trading practice that seeks to exploit changes in the value of the fund's investments that result from events occurring after the close of the foreign markets on which the investments trade, but prior to the later close of trading on the NYSE, the time as of which the fund determines its NAV. If an arbitrageur is successful, he or she may dilute the interests of other shareholders by trading shares at prices that do not fully reflect their fair value.

When an underlying fund invests in securities that may trade infrequently or may be more difficult to value, such as lower-rated bonds and securities of smaller companies, it may be susceptible to trading by short-term traders who seek to exploit perceived price inefficiencies in the fund's investments. In addition, the market for these securities may at times show "market momentum," in which positive or negative performance may continue from one day to the next for reasons unrelated to the fundamentals of the issuer. Short-term traders may seek to capture this momentum by trading frequently in the fund's shares, which will reduce the fund's performance and may dilute the interests of other shareholders. Because lower-rated debt and securities of smaller companies may be less liquid than higher-rated debt or securities of larger companies, respectively, an underlying fund may also be unable to buy or sell these securities at desirable prices when the need arises (for example, in response to volatile cash flows caused by short-term trading). Similar risks may apply if a fund holds other types of less liquid securities.

The fund may be adversely affected if an underlying fund in which it invests is harmed by excessive short-term trading.

- **Fund policies.** In order to protect the interests of long-term shareholders of the fund, the Investment Manager and the fund's Trustees have adopted policies and procedures intended to discourage excessive short-term trading. The fund seeks to discourage excessive short-term trading by using fair value pricing procedures to value investments under some circumstances. In addition, the Investment Manager monitors activity in those shareholder accounts about which it possesses, or otherwise obtains, the necessary information in order to detect excessive short-term trading patterns and takes steps to deter excessive short-term traders.

- **Account monitoring.** The Investment Manager's Compliance Department currently uses multiple reporting tools to detect short-term trading activity occurring in accounts for investors held directly with the Putnam funds as well as in accounts held through financial intermediaries. The Investment Manager measures excessive short-term trading in the fund by the number of "round trip" transactions within a specified period of time. A "round trip" transaction is defined as a purchase or exchange into a fund followed, or preceded, by a redemption or exchange out of the same fund. If the Investment Manager's Compliance Department determines that an investor has engaged in excessive short-term trading, the Investment Manager will issue the investor and/or the

investor's financial intermediary, if any, a written warning. The Investment Manager's practices for measuring excessive short-term trading activity and issuing warnings may change from time to time. Some types of transactions are exempt from monitoring, including, but not limited to, those in connection with systematic investment or withdrawal plans and reinvestment of dividend and capital gain distributions.

- **Account restrictions.** In addition to these monitoring practices, the Investment Manager and the fund reserve the right to reject or restrict purchases or exchanges (if applicable) for any reason. Continued excessive short-term trading activity by an investor or financial intermediary following a warning may lead to the termination of the exchange privilege for that investor or the financial intermediary initiating the trades on the investor's behalf. The Investment Manager may determine that an investor's trading activity is excessive or otherwise potentially harmful based on various factors, including an investor's or financial intermediary's trading history in the fund or other Putnam funds, and may aggregate activity in multiple accounts in the fund or other Putnam funds that the Investment Manager believes are under common ownership or control for purposes of determining whether the activity is excessive. If the Investment Manager identifies an investor or financial intermediary engaging in excessive trading, it may revoke certain privileges, such as the telephone exchange privilege or the ability to initiate online exchanges via Putnam's Individual Investor website. The Investment Manager may also temporarily or permanently bar the investor or financial intermediary from investing in the fund or other Putnam funds. The Investment Manager may take these steps in its discretion even if the investor's activity does not fall within the Investment Manager's current monitoring parameters for the fund.

- **Limitations on the fund's policies.** There is no guarantee that these policies will be able to detect excessive short-term trading in all accounts. For example, the Investment Manager currently does not have access to sufficient information to identify each investor's trading history, and in certain circumstances there may be operational or technological constraints on its ability to enforce the fund's policies. In addition, even when the Investment Manager has sufficient information, its detection methods may not capture all excessive short-term trading.

  In particular, many purchase, redemption and exchange orders are received from financial intermediaries that hold omnibus accounts with the fund. Omnibus accounts are accounts in which shares are held in the name of a financial intermediary, such as a retirement plan sponsor, broker, adviser, or third-party administrator or recordkeeper, on behalf of its clients or participants, who are the beneficial owners of the fund shares held in the omnibus account. The Investment Manager monitors cash flows into and out of the fund on an ongoing basis. If cash flows or other information indicate that excessive short-term trading may be taking place within an omnibus account, the Investment Manager will contact the financial intermediary that maintains the omnibus account to obtain information about trading activity of the beneficial owners and attempt to identify and remedy any excessive trading. However, the Investment Manager's ability to monitor and deter excessive short-term traders in omnibus accounts ultimately depends on the capabilities and cooperation of the

financial intermediaries that maintain the omnibus accounts. Financial intermediaries may impose different or additional limits on short-term trading.

Distribution plans and payments to dealers

Putnam funds are distributed primarily through dealers (including any broker, dealer, bank, bank trust department, registered investment advisor, financial planner, retirement plan administrator, and any other institution having a selling, services, or any similar agreement with the Distributor or one of its affiliates). In order to pay for the marketing of fund shares and services provided to shareholders, the fund has adopted distribution and service (12b-1) plans, which increase the annual operating expenses you pay each year in certain share classes, as shown in the table of annual fund operating expenses in the section Fund summary - Fees and expenses. The Distributor and its affiliates also make additional payments to dealers that do not increase your fund expenses, as described below.

- **Distribution and service (12b-1) plans.** The fund's 12b-1 plans provide for payments at annual rates (based on average net assets) of up to 0.35% on class A and class R3 shares and 1.00% on class C and class R shares. The Trustees currently limit payments on class A and class R3 shares to 0.25% of average net assets and payments on class R shares to 0.50% of average net assets. Because these fees are paid out of the fund’s assets on an ongoing basis, they will increase the cost of your investment.

- **Payments to dealers.** If you purchase your shares through a dealer, your dealer generally receives payments from the Distributor representing some or all of the sales charges and distribution and service (12b-1) fees, if any, shown in the tables under Fund summary -- Fees and expenses at the front of this prospectus.

  The Distributor and its affiliates also pay additional compensation to selected dealers in recognition of their marketing support and/or program servicing (each of which is described in more detail below). These payments may create an incentive for a dealer firm or its representatives to recommend or offer shares of the fund or other Putnam funds to its customers. These additional payments are made by the Distributor and its affiliates and do not increase the amount paid by you or the fund as shown under Fund summary -- Fees and expenses.

  The additional payments to dealers by the Distributor and its affiliates are generally based on one or more of the following factors: average net assets of a fund attributable to that dealer, sales or net sales of a fund attributable to that dealer, or reimbursement of ticket charges (fees that a dealer firm charges its representatives for effecting transactions in fund shares), or on the basis of a negotiated lump sum payment for services provided.

  Marketing support payments are generally available to most dealers engaging in significant sales of Putnam fund shares. These payments are individually negotiated with each dealer firm, taking into account the marketing support

services provided by the dealer, including business planning assistance, educating dealer personnel about the Putnam funds and shareholder financial planning needs, placement on the dealer's preferred or recommended fund company list, access to sales meetings, sales representatives and management representatives of the dealer, market data, as well as the size of the dealer's relationship with the Distributor. Although the total amount of marketing support payments made to dealers in any year may vary, on average, the aggregate payments are not expected, on an annual basis, to exceed 0.085% of the average net assets of Putnam's retail mutual funds attributable to the dealers.

Program servicing payments, which are paid in some instances to dealers in connection with investments in the fund through dealer platforms and other investment programs, are not expected, with certain limited exceptions, to exceed 0.20% of the total assets in the program on an annual basis. These payments are made for program or platform services provided by the dealer, including shareholder recordkeeping, reporting, or transaction processing, as well as services rendered in connection with dealer platform development and maintenance, fund/investment selection and monitoring, or other similar services.

You can find a list of all dealers to which the Distributor and its affiliates made marketing support and/or program servicing payments in 2024 in the SAI, which is on file with the SEC and is also available at www.franklintempleton.com. You can also find other details in the SAI about the payments made by the Distributor and its affiliates and the services provided by your dealer. Your dealer may charge you fees or commissions in addition to those disclosed in this prospectus. You can also ask your dealer about any payments it receives from the Distributor and its affiliates and any services your dealer provides, as well as about fees and/or commissions it charges.

- **Other payments.** The Distributor and its affiliates may make other payments (including payments in connection with educational seminars or conferences) or allow other promotional incentives to dealers to the extent permitted by SEC and NASD (as adopted by FINRA) rules and by other applicable laws and regulations. The fund's transfer agent may also make payments to certain financial intermediaries in recognition of subaccounting or other services they provide to shareholders or plan participants who invest in the fund or other Putnam funds through their retirement plan. See the discussion in the SAI under Management -- Investor Servicing Agent for more details.

Fund distributions and taxes

Maturity Fund declares a dividend monthly based on the Investment Manager's projections of its estimated net income and normally distributes any net investment income monthly and any net realized capital gains annually. Each other fund normally distributes any net investment income and any net realized capital gains annually.

You may choose to reinvest distributions from net investment income, capital gains or both in additional shares of your fund or other Putnam funds, or you may receive them in cash in the form of a check or an electronic deposit to your bank account. If you do not select an option when you open your account, all distributions will be reinvested. If you choose to receive distributions in cash, but correspondence from the fund or Putnam Investor Services is returned as "undeliverable," the distribution option on your account may be converted to reinvest future distributions in the fund. You will not receive interest on uncashed distribution checks.

For shares purchased through your employer's retirement plan, the terms of the plan will govern how the plan may receive distributions from the fund.

The fund's investments in underlying funds could affect the amount, timing and character of distributions from the fund, and therefore may increase the amount of taxes payable by shareholders.

For U.S. federal income tax purposes, distributions of net investment income are generally taxable to you as ordinary income. Taxes on distributions of capital gains are determined by how long the fund owned (or is deemed to have owned) the investments that generated them, rather than by how long you have owned (or are deemed to have owned) your shares. Distributions that the fund properly reports to you as gains from investments that the fund owned for more than one year are generally taxable to you as long-term capital gains includible in net capital gain and taxed to individuals at reduced rates. Distributions of gains from investments that the fund owned for one year or less and gains on the sale of or prepayment on bonds characterized as market discount are generally taxable to you as ordinary income. Distributions that the fund properly reports to you as “qualified dividend income” are taxable at the reduced rates applicable to your net capital gain provided that both you and the fund meet certain holding period and other requirements. Distributions are taxable in the manner described in this paragraph whether you receive them in cash or reinvest them in additional shares of the fund or other Putnam funds.

Distributions by the fund to retirement plans that qualify for tax-advantaged treatment under U.S. federal income tax laws will not be taxable. Special tax rules apply to investments through such plans. You should consult your tax advisor to determine the suitability of the fund as an investment through such a plan and the tax treatment of distributions (including distributions of amounts attributable to an investment in the fund) from such a plan.

Unless you are investing through a tax-advantaged retirement account (such as an IRA), you should consider avoiding a purchase of fund shares shortly before the fund makes a distribution because doing so may cost you money in taxes. Distributions are taxable to you even if they are paid from income or gains earned by the fund before your investment (and thus were included in the price you paid). Contact your financial representative or Putnam to find out the distribution schedule for your fund.

The fund’s investments in foreign securities, if any, may be subject to foreign withholding or other taxes. In that case, the fund’s return on those investments

would be decreased. The fund may be entitled to elect to pass through to its shareholders a credit or deduction for foreign taxes (if any) borne with respect to foreign securities income earned by the fund or by any underlying funds and passed through to the fund. If the fund so elects, shareholders will include in gross income from foreign sources their pro rata shares of such taxes, if any, treated as paid by the fund. Even if the fund elects to pass through to its shareholders foreign tax credits or deductions, tax-exempt shareholders and those who invest in the fund through tax-advantaged accounts such as IRAs will not benefit from any such tax credit or deduction. In addition, the fund's investments in foreign securities or foreign currencies, if any, may increase or accelerate the fund's recognition of ordinary income and may affect the timing or amount of the fund's distributions.

Any gain resulting from the sale or exchange (if applicable) of your shares generally also will be subject to tax. Any such gain or loss will be long term or short term depending on how long you have held your shares.

The above is a general summary of the tax implications of investing in the fund. Please refer to the SAI for further details. You should consult your tax advisor for more information on your own tax situation, including possible foreign, state and local taxes.

Information about the Prospectus and SAI

The prospectus and SAI for a fund provide information concerning the fund. The prospectus and SAI are updated at least annually and any information provided in a prospectus or SAI can be changed without a shareholder vote unless specifically stated otherwise. The prospectus and the SAI are not contracts between the fund and its shareholders and do not give rise to any contractual rights or obligations or any shareholder rights other than any rights conferred explicitly by federal or state securities laws that may not be waived.

Financial highlights

The financial highlights tables are intended to help you understand the performance of each fund for the past five years, unless otherwise noted. Certain information reflects financial results for a single fund share. Total return represents the rate that an investor would have earned (or lost) on an investment in the fund, assuming reinvestment of all dividends and other distributions. Unless otherwise noted, this information has been audited by the fund’s independent registered public accounting firm, PricewaterhouseCoopers, LLP, whose report, along with the fund's financial statements, are available on the fund’s website and are included in the fund’s Form N-CSR filed with the SEC, which is available upon request.

Putnam Retirement Advantage Maturity Fund - Class A

	Year Ended August 31,				
	2025	**2024**	**2023**	**2022**	**2021**
Per share operating performance (for a share outstanding throughout the year)

Appendix

Financial intermediary specific sales charge waiver information

As described in the prospectus, class A shares may be subject to an initial sales charge and class C shares may be subject to a CDSC. Certain financial intermediaries may impose different initial sales charges or waive the initial sales charge or CDSC in certain circumstances. This Appendix details the variations in sales charge waivers by financial intermediary. Not all financial intermediaries specify financial intermediary-specific sales charge waiver categories for every share class. For information about sales charges and waivers available for share classes other than those listed below, please see the section "Additional reductions and waivers of sales charges" in the prospectus. You should consult your financial representative for assistance in determining whether you may qualify for a particular sales charge waiver.

AMERIPRISE FINANCIAL

Front-End sales charge waivers on Class A shares available at Ameriprise Financial

The following information applies to class A share purchases if you have an account with or otherwise purchase fund shares through Ameriprise Financial:

Shareholders purchasing fund shares through an Ameriprise Financial account are eligible for the following front-end sales charge waivers, which may differ from those disclosed elsewhere in this fund's prospectus or SAI:

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same Fund (but not any other fund within the same fund family).
- Shares exchanged from Class C shares of the same fund in the month of or following the 7-year anniversary of the purchase date. To the extent that this prospectus elsewhere provides for a waiver with respect to exchanges of Class C shares or conversion of Class C shares following a shorter holding period, that waiver will apply.
- Employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members.
- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) TSCAs subject to ERISA and defined benefit plans) that are held by a covered family member, defined as an Ameriprise financial advisor and/or the advisor's spouse, advisor's lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor's lineal descendant (son, step-son, daughter, step-

daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant.

- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e. Rights of Reinstatement).

D.A. DAVIDSON & CO. ("D.A. DAVIDSON")

Shareholders purchasing fund shares including existing fund shareholders through a D.A. Davidson platform or account, or through an introducing broker-dealer or independent registered investment advisor for which D.A. Davidson provides trade execution, clearance, and/or custody services, will be eligible for the following sales charge waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or SAI.

Front-End sales charge waivers on Class A shares available at D.A. Davidson

- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Shares purchased by employees and registered representatives of D.A. Davidson or its affiliates and their family members as designated by D.A. Davidson.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares of the Fund if the shares are no longer subject to a CDSC and the conversion is consistent with D.A. Davidson's policies and procedures.

CDSC Waivers on Classes A and C shares available at D.A. Davidson

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in this prospectus.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA or other qualifying retirement accounts pursuant to the Internal Revenue Code.
- Shares acquired through a right of reinstatement.

Front-end sales charge discounts available at D.A. Davidson: breakpoints, rights of accumulation and/or letters of intent

- Breakpoints as described in this prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at D.A. Davidson. Eligible fund family assets not held at D.A. Davidson may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at D.A. Davidson may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

EDWARD D. JONES & CO., L.P. ("EDWARD JONES")

Policies Regarding Transactions Through Edward Jones

The following information has been provided by Edward Jones:

Effective on or after September 3, 2024, the following information supersedes prior information with respect to transactions and positions held in fund shares through an Edward Jones system. Clients of Edward Jones (also referred to as "shareholders") purchasing fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from discounts and waivers described elsewhere in the mutual fund prospectus or statement of additional information ("SAI") or through another broker-dealer. In all instances, it is the shareholder's responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of the Putnam funds, or other facts qualifying the purchaser for discounts or waivers. Edward Jones can ask for documentation of such circumstance. Shareholders should contact Edward Jones if they have questions regarding their eligibility for these discounts and waivers.

Breakpoints

- Breakpoint pricing, otherwise known as volume pricing, at dollar thresholds as described in the prospectus.

Rights of Accumulation ("ROA")

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all share classes (except certain money market funds and any assets held in group retirement plans) of the Putnam funds held by the shareholder or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations ("pricing groups"). If grouping assets as a shareholder, this includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of

eligible fund family assets in the ROA calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Money market funds are included only if such shares were sold with a sales charge at the time of purchase or acquired in exchange for shares purchased with a sales charge.

- The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.

- ROA is determined by calculating the higher of cost minus redemptions or market value (current shares x NAV).

Letter of Intent ("LOI")

- Through a LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible fund family assets in the LOI calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not adjusted under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if LOI is not met.

- If the employer maintaining a SEP IRA plan and/or SIMPLE IRA plan has elected to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping, LOIs will also be at the plan-level and may only be established by the employer.

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and other accounts in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate's life if the associate retires from Edward Jones in good-standing and remains in good standing pursuant to Edward Jones' policies and procedures.

- Shares purchased in an Edward Jones fee-based program.

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment.

- Shares purchased from the proceeds of redeemed shares of the same fund family so long as the following conditions are met: the proceeds are from the sale of shares within 60 days of the purchase, the sale and purchase are made

from a share class that charges a front-end sales charge and one of the following ("Right of Reinstatement"):

- The redemption and repurchase occur in the same account.
- The redemption proceeds are used to process an: IRA contribution, excess contributions, conversion, recharacterizing of contributions, or distribution, and the repurchase is done in an account within the same Edward Jones grouping for ROA.

- The Right of Reinstatement excludes systematic or automatic transactions including, but not limited to, purchases made through payroll deductions, liquidations to cover account fees, and reinvestments from non-mutual fund products.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the prospectus.
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones.

Contingent Deferred Sales Charge ("CDSC") Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder.
- Systematic withdrawals with up to 10% per year of the account value.
- Return of excess contributions from an Individual Retirement Account (IRA).
- Shares redeemed as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations.
- Shares redeemed to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones.
- Shares exchanged in an Edward Jones fee-based program.
- Shares acquired through NAV reinstatement.
- Shares redeemed at the discretion of Edward Jones for Minimum Balances, as described below.

Other Important Information Regarding Transactions Through Edward Jones

Minimum Purchase Amounts

- Initial purchase minimum: $250
- Subsequent purchase minimum: none

Minimum Balances

- Edward Jones has the right to redeem at its discretion fund holdings with a balance of $250 or less. The following are examples of accounts that are not included in this policy:
  - A fee-based account held on an Edward Jones platform
  - A 529 account held on an Edward Jones platform
  - An account with an active systematic investment plan or LOI

Exchanging Share Classes

- At any time it deems necessary, Edward Jones has the authority to exchange at NAV a shareholder's holdings in a fund to Class A shares of the same fund.

J.P. MORGAN SECURITIES LLC

Effective September 29, 2023, if you purchase or hold fund shares through an applicable J.P. Morgan Securities LLC brokerage account, you will be eligible for the following sales charge waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers), share class conversion policy and discounts, which may differ from those disclosed elsewhere in this fund's prospectus or Statement of Additional Information ("SAI").

Front-end sales charge waivers on Class A shares available at J.P. Morgan Securities LLC

- Shares exchanged from Class C (i.e., level-load) shares that are no longer subject to a CDSC and are exchanged into Class A shares of the same fund pursuant to J.P. Morgan Securities LLC's share class exchange policy.
- Qualified employer-sponsored defined contribution and defined benefit retirement plans, nonqualified deferred compensation plans, other employee benefit plans and trusts used to fund those plans. For purposes of this provision, such plans do not include SEP IRAs, SIMPLE IRAs, SAR-SEPs or 501(c)(3) accounts.
- Shares of funds purchased through J.P. Morgan Securities LLC Self-Directed Investing accounts.
- Shares purchased through rights of reinstatement.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of J.P. Morgan Securities LLC, or its affiliates and their spouse or financial dependents as defined by J.P. Morgan Securities LLC.

Class C to Class A share conversion

A shareholder in the fund's Class C shares will have their shares converted to Class A shares (or the appropriate share class) of the same fund if the shares are no longer subject to a CDSC and the conversion is consistent with J.P. Morgan Securities LLC's policies and procedures.

CDSC waivers on Class A and C Shares available at J.P. Morgan Securities LLC

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in this prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.
- Shares acquired through a right of reinstatement.

Front-end load discounts available at J.P. Morgan Securities LLC: breakpoints, rights of accumulation & letters of intent

- Breakpoints as described in this prospectus.
- Rights of Accumulation ("ROA") which entitle shareholders to breakpoint discounts (as described in this prospectus) will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at J.P. Morgan Securities LLC. Eligible fund family assets not held at J.P. Morgan Securities LLC (including 529 program holdings, where applicable) may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of Intent ("LOI") which allow for breakpoint discounts based on anticipated purchases within a fund family, through J.P. Morgan Securities LLC, over a 13-month period of time (if applicable).

JANNEY MONTGOMERY SCOTT LLC ("JANNEY")

Effective May 1, 2020, if you purchase fund shares through a Janney brokerage account, you will be eligible for the following load waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers) and discounts, which may differ from those disclosed elsewhere in this fund's Prospectus or SAI.

Front-end sales charge* waivers on Class A shares available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).

- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Class C shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Janney's policies and procedures.

CDSC waivers on Class A and C shares available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.
- Shares acquired through a right of reinstatement.
- Shares exchanged into the same share class of a different fund will not be subject to the deferred sales charge. When you redeem the shares acquired through the exchange, the redemption may be subject to the deferred sales charge, depending upon when and from which fund you originally purchased the shares.

Front-end sales charge* discounts available at Janney: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in the fund's Prospectus.
- Rights of accumulation ("ROA"), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Janney. Eligible fund family assets not held at Janney may be included in the

ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Janney may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

*Also referred to as an “initial sales charge.”

MERRILL LYNCH

Purchases or sales of front-end (i.e., Class A) or level-load (i.e., Class C) mutual fund shares through a Merrill platform or account will be eligible only for the following sales load waivers (front-end, contingent deferred, or back-end waivers) and discounts, which may differ from those disclosed elsewhere in this fund’s prospectus or SAI. Purchasers will have to buy mutual fund shares directly from the mutual fund company or through another intermediary to be eligible for waivers or discounts not listed below.

It is the client’s responsibility to notify Merrill at the time of purchase or sale of any relationship or other facts that qualify the transaction for a waiver or discount. A Merrill representative may ask for reasonable documentation of such facts and Merrill may condition the granting of a waiver or discount on the timely receipt of such documentation.

Additional information on waivers and discounts is available in the Merrill Sales Load Waiver and Discounts Supplement (the “Merrill SLWD Supplement") and in the Mutual Fund Investing at Merrill pamphlet at ml.com/funds. Clients are encouraged to review these documents and speak with their financial advisor to determine whether a transaction is eligible for a waiver or discount.

Front-end Sales Load Waivers Available at Merrill

- Shares of mutual funds available for purchase by employer-sponsored retirement, deferred compensation, and employee benefit plans (including health savings accounts) and trusts used to fund those plans provided the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Shares purchased through a Merrill investment advisory program
- Brokerage class shares exchanged from advisory class shares due to the holdings moving from a Merrill investment advisory program to a Merrill brokerage account
- Shares purchased through the Merrill Edge Self-Directed platform
- Shares purchased through the systematic reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same mutual fund in the same account

- Shares exchanged from level-load shares to front-end load shares of the same mutual fund in accordance with the description in the Merrill SLWD Supplement
- Shares exchanged from back-end load (i.e., Class B) shares to front-end load (i.e., Class A) shares of the same mutual fund[1]
- Shares purchased by eligible employees of Merrill or its affiliates and their family members who purchase shares in accounts within the employee's Merrill Household (as defined in the Merrill SLWD Supplement)
- Shares purchased by eligible persons associated with the fund as defined in this prospectus (e.g., the fund's officers or trustees)
- Shares purchased from the proceeds of a mutual fund redemption in front-end or back-end load shares provided (1) the repurchase is in a mutual fund within the same fund family; (2) the repurchase occurs within 90 calendar days from the redemption trade date, and (3) the redemption and purchase occur in the same account (known as Rights of Reinstatement). Automated transactions (i.e., systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill's account maintenance fees are not eligible for Rights of Reinstatement

Contingent Deferred Sales Charge ("CDSC") Waivers on Front-end, Back-end, and Level Load Shares Available at Merrill

- Shares sold due to the client's death or disability (as defined by Internal Revenue Code Section 22(e)(3))
- Shares sold pursuant to a systematic withdrawal program subject to Merrill's maximum systematic withdrawal limits as described in the Merrill SLWD Supplement
- Shares sold due to return of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the investor reaching the qualified age based on applicable IRS regulations
- Shares exchanged from back-end load shares to front-end load shares of the same mutual fund[1]
- Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g., traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund

[1] On or around April 15, 2024, Merrill will exchange all back-end load shares held in Merrill accounts to front-end load shares of the same mutual fund.

Front-end Sales Load Discounts Available at Merrill: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoint discounts, as described in this prospectus, where the sales load is at or below the maximum sales load that Merrill permits to be assessed to a front-end load purchase, as described in the Merrill SLWD Supplement
- Rights of Accumulation (ROA), as described in the Merrill SLWD Supplement, which entitle clients to breakpoint discounts based on the aggregated holdings of mutual fund family assets held in accounts in their Merrill Household
- Letters of Intent (LOI), which allow for breakpoint discounts on eligible new purchases based on anticipated future eligible purchases within a fund family at Merrill, in accounts within your Merrill Household, as further described in the Merrill SLWD Supplement

MORGAN STANLEY WEALTH MANAGEMENT

Effective July 1, 2018, shareholders purchasing fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to class A shares, which may differ from and may be more limited than those disclosed elsewhere in this fund's Prospectus or SAI.

Front-end sales charge waivers on class A shares available at Morgan Stanley Wealth Management:

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge

OPPENHEIMER & CO. INC. ("OPCO")

Effective September 1, 2020, shareholders purchasing Fund shares through an OPCO platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales

charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's prospectus or SAI.

Front-end sales load waivers on Class A shares available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased through an OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO
- Employees and registered representatives of OPCO or its affiliates and their family members

CDSC waivers on A, B and C shares available at OPCO

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in this prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based upon applicable IRS regulations as described in the prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a right of reinstatement

Front-end sales charge discounts available at OPCO: breakpoints & rights of accumulation

- Breakpoints as described in this prospectus.
- Rights of Accumulation (ROA), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holdings of fund family assets held by accounts within the purchaser's household at

OPCO. Eligible fund family assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets

RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. AND EACH ENTITY'S AFFILIATES ("RAYMOND JAMES")

Effective March 1, 2019, shareholders purchasing fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this fund's prospectus or SAI.

Front-end sales load waivers on Class A shares available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC waivers on Classes A, B and C shares available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's prospectus.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the fund's prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.

- Shares acquired through a right of reinstatement.

Front-end load discounts available at Raymond James: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in this prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

ROBERT W. BAIRD & CO. ("BAIRD")

Effective September 1, 2020, shareholders purchasing fund shares through a Baird brokerage account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI.

Front-End sales charge waivers on Class A shares available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing share of the same fund
- Shares purchased by employees and registered representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the fund's Class C Shares will have their shares converted at net asset value to Class A shares of the fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC waivers on Class A and C shares available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in this prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End sales charge discounts available at Baird: breakpoints and/or rights of accumulation

- Breakpoints as described in this prospectus
- Rights of accumulation, which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Baird. Eligible fund family assets not held at Baird may be included in the rights of accumulation calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases within a fund family through Baird, over a 13-month period of time

STIFEL, NICOLAUS & COMPANY, INCORPORATED AND ITS BROKER DEALER AFFILIATES ("STIFEL")

Shareholders purchasing or holding fund shares, including existing fund shareholders, through a Stifel or affiliated platform that provides trade execution, clearance, and/or custody services, will be eligible for the following sales charge load waivers (including front-end sales charge waivers and contingent deferred, or back-end, ("CDSC") sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the fund's SAI.

Class A Shares

As described elsewhere in this prospectus, Stifel may receive compensation out of the front-end sales charge if you purchase Class A shares through Stifel.

Rights of Accumulation

- Rights of accumulation ("ROA") that entitle shareholders to breakpoint discounts on front-end sales charges will be calculated by Stifel based on the aggregated holding of eligible assets in Putnam funds held by accounts within the purchaser's household at Stifel. Ineligible assets include Class A Money Market Funds not assessed a sales charge. Fund family assets not held at Stifel may be included in the calculation of ROA only if the shareholder notifies his or her financial advisor about such assets.

- The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.

Front-end Sales Charge Waivers on Class A Shares Available at Stifel

Sales charges may be waived for the following shareholders and in the following situations:

- Class C shares that have been held for more than seven (7) years may be converted to Class A shares or other front-end share class(es) shares of the same fund pursuant to Stifel's policies and procedures. To the extent that this prospectus elsewhere provides for a waiver with respect to the exchange or conversion of such shares following a shorter holding period, those provisions shall continue to apply.
- Shares purchased by employees and registered representatives of Stifel or its affiliates and their family members as designated by Stifel.
- Shares purchased in a Stifel fee-based advisory program, often referred to as a "wrap" program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same or other fund within the fund family.
- Shares purchased from the proceeds of redeemed shares of the same fund family so long as the proceeds are from the sale of shares from an account with the same owner/beneficiary within 90 days of the purchase. For the absence of doubt, automated transactions (i.e. systematic purchases, including salary deferral transactions and withdrawals) and purchases made after shares are sold to cover Stifel Nicolaus' account maintenance fees are not eligible for rights of reinstatement.
- Shares from rollovers into Stifel from retirement plans to IRAs.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the direction of Stifel. Stifel is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in this prospectus.
- Purchases of Class 529-A shares through a rollover from another 529 plan.
- Purchases of Class 529-A shares made for reinvestment of refunded amounts.
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Charitable organizations and foundations, notably 501(c)(3) organizations.

Contingent Deferred Sales Charges Waivers on Class A and C Shares

- Death or disability of the shareholder or, in the case of 529 plans, the account beneficiary.
- Shares sold as part of a systematic withdrawal plan not to exceed 12% annually.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations.
- Shares acquired through a right of reinstatement.
- Shares sold to pay Stifel fees or costs in such cases where the transaction is initiated by Stifel.
- Shares exchanged or sold in a Stifel fee-based program.

Share Class Conversions in Advisory Accounts

- Stifel continually looks to provide our clients with the lowest cost share class available based on account type. Stifel reserves the right to convert shares to the lowest cost share class available at Stifel upon transfer of shares into an advisory program.
