

Separately Managed Accounts

Royce Small-Cap Total Return Portfolios

3Q 2025

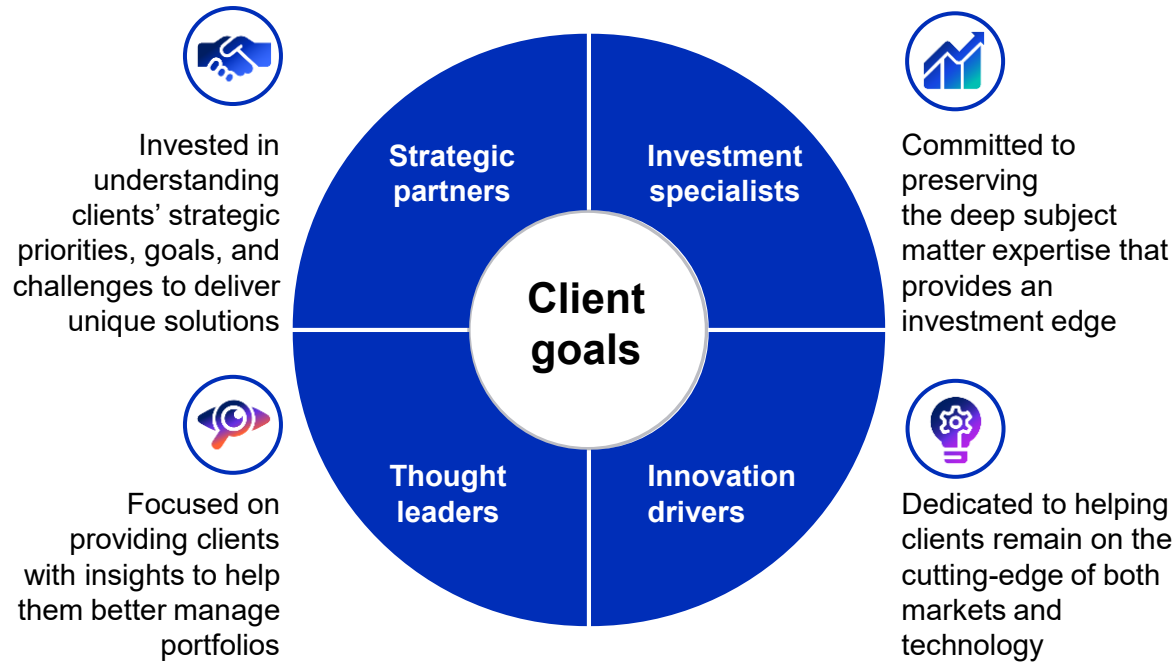

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC (FTPPG), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: Royce Investment Partners. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.

These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents or materials prepared by such sponsor firms, which will be provided upon request. For additional information, documents and/or materials, please speak to your Financial Professional or contact your sponsor firm.

About Royce Investment Partners

Founded 1972

30+ years average PM Industry experience

Operate with investment independence, majority-owned subsidiary of Franklin Resources, Inc.

Royce Small-Cap Total Return Portfolios

Overview

Royce Small-Cap Total Return Portfolios are a small-cap strategy that primarily invests in U.S. companies that pay regular dividends and/or return capital to shareholders. Favors companies that typically fall into one of three investment themes: Compounder, Quality Value, or Special Situations. The portfolios will not invest in any non-U.S. traded securities but have the option to invest in U.S.-traded American depositary receipts (ADRs).

Investment objective

- Long-term capital appreciation and current income

Investment philosophy

Royce Small-Cap Total Return Portfolios:

- Seek to buy high-quality small-cap businesses that are out of favor for what the portfolio managers think are transitory or cyclical reasons
- Focus on companies with a history of returning capital to investors
- Employ a bottom-up, risk-aware approach
- Use data, analytics, and technology

Key differentiators

- Managed with a consistent investment discipline since 1993.
- Focuses on leading quality companies that pay regular dividends and/or return capital to shareholders.
- Managed by Royce Investment Partners, a small-cap specialist.

What are the risks?

All investments involve risks, including possible loss of principal. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. To the extent the portfolio invests in a **concentration of certain securities, regions or industries**, it is subject to increased volatility. **Liquidity risk** exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. The manager may consider **environmental, social and governance (ESG) criteria** in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated.

Diversification does not assure a profit or protect against market loss.

Royce Small-Cap Total Return Portfolios

Investment process

STEP 1

Idea generation

True bottom-up investment process using comprehensive fundamental analysis, with three investment themes:

- “Compounder” companies possess what it believes are outstanding business models, strong financial characteristics, and above- average growth potential.
- “Quality Value” companies have attractive profit margins, strong free cash flows, high returns on invested capital, and low leverage and they also trade at what Royce believes are attractive valuations.
- “Special Situations” are companies that may have complex business models and/or require a catalyst for growth, such as spinoffs, turnarounds, and/or unrecognized asset values.

STEP 2

Fundamental research

Team member speaks with the company, reviews financial statements, SEC filings, earnings call transcripts, and company presentations examines industry journals; and conducts research on customers, competitors and culture to produce three documents:

- Financial model
- Investment memorandum
- Quality value scorecard

STEP 3

Team evaluation and risk analysis

- Each team member brings to the process their own bias, experience, and investment lens.
- By identifying missed or under-appreciated risks, the potential impact of behavioral biases is reduced, and the team gains a deeper understanding of the investment opportunity.

Diversification does not assure a profit or protect against market loss.

The investment process may change over time. The characteristics set forth are intended as a general illustration of some of the criteria the strategy team considers in selecting securities for client portfolios. There is no guarantee investment objectives will be achieved.

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (3.0% is the maximum anticipated wrap fee for equity and balanced portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

*Pure gross of fee returns do not reflect the deduction of any expenses, including transaction costs, and are presented as supplemental to the net of fee returns.

Royce Small-Cap Quality Value SMA Composite: The Royce Small-Cap Quality Value SMA Composite contains portfolios that invest at least 65% of their net assets in dividend-paying equity securities. In addition, at least 65% of the strategy's net assets will be invested in equity securities issued by small-cap companies at the time of investment. Small-cap companies are those that have a market capitalization not greater than that of the largest company in the Russell 2000® Index at the time of its most recent reconstitution. Although the strategy normally focuses on securities of U.S. companies, it may invest up to 25% of its net assets (measured at the time of investment) in securities of companies headquartered in foreign countries. The strategy may invest in other investment companies that invest in equity securities. The strategy may sell securities to, among other things, secure gains, limit losses, redeploy assets into what Royce deems to be more promising opportunities, and/or manage cash levels in the strategy's portfolio. As of July 1, 2022, the strategy is defined to only include wrap portfolios. The Royce Small-Cap Quality Value SMA composite is compared against the Russell 2000 Value Index. The Royce Small-Cap Quality Value SMA composite was created in July 2022 and inception on December 31, 1993.

For the purpose of complying with the GIPS standards, the Firm is defined as Royce & Associates, LP, which primarily conducts its business under the name Royce Investment Partners. Royce is registered with the U.S. Securities and Exchange Commission (the "SEC") as an investment adviser (SEC File No. 801-8268). Royce has been investing in smaller-company securities with a value approach for more than 40 years. Royce & Associates, LP began primarily conducting its business under the name Royce Investment Partners effective December 16, 2019. The firm's full list of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled funds are available upon request.

Royce claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Royce has been independently verified for the periods January 1, 2008, through December 31, 2023. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite and benchmark performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. The wrap fee includes transaction costs, investment management, custodial, and other administrative fees. Past performance is not indicative of future results. Returns include the reinvestment of all income.

GIPS Report (cont'd)

Royce Small-Cap Quality Value SMA Composite GIPS Composite Report

The currency used to express performance is USD. For non-wrap portfolios, gross-of-fee returns are reduced by trading costs. For wrap portfolios, gross-of-fee returns are not reduced by trading costs. Net-of-fee returns are calculated using a model fee of 3%. Net-of-fee composite returns are calculated by reducing each monthly composite pure gross rate of return by the highest wrap fee charged (3.00%) annually, prorated to a monthly ratio. 100% composite assets are represented by wrap fee portfolios for each period end 2022 forward. Prior to 2022, the composite did not contain wrap portfolios. Composite dispersion is measured by the asset-weighted standard deviation of annual net returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite net returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The fee schedule currently in effect is 3.00% on all assets. Actual investment advisory fees incurred by clients are negotiable and may vary. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Benchmark: Russell 2000 Value Index - The Russell 2000 Value Index is an index measuring the performance of value stocks within the Russell 2000 Index, as determined by Russell Investments.

Definitions

Term definitions

Earnings before interest, taxes, depreciation and amortization (EBITDA) approximates a firm's operating cash flow by considering its earnings before interest, taxes, depreciation and amortization.

Free Cash Flow measures the cash remaining after accounting for a firm's cash expenditures to support its operations and maintain its capital assets.

Market Capitalization measures the number of outstanding common shares of a given corporation multiplied by the latest price per share.

Weighted Median Market Capitalization represents the value at which half the portfolio's market capitalization weight falls above, and half falls below.

Weighted Average Market Capitalization represents the average value of the companies held in the portfolio. When that figure is weighted, the impact of each company's capitalization on the overall average is proportional to the total market value of its shares.

Dividend Yield is determined by dividing a stock's annual dividends per share by the current market price per share. Dividend yield is a financial ratio that shows how much a company pays out in dividends. **Dividend Yield is calculated without the deduction of fees and expenses.**

P/E (Year 1) is the previous day's closing price of the stock divided by the consensus earnings per share (EPS) of fiscal year 1 (FY1) provided by I/B/E/S. Forecasts are inherently limited and should not be relied upon as indicators of future performance.

The **Price-to-Book** ratio (P/B) is a stock's price divided by the stock's per share book value.

Earnings Per Share (EPS) is the portion of a company's profit allocated to each outstanding share of a common stock.

The **Sharpe Ratio** is a risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by Beta, where **Beta** measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is based on quarterly data. Standard deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those quarters that are either positive (Up) or negative (Down) for the benchmark.

An **Up Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive quarters.

A **Down Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative quarters.
