What are the Risks?

All investments involve risks, including possible loss of principal. Historically, the fund has focused on larger companies. The fund may also invest in small, relatively new and/or unseasoned companies, which involves additional risks, as the price of these securities can be volatile, particularly over the short term. The fund may focus on particular sectors of the market from time to time, which can carry greater risks of adverse developments in such sectors. In addition, the fund may invest up to 40% of its net assets in stocks of foreign companies, which involve special risks, including currency fluctuations and economic as well as political uncertainty. These and other risks are described more fully in the fund's prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial advisor, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.
