

# **Western Asset Core Portfolios**

A US dollar-denominated core bond portfolio that seeks to maximize total return.

## A Active management can unlock opportunities within the Core Bond Universe

- In today's unsettled economic environment, core bonds have the potential to provide much-needed stability and serve as a hedge against market volatility.
- While equities have historically delivered higher average returns, they come with greater variability. A diversified approach with actively managed core fixed income investments can help reduce downside risk.
- Yields within active fixed income remain attractive compared to passive fixed income index alternatives. As of 9/30/25, the YTM of the Morningstar US Fund Intermediate Core Plus category was 5.32%, which was 95 basis points greater than the yield of the BBG US Agg Index of 4.37%.

#### Past performance is no guarantee of future results.

For illustrative purposes only and not reflective of the performance or portfolio composition of any Franklin Templeton fund. Money Market represented by Morningstar Money Market Category and Core Bond represented by Bloomberg US Aggregate Bond Index.

## **B** A well-diversified, active portfolio with a unique structure

Western Asset provides investors with a diversified, value-oriented, tightly controlled portfolio that seeks to exceed benchmark returns while approximating the benchmark's risk.

\*Holdings as of September 30, 2025.

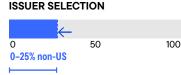

**AVG. EFFECTIVE DURATION** 

Shares of the no-fee funds may only be purchased by or on behalf of separately managed accounts by Franklin Templeton affiliates, including Western Asset. Managed account clients will pay fees to program sponsors or to their account managers, and such fees will be calculated taking into account assets invested in shares of no-fee funds. Unless reimbursed by the fund's manager or its affiliates, ordinary and extraordinary fund-level operating expenses are borne by shareholders. The manager of the no-fee funds has entered into an expense reimbursement agreement with the funds pursuant to which the manager has agreed to reimburse 100% of each fund's ordinary operating expenses through December 31, 2025. The expense reimbursement agreement does not cover brokerage, taxes and extraordinary expenses.

# Designed to deliver a core experience

**Western Asset Management** is one of the world's leading global fixed income managers. Founded in 1971, the firm is known for team management and proprietary research, supported by robust risk management and a long-term fundamental value approach.

# 4.3–7.9 years, +/-20% of the Index 0 0-2

2. Portfolio statistics and credit quality are based on a representative account within the composite. Portfolio characteristics and sector weightings of individual client portfolios in the program may differ, sometimes significantly, from those shown above. This information does not constitute, and should not be construed as, investment advice or recommendations with respect to the sectors listed and should not be used as a sole basis to make any investment decisions

#### Yield to Worst is calculated without the deduction of fees and expenses.

3. Credit quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by the following Nationally Recognized Statistical Rating Organizations ("NRSRO"): Standard and Poor's ("S&P"), Moody's Investors Service ("Moody's"), Fitch Ratings, Ltd. In the event a portfolio security is rated by more than one NRSRO, the higher rating is shown. In the case where a security is not rated by an NRSRO, these are listed as "Non Rated." The credit quality of the investments in the Portfolio does not apply to the stability or safety of the Portfolio. These ratings may change over time. The Portfolio itself has not been rated by an NRSRO.

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintempleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

Fees: Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in US dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-offee returns is reduced by a model "wrap fee" (1.5% is the maximum anticipated wrap fee for fixed income portfolios), which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs

Risks: All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Investments in underlying funds are subject to the same risks as, and indirectly bear the fees and expenses of, the underlying funds.

Effective duration is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

Separately managed accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC (FTPPG), a federally

registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: Western Asset Management Company, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee.
