

Designed to elevate your business

The Franklin Templeton SIMPLE Pro IRA

We know how hard you work as a business owner to build and grow a business that will make a lasting impact and create opportunities for others that did not previously exist. We also know that businesses survive because of the communities and individuals who are there to support them. Let us help you make retirement a reality by enrolling in a **Franklin Templeton SIMPLE Pro IRA**—because you deserve it.

A SIMPLE path to planning. Business ownership may come with its challenges, especially in today's era of economic uncertainty. But adaptability is key to helping you address sources of financial worries. Franklin Templeton offers a differentiated solution with a SIMPLE Pro IRA for employers, providing a range of investment options designed to help you achieve your retirement planning goals.

SIMPLE Pro IRA is tailored for employers seeking to provide:

Employer matching contributions

Boost employee retention with up to a 3% salary match or a 2% non-elective contribution, enhancing your benefits package.¹

Tax-deferred growth

Allow employees to enjoy tax-deferred potential growth on contributions, helping them build retirement savings more effectively.

Efficient and affordable

Benefit from lower administrative costs—just \$35 per employee per year—and easier management, making SIMPLE IRAs an affordable option for small businesses.

1. Some employers may be able to take advantage of new contribution rules. Seek advice on how to affirmatively elect these other options for their plan and determine if they are eligible for the increased limits.

2. As of 3/31/2025.

Before investing, carefully consider a fund's investment objectives, risks, charges and expenses. You can find this and other information in each prospectus or summary prospectus, if available, at www.franklintempleton.com. Please read it carefully.

All investments are subject to risks, including the risk of loss. Equity securities are subject to price fluctuation and possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Asset-backed, mortgage-backed or mortgage-related securities** are subject to prepayment and extension risks. **Changes in the credit rating** of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Investments in **underlying funds** are subject to the same risks as, and indirectly bear the fees and expenses of, the underlying funds. The **allocation** of assets among different strategies, asset classes and investments may not prove beneficial or produce the desired results. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. The **investment style** may become out of favor, which may have a negative impact on performance. **Dividends** may fluctuate and are not guaranteed, and a company may reduce or eliminate its dividend at any time. **Short selling** is a speculative strategy. Unlike the possible loss on a security that is purchased, there is no limit on the amount of loss on an appreciating security that is sold short. **Derivative instruments** can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. **Real estate investment trusts (REITs)** are closely linked to the performance of the real estate markets. REITs are subject to illiquidity, credit and interest rate risks, and risks associated with small- and mid-cap investments. **Convertible securities** are subject to the risks of stocks when the underlying stock price is high relative to the conversion price and debt securities when the underlying stock price is low relative to the conversion price. **Active management** does not ensure gains or protect against market declines. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. The manager may consider **environmental, social and governance (ESG)** criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated.

FRANKLIN U.S. GOVERNMENT MONEY FUND

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor is not required to reimburse the fund for losses, and you should not expect that the sponsor will provide financial support to the fund at any time, including during periods of market stress. Although the fund invests in US government obligations, an investment in the fund is neither insured nor guaranteed by the US government.

Before adopting any plan you should carefully consider all of the benefits, risks and costs associated with a plan. Information regarding retirement plans is general and is not intended as legal or tax advice. Retirement plans are complex, and the federal and state laws or regulations on which they are based vary for each type of plan and are subject to change. In addition, some products, investment vehicles, and services may not be available or appropriate in all workplace retirement plans. Plan sponsors and plan administrators should consult the advice of legal counsel or a tax professional to address their specific situations.

All entities mentioned are Franklin Templeton companies.

Putnam funds are not exchangeable for other funds distributed by Franklin Distributors, LLC.
