**August 31, 2023:**

The following table provides estimates of the source of the Funds' distributions. These estimates are based on the Funds' fiscal year-to-date activity. The table below provides an estimate of the source of the Funds' distributions on a U.S. GAAP basis. The information is being provided pursuant to Section 19(a) of the Investment Company Act of 1940, as amended, and should not be used for tax reporting purposes. In early 2024, after definitive information is available, the Funds will send shareholders a Form 1099-DIV specifying how the distributions paid by the Funds during calendar year 2023 have been characterized for purposes of reporting the distributions on shareholders' tax returns. The Funds will also post Form(s) 8937 to the Franklin Templeton website† if all or any portion of the distributions are characterized as a tax return of capital after the close of the Funds' fiscal year-end.

<b>August 2023 Distribution*</b>			
<b>Fund</b>	<b>Per Share Distribution</b>	<b>Dividend Income</b>	<b>Return of Capital</b>
CEM	\$0.7700	56%	44%
EMO	\$0.6500	100%	-
CTR	\$0.7000	100%	-

\* Distribution character percentages also apply to year-to-date distributions.

Because the Funds are taxed as a "C" Corporation, the distributions paid by the Funds are considered to be dividend income to the extent that the distributions are paid out of the Funds' current net income or realized capital gains.
